BILLING CODE 6450–01–M

[Docket No. ERA–C&E–86–39; OFP Case No. 61060–9315–20–24]

Capitol District Energy Center Cogeneration Associates; Acceptance of Petition for Exemption and Availability of Certification

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of acceptance of petition for exemption and availability of certification from Capitol District Energy Center Cogeneration Associates.

SUMMARY: On March 24, 1986, Capitol District Energy Center Cogeneration Associates ("Petitioner"), filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent cogeneration facility ("Facility") on Aetna Life & Casualty Company's (Aetna) Capitol Avenue property in Hartford, Connecticut, from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 *et seq.*) ("FUA" or "the Act"). The facility will be located on Capitol Avenue, west of and adjacent to Aetna's Capitol Avenue office building.

Title II of FUA prohibits both the use of petroleum and natural gas as primary energy sources in any new powerplant and the construction of any such facility without the capability to use an alternate fuel as a primary energy source. Final rules setting forth criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA are found in 10 CFR Parts 500, 501, and 503. Final rules governing the cogeneration exemption were revised on June 25, 1982 (47 FR 29209, July 6, 1982), and are found at 10 CFR 503.37.

The petitioner proposes to construct a cogeneration facility on Aetna's Capitol Avenue property in Hartford, Connecticut. The project will be owned by a joint venture named Capitol District Energy Center Co-generation Associates. The facility will generate electricity to meet all of Aetna's needs, with approximately 45 MWe to be sold to Northeast Utilities (NU). The system has been designed to provide firm power to Aetna, as well as baseload steam supply to Aetna and the district heating system.

Oil and gas consumed by the facility will be less than that which would otherwise be consumed in the absence of the cogeneration facility. It is expected that more than 50 percent of the new annual electrical power produced by the facility will be sold causing the proposed facility to be classified as a new electric powerplant under FUA.

ERA has determined that the petition appears to include sufficient evidence to support an ERA determination on the exemption request and it is therefore accepted pursuant to 10 CFR 501.3. A review of the petition is provided in the SUPPLEMENTARY INFORMATION section below.

As provided for in sections 701(c) and (d) of FUA and 10 CFR 501.31 and 501.33, interested persons are invited to submit written comments in regard to this petition and any interested person may submit to written request that ERA convene a public hearing.

The public file containing a copy of the Notice of Acceptance and Availability of Certification as well as other documents and supporting materials on this proceeding are available upon request at: Department of Energy, Freedom of Information Reading Room, Room 1E–190, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, 9:00 a.m. to 4:00 p.m., except Federal holidays.

ERA will issue a final order granting or denying the petition for exemption from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless ERA extends such period. Notice of any such extension, together with a statement of reasons therefore would be published in the Federal Register.

DATES: Written comments are due on or before July 13, 1986. A request for a public hearing must be made within this same 45-day period.

ADDRESS: Fifteen copies of written comments or a request for a public hearing shall be submitted to: Case Control Unit, Office of Fuels Programs, Room GA–096, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585.

Docket No. ERA–C&E–86–39 should be printed on the outside of the envelope and the document contained therein.

FOR FURTHER INFORMATION CONTACT:

John Boyd, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA–045, Washington, DC 20585, Telephone: (202) 252–4523

Steven E. Ferguson, Esq. Office of General Counsel, Department of Energy, Forrestal Building, Room 6A–111, 100 Independence Avenue, SW., Washington, DC 20585, Telephone: (202)252–6947.

SUPPLEMENTARY INFORMATION: The facility will consist of a General Electric Model PG6531 gas turbine (hereinafter "Frame 6"), a two pressure Waste Heat Recovery Boiler (WHRB), a condensing-extraction steam turbine, three 45,000 pph package boilers and four 900 ton two stage absorption chillers. The primary fuel to the plant will be natural gas with fuel oil serving as back-up. It will produce electricity, steam and chilled water from natural gas or fuel oil. Electricity will be provided to meet all of Aetna's needs and approximately 45 MWe sold to Connecticut Light & Power, subsidiary of Northeast Utilities. Steam and chilled water, which will be generated from the gas turbine exhaust, will be sold to Energy Network Inc.'s (ENI) Capitol District Heating and Cooling (CDHC) System. Steam will also be sold to Aetna for heating their Farmington Avenue complex. The CDHC System is being developed to serve heating and cooling requirements in the Capitol area, including Aetna's office buildings, the new State of Connecticut Legislative Office Building the twin office towers of the Underwood Park Development, and other existing commercial and institutional buildings located in the Capitol Area. Cooling and heating energy will be delivered by a circulating water systems through pre-insulated underground piping. In

addition, steam will be provided to heat Aetna's Farmington Avenue complex.

The cogeneration facility is classified as an electric powerplant under FUA because more than 50 percent of its net annual electric generation will be sold.

Section 212(c) of the Act and 10 CFR 503.37 provide for a permanent cogeneration exemption from the prohibitions of Title II of FUA. In accordance with the requirements of § 503.37(a)(1), the petitioner has certified to ERA that:

1. The oil or gas to be consumed by the subject cogeneration unit will be less than that which would otherwise be consumed in the absence of the unit, pursuant to the methodology for computing such savings set forth in 10 CFR 503.37; and

2. The use of a mixture of natural gas and coal or oil and coal is not economically or technically feasible.

In accordance with the evidentiary requirements of § 503.37(c) (and in addition to the certification discussed above) the petitioner has included as part of the petition:

1. Exhibits containing the basis for the certification described above; and

2. An environmental impact analysis as required under 10 CFR 503.13.

In processing this exemption request, ERA will comply with the requirements of the National Environmental Policy Act of 1969 (NEPA); the Council on Environmental Quality's implementing regulations, 40 CFR Part 1500 *et seq.*; and DOE's guidelines implementing those regulations, published at 45 FR 20694, March 28, 1980. NEPA compliance may involve the preparation of (1) an Environmental Impact Statement (EIS); (2) an Environmental Assessment; or (3) a memorandum to the file finding that the grant of the requested exemption would not be considered a major Federal action significantly affecting the quality of the environment. If an EIS is determined to be required, ERA will publish a Notice of Intent to prepare an EIS in the Federal Register as soon as practicable. No final action will be taken on the exemption petition until ERA's NEPA compliance has been completed.

The acceptance of the petition by ERA does not constitute a determination that the petitoner is entitled to the exemption requested. That determination will be based on the entire record of this proceeding, including any comments received during the public comment period provided for this notice.

Issued in Washington, DC, May 12, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. ERA C&E-86-40; OFP Case No. 5224-8319-28-24]

Pacific Gas and Electric Co.; Acceptance of Petition for Exemption and Availability of Certification

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of acceptance of petition for exemption and availability of certification by the Pacific Gas and Electric Company.

SUMMARY: On April 21, 1986, the Pacific Gas and Electric Company (PGandE) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent cogeneration exemption for a proposed electric powerplant to be known as the San Francisco Cogeneration facility and to be located in San Francisco, California, from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 *et seq.*) ("FUA" of "the Act"). Title II of the FUA prohibits both the use of petroleum and natural gas as a primary energy source in any new powerplant and the construction of any such facility without the capability to use the alternate fuel as a primary energy source. Final rules setting forth criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA are found in 10 CFR Parts 500, 501, and 503. Final rules governing the cogeneration exemption were revised on June 25, 1982 (47 FR 29208, July 6, 1982), and are found at 10 CFR 503.37.

PGandE is requesting a permanent cogeneration exemption to construct and operate the San Francisco Cogeneration facility. The proposed facility, to be built on land immediately adjacent to PGandE's presently operating installation, will contain a gas turbine generator and an exhaust Heat Recovery Steam Generator. The facility is to be located in San Francisco, California and all power produced will be sold to PGandE's customers. The entire 32–49.9 MW of new capacity to be provided by the proposed San Francisco Cogeneration Facility is projected to displace less efficient gas and/or oil fired units at PGandE's two older powerplants.

ERA has determined that the petition appears to include sufficient evidence to support an ERA determination on the exemption request and it is therefore accepted pursuant to 10 CFR 501.3. A review of the petition is provided in the SUPPLEMENTARY INFORMATION section below.

As provided for in sections 701(c) and (d) of FUA and 10 CFR 501.31 and 501.33, interested persons are invited to submit written comments is regard to this petition and any interested person may submit a written request that ERA convene a public hearing.

The public file containing a copy of this Notice of Acceptance and Availability of Certification as well as other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW, Room 1E-190, Washington, DC 20585, from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays.

ERA will issue a final order granting or denying the petition for exemption from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless ERA extends such period. Notice of any such extension, together with a statement of reasons therefor, would be published in the Federal Register.

DATES: Written comments are due on or before July 13, 1986. A request for a public hearing must be made within this same 45-day period.

ADDRESSES: Fifteen copies of written comments or a request for a public hearing shall be submitted to: Case Control Unit, Office of Fuels Programs, Room GA-045, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585.

Docket No. ERA C&E-86-40 should be printed on the outside of the envelope and the document contained therein.

FOR FURTHER INFORMATION CONTACT:

Xavier Puslowski, Coal & Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA-045, Washington, DC 20585, Telephone (202) 252-4807;

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Forrestal Building, Room 6A-113, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202) 252-6749.

SUPPLEMENTARY INFORMATION: Section 212(c) of the Act and 10 CFR 503.37 provide for a permanent cogeneration

exemption from the prohibitions of Title II of FUA. In accordance with the requirements of § 503.37(a)(1), PGandE has certified to ERA that:

1. The oil or gas to be consumed by the cogeneration facility will be less than that which would otherwise be consumed in the absence of the proposed powerplant, where the calculation of savings is in accordance with 10 CFR § 503.37(b); and

2. The use of a mixture of petroleum or natural gas and an alternate fuel in the cogeneration facility, for which an exemption under 10 CFR 503.38 would be available, would not be economically or technically feasible.

In accordance with the evidentiary requirements of § 503.37(c) (and in addition to the certifications discussed above), PGandE has included as part of its petition:

1. Exhibits containing the basis for the certification described above; and

2. An environmental impact analysis, as required under 10 CFR 503.13.

In processing this exemption request, ERA will comply with the requirements of the National Environmental Policy Act of 1969 (NEPA); the Council on Environmental Quality's implementing regulations, 40 CFR Part 1500 *et seq.*; and DOE's guidelines implementing those regulations, published at 45 FR 20694, March 28, 1980. NEPA compliance may involve the preparation of (1) an Environmental Impact Statement (EIS); (2) and Environmental Assessment; or (3) a memorandum to the file finding that the grant of the requested exemption would not be considered a major Federal action significantly affecting the quality of the environment. If an EIS is determined to be required, ERA will publish a Notice of Intent to prepare an EIS in the **Federal Register** as soon as practicable. No final action will be taken on the exemption petition until ERA's NEPA compliance has been completed.

The acceptance of the petition by ERA does not constitute a determination that PGandE is entitled to the exemption requested. That determination will be based on the entire record of this proceeding, including any comments received during the public comment period provided for in this notice.

Issued in Washington, DC, on May 12, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 86-31-NG]

Czar Resources Inc.; Application To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Application for Blanket Authorization to Import Natural Gas from Canada for Short-Term and Spot Sales.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on April 28, 1986, of an application filed by Czar Resources Inc. (Czar Inc.) for blanket authorization to import from Canada up to 100 Bcf of natural gas per year over a two-year period beginning on the date of first delivery. Czar Inc. is a wholly-owned subsidiary of Czar Resources Ltd. (Czar Ltd.), a Canadian corporation. The gas would be supplied by Czar Ltd. and other Canadian producers and sold by Czar Inc. on a short-term or spot basis to U.S. customers that include, but are not limited to, pipelines, gas distributors, electric utilities, industrial users and agricultural end-users. Czar Inc. would act on its own behalf or as an agent on behalf of U.S. purchasers and/or Canadian suppliers. Czar Inc. asserts that no new pipeline facilities will be required to import the gas. The primary points of importation will be Eastpoint, Idaho, Sumas, Washington, and Detroit, Michigan, through the systems of Pacific Gas Transmission Company, Northwest Pipeline Corporation and Panhandle Eastern Pipeline Company, respectively.

The application was filed with the ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed no later than June 30, 1986.

FOR FURTHER INFORMATION CONTACT:

P.J. Fleming, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-4819.

Diane Stubbs, Office of General Counsel, Natural Gas and Mineral Leasing, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-6667

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076, RG-23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, 20585, (202) 252-9478. They must be filed no later than 4:30 p.m. June 30, 1986.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially

advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of the Czar Inc. application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076-A at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

Issued in Washington, DC, May 8, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 86-12061 Filed 5-28-86; 8:45 am]

BILLING CODE 6450-01-M

Office of Energy Research

Energy Research Advisory Board; Physics Review Panel; Open Meeting

Notice is hereby given of the following meeting:

Name: Physics Review Panel of the Energy Research Advisory Board (ERAB).

Date & time: June 13, 1986—8:00 a.m.–5:00 p.m.

Place: Department of Energy, 1000 Independence Avenue SW, Room 4A–110, Washington, DC 20585.

Contact: William L. Woodard, Department of Energy, Office of Energy Research, 1000 Independence Avenue, SW, Washington, DC 20585, (202) 252–5707.

Purpose of the parent board: To advise the Department of Energy (DOE) on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

Purpose of the panel: The Physics Review Panel is a subgroup of ERAB and reports to the parent Board. The Physics Review Panel will review the National Research Council's report, "Physics through the 1990's" and, in particular, assess its specific suggestions for initiatives that are recommended for the Department of Energy.

Tentative Agenda

June 13, 1986

- Administrative items.
- Briefings from Federal agencies on support for physics research programs.
- Future meeting dates.
- Public Comment (10 minute rule).

Public participation: The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact William Woodard at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes of the meeting: Available for public review and copying at the Freedom of Information Public Reading Room 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC between 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on May 22, 1986.

Charles E. Cathey,

Deputy Director, Science and Technology Affairs Staff, Office of Energy Research.

[FR Doc. 86-11982 Filed 5-28-86; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. CP86-478-000 et al.]

K N Energy, Inc., et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. K N Energy, Inc.

[Docket No. CP86-478-000]

May 20, 1986.

Take notice that on April 28, 1986, K N Energy, Inc. (K N), P.O. Box 15265, Lakewood, Colorado 80215, filed in Docket No. CP86-478-000 a request pursuant to Sections 157.205 and 157.211 of the Regulations under the Natural Gas Act (18 CFR 157.205 and 157.211) for authorization to construct and operate sales taps for the delivery of natural gas to 14 end-users under authorization issued in Docket Nos. CP83-140-000, CP83-140-001 and CP83-140-002 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

K N proposes to construct and operate 14 sales taps for irrigation, grain drying and small commercial end-users located along its jurisdictional pipeline in the States of Kansas and Nebraska. K N states that the approximate total quantity to be sold to the end-users would be 647 Mcf on a peak day and 14,320 Mcf on an annual basis. It is further stated that the estimated cost of constructing the individual sales taps would range from approximately $850 to $3,400 and that the customers would reimburse to K N a portion of these costs through the imposition of a connection charge which amounts to $250 in the State of Kansas and $400 in the State of Nebraska.

K N states that the proposed sales taps are not prohibited by any of K N's existing tariffs. K N further states that the proposed sales taps would have no significant impact on its peak day and annual deliveries. K N asserts that the natural gas delivered and sold by it to the various end-users would be priced in accordance with the currently filed rate schedules authorized by the applicable state or local regulatory body having jurisdiction.

Comment date: July 7, 1986, in accordance with Standard Paragraph G at the end of this notice.

2. ANR Pipeline Company

[Docket No. CP86-485-000]

May 22, 1986.

Take notice that on April 30, 1986, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP86-485-000 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing ANR to transport, on an interruptible basis, up to 10,000 dekatherms (dt) equivalent of natural gas per day for Texas Eastern Transmission Corporation (Tetco), with pregranted abandonment, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

ANR states that pursuant to a transportation agreement with Tetco dated March 18, 1986, Tetco would tender gas to ANR at a point of receipt on High Island Offshore System (HIOS) at the subsea valve in High Island Area Block A–530, offshore Texas. ANR states that it would then transport the volumes within its dedicated capacity in HIOS and its own facilities and deliver the volumes, adjusted for fuel, to Tetco, at an existing interconnection of the

facilities of ANR and Tetco in St. Landry Parish, Louisiana.

ANR states that it would charge Tetco 17.58 cents per dt delivered, with such charge comprised of 5.10 cents per dt for gas transported through ANR's facilities plus 12.48 cents per dt, the currently effective HIOS overrun rate. ANR further requests authority to collect the HIOS overrun rate from Tetco by including such rate in its charge to Tetco. ANR requests authorization to transport for a term of two years and for such additional term as ANR and Tetco may agree. ANR states that no facilities are required to be constructed by ANR to effect the proposed service.

Comment date: June 13, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. High Island Offshore System

[Docket No. CP86-484-000]

May 22, 1986.

Take notice that on April 30, 1986, High Island Offshore System (HIOS), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP86-484-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline facilities in the offshore Texas area, all as more fully set forth in the application which is on file and open to public inspection.

HIOS proposes to construct and operate approximately 1.5 miles of 30-inch pipeline and appurtenant facilities which would constitute an extension of the existing West Leg of HIOS. It is stated that the proposed facilities would extend due south from the present terminus of the West Leg of HIOS in High Island Area A-582, offshore Texas. It is further stated that such facilities would not increase the capacity of the HIOS system but would permit HIOS to attach new reserves which are currently being developed in the East Breaks area, offshore Texas, and reserves in various other blocks in the vicinity which are expected to be developed.

It is explained that the facilities are proposed to be constructed and ready for service on or about November 1, 1986.

HIOS estimates that the cost of the proposed facilities would be approximately $3,500,000, of which approximately $1,000,000 would be contributed by producers. Such facilities it is asserted would be financed from cash on hand.

It is noted that ANR Pipeline Company has filed an application in Docket No. CP86-483-000 to transport gas for Standard Oil Production Company which would be produced in East Breaks area Block 185, offshore Texas. Such gas, it is indicated, would be transported, in part, through the facilities proposed in Docket No. CP86-484-000.

Comment date: June 13, 1986, in accordance with Standard Paragraph F at the end of this notice.

4. Panhandle Eastern Pipe Line Company

[Docket No. CP86-481-000]

May 22, 1986.

Take notice that on April 29, 1986, Panhandle Eastern Pipe Line Company (Panhandle), 3000 Bissonnet, Houston, Texas 77251-1642, filed in Docket No. CP86-481-000 an application for permission and approval to abandon its Montezuma-South Alta storage field located in Vermillion County, Indiana, all as more fully set forth in the application on file with the Commission and open to public inspection.

Panhandle states that the underground reservoir is producing an unusually high level of hydrogen sulfide which has caused significant corrosion in withdrawal wells, gathering lines and other plant facilities and that immediate expenditures of $800,000 would be required for repairs caused by such corrosion. Panhandle indicates that even if repairs were made, working storage capacity would only be 800,000 Mcf, down 1.0 Bcf from the authorized level of 1.8 Bcf, and that the daily withdrawal rate would be 10,000 Mcf. Panhandle states that the corrosion problems are expected to continue due to the high hydrogen sulfide level and the limited working storage capacity of the field does not justify the continued high operating cost associated with the field. Therefore, Panhandle states that it is more economical to abandon, rather than operate, the Montezuma-South Alta storage field.

Panhandle estimates that approximately 740,000 Mcf of gas, valued at $280,000, would not be economically recoverable and that all recoverable gas would be withdrawn by the end of 1987. The estimated cost of plugging and abandoning storage wells and removal of equipment, net of salvage, is $515,000 it is stated.

Panhandle states that the abandonment of the Montezuma-South Alta storage field would reduce its system working storage capacity by only 1.0 percent and upon such abandonment, Panhandle would have on its system 193 Bcf and 74 Bcf of storage capacity and working storage capacity, respectively.

Comment date: June 13, 1986, in accordance with Standard Paragraph F at the end of this notice.

5. Texas Eastern Transmission Corporation, United Gas Pipe Line Company

[Docket No. CP86-229-001]

May 22, 1986.

Take notice that on May 7, 1986, Texas Eastern Transmission Corporation (Texas Eastern), P.O. Box 2521, Houston, Texas, 77252, and United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP86-229-001 a joint petition to amend the order issued March 28, 1986, in Docket No. CP86-229-000 pursuant to Section 7 of the Nautral Gas Act so as to authorize the construction and operation of interconnecting facilities between their systems, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is explained that Texas Eastern and United have received authorization in Docket No. CP86-229-000 to exchange up to 275,000 dt equivalent of natural gas per day. In order to facilitate this exchange Texas Eastern and United propose to construct and operate interconnecting facilities near Loggy Bayou in Red River Parish, Louisiana, and near Raceland in LaFourche Parish, Louisiana.

Specifically, Texas Eastern proposes to construct and operate an interconnection between its facilities and those of United near Loggy Bayou at an estimated cost of $660,000. United proposes to construct and operate an interconnection between its facilities and those of Texas Eastern near Raceland at an estimated cost of $507,300.

Comment date: June 13, 1986, in accordance with the first subparagraph of Standard paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the

appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiciton conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Office of Hearings and Appeals

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of Implementation of Special Refund Procedures.

SUMMARY: the Office of Hearings and Appeals of the Department of Energy announces the procedures for disbursement of $50,174 (plus accrued interest) obtained as a result of a Consent Order which the DOE entered into with E. B. Lynn Oil Company of Allentown, Pennsylvania (Case No. HEF-0064). The fund will be available to customers who purchased motor gasoline from Lynn during the consent order period.

DATE AND ADDRESS: Applications for refund of a portion of the consent order fund must be filed no later than 90 days after publication of this notice in the **Federal Register** and should be addressed to: Lynn Consent Order Refund Proceeding, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585. All applications should conspicuously display a reference to Case No. HEF-0064.

FOR FURTHER INFORMATION CONTACT: Richard W. Dugan, Associate Director, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252-2800.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(c) of the procedural regulations of the Department of Energy, 10 CFR 205.282(c), notice is hereby given of the issuance of the Decision and Order set out below. The Decision and Order relates to a Consent Order entered into by E. B. Lynn Oil Company of Allentown, Pennsylvania. The Consent Order settled possible pricing violations with respect to the firm's sales of motor gasoline to customers during the May 1, 1979 through April 30, 1980 consent order period.

The Office of Hearings and Appeals previously issued a Proposed Decision and Order which tentatively established a two-stage refund procedure and solicited comments from interested parties concerning the proper disposition of the consent order fund. The Proposed Decision and Order discussing the distribution of the consent order funds was issued on November 1, 1985. 50 FR 46344 (November 7, 1985).

As the Decision and Order indicates, applications for refunds from the consent order fund may now be filed. Applications will be accepted provided they are postmarked no later than 90 days after publication of this Decision and Order in the **Federal Register**. Applications will be accepted from reseller customers who purchased motor gasoline from Lynn during the consent order period. The specific information required in an application for refund is set forth in the Decision and Order. The Decision and Order reserves the question of the proper distribution of any remaining consent order funds until the first-stage claims procedure is completed.

Dated: May 13, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Decision and Order of the Department of Energy

Special Refund Procedures

May 13, 1986.

Name of Firm: E. B. Lynn Oil Company
Date of Filing: October 13, 1983
Case Number: HEF-0064

In accordance with the procedural regulations of the Department of Energy (DOE), 10 C.F.R. Part 205, Subpart V, the Economic Regulatory Administration (ERA) of the DOE filed a Petition for the Implementation of Special Refund Procedures with the Office of Hearings and Appeals (OHA) on October 13, 1983. The petition requests that the OHA formulate and implement procedures for the distribution of funds received pursuant to a Consent Order entered into by the DOE and E. B. Lynn Oil Company (Lynn) of Allentown, Pennsylvania.

I. Background

Lynn sells motor gasoline to other motor gasoline marketers (resellers and retailers) and in bulk to certain end-users. Lynn was therefore a "reseller-retailer" subject to the Mandatory Petroleum Price Regulations set forth at 10 CFR Part 212, Subpart F. An ERA audit of Lynn's business transactions during the period May 1, 1979 through April 30, 1980 (the audit period) revealed possible overcharges totalling $121,279.32 in sales of motor gasoline to Lynn's five classes of purchaser. Subsequently, Lynn entered into a Consent Order with the DOE on September 20, 1981 in order to settle all disputes and claims between Lynn and the DOE regarding Lynn's compliance with the DOE price regulations in sales of motor gasoline during the audit period (hereinafter referred to as the consent order period). The Consent Order refers to the ERA's allegations of overcharges, but notes that no formal findings of violation were made. Additionally, the Consent Order states that Lynn does not admit it committed any such violations.

In the Consent Order, Lynn agreed to refund $11,182 directly to members of its two end-user classes of purchaser and remit $42,063 to the DOE for deposit in an interest-bearing escrow account.

This Decision and Order concerns the distribution of the funds that were deposited in the escrow account, plus accrued interest.[1]

On November 1, 1985, the OHA issued a Proposed Decision and Order (PD&O) setting forth a tentative plan for the distribution of the consent order fund. 50 FR 46344 (November 7, 1985). We stated in the PD&O that the basic purpose of a special refund proceeding is to make restitution for injuries that were suffered as a result of alleged or adjudicated violations of the DOE regulations. In order to effect restitution in this proceeding, we proposed to establish a claims procedure whereby applications for refund would be accepted from customers who can demonstrate that they were injured as a result of Lynn's pricing practices during the consent order period. A copy of the PD&O was published in the Federal Register on November 7, 1985, and comments were solicited regarding the proposed refund procedures. We have received no comments regarding those procedures.

II. Jurisdiction and Authority

The procedural regulations of the DOE set forth general guidelines by which the OHA may formulate and implement a plan of distribution for funds received as a result of an enforcement proceeding. 10 CFR Part 205, Subpart V. The DOE policy is to use the Subpart V process in order to distribute such funds. For a more detailed discussion of Subpart V and the authority of the OHA to fashion procedures to distribute refunds obtained as part of settlement agreements, *see Office of Enforcement*, 9 DOE ¶ 82,553 (1982); *Office of Enforcement*, 9 DOE ¶ 82,508 (1981); *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (*Vickers*). As we stated in the PD&O, we have reviewed the record in the present case and have determined that a Subpart V proceeding is an appropriate mechanism for distributing the Lynn consent order fund. We will therefore grant the ERA's petition and assume jurisdiction over this fund.

III. Refund Procedures

Since we have not received any adverse comments regarding our proposed refund procedures, we have determined that those procedures should be adopted.

The distribution of refunds will take place in two stages. In the first stage, refund monies will be refunded to customers who purchased Lynn motor gasoline during the consent order period and who demonstrate that they were injured by Lynn's pricing practices. Such purchasers must file claims and document their purchases in order to be eligible for a portion of the consent order fund.

After meritorious claims are paid in the first stage, a second stage may become necessary to distribute any remaining funds. *See generally Office of Special Counsel*, 10 DOE ¶ 85,048 (1982) (*Amoco*). However, we will not discuss second stage refund procedures in this Decision and Order.

A. Refund Claimants

As indicated earlier, Lynn's end-user customers received direct refunds from Lynn pursuant to the Consent Order. They will therefore not be eligible for refunds in this proceeding. Claimants in the Lynn refund proceeding will belong to one of the three classes of purchaser which did not receive refunds directly from Lynn, i.e., resellers (including retailers) of Lynn motor gasoline in Lynn's classes of purchaser 1, 3, or 4.

These three classes are described in the ERA audit file as follows:

Class 1: Large volume reseller which purchased trailer loads of Lynn motor gasoline.

Class 3: Retail gasoline station which received shipments of over 7,000 gallons per month from Lynn.

Class 4: Retail gasoline station which received shipments of less than 7,000 gallons per month from Lynn.

The ERA audit file identifies customers in each of the three classes, but does not list customer-specific overcharge amounts.[2] These customers are listed by class in Appendix B to this Decision and Order. We recognize, however, that there may be other resellers who purchased motor gasoline from Lynn and who may have been injured by Lynn's pricing practices during the consent order period. As proposed, we will accept applications for refund from reseller customers not listed in Appendix B, provided they can prove that they were injured by Lynn's alleged pricing violations.

B. Showing of Injury

To demonstrate injury, a reseller claimant must provide evidence that it would have maintained its prices for the motor gasoline purchased from Lynn at the same level had the alleged overcharges not occurred. Accordingly, any reseller of Lynn motor gasoline should show that at the time it purchased motor gasoline from Lynn, market conditions would not permit it to increase its prices to pass through the additional costs associated with the alleged overcharges. *Office of Enforcement*, 10 DOE ¶ 85,050 (1983); *Office of Enforcement*, 10 DOE ¶ 85,020 (1982). In addition, a reseller must show that it had "banks" of unrecovered increased product costs in order to demonstrate that it did not subsequently recover these costs by increasing its prices.[3] As we noted in the PD&O, however, the maintenance of a bank will not automatically establish injury. *See Tenneco Oil Co./Chevron U.S.A., Inc.*, 10 DOE ¶ 85,014 (1982).

The presumptions proposed in the PD&O are being adopted here and will enable the OHA to consider the refund applications in the most efficient way possible in view of the limited resources available. *See* 10 CFR 205.282(e).

1. Applicants Claiming a Refund of $5,000 or Less

Making a detailed showing of injury may be too complicated and burdensome for resellers who purchased relatively small amounts of motor gasoline from Lynn. For example, such firms may have limited accounting and data-retrieval capabilities and may therefore be unable to produce the records necessary to prove that they did not pass on the alleged overcharges to their own customers. The cost to the applicant and to the government of compiling and analyzing information sufficient to make a detailed showing of injury should also not exceed the amount of the refund to be gained. We will therefore adopt a small claims presumption in this case. *See, e.g., Aztex Energy Co.*, 12 DOE ¶ 85,116 (1984); *Marion Corpe*, 12 DOE ¶ 85,014 (1984) (*Marion*). Any reseller applicant claiming a refund of $5,000 or less, based upon the volumetric refund amounts in this proceeding, need not make a detailed showing of injury in order to be eligible to receive a refund.[4]

---

[1] Lynn remitted a total of $80,174 of the DOE. This amount includes interest on Lynn's installment payments of the consent order amount to the DOE.

[2] In two instances, the same firm appears as a customer in one of Lynn's end-user classes and in one of its reseller classes. These two customers, as well as any other customer who is a member of both an end-user class and a reseller class, will be eligible to apply for refunds only on the basis of those volumes which they purchased from Lynn and resold.

[3] Retailer applicants will not be required to submit bank information in connection with sales made after July 15, 1979, the date on which the amendment to the price rule eliminating the banking requirement for retailers became effective. 44 FR 42541 (July 19, 1979).

[4] As in prior refund cases, resellers whose calculated refund exceeds the threshold amount may elect to apply for a refund of $5,000 without being required to make a detailed demonstration of injury.

2. Spot Purchasers

We further adopt our proposal that resellers that made spot purchases from Lynn be ineligible to receive a refund, even a refund below the threshold level, unless they can make a showing that rebuts the presumption that they were not injured. Spot purchasers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot purchases unless they were able to pass through the full amount of the alleged overcharges to their own customers. *See Vickers*, 8 DOE at 85,396–97. Accordingly, any reseller claimant who was a spot purchaser must submit evidence to rebut the spot purchaser presumption and establish the extent to which it was injured as a result of its spot purchase(s).

C. Calculation of Refund Amounts

We will use a volumetric method to divide the consent order fund among successful applicants. This method generally presumes that the alleged overcharges were spread equally over all the gallons of the consent order product(s) sold by a consent order firm. *See e.g., Vickers*. Moreover, we will use the information contained in the ERA audit file to fashion a refund plan which corresponds more closely to the injuries experienced than would a plan based solely on a volumetric approach. *See e.g., Marion* (applicant could choose between volumetric refund and pro rata share of alleged overcharges). In the present case, we will presume that the effects of the alleged overcharges were dispersed equally within each individual reseller class of Lynn customers, and not equally over all sales to all customers. *See e.g., Blex Oil, Inc.*, 13 DOE ¶ 85,019 (1985) (*Blex*). The ERA audit file in the present case indicates that there is a marked difference in the amount of the per gallon overcharge allegedly experienced by each of the three classes. Therefore, in order to distribute the refund monies to firms in a manner which more closely approximates their actual injury, we will grant refunds to claimants in the three classes of customer based on three different volumetric refund amounts. *See e.g., Collins Oil Co.*, 13 DOE ¶ 85,077 at 88,213 n.7 (1985), and *Eugene Endicott*, 13 DOE ¶ 85,086 at 88,233 n.9 (1985) (combination of pro rata share of alleged overcharges and volumetric presumption for certain classes of purchaser). *See also Blex*. The volumetric refund amount is calculated by dividing the consent order settlement amount attributable to each class of purchaser by the gallonage of motor gasoline sold by Lynn to that class during the consent order period.[5] The per gallon volumetric refund amounts, exclusive of interest, are set forth in Appendix A.[6] An eligible claimant's refund will be calculated by multiplying the appropriate volumetric refund amount by the number of gallons of motor gasoline the claimant purchased from Lynn during the consent order period.[7] In addition, the interest which has accrued on the money in the Lynn escrow account will be added to the refund of each successful claimant in proportion to the size of its refund.

As in previous cases, we propose to establish a minimum refund amount of $15.00 for first stage claims. We have found through our experience in prior refund cases that the costs of processing claims in which refunds are sought for amounts less than $15.00 outweighs the benefits of restitution in those situations. *See, e.g., Uban Oil Co.*, 9 DOE ¶ 82,541 at 85,225 (1985).

IV. Application for Refund Procedures

We have determined that the procedures described in the PD&O are the most equitable and efficacious means of distributing the Lynn consent order fund. Acccordingly, we shall now accept applications for refund from eligible customers who purchased Lynn motor gasoline during the consent order period. There is no official application form. Applications for Refund should be written or typed on business letterhead or personal stationery. The following information should be included in all Applications for Refund:

1. The name of the consent order firm: E.B. Lynn Oil Company, the case number: HEF–0064, and the applicant's name should be prominently displayed on the first page.

2. The name, position title, and telephone number of a person who may be contacted by us for additional information concerning the Application.

3. The manner in which the applicant used the Lynn motor gasoline, i.e., whether it was a reseller or end-user.

4. The volume of Lynn motor gasoline that the applicant purchased in each month of the period of time for which it is claiming it was injured by the alleged overcharges.

5. If the applicant is a reseller who wishes to claim a refund in excess of $5,000, it should also:

(a) State whether it maintained banks of unrecouped product cost increases and furnish the OHA with quarterly bank calculations from the month in which purchases were first made until the termination of banking regulations (July 15, 1979 for retailers; April 30, 1980 for resellers and retailer-resellers).

(b) Submit evidence to establish that it did not pass through the alleged overcharges to its customers. For example, a firm may compare the prices it paid for Lynn motor gasoline with the prices paid for that product by its competitors to show that price increases to recover alleged overchanges were infeasible.

6. A statement of whether the applicant was in any way affiliated with Lynn. If so, the applicant should state the nature of the affiliation.

7. A statement of whether there has been any change in ownership of the entity that purchased the motor gasoline from Lynn since the end of the consent order period. If so, the name and address of the current (or former) owner should be provided.

8. A statement of whether the applicant is or has been involved as a party in any DOE or private section 210 enforcement actions. If these actions have been terminated, the applicant should furnish a copy of any final order issued in the matter. If the action is ongoing, the applicant should describe the action and its current status. The applicant is under a continuing obligation to keep the OHA informed of any change in status during the pendency of its Application for Refund. *See* 10 CFR 205.9(d).

9. The following signed statement:

I swear (or affirm) that the information submitted is true and accurate to the best of my knowledge and belief.

All Applications for Refund must be filed in duplicate and must be received within 90 days after publication of this Decision and Order in the Federal Register. A copy of each Application will be available for public inspection in the Public Reference Room of the Office of Hearings and Appeals, Forrestal Building, Room 1E–234, 1000 Independence Avenue, SW.,

---

[5] The consent order settlement amount for each class of purchaser represents a share of the total consent order fund that is proportional to the share of the total alleged overcharges experienced by that class.

[6] We recognize that the impact on an individual purchaser could have been greater than the applicable volumetric refund amount, and we will allow any purchaser to file a refund application based on a claim that it suffered a disproportionate injury as a result of Lynn's pricing practices. *See, e.g., Amtel, Inc.*, 12 DOE ¶ 85,073 at 88,233–34 (1984); *Sid Richardson Carbon & Gasoline Co. and Richardson Products Co./Siouxland Propane Co.*, 12 DOE ¶ 85,054 at 88,184 (1984) and cases cited therein.

[7] One Lynn customer, Airport Garage, was listed as being in two reseller classes of customer. In determining the total refund for which it may be eligible, we will multiply the amount of motor gasoline it purchases as a member of each class by the appropriate volumetric refund amount for that class.

Washington, D.C. Any applicant that believes that its Application contains confidential information must so indicate on the first page of its Application and submit two additional copies of its Application from which the material alleged to be confidential has been deleted, together with a statement specifying why the information is alleged to be privileged or confidential.

All Applications should be sent to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585.

It Is Therefore Ordered That:

(1) Applications for Refund from the funds remitted to the Department of Energy by E.B. Lynn Oil Company pursuant to the Consent Order executed on September 20, 1981 may now be filed.

(2) All Applications must be filed no later than 90 days after publication of this Decision and Order in the Federal Register.

Dated: May 13, 1986

George B. Breznay,

Director, Office of Hearings and Appeals.

BILLING CODE 6450-01-M

Issuance of Decisions and Orders; Week of March 31 through April 4, 1986

During the week of March 31 through April 4, 1986, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeal

Beco Corporation, 04/02/86; KEA-0021

BECO Corporation filed an Appeal from a denial by the Manager, Idaho Operations Office of a request for information which the company had submitted pursuant to the Freedom of Information Act. The company had sought access to responses to a cancelled Request for Proposal (RFP), which was subsequently reissued. In considering the Appeal, the DOE found that the reissued RFP was substantially similar to the prior RFP. The DOE determined that the responses could be used by competitors to the detriment of the original submitters. The DOE therefore determined that the proposals were properly withheld prior to the time of selection of a winning proposal pursuant to 5 U.S.C. 552(b)(4). Accordingly, the Appeal was denied.

Requests for Exception

Otis Ainsworth, 04/04/86; HEE-0066

Otis Ainsworth filed an Application for Exception in which he sought to be relieved of his obligation to make restitution under the terms of a Remedial Order. In considering the request, the DOE found that (i) the doctrine of laches was applicable to exception proceedings, (ii) Ainsworth's delay in applying for relief was not excusable, and (iii) the delay resulted in prejudice to the DOE and third parties. Accordingly, exception relief was denied.

Bernard Schafer Petroleum, 03/31/86; HEE-0132

Bernard Schafer Petroleum filed an Application for Exception from the requirement to file Form EIA-782B, entitled "Resellers'/Retailers' Monthly Petroleum Product Sales Report." In evaluating the request, the DOE found that the 12 hours per month that the firm needed to complete the form placed a disproportionate burden on Schafer. Accordingly, the DOE granted the Application for Exception, permitting Schafer to file the form using estimated data.

Implementation of Special Refund Procedures

Fine Petroleum Company, 04/04/86; HEF-0072

The Office of Hearings and Appeals issued a final Decision and Order establishing special refund procedures for the distribution of $25,000, plus interest, obtained as a result of a consent order entered into by the DOE and Fine Petroleum Company. Under these procedures, the funds will be distributed to customers who purchased refined petroleum products from Fine during the period November 1, 1973 through February 29, 1976 and who establish that they were injured as a result of Fine's pricing practices. The Decision stated, however, that end-users and resellers requesting refunds of $5,000 or less will not be required to make a detailed showing of injury. Successful applicants will generally receive refunds proportionate to the volumes of petroleum products that they purchased from Fine during the consent order period.

U.S.A. Petroleum, 04/04/86; HEF-0500

The DOE issued a Decision and Order implementing a plan for the distribution of $1,750,000 plus interest, received as a result of a consent order with U.S.A. Petroleum. The DOE first decided that a portion of the fund related to U.S.A.'s participation in the Crude Oil Entitlements Program should be set aside for distribution pursuant to DOE policy. The DOE determined that the remaining portion of the settlement fund, $962,500, should be distributed to customers who were injured as a result of purchases of petroleum products from U.S.A. Petroleum during the period August 1973 through January 1981. The Decision stated, however, that end-users and resellers requesting refunds of $5,000 or less would not be required to make a detailed showing of injury. The DOE provided that successful applicants would generally receive refunds proportionate to the volumes of U.S.A.'s refined products that they purchased.

BEST COPY AVAILABLE

Wellen Oil, Inc., 04/03/86; HEF-0004

The Office of Hearings and Appeals issued a final Decision and Order establishing special refund procedures for the distribution of $69,219.58 plus interest, obtained as a result of a Consent Order entered into by the DOE and Wellen Oil, Inc. Under these procedures, the funds will be distributed to customers who purchased petroleum products from Wellen during the period September 1, 1973 through December 31, 1973, and who establish that they were injured as a result of Wellen's pricing practices. The Decision states, however, that end-users or resellers requesting refunds of $5,000 or less will not be required to make a detailed showing of injury. Successful applicants will receive refunds proportionate to the volumes of petroleum products they purchased from Wellen during the consent order period.

Refund Applications

Appalachian Flying Service/Pendley Constructors, Inc., et al., 04/01/86; RF224-1, ET AL.

The DOE issued a Decision and Order concerning Applications for Refund filed by six end-users of aviation fuel and aviation gasoline purchased from Appalachian Flying Service. In accordance with the Procedures established in the Appalachian Special Refund Proceeding, the DOE determined that each applicant should receive a refund based on the volumes of aviation fuel and aviation gasoline it purchased from Appalachian during the consent order period. The total amount of refunds approved in this Decision is $2,700 ($2,402 principal plus $298 interest).

Earth Resources Company/Defense Logistics Agency, 03/31/86; RF239-3

The DOE issued a Decision and Order concerning an Application for Refund filed by the Defense Logistics Agency (DLA), an ultimate consumer of Earth Resources Company petroleum products. The DLA applied for a refund based on the procedures outlined in *Earth Resources Co.*, 13 DOE ¶85,304 (1986), governing the disbursement of settlement funds received from Earth Resources pursuant to a 1981 consent order. Those procedures specified that DLA was eligible to file for a refund equal to the amount of credit payments due DLA under the terms of the consent order, but never paid to the firm by Earth Resources. The DOE concluded that DLA should receive a total refund of $2,225,586, consisting of the consent order credit payments of $1,540,632 and $684,954 in accrued interest.

F.O. Fletcher, Inc./Franklin Oil Company, 04/01/86; RF172-52

The DOE issued a Decision and Order concerning an Application for Refund filed by Franklin Oil Company in connection with a consent order fund made available by F.O. Fletcher, Inc. Franklin, a reseller of diesel fuel, provided evidence that it purchased diesel fuel from Fletcher during the consent order period, but was unable to make an adequate showing of injury to merit a refund over the $5,000 small claims threshold established in the Fletcher Special Refund Proceeding. Accordingly, the DOE granted Franklin a refund of $5,000. The total refund amount approved in this Decision is $9,598 ($5,000 in principal plus $4,598 in interest).

F.O. Fletcher, Inc./McCall Oil and Chemical Corporation, 03/31/86; RF172-36

The DOE issued a Decision and Order concerning an Application for Refund filed by McCall Oil and Chemical Corporation, in connection with a consent order fund made available by F.O. Fletcher, Inc. McCall, a retailer of No. 2 heating oil and kerosene, provided evidence that it purchased these products from Fletcher during the consent order period, but was unable to make an adequate showing of injury to merit a refund over the $5,000 small claims threshold established in the Fletcher Special Refund Proceeding. Accordingly, the DOE granted McCall a refund of $5,000. The total refund amount approved in this Decision is $9,598 ($5,000 in principal plus $4,598 in interest).

Gulf Oil Corporation Finley's Gulf, et al., 03/31/86; RF40-00308, et al.

The DOE issued a Decision and Order concerning nine Applications for Refund filed by retailers that were direct purchasers of Gulf Oil Corporation petroleum products. Each firm applied for a refund based on the procedures outlined in *Gulf Oil Corp.*, 12 DOE ¶85,048 (1984), governing the disbursement of settlement funds received from Gulf pursuant to a 1978 consent order. In accordance with those procedures, each applicant demonstrated that it would not have been required to pass through to customers a cost reduction equal to the refund claimed. The DOE concluded that they should receive a total refund of $16,204, consisting of $13,634 in principal and $2,570 in interest.

Gulf Oil Corporation/Rollins Gulf Station, Inc., 04/01/86 RF40-1186

The DOE issued a Decision concerning an Application for Refund from the Gulf Oil Corporation escrow account filed by Rollins Gulf Station, Inc. The DOE cited the requirement that Gulf refund applicants demonstrate that they would not have been required to pass through to their customers a cost reduction equal to the refund claimed. The DOE then found that the firm had negative cost banks during the period November 1, 1973 through January 31, 1976, and higher profit margins in August through October 1973 than during the May 1973 base period. The DOE therefore concluded that the firm suffered no injury during the consent order period and would be required to pass through any refund to its customers. Accordingly, Rollins' refund application was denied.

Gulf Oil Corporation/State of Connecticut, 04/04/86; RF40-3119

The DOE issued a Decision and Order concerning an Application for Refund filed by the State of Connecticut in connection with a consent order fund made available by Gulf Oil Corporation. The State, and end-user of Gulf petroleum products, purchased the products directly from Gulf. Pursuant to procedures outlined in *Gulf Oil Corp.*, 12 DOE ¶ 85,048 (1984), the State submitted evidence showing that it purchased 188,200 gallons of Gulf product. The DOE concluded that the State should therefore receive a total of $226 ($190 in principal plus $36 in interest).

Gulf Oil Corporation/State of Tennessee, 04/01/86; RF40-3132

The DOE issued a Decision and Order granting an additional refund to the State of Tennessee in the Gulf Oil Corporation special refund proceeding, based on 1,285,072 gallons of Gulf product that were not included in the calculation of the State's original refund. The additional refund totaled $1,884, representing $1,588 in principal and $296 in interest.

Gulf Oil Corporation/The Cincinnati Vulcan Oil Co., et al., 04/01/86; RF40-534, et al.

The DOE issued a Decision and Order concerning eight Applications for Refund filed on the basis of the procedures set forth in *Gulf Oil Corp.*, 12 DOE ¶ 85,048 (1984). In accordance with these procedures, the applicants, all direct purchasers of Gulf motor gasoline, demonstrated that they would not have been required to pass through to customers a cost reduction equal to the refund claimed. The DOE concluded that the applicants should receive refunds of the full volumetric amount. The refunds granted in this decision totaled $139,451.03 ($117,737.20 in principal and $21,713.83 in interest).

Inland U.S.A., Inc./Midwest Petroleum Company, 04-04-86; RF176-16

The DOE issued a Decision and Order concerning an Application for Refund filed by Midwest Petroleum Company, in connection with a consent order fund made available by Inland U.S.A., Inc. Midwest, a reseller of motor gasoline, provided evidence that it purchased motor galoline from Inland during the consent order period and was injured by the alleged Inland overcharges. Accordingly, the DOE granted Midwest a refund based on the full amount allocable to the firm under the procedures set forth in the Inland Special Refund Proceeding. The total refund amount approved in this Decision is $75,697 ($52,040 in principal plus $23,657 in interest).

Inland U.S.A., Inc./Sieveking Company, Inc., et al., 04-04-86; RF176-14, et al.

The DOE issued a Decision and Order concerning three Applications for Refund filed in connection with a consent order fund made available by Inland U.S.A., Inc. Each applicant was a reseller that provided evidence that it purchased motor gasoline from Inland during the consent order period, but none was able to make an adequate showing of injury to merit a refund over the $5,000 small claims threshold. Accordingly, the DOE granted each applicant a refund of $5,000. The total amount of refunds approved in this Decision is $21,819 ($15,000 in principal plus $6,819 in interest).

Leese Oil Company/Mitchell Construction Company, 04-04-86; RF211-10

The DOE issued a Decision and Order concerning an Application for Refund filed by Mitchell Construction Company, in connection with a consent order fund made available by Leese Oil Company. In accordance with the procedures established in the Leese Special Refund Proceeding, the DOE determined that Mitchell, an end-user of Leese motor gasoline, should receive a refund based on the full volume of motor gasoline it purchased from Leese during the consent order period. The total refund amount approved in this Decision is $433 ($268 in principal plus $65 in interest).

BEST COPY AVAILABLE

Little America Refining Company/Service Oil Company, Mountain States Petroleum Corporation, 04-04-86; RF112-69, RF112-179

The DOE issued a Decision and Order granting refunds from the Little America Refining Company deposit escrow account to Service Oil Company and Mountain States Petroleum Corporation, two purchasers of Larco petroleum products. Both of the applicants submitted claims for less than the $5,000 small claims threshold, and were therefore not required to submit additional evidence of injury. The refunds to these firms totaled $5,455, representing $3,649 in principal and $1,806 in interest.

Placid Refining Company, et al., 03/31/86; RF171-32, et al.

The DOE issued an order directing immediate payment of claims filed by ten recipients of exception relief from the Crude Oil Entitlements Program. Funds sufficient to pay those claims had previously been segregated into interest-bearing escrow accounts, pending resolution of related litigation. The order directed the disbursement of a total of $28,393,974 plus interest to the ten firms.

Saber Energy, Inc./Land O' Lakes, Inc., et al., 04/03/86; RF192-2, et al.

The DOE issued a Decision and Order concerning six Applications for Refund filed by resellers and end-users of Saber refined petroleum and natural gas liquid products. All of the claimants applied for refunds based on the procedures outlined in *Saber Energy, Inc.*, 13 DOE ¶ 85,134 (1985). The applicants elected to limit their claims to the $5,000 presumption amount. After disallowing portions of those claims based on purchases of products that had been decontrolled prior to the date of purchase, the DOE granted refunds totaling $60,943, including $47,976 in principal and $12,967 in interest.

Dismissals

The following submissions were dismissed:

Name and Case No.
Don's Sinclair RF112-69
G. & L. Oil Company RF143-5

Copies of the full text of these decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published lose leaf reporter system.

BILLING CODE 6450-01-M

Implementation of Special Refund Procedures; Farstad Oil Co.

AGENCY: Office of Hearings and Appeals.

ACTION: Notice of implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding to adversely affected parties $67,623.34 obtained as a result of a consent order which the DOE entered into with Farstad Oil Company, a reseller-retailer of petroleum products located in Minot, North Dakota. The money is being held in escrow following the settlement of enforcement proceedings brought by the DOE's Economic Regulatory Administration.

DATE AND ADDRESS: Comments must be filed within 20 days of publication of this notice in the Federal Register and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. All comments should conspicuously display a reference to case number HEF-0567.

FOR FURTHER INFORMATION CONTACT: Walter J. Marullo, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585 (202) 252-6602.

SUPPLEMENTARY INFORMATION: In Accordance with § 205.282(b) of the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision sets forth procedures and standards that the DOE has tentatively formulated to distribute to adversely affected parties $67,623.34 plus accrued interest obtained by the DOE under the terms of a consent order entered into with Farstad Oil Company (Farstad). The funds were provided to the DOE by Farstad to settle all claims and disputes between the firm and the DOE regarding the manner in which the firm applied the federal price regulations with respect to its sales of motor gasoline and No. 1 and No. 2 diesel fuel during the period November 1, 1973, through April 30, 1974.

OHA proposes that a two-stage refund process be followed. In the first stage, OHA has tentatively determined that a portion of the consent order funds should be distributed to firms and individuals that purchased Farstad motor gasoline and No. 1 and No. 2 diesel fuel during the consent order period, provided that they have not already received a direct refund from the firm. In order to obtain a refund, each claimant will be required to submit a schedule of its monthly purchases of Farstad motor gasoline and No. 1 and No 2 diesel fuel and to demonstrate that it was injured by Farstad's pricing practices. The specific requirements for providing injury are set forth in the following Proposed Decision and Order. Applications for Refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Some residual funds may remain after all meritorious first-Stage claims have been satisfied. OHA invites interested parties to submit their views concerning alternative methods of distributing any remaining funds in a subsequent proceeding.

Any member of the public may submit written comments regarding the proposed refund procedures. Such parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice. All comments received in this proceeding will be available for public inspection between 1:00 and 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E-234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: May 20, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order of The Department of Energy—Implementation of Special Refund Procedures

May 20, 1986

Name of Firm: Farstad Oil Company
Date of Filing: March 6, 1986
Case Number: HEF 0567

Under the procedural regulations of the department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special procedures to distribute funds received as a result of an enforcement proceeding in order to remedy the effects of actual or alleged violations of the DOE regulations. *See* 10 CFR Part 205, Subpart V. On March 6, 1986, ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a consent order entered into with Farstad Oil Company (Farstad).

I. Background

Farstad is a "reseller-retailer" of refined petroleum products as that term was defined in 10 CFR 212.31 and is located in Minot, North Dakota. A DOE audit of Farstad's records revealed possible violations of the Mandatory Petroleum Price Regulations. 10 CFR Part 212, Subpart F. The audit alleged

that between November 1, 1973, and April 30, 1974, Farstad committed possible pricing violations in its sales of motor gasoline and No 1 and No. 2 diesel fuel.

In order to settle all claims and disputes between Farstad and the DOE regarding the firm's sales of motor gasoline and No. 1 and No. 2 diesel fuel during the period covered by the audit, Farstad and the DOE entered into a consent order on September 1, 1981. The consent order refers to ERA's allegations of overcharges, but notes that there was no finding that violations occurred. Additionally, the consent order states that Farstad does not admit that it violated the regulations.

Under the terms of the consent order, Farstad agreed to refund $78,636.17, plus interest, as follows: First, Farstad was to directly issue checks totaling $27,472.56, plus interest, to its end-user customers; second, in order to make restitution to its wholesale customers, Farstad was required to deposit $51,163.61, plus interest, into an interest-bearing escrow account for ultimate distribution by the DOE. On February 14, 1984, Farstad remitted $67,623.34 to the DOE. In addition to the $66,981.67 paid as settlement for the alleged wholesale overcharges, this sum included $641.67 assigned to the end-user customers which Farstad could not locate.[1] This Decision and Order proposes procedures to distribute the $67,623.34 received from Farstad plus the interest which has accrued on the escrow account.[2]

II. Proposed Refund Procedures

The procedural regulations of the DOE set forth general guidelines to be used by OHA in formulating and implementing a plan of distribution for funds received as a result of an enforcement proceeding. 10 CFR Part 205, Subpart V. The Subpart V process may be used in situations where the DOE is unable to identify readily those persons who likely were injured by alleged overcharges or to ascertain readily the amount of such persons' injuries. For a more detailed discussion of Subpart V and the authority of OHA to fashion procedures to distribute refunds, *see Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (*Vickers*).

Our experience with Subpart V cases leads us to believe that the distribution of refunds in this proceeding should take place in two stages. In the first stage, we will accept claims from identifiable purchasers of motor gasoline and No. 1 and No. 2 diesel fuel that may have been injured by Farstad's pricing practices during the period November 1, 1973, through April 30, 1974, provided that they have not already received direct refunds from Farstad. If any funds remain after all meritorious first-stage claims have been paid, they may be distributed in a second-stage proceeding. *See, e.g., Office of Special Counsel*, 10 DOE ¶ 85,048 (1982) (*Amoco*).

A. Refunds to Identifiable Purchasers

In the first stage of the Farstad refund proceeding, we propose to distribute the funds currently in escrow to claimants who demonstrate that they were injured by Farstad's alleged overcharges, provided that they have not already received direct refunds from the firm.[3] As we have done in many prior refund cases, we propose to adopt certain presumptions and findings which will be used to help determine the level of a purchaser's injury.

The presumptions and findings we plan to adopt in this case are used to permit claimants to participate in the refund process without incurring inordinate expenses and to enable OHA to consider the refund applications in the most efficient way possible in view of the limited resources available. First, we plan to adopt a presumption that the alleged overcharges were dispersed evenly in all of Farstad's sales of motor gasoline and No. 1 and No. 2 diesel fuel made during the consent order period. This presumption is called a volumetric method. Second, we propose to adopt a presumption of injury with respect to small claims. Third, we plan to adopt a presumption that spot purchasers were not injured by the alleged overcharges. Finally, we are making proposed findings that end users, certain types of regulated firms, and cooperatives were injured by Farstad's pricing practices.

The pro rata, or volumatric, refund presumption assumes that alleged overcharges by a consent order firm were spread equally over all gallons of product covered by the consent order. In the absence, of better information, this assumption is sound because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices. This presumption is rebuttable, however. A claimant which believes that it incurred a disproportionate share of the alleged overcharges may submit evidence proving this claim in order to receive a larger refund. *See, e.g., Sid Richardson Carbon and Gasoline Co. and Richardson Products Co./Siouxland Propane Co.* 12 DOE ¶ 85,054 at 88,164 (1984), and cases cited therein.

Under the volumeric method we plan to adopt, a claimant will be eligible to receive a refund equal to the a number of gallons of Farstad motor gasoline and No. 1 and No. 2 diesel fuel that it purchased during the consent order period times the volumetric factor. The volumetric factor is the average per gallon refund and in this case equals $0.007551 per gallon.[4] In addition, successful claimants will receive a proportionate share of the accrued interest.

The second presumption we plan to use is that purchasers of Farstad motor gasoline and No. 1 and No. 2 diesel fuel that are seeking small refunds were injured by the firm's pricing practices. Under this presumption, a claimant which is a reseller or retailer would not be required to submit any additional evidence of injury beyond volumes of Farstad motor gasoline and No. 1 and No. 2 diesel fuel purchased if its refund claim is below $5,000. *See Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069, at 88,210 (1984); *Office of Special Counsel, 11 DOE ¶ 85,226 (1984) (Conoco)*, and cases cited therein.

A reseller or retailer which claims a refund in excess of $5,000 will be required to document its injury. While there are a variety of methods by which a firm might make such a showing, a firm is generally required to demonstrate (i) that it maintained a "bank" of unrecovered costs, and (ii) that market conditions did not permit it to pass on the increased costs to its customers in the form of higher prices.[5]

If a reseller or retailer made only spot purchases, we propose that it should not receive a refund since it is unlikely to have been injured. As we have previously stated with respect to spot purchasers:

> [T]hose customers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot market purchases of [the firm's product] at increased prices unless they were able to pass through the full amount of [the firm's] quoted selling price at the time of purchase to their own customers.

Vickers, 8 DOE at 85,396–97. Firms which made only spot purchases of Farstad products will not receive refunds unless they present evidence which rebuts the spot purchaser presumption and establishes the extent to which they were injured.

As noted above, we have concluded that end users were injured by the alleged overcharges. Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the consent order period. They were therefore not required to base their pricing decisions on cost increases or to keep records which would show whether they passed through cost increases. An analysis of the impact of the alleged overcharges on the final prices of goods and services which were not covered by the petroleum price regulations would thereofre be beyond the scope of a special refund proceding. *See Office of Enforcement*, 10 DOE ¶ 85,072 (1983) *(PVM)*;

---

[1] The end users that received direct refunds, all of which are affiliated with the United States Government, are not eligible to apply for refunds in this proceeding. However, applications will be accepted from end users that did not receive direct refunds from Farstad. All of these latter customers are either individuals or non-U.S. Government entities.

[2] The total value of the Farstad account stood at $81,363.00 as of April 30, 1986.

[3] The Appendix to this Proposed Decision and Order contains the names of some customers that may have purchased petroleum products from Farstad during the consent order period. We will accept information regarding the present locations of these purchasers for a period of 30 days following publication of a final Decision and Order in this proceeding.

[4] This figure is computed by dividing the $67,623.34 received from Farstad by the 8,956,072 gallons of motor gasoline and No. 1 and No. 2 diesel fuel sold by Farstad during the consent order period to customers that did not receive direct refunds from the firm.

[5] Resellers or retailers that claim a refund in excess of $5,000 but which do not attempt to establish that they did not pass through the price increases will be eligible for a refund of up to the $5,000 threshold, without being required to submit evidence of injury beyond purchase volumes. Firms potentially eligible for greater refunds may choose to limit their claims of $5,000. *See* Vickers, 8 DOE at 85,396. *See also* Office of Enforcement, 10 DOE ¶ 85,020 at 88,122 (1982).

See also Texas Oil & Gas Corp., 12 DOE at 88,309, and cases cited therein.[5]

In addition, we propose that firms whose prices for goods and services are regulated by a governmental agency or by the terms of a cooperative agreement not be required to demonstrate that they absorbed the petroleum product overcharges alleged by ERA. In the case of regulated firms, *e.g.*, public utilities, any overcharges incurred as a result of Farstad's alleged violations of the DOE regulations would routinely be passed through to the utilities' customers. Similarly, any refunds received by such firms would be reflected in the rates they were allowed to charge their customers. Refunds to agricultural cooperatives would likewise directly influence the prices charged to their member customers. Consequently, we propose adding such firms to the class of claimants that are not required to show that they did not pass through to their customers cost increases resulting from alleged overcharges. *See, e.g., Office of Special Counsel*, 9 DOE ¶ 82,538 (1982 *(Tenneco), and Office of Special Counsel*, 9 DOE ¶ 82,545 at 85,244 (1982) *(Pennzoil)*. Instead, those firms should provide with their application a full explanation of the manner in which refunds would be passed through to their customers and how the appropriate regulatory body or membership group will be advised of the applicant's receipt of any refund money. Sales by cooperatives to nonmembers, however, will be treated the same as sales by any other reseller.

As in previous cases, only claims for at least $15 will be processed. This minimum has been adopted in prior refund cases because the cost of processing claims for refunds of less than $15 outweighs the benefits of restitution in those situations. See, e.g., *Uban Oil Co.*, 9 DOE at 85,226. *See also* 10 CFR 205.286(b). The same principle applies here.

If valid claims exceed the funds available in the escrow account, all refunds will be reduced proportionately. Actual refunds will be determined after analyzing all appropriate claims.

B. Applications for Refund

Any purchaser claiming a portion of the consent order funds will be required to file an Application for Refund pursuant to 10 CFR 205.283. In its application, a claimant must include a schedule, broken down by product, of its monthly purchases of Farstad motor gasoline and No. 1 and No. 2 diesel fuel as well as all relevant information necessary to support its claim in accordance with the presumptions and findings outlined above. A claimant must also state whether it has previously received a refund, from any source, with respect to the alleged overcharges underlying this proceeding. Each applicant must also state whether there has been a change in ownership of the firm since the audit period. If there has been a change in ownership, the applicant must provide the names and addresses of the other owners, and should either state the reasons why the refund should be paid to be applicant rather than to the other owners or provide a signed statement from the other owners indicating that they do not claim a refund. Finally, an applicant should report whether it is or has been involved as a party in DOE enforcement or private actions filed under Section 210 of the Economic Stabilization Act. If these actions have been concluded the applicant should furnish a copy of any final order issued in the matter. If the action is still in progress, the applicant should briefly describe the action and its current status. The applicant must keep OHA informed of any change in status while its Application for Refund is pending. *See* 10 CFR 205.9(d).

C. Distribution of Remaining Consent Order Funds

In the event that money remains after all meritorious claims have been satisfied, residual funds could be distributed in a number of ways in a subsequent proceeding. However, we will not be in a position to decide what should be done with any remaining funds until the initial stage of this refund proceeding has been completed. We encourage the submission by interested parties of proposals which address alternative methods of distributing any remaining funds.

It Is Therefore Ordered That:

The refund amount remitted to the Department of Energy by Farstad Oil Company pursuant to the Consent Order executed on September 1, 1981, will be distributed in accordance with the foregoing decision.

BILLING CODE 6450-01-M

Implementation of Special Refund Procedures; Ramos Oil Co., Inc.

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding to adversely affected parties $21,818.84 obtained as a result of a Consent Order which the DOE entered into with Ramos Oil Company, Inc., a reseller-retailer of petroleum products located in West Sacramento, California. The money is being held in escrow following the settlement of enforcement proceedings brought by the DOE's Economic Regulatory Administration.

ADDRESS: Comments must be filed within 30 days of publication of this notice in the Federal Register and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. All comments should conspicuously display a reference to case number HEF-0159.

FOR FURTHER INFORMATION CONTACT: Walter J. Marullo, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-6602.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision sets forth procedures and standards that the DOE has tentatively formulated to distribute to adversely affected parties $21,818.84 plus accrued interest obtained by the DOE under the terms of a Consent Order entered into with Ramos Oil Company, Inc. (Ramos). The funds were provided to the DOE by Ramos to settle all claims and disputes between the firm and the DOE regarding the manner in which the firm applied the federal price and allocation regulations with respect to its sales of motor gasoline, No. 2 diesel fuel, and lubricants (covered products) during the period August 20, 1973, through January 27, 1981.

OHA proposes that a two-stage refund process be followed. In the first stage, OHA has tentatively determined that a portion of the consent order funds should be distributed to firms and individuals that purchased Ramos covered products during the consent order period. In order to obtain a refund, each claimant will be required to submit a schedule, broken down by product, of its monthly purchases of Ramos motor gasoline, No. 2 diesel fuel, and lubricants and to demonstrate that it was injured by Ramos' pricing practices. The specific requirements for proving injury are set forth in the following Proposed Decision and Order. Applications for Refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Some residual funds may remain after all meritorious first-stage claims have been satisfied. OHA invites interested parties to submit their views concerning alternative methods of distributing any remaining funds in a subsequent proceeding.

Any member of the public may submit written comments regarding the proposed refund procedures. Such parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice. All comments received in this proceeding will be available for public inspection between 1:00 and 5:00 p.m., Monday through Friday, except Federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E-234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: May 20, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order of The Department of Energy—Implementation of Special Refund Procedures

May 20, 1986.

Name of Firm: Ramos Oil Company, Inc.

Date of Filing: October 13, 1983.

Case Number: HEF-0159.

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administraton (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special procedures to distribute funds received as a result of an enforcement proceeding in order to remedy the effects of actual or alleged violations of the DOE regulations. *See* 10 CFR Part 205, Subpart V. On October 13, 1983, ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a consent order entered into with Ramos Oil Company, Inc. (Ramos).

I. Background

Ramos is a "reseller-retailer" of refined petroleum products as that term was defined in 10 CFR § 212.31 and is located in West

Sacramento, California. A DOE audit of Ramos' records revealed possible violations of the Mandatory Petroleum Price and Allocation Regulations with respect to the firm's sales of motor gasoline, No. 2 diesel fuel, and lubricants (covered products).

In order to settle all claims and disputes between Ramos and the DOE regarding the firm's sales of covered products during the period August 20, 1973, through January 27, 1981, Ramos and the DOE entered into a consent order on May 19, 1983. The consent order refers to ERA's allegations of regulatory violations but notes that there was no finding that infractions occurred. Additionally, the consent order states that Ramos does not admit that it violated the regulations.

Under the terms of the consent order, Ramos was required, in three annual installments, to deposit a total of $19,000, plus interest, into an interest-bearing escrow account for ultimate distribution by the DOE. Ramos made its final payment on May 30, 1985.[1]

II. Proposed Refund Procedures

The procedural regulations of the DOE set forth general guidelines to be used by OHA in formulating and implementing a plan of distribution for funds received as a result of an enforcement proceeding. 10 CFR Part 205, Subpart V. The Subpart V process may be used in situations where the DOE is unable to identify readily those persons who likely were injured by alleged overcharges or to ascertain readily the amount of such persons' injuries. For a more detailed discussion of Subpart V and the authority of OHA to fashion procedures to distribute refunds, *see Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (*Vickers*).

Our experience with Subpart V cases leads us to believe that the distribution of refunds in this proceeding should take place in two stages. In the first stage, we will accept claims from identifiable purchasers of covered products which may have been injured by Ramos' pricing practices during the period August 20, 1973, through January 27, 1981. If any funds remain after all meritorious first-stage claims have been paid, they may be distributed in a second-stage proceeding. *See, e.g., Office of Special Counsel*, 10 DOE ¶ 85,048 (1982) (*Amoco*).

A. Refunds to Identifiable Purchasers

In the first stage of the Ramos refund proceeding, we propose to distribute the funds currently in escrow to claimants which demonstrate that they were injured by Ramos's alleged overcharges.[2] As we have done in many prior refund cases, we propose to adopt certain presumptions and findings which will be used to help determine the level of a purchaser's injury.

The presumptions and findings we plan to adopt in this case are used to permit claimants to participate in the refund process without incurring inordinate expenses and to enable OHA to consider the refund application in the most efficient way possible in view of the limited resources available. First, we plan to adopt a presumption that the alleged overcharges were dispersed evenly in all of Ramos' sales of covered products made during the consent order period. This presumption is called a volumetric method. Second, we propose to adopt a presumption of injury with respect to small claims. Third, we plan to adopt a presumption that spot purchasers were not injured by the alleged overcharges. Finally, we are making proposed findings that end users, certain types of regulated firms, and cooperatives were injured by Ramos' pricing practices.

The pro rata, or volumetric, refund presumption assumes that alleged overcharges by a consent order firm were spread equally over all gallons of product covered by the consent order. In the absence of better information, this assumption is sound because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices. This presumption is rebuttable, however. A claimant which believes that it incurred a disproportionate share of the alleged overcharges may submit evidence proving this claim in order to receive a larger refund. *See Sid Richardson Carbon and Gasoline Co. and Richardson Products Co./Siouxland Propane Co.*, 12 DOE ¶ 85,054 at 88,164 (1984), and cases cited therein.

Under the volumetric method we plan to adopt, a claimant will be eligible to receive a refund equal to the number of gallons of Ramos covered products that it purchased during the consent order period times the volumetric factor. The volumetric factor is the average per gallon refund and in this case equals $0.000213 per gallon.[3] In addition, successful claimants will receive a proportionate share of the accrued interest.

The second presumption we plan to use is that purchasers of Ramos covered products seeking small refunds were injured by the firm's pricing practices. Under this presumption, a claimant that is a reseller or retailer would not be required to submit any additional evidence of injury beyond volumes of Ramos covered products purchased if its refund claim is below $5,000. *See Texas Oil & Gas Corp.*, 12 Doe ¶ 85,069 at 88,210 (1984); *Office of Special Counsel*, 11 DOE ¶ 85,226 (1984) (*Conoco*), and cases cited therein.

A reseller or retailer which claims a refund in excess of $5,000 will be required to document its injury. While there are a variety of methods by which a firm might make such a showing, a claimant is generally required to demonstrate (i) that it maintained a "bank" of unrecovered costs, and (ii) that market conditions did not permit it to pass on the increased costs to its customers in the form of higher prices.[4]

A modification of the standard injury requirement is necessary in this proceeding because for a portion of the 7½-year Ramos consent order period, retailers and resellers of motor gasoline were not required to compute MLSPs with reference to May 15, 1973 selling prices and increased costs. *See* 10 CFR 212.93; 45 Fed. Reg. 29,548 (1980). Instead, effective July 16, 1979, for retailers and May 1, 1980, for resellers, these firms were required to calculate their MLSPs by adding a fixed-margin to their cost of product. Unrecouped increased product costs could no longer be banked for later recovery. *Id.* Since as of those dates retailers and resellers of motor gasoline were not required to maintain or compute cost banks, any requirement that these claimants make demonstrations of injury based on unrecovered banks would effectively eliminate all non-threshold applicants for a portion of the consent order period. Therefore, in this proceeding, we will not require retailers and resellers to submit

---

[1] Ramos paid $21,818.84, including installment interest, into the escrow account. This amount represents the principal which will form the basis for refund calculations. The total value of the Ramos escrow account stood at $24,049.09 as of April 30, 1986.

[2] At present, the record does not contain any information which indicates that allocation violations were uncovered during the audit investigation. However, since the consent order resolves disputes between Ramos and the DOE concerning the firm's compliance with the Mandatory Petroleum Allocation Regulations, as well as the price regulations, the escrow funds may be used to provide restitution to individuals and firms which show that they were injured by Ramos's allocation practices. For these claimants, we apropose to implement the same procedures that have been used in prior Subpart V proceedings involving alleged allocation violations. *See* Power Pak Co., Inc., 14 DOE ¶ 85,001 (1986).

[3] This figure is computed by dividing the $21,818.84 received from Ramos by the 102,402,443 gallons of covered products estimated to have been sold by the firm during the consent order period.

[4] This injury requirement reflects the nature of the petroleum price regulations in effect beginning on August 19, 1973, and ending on July 18, 1979 for retailers, and on May 1, 1980 for resellers. Under the original rules, a reseller or retailer of motor gasoline was required to calculate its maximum lawful selling price (MLSP) by summing its selling price on May 15, 1973, with increased costs incurred since that time. A firm which was unable to charge its MLSP in a particular month could "bank" any unrecovered increased product costs, so that those costs could be recouped in a later month, if possible. *See* 10 CFR 212.93; 45 FR 23548 (1980).

cost banks for the periods after July 10, 1979, and May 1, 1980, respectively.[5] However, retailers and resellers will be required for the entire consent order period to show that market conditions prevented them from recovering those increased product costs, *e.g.*, through a demonstration of reduced profit margins, decreased market shares, depressed sales volumes or competitive disadvantage.[6]

If a reseller or retailer made only spot purchases, we propose that it should not receive a refund since it is unlikely to have been injured. As we have previously stated with respect to spot purchasers:

[T]hose customers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot market purchases of [the firm's product] at increased prices unless they were able to pass through the full amount of [the firm's] quoted selling price at the time of purchase to their own customers.

Vickers, 8 DOE at 88,396-97. Firms which made only spot purchases of Ramos covered products will not receive refunds unless they present evidence which rebuts the spot purchaser presumption and establishes the extent to which they were injured.

As noted above, we have concluded that end users were injured by the alleged overcharges. Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the consent order period. They were therefore not required to base their pricing decisions on cost increases or to keep records which would show whether they passed through cost increases. An analysis of the impact of the alleged overcharges on the final prices of goods and services which were not covered by the petroleum price regulations would therefore be beyond the scope of a special refund proceeding. *See Office of Enforcement*, 10 DOE ¶ 85,072 (1983) (*PVM*); *see also Texas Oil & Gas Corp.*, 12 DOE at 88,200, and cases cited therein.[7]

In addition, we propose that firms whose prices for goods and services are regulated by a governmental agency or by the terms of a cooperative agreement not be required to demonstrate that they absorbed the petroleum products overcharges alleged by ERA. In the case of regulated firms, *e.g.*, public utilities, any overcharges incurred as a result of Ramos' alleged violations of the DOE regulations would routinely be passed through to the utilities' customers. Similarly, any refunds received by such firms would be reflected in the rates they were allowed to charge their customers. Refunds to agricultural cooperatives would likewise directly influence the prices charged to their member customers. Consequently, we propose adding such firms to the class of claimants that are not required to show that they did not pass through to their customers cost increases resulting from alleged overcharges. *See, e.g., Office of Special Counsel*, 9 DOE ¶ 82,538 (1982) (*Tenneco*), *and Office of Special Counsel*, 9 DOE ¶ 82,545 at 85,244 (1982) (*Pennzoil*). Instead, those firms should provide with their application a full explanation of the manner in which refunds would be passed through to their customers and how the appropriate regulatory body or membership group will be advised of the applicant's receipt of any refund money. Sales by cooperatives to nonmembers, however, will be treated the same as sales by any other reseller.

As in previous cases, only claims for at least $15 will be processed. This minimum has been adopted in prior refund cases because the cost of processing claims for refunds of less than $15 outweighs the benefits of restitution in those situations. *See, e.g., Uban Oil Co.*, 9 DOE at 85,225. *See also* 10 CFR 205.286(b). The same principle applies here.

If valid claims exceed the funds available in the escrow account, all refunds will be reduced proportionately. Actual refunds will be determined after analyzing all appropriate claims.

B. Applications for Refund

Any purchaser claiming a portion of the consent order funds will be required to file an Application for Refund pursuant to 10 CFR 205.283. In its application, a claimant must include a schedule, broken down by product, of its monthly purchases of Ramos motor gasoline, No. 2 diesel fuel, and lubricants as well as all relevant information necessary to support its claim in accordance with the presumptions and findings outlined above.[8] A claimant must also state whether it has previously received a refund, from any source, with respect to the alleged overcharges underlying this proceeding. Each applicant must also state whether there has been a change in ownership of the firm since the audit period. If there has been a change in ownership, the applicant must provide the names and addresses of the other owners, and should either state the reasons why the refund should be paid to the applicant rather than to the other owners or provide a signed statement from the other owners indicating that they do not claim a refund. Finally, an applicant should report whether it is or has been involved as a party in DOE enforcement or private actions filed under Section 210 of the Economic Stabilization Act. If these actions have been concluded the applicant should furnish a copy of any final order issued in the matter. If the action is still in progress, the applicant should briefly describe the action and its current status. The applicant must keep OHA informed of any change in status while its Application for Refund is pending. *See* 10 CFR 205.9(d).

C. Distribution of Remaining Consent Order Funds

In the event that money remains after all meritorious claims have been satisfied, residual funds could be distributed in a number of ways in a subsequent proceeding. However, we will not be in a position to decide what should be done with any remaining funds until the initial stage of this refund proceeding has been completed. We encourage the submission by interested parties of proposals which address alternative methods of distributing any remaining funds.

It is therefore ordered that:

The refund amount remitted to the Department of Energy by Ramos Oil Company, Inc. pursuant to the Consent Order executed on May 19, 1983, will be distributed in accordance with the foregoing decision.

[FR Doc. 86-11980 Filed 5-28-86; 8:45 am]
BILLING CODE 6450-01-M

---

[5] The cost bank requirement has been relaxed in other instances involving the change in the pricing regulations for motor gasoline. *See* Tenneco Oil Company/United Fuels Corporation, 10 DOE ¶ 85,055 at 88,017 n.1 (1982).

[6] Resellers or retailers which claim a refund in excess of $5,000 but who do not attempt to establish that they did not pass through the price increase will be eligible for a refund of up to the $5,000 threshold, without being required to submit evidence of injury beyond purchase volumes. Firms potentially eligible for greater refunds may choose to limit their claims to $5,000. *See* Vickers, 8 DOE at 88,398. *See also* Office of Enforcement, 10 DOE ¶ 85,028 at 88,122 (1982).

[7] If a firm is both a spot purchaser and an end user, it will be treated as an end user and will not be required to make any showing of injury beyond that required of other end users.

[8] Although the price of motor gasoline was controlled until January 27, 1981, No. 2 diesel fuel and lubricants were deregulated on July 1, 1978, and September 1, 1979, respectively. In compiling its schedule of monthly purchases a claimant should not include purchases of deregulated products.

ENVIRONMENTAL PROTECTION AGENCY

[OPP-36122; FRL-3023-3]

Pesticide Programs; Guide Standard and Protocol for Microbiological Water Purifiers; Request for Comments

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Availability and Request for Comments.

SUMMARY: This notice announces the development of a guide standard and protocol for testing microbiological water purifier units submitted to the EPA for registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). This standard includes specific requirements for three basic types of microbiological water purifiers. Only two types of units are subject to registration under FIFRA (ceramic candles and/or units with a chemical agent and halogenated resins and/or units). This notice is applicable only to these two types of units. The standard will also serve as the basic framework for developing appropriate modifications to evaluate and test other basic types of microbiological water purifier units that might be registered under FIFRA in the future. The Office of Pesticide Programs (OPP) is soliciting public comments on this guide standard in order to consider any pertinent concern before publishing the protocol as a final guideline available from the National Technical Information Service (NTIS). Copies of the guide standard, as proposed are available from Ms. Dorothy Portner whose address and telephone number are given under FOR FURTHER INFORMATION CONTACT.

DATE: Written comments must be received by July 14, 1986.

ADDRESS: Submit three copies of comments, identified by the control number "OPP-36122," by mail to: Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: Rm., 236, CM#2, 1921 Jefferson Davis Highway, Arlington, Va.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Dorothy Portner, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C 20460. Office location and telephone number: Rm. 711, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-0484). Contact Ms. Portner for a copy of the proposed guide standard.

SUPPLEMENTARY INFORMATION: Several Federal offices, as well as industrial and consumer groups, have been involved in responding to questions and problems relating to microbiological water purifer equipment and have recognized the need for a guide standard and testing protocol to evaluate these units. In July 1984, the Office of Drinking Water (ODW) and OPP formed a work group to recommend a standard and to develop a testing protocol for microbiological water purifiers. A committee was selected, consisting of a broad multi-disciplinary group of experts from academia, industry, and government. The committee was chaired by Stephen A. Schaub, Ph.D., U.S. Army Medical Bioengineering Research and Development Laboratory. The committee's objective was to produce a comprehensive document that would be useful for government, industry, and consumers:

1. As a basic framework for testing and evaluating microbiological water purifiers for EPA registration.

2. As a guide to the acceptance of water treatment units where point-of-use units may be needed to treat a contaminated public water supply or for emergency situations.

3. As a test guide to manufacturers wishing to consider and evaluate their units as microbiological water purifiers, whether registered or not.

4. As a guide to consumers regarding the performance to be expected from microbiological water purifiers tested according to this standard and protocol.

5. To assist in the evaluation of microbiological treatment units for military applications.

This guide standard covers three basic types of units subject to registration and/or regulation under FIFRA. These units are identified by their principal means of action: (1) Ceramic candles and/or units (with or without an antimicrobial agent): filtration and adsorption, and antimicrobial activity if a chemical is included; (2) halogented resin and/or units: chemical disinfection and possibly filtration; and (3) ultraviolet (UV) units: UV irradiation with possible add-on treatment for adsorption and filtration. The performance requirements and a comprehensive protocol with detailed microbiological test procedures, developed under defined basic principles, are specified for these three basic types of devices. OPP intends to utilize applicable sections of this guide standard as the basis for deriving efficacy data to support the registration of ceramic candle units with an antimicrobial agent and halogented resin units (types 1 and 2). Other sections of this standard may be used by other Federal offices, device manufacturers, and consumer groups as a guide to evaluate the effectiveness of devices that are regulated under FIFRA only as microbiological water purifiers (ceramic candle units without an antimicrobial agent and UV units).

Dated: May 20, 1986.

FEDERAL COMMUNICATIONS COMMISSION

[Report No. 1691]

Petitions for Reconsideration and Applications for Review of Actions in Rulemaking Proceedings

May 20, 1986.

Petitions for reconsideration and applications for review have been filed in the Commission rulemaking proceedings listed in this Public Notice and published pursuant to 47 CFR 1.429(e). The full text of these documents are available for viewing and copying in Room 239, 1919 M Street, NW., Washington, DC or may be purchased from the Commission's copy contractor, International Transcription Service (202-857-3800). Oppositions to these petitions and applications must be filed within 15 days after publication of this Public Notice in the Federal Register. Replies to oppositions must be filed within 10 days after the time for filing oppositions has expired.

Subject: Authorized Rates of Return for the Interstate Services of AT&T Communications and Exchange Telephone Carriers (CC Docket No. 84-900, Phase I).

Number of petitions received: 3.

Applications for Review Filed

Subject: Amendment of § 73.202(b) Table of Allotments, FM Broadcast Stations. (Oak Beach and Bay Shore, New York.) (MM Docket No. 84-235, RM-4811.)

Number of applications received: 2.

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in section 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-004059-003
Title: San Francisco Terminal Agreement
Parties: The San Francisco Port Commission California Stevedore & Ballast, Co.
Synopsis: The purpose of this amendment is to extend the term of the basic agreement until June 30, 1987, with all other terms and conditions remaining in force. The parties have requested a shortened review period.

Agreement No.: 224-004177-001
Title: Port of Seattle and Seattle International Terminal, Inc., Terminal and Crane Lease Agreement
Parties: Port of Seattle (Port) Seattle International Terminal, Inc. (Lessee)
Synopsis: The proposed amendment would convert 5.17 acres of backup storage yard to container yard use, and provide for a construction rental abatement. It would also give the Port's formal consent to a corporate reorganization by the Lessee. The parties have requested a shortened review period.

Agreement No.: 224-010944
Title: Jacksonville Terminal Agreement
Parties: Jacksonville Port Authority (Port), United States Line, Inc. (USL)
Synopsis: The proposed agreement specifies the incentives the Port will offer to USL as an inducement to utilize its facilities at the Port of Jacksonville, Florida. The incentives consist of: (1) A payment of $35.00 to USL for every loaded container transitting the Port by water up to a maximum of 250 containers per vessel for the first ten vessels and (2) a waiver of the Port's $75.00 gate charge specified in its tariff. The agreement provides that USL will make a minimum of ten calls in the year's duration of the agreement.

Dated: May 23, 1986.

FEDERAL RESERVE SYSTEM

Continental Illinois Corp. et al.; Formation of, Acquisition by, or Merger of Bank Holding Companies

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and 225.14 of the Board's Regulation Y (12 CFR 225.24) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than June 20, 1986.

A. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Continental Illinois Corporation*, Chicago, Illinois; to acquire 100 percent of the voting shares of First National Bank of Deerfield, Deerfield, Illinois.

2. *St. Joseph Bankcorporation, Inc.*, South Bend, Indiana; to acquire 100 percent of the voting shares of Angola Bancorporation, Angola, Indiana, and thereby indirectly acquire First National Bank of Angola, Angola, Indiana.

B. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Old National Bancorp*, Evansville, Indiana; to acquire 100 percent of the voting shares of The Rockville National Bank, Rockville, Indiana.

2. *Southside Bancshares Corp.*, St. Louis, Missouri; to acquire at least 92.3

percent of the voting shares of Weldon Spring Bank, Weldon Spring, Missouri.

Board of Governors of the Federal Reserve System, May 23, 1986.

BILLING CODE 6210-01-M

Fidelity Financial Corp. of Michigan et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under §225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and §225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in §225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any question of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 18, 1986.

A. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Fidelity Financial Corporation of Michigan*, Birmingham, Michigan; to engage *de novo* through its subsidiary, Fidelity Leasing Corporation, Birmingham, Michigan, in leasing personal and real property pursuant to §225.25(b)(5) of the Board's Regulation Y. Comments on this application must be received by June 10, 1986.

B. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Sanger First National Holding Co., Inc. of Texas*, Sanger, Texas; to engage directly in the activity of providing to others financially related data processing and data tranamission services, facilities and data bases; or access to them pursuant to §225.25(b)(7) of the Board's Regulation Y.

Board of Govenors of the Federal Reserve System, May 23, 1986.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 86-12094 Filed 5-28-86; 8:45 am]

BILLING CODE 6210-01-M

Marisub, Inc.; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C 1842) to become a bank holding company to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweight possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 16, 1986.

A. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Marisub, Inc.*, Milwaukee, Wisconsin; to acquire 100 percent of the voting shares of Marine Bank National Association, Milwaukee, Wisconsin; Marine Bank West, Waukesha, Wisconsin; Marine Bank South, National Association, Racine, Wisconsin; Marine Bank Dane County, Madison, Wisconsin; West Bend Marine Bank, West Bend, Wisconsin; Marine Bank of Beaver Dam, Beaver Dam, Wisconsin; Fidelity Marine Bank Antigo, Wisconsin; and Marine First National Bank, Janesville, Wisconsin.

Marisub, Inc., Milwaukee, Wisconsin; has also applied to acquire the (1) Marine Bank Services Corporation, Milwaukee, Wisconsin, and thereby engage in data processing, data print and transmission services, facilities (including data processing and data transmission hardware, software, documentation or operation personnel), data bases or access to such services, facilities and data bases pursuant to § 225.25(b)(7) of the Board's Regulation Y; (2) Marinebanc Leasing Company, Inc., Milwaukee, Wisconsin, and thereby engage in leasing personal property or acting as agent, broker, or adviser in leasing such property pursuant to § 225.25(b)(5) of the Board's Regulation Y; (3) Marine Mortgage Company, Inc., New Berlin, Wisconsin, and thereby engage in making, acquiring, or servicing mortgage loans or other extensions of credit for the company's account or for the account of others pursuant to § 225.25(b)(1) of the Board's Regulation Y; and (4) The Marine Trust Company, N.A., Waukesha, Wisconsin, and thereby engage in performing functions or activities that may be performed by a trust company pursuant to § 225.25(b)(3) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, May 23, 1986.

James McAfee,

Associate Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Community-Based Cardiovascular Disease Prevention Program; Program Announcement and Notice of Availability of Funds for Fiscal Year 1986

The Centers for Disease Control (CDC) announces that competitive Cooperative Agreement applications are being accepted for a Community-Based Cardiovascular Disease Prevention Program. The catalog of Federal Domestic Assistance Number is 13.283.

Program Objective

Cardiovascular disease (CVD) is the leading cause of death in the United States, accounting for almost half of all deaths. Epidemiologic studies have demonstrated strong and consistent associations between behavioral risk factors—such as cigarette smoking, poor nutrition, physical inactivity, and uncontrolled high blood pressure—and CVD morbidity and mortality. In addition, studies have suggested that the recent declines in CVD can be attributed in large part to reductions in these behavioral risk factors. Most recently, investigators have attempted to demonstrate that community-based health promotion programs could produce reductions in CVD risk behaviors and ultimately in disease morbidity and mortality. In North Karelia, Finland and in northern California, community-based research programs have been shown to be effective in decreasing levels of CVD risk factors. The North Karelia results suggested that a decline in CVD morbidity and mortality had occurred as well. With funding from the National Heart, Lung and Blood Institute, current research efforts in Minnesota, Rhode Island (Pawtucket), and California (Stanford) are attempting to corroborate and expand on these previous findings.

The overall objective of the CDC Community-based CVD Prevention Program is to make practical application of current research findings at the State and community level. The CVD program is intended to develop and then replicate cost-effective, pubic health-based programs in communities across the country which will result in sustained reductions in behavioral risk factors and, ultimately, reductions in CVD. Public health departments provide an obvious framework from which these programs could develop. It is intended that these programs build upon the existing State and local health department expertise and resources to organize, conduct, and evaluate community-based CVD risk reduction activities. The following principles and assumptions form the conceptual framework for the development of these intervention programs:

Setting: The program should specify a community approach. Intervention strategies should be applied to the entire community and programs should be integrated with the existing social, education, and health service structures of the community.

Intervention: It is expected that a successful intervention will include strategies directed both at the individual and the community in which he/she lives. These intervention strategies will target multiple settings such as schools and worksites, various communication channels such as mass media and patient eduction, multiple community characteristics such as prevailing tax policies (cigarette taxes) and clean indoor air ordinances, and multiple resource development efforts such as the mobilization of community organizations and networks and the identification of new community resources.

The CVD Prevention Program should attempt to modify the health policies and societal influences surrounding CVD and which affect the community as a whole. This derives from the observation that the majority of CVD occurs among low or moderate risk individuals and strategies to reach these individuals are most effective when applied in a broad, community-wide effort. Nevertheless, interventions targeted at high risk individuals and population subgroups with defined CVD risk as well as adequate treatment for those identified should also be an important objective of the program. These two strategies are viewed as complementary rather than conflicting.

As a simple model for community-based CVD reduction, it is assumed that the intervention will produce changes in the community which are supportive of health promoting behaviors. These "community influences" include physician attitudes regarding health risk behaviors, the proportion of worksites with smoking cessation programs or clean indoor ordinances, and grocery store or restaurant food labeling programs, etc. It is also expected that change will occur in a sequence from awareness of the risk factors and of the intervention, to participation, behavioral change, risk reduction and, eventually, disease reduction.

Evaluation: The intent of this program is to determine whether a community-based intervention can be implemented and demonstrated to be effective at the local level at an affordable cost. The evaluation should include two basic components:

1. Evaluation of the *process* of implementing a community-based CVD intervention program, with a detailed formative assessment. This evaluation will be coordinated through the recipient State health department. This evaluation will include the assessment of such elements as the expansion of worksite lifestyle programs, enhancement of school health curricula, changes in food store marketing practices, mobilization of community resources, availability of program materials, and the passage of laws or regulations affecting smoking behavior such as increased cigarette taxes or expanded designation of smoke-free areas in public buildings.

2. Evaluation of the *effectiveness* of the program by contrasting changes in the intervention community over time with those observed in a comparison community. This component of the evaluation will measure changes in self-reported knowledge, attitudes and behavior which affect CVD risks, such as smoking, sedentary lifestyle, therapeutic compliance, and dietary patterns. The ultimate goal of the program is to reduce CVD morbidity and mortality. The assessment of these outcomes in the short term will be difficult because of the long lag time between behavioral or physiologic changes and actual changes in disease outcomes. However a surveillance mechanism for monitoring behavioral as well as morbidity and mortality outcomes will be established to permit tracking of changes over time.

Because of the cost limitations of this evaluation, methods such as telephone surveys may be used to assess changes in awareness, attitudes, and health behaviors. Morbidity changes should be monitored through mechanisms such as sentinel physicians, HMO's, and hospital admissions and discharges with diagnoses relating to CVD such as strokes, hypertensive crises, and myocardial infarctions. Other morbidity data for monitoring changes may come from self-reported levels of blood pressure, cholesterol, and body weight. In addition, these kinds of physiological data may be obtained from intervention activities such as worksite lifestyle programs. Mortality data relating to CVD will also be monitored to establish

a system that can demonstrate changes over time.

Authority

This program is authorized under section 301(a) of the Public Health Service Act [42 U.S.C. 241(a)], as amended.

Eligibility Requirements

Eligible applicants are the official health departments of any State, including the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.

Availability of Funds

It is expected that approximately $300,000 will be available in Fiscal Year 1986 to fund approximately one or two awards. The awards will range from approximately $150,000 to $300,000. The awards will be funded with 12-month annual budget periods with a 5-year project period. Continuation awards within the project period will be made on the basis of satisfactory progress in meeting project objectives, and on the availability of funds. The funding estimate outlined above may vary and is subject to change.

Type of Assistance

Awards resulting from this announcement will be Cooperative Agreements. One or two awards will be made.

I. Recipient Activities

a. Select one or more communities which are committed to and capable of implementing a community-wide CVD prevention program commensurate with the conceptual framework of the program. The intervention community should encompass at least 50,000 persons and will have demonstrated interest and activities in community-based health promotion. It is also desirable for the selected community to have a diverse ethnic and socioeconomic composition and diverse employment opportunities.

b. Select a comparison community of approximately the same size, demographic composition, and sociocultural profile as the intervention community. This comparison community should be as isolated and removed from the intervention community as practicable and in a different media market. It should be surveyed in a manner similar to that of the intervention community in order to demonstrate that the baseline level of behavioral risk factors and health promotion activities in regard to CVD is comparable to the intervention community, thus affording comparisons that will enable program effectiveness to be evaluated. The recipient may elect to incorporate a different evaluation approach; this will be acceptable, provided the evaluation method selected can demonstrate that any changes which occur in the intervention community are not part of a secular trend.

c. Assist the selected intervention community(s) to design a community program which should include:

(1) Obtaining community-level data which describe CVD mortality and morbidity and behavioral risk factors, community influences, health policies, knowledge, attitudes, options and community resources affecting CVD. The behavioral component of the community-level data should include health enhancing behaviors such as physical exercise and efforts to reduce elevated blood pressure and cholesterol levels and health damaging behaviors such as smoking.

(2) Convening a panel of community representatives to review the analysis of the above data and set community objectives for the prevention and reduction of CVD.

(3) Designing, organizing, implementing, and evaluating the effectiveness of health promotion/education strategies which incorporate the following components in meeting the community objectives:

(a) Identifying, improving, and integrating CVD preventive services including a broad range of primary prevention efforts into existing community efforts such as treatment for individuals with CVD risk factors, training of public health and medical personnel, laboratory quality control and evaluation, and related measures.

(b) Educating people about the relationship between behaviors and their health, motivating them to adopt desirable personal health practices, increasing their skills through self-help, and helping them to maintain the acquired personal health practices through social supports.

(c) Producing changes in the community to create opportunities for healthy actions.

(d) Mobilizing the community for broad changes to support the adoption of healthy behavior.

(4) Evaluating the critical program indicators such as those described in Part c. 1), above.

d. Prepare and disseminate information pertinent to the program through presentation and publication in appropriate State and national forums.

e. Implement or expand a State surveillance system of CVD to include mortality, morbidity, behavioral risk factors, and community influences which affect health behaviors.

2. CDC Activities

a. Provide technical assistance and training to assure that State health department staff have the appropriate skills and expertise to, in turn, train, advise, and prepare local health representatives to conduct the program functions.

b. Provide technical assistance in the design and development of methods for training, data collection, and data analysis that can be adapted to future programs.

c. Develop and recommend program intervention strategies.

d. Collaborate in the selection of the intervention and comparison communities.

e. Participate in selected aspects of training and technical assistance to the selected community(s).

f. Provide technical assistance in the collection and analysis of data gathered from program activities.

Applications

1. Copies—Place of Submission

The original and two copies of the application should be submitted on Form PHS 5161–1 (revised 3–86) on or before July 28, 1986: Grants Management Branch, Procurement and Grants Office Centers For Disease Control Room 321, 255 East Paces Ferry Road, Atlanta, Georgia 30305.

Application forms should be available in the institution's business office or from the above address.

2. Deadlines

Applications shall be considered as meeting the deadline if they are either:

a. Received on or before the deadline date, or

b. Sent on or before the deadline date and received in time for submission to the independent review group. (Applicants should request a legibly-dated U.S. Postal Service postmark or obtain a legibly-dated receipt from a commercial carrier or U.S. Postal Service. Private matered postmarks shall not be acceptable as proof of timely mailing.)

3. Late Application

Applications which do not meet the criteria in either paragraph 2.a. or b. immediately above are considered late applications and will not be considered in the current competition and will be returned to the applicant.

4. Reviews

Applications are not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs.

5. Content

Applications must incude a narrative which details the following:

a. Background and needs including items relevant to the evaluation of the application.

b. Program plan which includes goals and specific measurable objectives, methods and activities which will be undertaken to accomplish the objectives, and evaluation plan.

c. Supporting material which includes the organizational location of the project, supporting and complementary personnel and resources, details of the applicant's previous experience in community-based CVD prevention and other chronic disease efforts, curriculum vitae of critical staff, previous scientific publications related to CVD, State health promotion plans related to CVD, and any other related material which will aid in the evaluation of the appropriateness of the applicant's experience and commitment to the program.

d. Description of duties for a public health advisor assignee, if being requested.

e. Index of the above.

Review Criteria

Applications will be reviewed and evaluated based on the evidence submitted which specifically describes the applicant's ability to meet the following criteria:

1. State Commitment

a. Evidence of the applicant's commitment to CVD prevention as evidenced by prior and current activities to promote State and community policies conducive to the reduction of CVD and plans for new activities.

b. Evidence of applicant's ability and willingness to make a long-term commitment to CVD prevention, including the possibility of providing additional State/local funds and staff resources.

c. The documented intent of the applicant to extend the program in more than one community within the allowable Federal budget or in combination with State and community resources.

2. State Capability

a. Evidence of the applicant's experience in implementing and managing chronic disease programs and evidence of how these activities would be integrated with the community-level risk factor reduction efforts.

b. Degree of prior experience in data collection which is appropriate to this project, such as behavioral risk factor surveys or surveillance; analysis of morbidity or mortality data related to behavioral risks associated with CVD; and assessments of the surrounding influences in the community which affect health behaviors.

c. Evidence of applicant's ability to generate community leadership, organization, priority-setting, and financial support for community-based CVD prevention, such as experience with CHPE's Planned Approach to Community Health (PATCH) Program.

d. The quality of the applicant's plans for community technical and organizational assistance.

e. The qualifications and time allocation of proposed staff and availability of equipment and facilities to be used during the project.

3. Project Design

a. The applicant's understanding of community-based CVD prevention, including practical intervention strategies and their behavioral science foundations.

b. Appropriateness of stated goals and objectives in addressing the stipulated recipient activities.

c. The adequacy of the procedures and criteria to be used in selecting the community in which the project is to be implemented.

d. Assurances of and special steps to achieve rapid indentification of the intervention and comparison communities and the necessary project personnel.

e. The overall quality of the evaluation plan.

f. Innovative approaches to program design, particularly those which may help evaluate changes in physiologic factors and/or morbidity.

g. Availability of morbidity data from which long term guidance and general assessment could be based and innovative approaches to the acquisition and use of such data.

h. The extent to which the budget is reasonable and consistent with the intended uses of the requested funds.

4. Potential for Public Health Impact

a. The proportion of the State's population at increased risk of CVD, based on race and sociodemographic characteristics, in whom intervention could have the greatest potential impact on morbidity and mortality.

b. Evidence of the applicant's ability to implement effective improvements in chronic disease or risk reduction programs and to institute these changes throughout the State, especially in communities with an increased level of CVD risks.

Supplementary Information

1. Use of Funds

a. Funds may be used to support personnel and purchase supplies, services, and equipment directly related to planning, organizing, implementing, and evaluating the project.

b. Funds may not be used for office equipment and furniture, and renting or leasing office space unless specifically approved.

c. Funds may not be used for construction or renovation.

d. Funds may not be used for diagnosis and treatment.

2. Reporting Requirements

Annual financial status reports are required no later than 90 days after the end of each budget period. Final financial status reports are required 90 days after the end of a project period.

3. Other

The Centers for Disease Control may provide a public health advisor in addition to the awarded funds. States interested in such an assignee should indicate their interest with their application along with a description of the intended duties and responsibilities of the assignee. The assignment of a public health advisor and his/her responsibilities will be negotiated after the award of the cooperative agreement.

Information

Information on application procedures, copies of application forms, and other material may be obtained from Luther E. DeWeese, Grants Management Branch, Procurement and Grants Office, Centers For Disease Control, 255 East Paces Ferry Road, NE., Room 321, Atlanta, Georgia 30305, or by calling (404) 262-6575 or FTS 236-6575.

Technical assistance may be obtained from Gary C. Hogelin, Field Services Branch, Division of Nutrition, Center for Health Promotion and Education, Centers For Disease Control, 1600 Clifton Rd, NE., Atlanta, Georgia 30333, telephone (404) 329-3075 or FTS 236-3075.

Dated: May 22, 1986.

Robert L. Foster,

Acting Director, Office of Program Support, Centers for Disease Control.

BILLING CODE 4160-18-M

Family Support Administration

Refugee Resettlement Program; Formula for Allocations to States of FY 1986 Funds for Social Services for Refugees and Cuban/Haitian Entrants

AGENCY: Office of Refugee Resettlement (ORR), FSA, HHS.

ACTION: Final Notice.

SUMMARY: This notice establishes the formula for allocation to States of FY 1986 funds for social services under the Refugee Resettlement Program (RRP). The formula yields the allowable allocation of FY 1986 refugee and Cuban/Haitian entrant social service funds for each State participating in the RRP.

EFFECTIVE DATE: May 29, 1986.

FOR FURTHER INFORMATION CONTACT: David Howell, (202) 245–1923.

SUPPLEMENTARY INFORMATION: Notice of the proposed formula for the allocation of FY social service funds was published in the **Federal Register** on February 27, 1986 (51 FR 6943). No major changes have been made in the formula as a result of comments on the previously published proposal. However, the total funds to be allocated by formula have been increased from approximately $35,000,000 to $58,200,000.

I. Amounts Available for Allocation

The Office of Refugee Resettlement (ORR) will make available $66,617,000 in FY 1986 refugee/entrant social service funds. This determination is based upon the Continuing Resolution for FY year 1986 (Pub. L. 99–190) which provides that funding for social services be at the same level as in FY 1985. This figure, $71,700,000, was then reduced by 4.3% to $68,617,000 under the Balanced Budget and Emergency Deficit Control Act of 1985 (Pub. L. 99–177), generally referred to as Gramm-Rudman-Hollings. A proposal made by the President on February 5, 1986, to rescind funds in excess of the $44,802,000 originally requested for FY 1986 was not approved by Congress within the required 45 legislative days and therefore did not take effect.

Of the total of $66,617,000 in social service funds, the Director of ORR will make available to States during FY 1986 approximately $58,200,000 (85 %) under the allocation formulas set out in this notice. These funds will be made available for the purpose of providing social services to refugees and entrants.

All allocation figures include both refugees and entrants since both populations may be served through funds addressed in this notice.

Of the $58,225,465 covered by this notice, the Director will allocate funds directly to States in the following manner:

- $55,000,000 will be allocated on the basis of each State's proportion of the national population of refugees and entrants who had been in the U.S. less than 3 years as of October 1, 1985.
- $330,693 will be allocated to States which have particular needs associated with small refugee/entrant populations in order to provide a floor of $75,000 for States with fewer than 500 refugees/entrants.
- $2,894,772 will be allocated to each State on the basis of its proportion of the 3-year refugee/entrant population (including a floor amount of $5,000 to States with small refugee populations) in order to provide an incentive for States to fund refugee/entrant mutual assistance associations (MAAs). The amount being allocated to MAAs, exclusive of the floor, is $2,871,000; this reflects the 4.3% Gramm-Rudman reduction as compared with the FY 1985 formula amount of $3,000,000. A written assurance that these optional funds will be used for MAAs is required in order for a State to receive the funds. Guidance to States regarding this assurance is provided below.

The $10,391,535 remaining in social service funds will be used on a discretionary basis to carry out specifically directed initiatives intended to contribute to the effectiveness and efficiency of the refugee resettlement program in service delivery and self-support, as described in the previous notice.

While the formula is based on the 3-year refugee population, social service programs are not limited to refugees who have been in the U.S. only 3 years. States may provide services without regard to an individual refugee's or entrant's length of residence. (A State must, however, have an approved State plan for the Cuban-Haitian Entrant Program in order to use funds on behalf of entrants as well as refugees.)

ORR funds may not be used to provide services to United States citizens since they are not covered under the refugee and entrant legislation (except that services may be provided to a U.S.-born minor child in a family in which both parents are refugees or entrants or, if only one parent is present, in which that parent is a refugee or entrant).

In accordance with ORR's "Statement of Program Goals, Priorities and Standards for State-Administered Refugee Resettlement Program" issued March 1, 1984, funds awarded under this notice are subject (as were FY 1985 funds) to a requirement that at least 85% of a State's award be used for employment services, English language training, and case management services, reflecting the Congressional objectives that "employable refugees should be placed in jobs as soon as possible after their arrival in the United States" and that social service funds be focused on these types of services. (Immigration and Nationality Act, section 412(a)(1)(B).) As in FY 1985, ORR will consider granting, under specific circumstances, a waiver of this provision. In order to receive a waiver, a State must be able to demonstrate to the satisfaction of the Director, ORR, that two of the following three conditions exist: The cash assistance rate for time-eligible refugees/entrants in the State is below the national average for all time-eligible refugees/entrants in the U.S.; less than 85% of the State's social service allocation is sufficient to meet all employment-related needs of the State's refugees/entrants; and/or there are nonemployment-related service needs which are so extreme as to justify an allowance above the basic 15%.

States should also expect to use funds available under this notice to pay for social services which are provided to refugees/entrants who participate in alternative projects. The Continuing Resolution for FY 1985 (Pub. L. 98–473), in addition to providing funds for the refugee program, amended the Immigration and Nationality Act to provide that:

> The Secretary [of HHS] shall develop and implement alternative projects for refugees who have been in the United States less than thirty-six months, under which refugees are provided interim support, medical services, support [social] services, and case management, as needed, in a manner that encourages self-sufficiency, reduces welfare dependency, and fosters greater coordination among the resettlment agencies and service providers.[1]

The Department has already issued a separate notice in the **Federal Register** with respect to applications for such projects (50 FR 24583; June 11, 1985). The notice on alternative projects does not contain provisions for the allocation of additional social service funds beyond the amounts proposed for availability in this notice. Therefore a State which may wish to consider carrying out such a project should take note of this in

[1] This provision, generally known as the Wilson/Fish Amendment, was originally included in 1985 in the House-passed reauthorization of the Refugee Act, H.R. 3729, as modified and reported by the Senate Judiciary Committee.

planning its use of social service funds being allocated under the present notice.

Finally, ORR believes that the continued and/or increased utilization of refugee mutual assistance associations (MAAs) in the provision of social services promotes appropriate use of services as well as the effectiveness of the overall service system. The belief is reinforced by the interest in MAAs which has developed under similar incentive funds awarded to States in previous years. Therefore additional funds which would be targeted specifically to these organizations have been included as an optional award to States which would use them for this purpose.

In order to receive the MAA incentive funds, the appropriate State agency official shall provide written assurance to the Office of Refugee Resettlement that the following conditions will be observed by the State agency in using funds made available to the State under this special allocation:

(1) That such funds will be used to fund refugee/entrant mutual assistance associations for the direct provision of services to refugee and entrant clients.

(2) That the MAA incentive allocation is subject to and included under ORR's requirement that 85% of the total amount of social service funds allocated by this notice to a State be used for priority services, as defined elsewhere in this notice.

(3) That the State agency will observe the following definition of a mutual assistance association:

(a) That the organization must be legally incorporated as a non-profit organization; *and*

(b) That not less than 51% of the composition of the Board of Directors or governing board of the mutual assistance association will be comprised of refugees/entrants or former refugees/entrants.

(4) That the State agency will assist MAAs in seeking other public and/or private funds for the provision of services for refugee and entrant clients in subsequent years.

Written assurances should be sent to the Director, Office of Refugee Resettlement, Room 1229 Switzer Building, 330 C Street, SW., Washington, DC 20201, with a duplicate copy to the appropriate ORR Regional Director. States must respond by June 30, 1986, in order to avail themselves of this special allocation.

II. Discussion of Comments Received

Fourteen comments were received during the public comment period in response to the notice of the proposed formula for the allocation to States of FY 1986 funds for social services for refugees and Cuban/Haitian entrants. Most of the commenters expressed concern primarily about the proposed amount of social service funds. Several also commented on other aspects of the proposal, and a few included recommendations for particular changes. The comments are summarized below and are followed in each case by the Department's response.

Comment: Nine commenters opposed the amount of funds announced as available under the proposed rescission. The reduction was felt to be both too great in absolute terms and also too great a change to be announced so late in the fiscal year.

Response: Since Congress did not approve the request there will be no rescission for FY 1986, as explained above. The Department continues to make every effort to provide public notice regarding potential and actual funding amounts as soon as figures are known.

Comment: Seven comments were received regarding the amount of funds set aside for discretionary use, as opposed to being allocated to States through the formula. The commenters felt that the $7,000,000 proposed for discretionary use was too high, given the proposed formula amount of $33,700,000. One commenter suggested that all social service funds should be allocated directly through the formula.

Response: The Department believes that, given the range and variation of need for social services among the State programs, there is strong justification to use a portion of the social service appropriation for specially directed service initiatives. This is further supported by the fact that with continuing high social service funding levels in the RRP, the possibility for States to preserve a variety of existing program initiatives has been maintained. While we continue to feel that most of the funds should be allocated by formula, we also believe that there is an increasing need to provide an opportunity for States to seek supplemental project funds to help meet identifiable special needs.

Of the $66,617,000 now available, the Department has decided to use approximately $10,409,000 (15%) for discretionary purposes. Most of these discretionary funds will be awarded to States, principally for competitive project awards for Comprehensive Discretionary Social Services (CDSS), of which States have previously been advised, and for continuation of ORR's mental health initiative under agreement with the Public Health Service. ORR estimates that, overall, 95% of the available $66,617,000 will be awarded to States; the remainder will be used, as noted in the proposal, to support special program initiatives and program development activities.

Comment: A few commenters suggested alternatives to the allocation formula itself: Two commenters suggested the use of time-expired refugees in the input data, and two suggested allocating funds on the basis of cash assistance rates. One commenter suggested an alternative method for calculating allocations for small States, while two stated that small States' awards should be reduced or eliminated.

Response: The Department has argued elsewhere (47 FR 22568; 47 FR 42834; 48 FR 24906; 49 FR 36702; 49 FR 45073; 50 FR 8194; as well as in the proposal under discussion at 51 FR 6943) that the 3-year population base is a sound approach to social service allocations because (1) it reflects population trends over a period of time in which refugees have the greatest need for services, (2) it is not subject to the instability of short-term biases, (3) it provides some incentive for States to use their program funds for priority services, and (4) it is consistent with program policies and priorities of ORR to provide services to refugees in order that they become self-sufficient as quickly as possible. The Department continues to believe that the 3-year population base is most appropriate for the allocation of social service funds. Further, the Department believes that the targeted assistance funds allocated over the previous 3 fiscal years, in addition to the targeted assistance funds to be made available in FY 1986, as well as funding for various special initiatives, have already provided the most appropriate means of addressing needs based on longer term populations and on extended use of cash assistance.

With regard to the floor for small States, we concur that a change may be appropriate in the way in which the floor is determined and believe the commenter's suggestion has merit. However, since that suggestion would yield some allocations less than the $45,000 proposed in the February 1986 notice, we believe that it would be preferable to propose an alternative floor for FY 1987 rather than adopt it now for FY 1986. In view of the greater total funding now available for social

services in FY 1986 we have decided to adopt a floor of $75,000, the same as last year's floor, rather than the $45,000 proposed in the February notice.

III. Allocation Formula

Of the funds available for FY 1986 for social services, $55,000,000 will be allocated to States in accordance with the formula specified below. A State's allowable allocation will be calculated as follows:

1. The total amount of funds determined by the Director to be available for this purpose; divided by—

2. The total number of refugees and entrants who arrived in the United States not more than three years prior to the beginning of the fiscal year for which the funds are appropriated, as shown by the ORR Refugee Data System. The resulting per capital amount will be multiplied by—

3. The number of refugees and entrants in item 2, above, in the State as of October 1, 1985, adjusted for estimated secondary migration.

The calculation above will yield the formula allocation for each State.

MAA incentive award supplements are allocated on the same 3-year population basis as that used in the social service formula. These funds will be made available contingent upon letters of assurance from States.

IV. Basis of Refugee and Entrant Population Estimates

The population estimates for the allocation of funds in FY 1986 are based on data on refugee arrivals from the ORR Refugee Data System, adjusted as of October 1, 1985, for estimated secondary migration. The data base includes refugees of all nationalities as well as Cuban and Haitian entrants resettled after September 30, 1982. Slight changes have been made in the estimated State refugee population totals since the publication of the proposed formula on February 27, 1986, to reflect new data received. Six States submitted convincing evidence of larger time-eligible populations than had been estimated previously, and their population estimates were revised accordingly.

For fiscal year 1986, ORR's formula allocations to the States for social services for refugees are based on the numbers of refugees who arrived, and on the numbers of entrants who arrived or were resettled, during the preceding three fiscal years: 1983, 1984, and 1985. Therefore estimates have been developed of the numbers of refugees and entrants with arrival or resettlement dates between October 1, 1982, and September 30, 1985, who are thought to be living in each State as of October 1, 1985. The population estimates for the FY 1986 allocations cover refugees of all nationalities and Cuban/Haitian entrants.

All States submitted data on their secondary in-migration on Form ORR-11 in time for use in adjusting these population estimates. The total reported migration was summed, yielding a net migration figure for each State. This figure, the minimum documented migration affecting each State, was applied to the total arrival figure, resulting in a revised population estimate. This estimate was converted into a percentage of the total 3-year refugee population. The percentage distribution was compared with the percentage distribution generated from the refugee child count done by the U.S. Department of Education in February 1985. Where a significant discrepancy between the two percentage distributions existed which could not be explained except by secondary migration, a further adjustment was made to the State's estimated population. The population estimates of 23 States were adjusted in this manner. Finally, each State's population was inflated by approximately 1.5 percent, to bring the sum of the State figures to the known national total.

Estimates were developed separately for refugees and entrants and then combined into a total estimated 3-year refugee/entrant population for each State. In doing so, ORR excluded from the populaton totals nationwide 3,567 refugees who were resettled subject to a full Federal match of $1,000 under ORR's matching-grant program with national voluntary refugee resettlement agencies. The social service funds available to serve non-matching-grant refugees are limited and are, therefore, directed to the areas where those refugees live.

Table 1 below, shows the estimated 3-year populations, as of October 1, 1985, of all refugees and entrants (col. 1), excluding those matching-grant refugees discussed above; the formula amounts which the population estimates yield (col. 2); the total allocation amounts after allowing for the minimum amounts (col. 3), and the amounts available as an incentive to States to use MMAs as service providers (col. 4).

TABLE 1.—ESTIMATED 3-YEAR REFUGEE/ENTRANT POPULATIONS OF STATES PARTICIPATING IN THE REFUGEE PROGRAM AND SOCIAL SERVICE FORMULA AMOUNTS AND ALLOCATIONS FOR FY 1986

State	Total population (1)	Formula amount (2)	Allocation (3)	MAA incentive allocation (4)
Alabama	939	$280,535	$280,535	$13,800

[FBA 225-72-2001]

Memorandum of Understanding With the Agricultural Marketing Service; Correction

AGENCY: Food and Drug Administration.

ACTION: Notice; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting an error in Attachment A to a memorandum of understanding (MOU) with the Agricultural Marketing Service (AMS) that sets forth the working arrangements being followed or adopted to enable the AMS and FDA to discharge their responsibilities relating to the inspection, sampling, and examination of imported dates and date material (51 FR 11480; April 3, 1986). In footnote one of Attachment A—Sample Collection Criteria, "180 pounds" is being corrected to read "100 pounds."

FOR FURTHER INFORMATION CONTACT: Walter J. Kustka, Intergovernmental and Industry Affairs Staff (HFC-50), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-44-1583.

SUPPLEMENTARY INFORMATION: In FR Doc. 86-7378 appearing at page 11480 in the Federal Register of Thursday, April 3, 1986, on page 11481 at the bottom of the second column in footnote 1, "180 pounds" is changed to read "100 pounds."

Dated: May 21, 1986.

Adam J. Trujillo,

Acting Associate Commissioner for Regulatory Affairs.

FR Doc. 86-11940 Filed 5-28-86; 8:45 am]

BILLING CODE 4160-01-M

Health Resources and Services Administration

National Organ Transplant Act; Grants for Organ Procurement Organizations

Correction

In FR Doc. 86-11418 beginning on page 18509 in the issue of Tuesday, May 20, 1986, make the following corrections:

1. On page 18509, in the third column:

a. In the SUMMARY, in the second line, "application" should read "applications".

b. In the DATE caption, in the second line, insert "by" after "received".

2. On page 18510, in the first column, in the FOR FURTHER INFORMATION CONTACT caption, in the first line, "Action Director" should read "Acting Director", and in the fourth line, the telephone number should read "301/443-7577".

3. On page 18511, in the first column:

a. Under the heading V. Evaluation Priorities, in the first line, "award" should read "awards", and in the 14th line, "exist" should read "exists".

b. In the footnote, in the first line, "operation" was misspelled.

4. On page 18511, in the second column:

a. Under the heading *1. Amount and Duration of Grants*, in the fifth line, "award" should read "awards".

b. In the 10th line from the bottom of the column, "fund" should read "funds".

BILLING CODE 1505-01-M

Public Health Service

Advisory Committees; Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory bodies scheduled to meet during the month of June 1986:

Name: Health Services Development Grants Review Subcommittee.

Date and Time: June 11-13, 1986, 8:30 AM.

Place: Linden Hill Hotel (Room to be announced), 5400 Pooks Hill Road, Bethesda, Maryland 20814.

Open June 11, 8:30 AM to 9:30 AM.

Closed for remainder of meeting.

Purpose: The Subcommittee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research and Health Care Technology Assessment (NCHSR).

Agenda: The open session of the meeting of June 11 from 8:30 AM to 9:30 AM will be devoted to a business meeting covering administrative matters and reports. There will also be a presentation by the Director, NCHSR. During the closed sessions, the Subcommittee will be reviewing research grant applications relating to the delivery, organization, and financing of health services. In accordance with the Federal Advisory Committee Act, Title 5, U.S.C., Appendix 2 and Title 5, U.S.C. 552b(c)(6), the Assistant Secretary for Health has made a formal determination that these latter sessions will be closed because the discussions are likely to reveal personal information concerning individuals associated with the applications. This information is exempt from mandatory disclosure.

Anyone wishing to obtain a Roster of Members, Minutes of Meeting, or other relevant information should contact Mr. Hoke S. Glover, National Center for Health Services Research and Health Care Technology Assessment, Stop 152, Park Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-3091.

Name: Health Care Technology Study Section

Date and Time: June 9-11, 1986, 8:30 AM.

Place: Bethesda Ramada Hotel, Ambassador Two Room, 8400 Wisconsin Avenue, Bethesda, Maryland 20814.

Open June 9, 8:30 AM to 10:00 AM.

Closed for remainder of meeting.

Purpose: The Committee is charged with the initial review of health research grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research and Health Care Technology Assessment (NCHSR).

Agenda: The open session from 8:30 AM to 10:00 AM on June 9 will be devoted to a business meeting covering administrative matters and reports. There will also be a presentation by the Director, NCHSR. The closed portion of the meeting will be devoted to review of health services research grant applications relating to the delivery, organization, and financing of health services. In accordance with the Federal Advisory Committee Act, Title 5, U.S.C., Appendix 2 and Title 5, U.S.C. 552b(c)(6), the Assistant Secretary for Health has made a formal determination that these latter sessions will be closed because the discussions are likely to reveal personal information concerning individuals associated with the applications. This information is exempt from mandatory disclosure.

Anyone wishing to obtain a Roster of Members, Minutes of Meeting, or other relevant information should contact Dr. Alan E. Mayers, National Center for Health Services Research and Health Care Technology Assessment, Stop 152, Park Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-3091.

Name: Health Services Research Review Subcommittee.

Date and Time: June 24-26, 1986, 1:00 PM.

Place: Hyatt Regency Hotel, Congressional Room, One Bethesda Metro Center, Bethesda, Maryland 20814.

Open June 25, 8:00 AM to 9:00 AM.

Closed for remainder of meeting.

Purpose: The Subcommittee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research and Health Care Technology Assessment (NCHSR).

Agenda: The open session of the meeting of June 25 from 8:00 AM to 9:30 AM will be devoted to a business meeting covering administration and reports. There will also be a presentation by the Director, NCHSR. During the closed sessions, the Subcommittee will be reviewing research grant applications relating to the delivery, organization, and financing of health services. In accordance with the Federal Advisory Committee Act, Title 5, U.S.C., Appendix 2 and Title 5, U.S.C. 552b(c)(6), the Assistant Secretary for Health has made a formal determination that these latter sessions will be closed because the discussions are likely to reveal personal information concerning individuals associated with the applications. This

information is exempt from mandatory disclosure.

Anyone wishing to obtain a Roster of Members, Minutes of Meeting, or other relevant information should contact Dr. Anthony Pollitt, National Center for Health Services Research and Health Care Technology Assessment, Stop 152, Park Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–3091.

Agenda items are subject to change as priorities dictate.

Dated: May 21, 1986.

John E. Marshall,

Director, National Center for Health Services Research and Health Care Technology Assessment.

FR Doc. 86–12037 Filed 5–28–86; 8:45 am]

BILLING CODE 4160–17–M

Social Security Administration

Social Security Benefits for the Aged, Blind, and Disabled; List of New or Improved Diagnostic Techniques for Determining Impairment Severity

SUMMARY: This notice provides a cumulative list of medical diagnostic and evaluative techniques which have come into use since 1970 and which may be reported and considered by the Social Security Administration (SSA) in determining a person's continuing eligibility for Social Security disability benefits and/or Supplemental Security Income benfits based on disability. This notice also provides the date each of these new or imrpoved techniques became generally available. These new of improved techniques may permit a more accurate diagnostic determination in a particular case than the techniques previously used in that case. Moreover, they may disclose that a person on the benefit rolls because of disability has a less severe or a more severe impairmnt than was previoulsy thought. These listed techniques are not equal in diagnostic accuracy or accuracy in determining the physical or mental deficit caused by an impairment. Additionally, diagnostic accuracy or accuracy in the measurement of physical or mental deficit may depend upon numerous factors which vary with the clinical situations in which the techniques are applied. However, a cessation of disability and termination of benefits may be required if medical findings from the technique(s)—(1) More accurately reflect a person's true clinical status than the technique(s) previously used to evaluate severity; and (2) Show that the person's impairment or combination of impairments are not as disabling as they had been considered to be and that he or she has the ability to perform substantial gainful activity (SGA).

Authority: Publication of the notice is required by the provisions of 20 CFR 404.1579(d)(2)(ii)(B), 404.1594(d)(3)(ii)(B), 416.994(b)(3)(iii)(B)(*2*), and 416.994(c)(3)(ii)(B)(*2*) contained in final regulations published on December 6, 1985 in the **Federal Register** at 50 FR 50115.

Comments: We welcome any comments concerning the medical diagnostic and evaluative techniques on the attached list, the clinical findings derived from these techniques, and their application to the evaluation of a person's physical or mental impairment. We will revise an item on this attached list at the time we publish the next periodic cumulative list if a comment shows the need for a change or correction.

ADDRESS: Comments should be submitted to the Acting Commissioner of Social Security, Department of Health and Human Services, P.O. Box 1585, Baltimore, Maryland 21203, or delivered to the Office of Regulations, Social Security Administration, 3–B–4 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235 between 8:00 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Lou Perkins, Disability Analyst, Office of Disability, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, (301) 594–6642.

SUPPLEMENTARY INFORMATION: Section 2 of Pub. L. 98–460 (The Social Security Disability Benefits Reform Act of 1984) amended sections 223(f), 216(i)(2)(D), and 1614(a) of the Social Security Act (the Act) by specifying a standard for determining whether a beneficiary's disability should cease. Subject to certain exceptions, this standard is that disability ceases only if there has been medical improvement in the beneficiary's impairment(s) that can be related to his or her ability to work and he or she can perform SGA. This notice concerns one of the exceptions to this standard; i.e., where new or improved diagnostic or evaluative techniques brought about by the changing methodologies and advances in medicine have improved the methods for measuring and documenting the effect of the various impairments on the ability to work. In accordance with sections 223(f)(3), 216(i)(2)(D), and 1614(a)(5)(C) of the Act (added to the Act by section 2 of Pub. L. 98–460), a beneficiary may be determined not entitled to benefits on the basis that his or her physical or mental impairment has ceased if substantial evidence demonstrates, *that on the basis of new or improved diagnostic techniques or evaluations,* the beneficiary's impairment or combination of impairments is not as disabling as it was considered to be at the time of the most recent prior decision that found the beneficiary to be disabled, and that—

(1) The beneficiary is able to enage in SGA; or

(2) The beneficiary receiving widow's or surviving divorced wife's benefits under section 202(e) of the Act or widower's or surviving divorced husband's benefits under section 202(f) of the Act, does not have an impairment or impairments of sufficient severity as to be considered under regulations prescribed by the Secretary, to be precluded from engaging in gainful work.

We published regulations for implementing the statutory provisions in section 2 of Pub. L. 98–460. (See 50 FR 50118 dated Decembe 6, 1985.) In §§ 404.1579(d)(2)(ii), 404.1594(d)(3)(ii), 416.994(b)(3)(iii)(B), and 416.994(c)(3)(ii)(B) of these regulations, we provide two methods for informing the public of the techniques we consider to be new or improved and how they are to be applied in determining a person's continuing eligibility for benefits.

The first method we will use to inform the public of new or improved techniques will involve the listing of impairments in 20 CFR Part 404, Appendix I of Subpart P of the regulations. When changes in these listings are published in the Federal Register, we will describe those changes made because new or improved medical techniques became generally available.

(The listing of impairments describes the medical impairments that we consider severe enough to prevent a person from performing gainful work.) These listing changes will be published in a Notice of Proposed Rulemaking (NPRM). After considering any public comments, a final rule including the listing changes will be published. This approach is consistent with our past practice. For example, the ECG exercise test included in the attached material, which is a primary basis for evaluating ischemic heart disease impairments, was included in the July 1979 revision of Appendix I. Also, we included the two following tests in a revised Appendix I published on December 6, 1985 in the Federal Register (see 50 FR 50068). First,

an exercise arterial blood gas study for documenting the severity of a gas exchange impairment in pulmonary conditions was included under listing 3.00 of Appendix I. Second, a serum drug level test for documenting the use of anti-convulsant medication when evaluating the severity of epilepsy was included under listing 11.00 of Appendix I.

The second method we will use to inform the public of new or improved techniques is to publish in the Federal Register at periodic intervals cumulative lists of the new or improved medical techniques that have become generally available and may affect our evaluation of the severity of impairments. We identify a new or improved medical technique to include in a published cumulative list in several ways. The technique results may have been presented as medical evidence by persons filing for Social Security benefits based on disability. The technique may have been discussed in medical literature by a medical professional group or studied by a government bureau. From these and other sources, we catalogue the new techniques and determine when they became generally available. By "generally available," we mean that a technique is no longer experimental or available only at centers of medical learning and research. Rather, the technique (with appropriate equipment) has become generally available to the appropriate practitioners throughout the country and the technique results are accepted by the medical community. We will omit from any published cumulative list the medical techniques generally available prior to 1970 since few, if any, claims should involve evaluation for continuing disability eligibility for periods before 1970.

The first of these periodic cumulative lists describing the new or improved techniques in effect since 1970, how they will apply in determining disability, and the date they became generally available, is attached.

Paperwork Reduction Act—This notice does not impose recordkeeping or reporting requirements on the public.

Dated: May 22, 1986.

Martha A. McSteen,

Acting Commissioner of Social Security.

Cumulative List of New or Improved Medical Techniques and Evaluations

I. Miscellaneous Tests Applicable to Several Body Systems

1. Radionuclide Imaging—(Generally available since September 1979.)

This technique uses radioactive tracers to visualize internal body structures which take up certain macromolecules which are radio labeled and thus are detectable by radionuclide scans. The commonly used scans include bone, cardiac, liver/spleen, and pancreatic. An abnormal nonhomogeneous scan is a nonspecific finding indicative of parenchymal liver disease. These scans are better techniques because they are essentially noninvasive ways of visualizing anatomical structures which, in conjunction with other techniques, may provide diagnostic evidence that would otherwise be unavailable.

2. Fiberoptic Endoscopy—(Generally available since September 1981.)

Fiberoptic endoscopy permits the visualization of internal linings of hollow organs accessible via the transoral or transanal route. It is a better diagnostic tool because it provides for the direct visualization of mucosal erosions, ulcers, mass lesions, fistulae, bleeding sources, and obstructive lesions in the gastrointestinal tract and bronchial tree. Biopsies may be obtained for histologic confirmation of lesions. Endoscopic retrograde cholangiopancreatography (ERCP) requires the injection of radiopaque dye into the pancreatic and biliary ducts through the endoscope and permits visualization of biliary or pancreatic ducts radiographically. The test is used for detection of lesions of the biliary and pancreatic ducts. Percutaneous transhepatic cholangiography is an alternative technique to visualize the biliary system. This procedure requires the injection of dye through a needle rather than through endoscopy. Which procedure is utilized depends on the available facilities.

3. Computerized Axial Tomography (CAT Scan)—(Generally available since January 1977 for CAT scan of the head; CAT scans for other parts of the body since September 1982.)

The CAT scan has made it possible to produce cross-sectional X-ray images of the internal structures of the body. The CAT scan not only provides the cross-sectional X-ray images but the sensitivity and resolution are so great that small differences in X-ray absorption can be detected so that it is possible to differentiate various types of soft tissues and detect small concentrations of contrast material within blood vessels. The CAT scan is most appropriate and sensitive for the detection of mass lesions, usually tumors. It is also possible to define anatomic defects such as cerebral infarcts, dilatation of ducts, and the presence of fluid in the pericardial, pleural, or peritoneal cavities. Its impact on the evaluation of impairments is to provide a noninvasive means for the detection of lesions in a multitude of organ systems.

4. Digital Subtraction Scanning or Angiography—(Generally available since January 1982.)

This is a special radiologic imaging technique which increases the radiodensity of blood over that of surrounding structures and, therefore, increases the resolution of the radiographic images of blood vessels. The scanning technique allows dye to be injected intravenously to visualize, by X-rays, the aorta, coronary, renal, and iliac vessels in order to estimate the blood flow in these vessels or the presence or absence of obstructive lesions. It is an improved technique because it can be performed on an outpatient basis with less risk and less discomfort to the patient than direct arteriography. In some cases, this technique will permit the exclusion of direct arteriography.

II. Cardiovascular

1. Coronary Arteriography—(Generally available since January 1970.)

Coronary arteriography demonstrates radiographically the anatomy of the coronary arteries. It provides direct documentation of the anatomic extent and distribution of obstruction of those arteries.

This is a better technique because it provides anatomical evidence for a diagnosis of coronary artery disease. During the test it is also possible to visualize the contracting heart to measure cardiac output and to evaluate, thereby, ventricular function.

2. ECG Exercise Test—(Generally available since January 1975).

The ECG exercise test produces a graphic tracing of the electric current produced by the polarization and depolarization of the heart muscle. It is a multi-stage, progressive, continuous test that measures cardiac current while the subject is at rest and is performing different levels of exercise. Variations from normal can be helpful in the diagnosis of ischemia, of exercise-induced arrhythmias and in the assessment of cardiac performace in certain clinical circumstances. It is improved technique over the Master Two-Step procedure which it replaced because the amount of exertion can be specifically quantified and the ECG monitoring during and after exercise provides greater specificity and sensitivity in the diagnosis of ischemia.

3. Multigated Radionuclide Ventriculography (MCUA Scan)—(Generally availble since September 1979).

The MUGA is a radionuclide imaging procedure otherwise known as multi-gated blood pool ventriculograph using, most commonly, technetium-99 sodium pertechnetate (99m/tc) as the tracer. The use of this technique at rest and after exercise provides for an evaluation of myocardial function and wall motion abnormalities indicative of ischemic heart disease. Left ventricular dysfunction and ejection fraction can be estimated from the test. When done at rest and after exercise, detection of exercise-induced wall motion abnormalities and/or a fall or failure of rise of ejection fraction is highly suggestive of severe heart disease. It is an improved technique because, without invasive cardiac catheterization, some gross estimate of cardiac dysfunction can be made by this test if there is a fall or failure to rise of ejection fraction, or exercise-induced dyskinesia, or akinesia of the left ventricular wall.

4. Thallium Perfusion Scan—(Generally availble since September 1979).

The thallium perfusion scan measures the perfusion of blood through the myocardium. The radionuclide thallium-201 is employed at the tracer. Resting and exercise radionuclide images are compared to detect fixed lesions present during rest and exercise and transient perfusion defects indicative of ischemia induced by exercise. As such, this is a better technque for disagnosis of ischemia and of old myocardial infarctions. Assessments of cardiac function can be made when this technque is performed in conjunction with an ECG exercise test.

5. M Mode Echocardiograph—(Generally available since August 1979).

This test records ultrasound waves reflected by heart structures. It is used to assess the motion and dimensions, of heart chambers, wall, and valves; but its reliability is far greter for left than right-sided heart structures (and only limited views of these structures are visualized at any one time). This technique is especially helpful in evaluating the mitral valve, the aortic valve, the thickness of the ventricular wall, and the presence or absence of fluid in the pericardial space. It is a better technique because it is noninvasive and may provide diagnostic evidence that would otherwise be unavailable.

6. Holter Reading—(Generally available since March 1980).

The Holter monitor produces continuous electrocardiographic tracings over extended periods of time so that ambulatory monitoring of patients is possible. The electrocardiograms can be correlated with the individual's activities and symptoms. Variations from normal are useful in the assessment of cardiac arrhythmias and of exertional or stress-induced ischemia. The fact that ECG tracings are produced over a long time period makes this an improved diagnostic technique for detection of arrhythmias and ischemia.

7. Venous Occlusive Plethysmography—(Generally available since October 1980).

Venous plethysmography records changes in volume of a limb after inflation and deflation of a cuff applied to the limb. The technique is useful in the noninvasive determination of the presence of deep vein thrombosis. In many situations this is a better technique because it can be diagnostic for deep vein thrombosis without resorting to a venogram, an uncomfortable procedure and one that is sometimes associated with noxious side effects (such as an allergic reaction or new thrombosis). In the absence of venographic results, this technique provides a better basis for diagnosis than clinical observations alone.

8. Doppler Vascular Ultrasonography—(Generally available since October 1980).

Doppler ultrasonography is based on the shift in ultrasound frequency that arises if an ultrasound beam is transmitted to and reflected from moving blood cells. The frequency of shift is proportional to the velocity of the blood flow. The Doppler ultrasound is used to determine systolic arterial pressues. This is applicable particularly in the distal lower extremities where the blood pressure cannot be measured accurately by the regular cuff method. Measurements of segmental pressures at various levels of the lower extremities help to distinguish between aorto-iliac, femoropopliteal, or combined disease. Doppler ultrasound can measure the ankle to brachial artery pressure index at rest and after exercise. This is an improved technique because it allows a quantitative, noninvasive determination of the severity of peripheral arterial disease. The estimate of severity is especially useful if this technique is repeated after the patient exercises.

9. Carotid Phonoangiography (CPA)—(Generally available since November 1980).

Carotid Phonoangiography (CPA) is used to record and evaluate alterations in the sound emanating from the carotid artery. It is a technical extension of auscultation and is used to assess the possibility of carotid obstruction. Although it can be used alone, its primary value is as an adjunct to hemodynamically based studies such as oculoplethysmography (OPG). It is an improved technique because it provides noninvasive evidence for the diagnosis of narrowing of the carotid artery.

10. 2 D Echocardiography—(Generally available since October 1984).

This test, like the M mode echocardiography (item 5 above), records ultrasound waves reflected by heart structures. It allows visualization over time of the cardiac structures and the great vessels (aorta and pulmonary artery). It displays the anatomic relationships of these structures as well as their movement during the cardiac cycle. It is better because it is noninvasive and, as such, may provide evidence which would otherwise be unavailable for detection of cardiac dysfunction.

11. Doppler Echocardiography—(Generally available since October 1984).

Doppler echocardiography records changing velocity of ultrasound waves generated by variations in blood flow in the heart and in the great vessels. It is used in the assessment of intracardiac and extracardiac shunts, valve flow, and cardiac output. It permits measurements of valvular gradients, quantitates valvular stenosis, and regurgitation and, in so doing, aids in estimating cardiac output. It is an improved technique because it provides data prevously obtainable only by catheterization of the heart or blood vessels, eliminating the need for catheterization in many patients.

12. Electrophysiologic Testing—(Generally available since October 1984).

Electrophysiologic testing requires cardiac catheterization and the placement of electrode catheters within selected portions of the heart. The application of an electrical current is used to assess the propensity of the patient to develop selected cardiac arrhythmias and of the value of various drugs in preventing these arrhythmias. It is a better technique because it may document severe, nonresponsive ventricular arrhythmias.

III. Gastrointestinal System Tests

Peritoneoscopy—(Generally available since September 1981).

This is an improved diagnostic technique because it permits the visualization of the peritoneal cavity and the peritoneal surfaces of intra-abdominal organs such as liver, ovaries, and uterus. It is useful in obtaining direct liver biopsies and in the detection

BEST COPY AVAILABLE

of intra-abdominal malignancies or metastases.

IV. Musculoskeletal

1. Arthroscopy—(Generally available since January 1972).

Arthroscopy is a diagnostic procedure for the evaluation of the integrity and status of joint spaces, mainly the knee, shoulder, ankle, and elbow. It would confirm the nature and extent of abnormalities of the joint involvement that may not be seen on ordinary x-ray and, thus, aid in evaluating severity. It is a better diagnostic tool because it permits direct visualization of the joint spaces and surrounding anatomical structures without extensive surgical intervention.

2. Arthrogram Studies—(Generally available since January 1978).

These are X-ray studies performed by injecting radiopaque material within specific joints such as shoulder, knee, hip, elbow, wrist, and ankle to more accurately delineate various pathological conditions and, because of this, is an improved technique.

3. Metrizamide Myelography with CAT Scan—(Generally available since January 1978).

This is a contrast-enhanced computed tomographic study of the spinal cord to determine the presence and degree of various pathologic conditions such as spinal stenosis, lateral recess syndrome, arachnoiditis, herniated disc, etc. This test provides a more sensitive and better resolution of X-ray images of the spinal structures.

V. Ophthalomology

1. Electro-Oculography (EOG)—(Generally available since January 1970).

Electro-oculography (EOG) is a diagnostic method to determine whether a disorder of the retinal pigment epithelium exists. It would apply to Listing 2.02 of Appendix I.

2. Visual Evoked Responses (VER)—(Generally available since January 1980).

The results of this testing technique may apply to Listing 2.02 of Appendix I. Stimulation of the retina changes the electrical activity of the cerebral cortex. A normal VER is a significant finding in the assessment of alleged reduction of visual acuity without demonstrable cause. It is an improved technique because it can be used to evaluate individuals who are unwilling or unable to cooperate in other techniques.

VI. Otolaryngology

1. Electronystagmogram (ENG)—(Generally available since January 1972).

Electronystagmography is an accepted, reliable, and accurate method for determining the status of a patient's vestibular functions. The test is based on recording eye movements based on the cornea-retinal potentials. The printed record of the nystagmus makes it available for comparison with subsequent tracings. It is a better technique for diagnosing true vertigo or labyrinthine disease.

2. Brainstem Auditory Evoked Response (BAER)—(Generally available since January 1972).

BAER is a technique of evoking production of electrical responses when stimulated by controlled sound. It is an improved technique because it is a valuable tool for assessing hearing when the test subject is incapable or unwilling to respond to auditory testing. The test is particularly useful in testing infants or young children.

3. All-Night Sleep Recordings for Diagnosis of Sleep Apnea—(Generally available since January 1978).

The parameters of interest that are usually monitored during sleep are as follows:

a. REM: Electro-oculogram of rapid eye movement to determine depth or stage of sleep.

b. Respirations: rate, tidal volumes, chest excursion.

c. ECG monitoring mainly for rate and arrhythmia.

d. Blood pressure (BP).

In particular cases, more comprehensive evaluations include:

a. Electroencephalogram (EEG).

b. Esophageal pressure.

c. Audiovisual taping.

d. Electromyogram (EMG).

e. Arterial blood gas analysis.

f. Oral and nasal respiration.

g. Chest and abdominal excursion.

The finding of obstructive sleep apnea under this comprehensive monitoring provides an improved diagnostic technique for evaluation of impairments of the cardiopulmonary system.

VII. Psychological Tests

1. Boston Diagnostic Aphasia Examination—(Generally available since January 1972).

A comprehensive examination of all language and speech functions. It is an improved technique because it provides more comprehensive and better organized quantitative data.

2. McCarthy Scales of Childrens' Abilities—(Generally available since January 1972).

Assesses motor and intellectual development of children 2½–8½ years of age. Yields 6 separate subscales, including a *General Cognitive Index* (GCI) which can be used as an Intelligence Quotient (IQ) score. It is a better technique because it is more current in terms of normative data.

3. Standford-Binet Intelligence Scale (Third Revision)—(Generally available since January 1973).

A measure of general intelligence for those aged 2 years and above. It provides a single overall IQ and there are no organized subtests or summary Verbal and Performance IQs. The measure is primarily verbal, especially at adult age levels. Because this test is more current in terms of normative data, it is an improvement over earlier tests.

4. Wechsler Intelligence Scale for Children-Revised (WISC–R)—(Generally available since January 1974).

Assesses a wide range of intellectual abilities in children ages 5 through 16. It yields a Verbal, Performance, and Full Scale IQ. This is an improved technique because it is more current in terms of normative data.

5. Wechsler Adult Intelligence Scale-Revised (WAIS–R)—(Generally available since January 1981).

Copyrighted and available for general use in 1981, it is an updated and renormed edition of the WAIS and, as such, is a better test. It assesses a wide range of intellectual abilities in those aged 16 through 74 and yields a Verbal, Performance, and Full Scale IQ.

6. Peabody Picture Vocabulary Test-Revised (PPVT–R)—(Generally available since January 1981).

An individually administered measure of hearing vocabulary for those aged 2 1/2 thru adulthood. It provides a quick estimate of verbal ability and scholastic aptitude. Because this revised test is more current in terms of normative data, it is a better technique.

7. Luria-Nebraska Neuropsychological Battery—(Generally available since January 1981).

A comprehensive neuropsychological test battery designed to assess the functioning of all major lobes of the brain. It is a better technique because it provides a low cost, portable, relatively brief alternative to the Halstead-Reitan Neuropsychological Battery.

8.a. Millon Behavioral Health Inventory—(Generally available since January 1982).

Yields information regarding a patient's style of relating to health professionals, problematic psychosocial attitudes and stressors, and psychosomatic aspects to physical complaints. It is an improved technique because it is more current, presents a more systematic approach, and is better organized.

BEST COPY AVAILABLE

8.b. Millon Adolescent Personality Survey—(Generally available since January 1982).

Developed to be compatible with the "Diagnostic and Statistical Manual of Mental Disorders; Third Edition" (DSM–III), this test assesses overall configuration of an adolescent's personality including coping style, expressed concerns, and behavioral patterns. It is an improved technique because of is compatability with the DSM–III.

8.c. Millon Clinical Multiaxial Inventory—(Generally available since January 1984).

Designed for the assessment of the DSM–III categories of personality disorders and clinical syndromes. Theory-derived constructs are quantitatively measured to suggest diagnoses and psychodynamics, as well as testable hypotheses about patient history and behavior. It is an improved technique because it assesses pathology in a format which can be readily used with the DSM–III.

9. Kaufman Test of Educational Achievement (K–TEA)—(Generally available since January 1983).

Assesses reading, spelling, and mathematical knowledge in children in grades 1 thru 12.

10. Kaufman Assessment Battery for Children (K–ABC)—(Generally available since January 1984).

This is a clinical instrument for the evaluation of preschool and elementary school children (2 1/2 thru 12 1/2 years of age). Developed from recent research and theory in neuropsychology and cognitive psychology, it assesses problem-solving ability using both simultaneous and sequential mental processes. It also includes an achievement scale which assesses acquired knowledge in reading and arithmetic. It is an improved technique because it generates data that coincides with recent research relating particular functions to parts of the brain.

11. The Scale of Independent Behavior—(Generally available since January 1984).

Assesses 14 critical areas of independent and adaptive behavior including self-care, motor, socialization and community independence skills.

The potential evaluation consequences of all the above psychological tests is a more accurate and objective adjudication based on standardized, validated instruments.

BILLING CODE 4160–11–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. I–86–136]

Combined Notice: Intent To Issue a Finding of No Significant Impact and Compliance With Executive Order 11988

The Department of Housing and Urban Development gives notice concerning the purposed Fairfield Village Subdivision, located in Harris County, Texas, and within the extraterritorial jurisdiction of the City of Houston, that: (1) It intends to issue a Finding of No Significant Impact (FONSI) based upon an Environmental Assessment (EA) for the project; and (2) provides an explanation of why the action is proposed to be partially located in a floodplain as required by Executive Order 11988 on Floodplain Management. Comments are solicited before the HUD-Fort Worth Regional Administrator makes a final determination whether to proceed without preparing an Environmental Impact Statement (EIS).

Description

The Friendswood Development Company of Houston, Texas, has filed an application with the Houston Office of the Department of Housing and Urban Development to accept the proposed 1,500 acre subdivision for mortgage insurance under section 203(b) of Title I of the National Housing act of 1934, as amended. The proposed subdivision is located in the northwest corner of Harris County, but is within the extraterritorial jurisdiction of the City of Houston. The tract is bordered on the south by U.S. Highway 290, approximately midway between the towns of Waller and Jersey City. The proposed subdivision, to be known as Fairfield Village, is a portion of a tract which was known as Nine Bar Ranch. When fully developed, the subdivision will provide housing for approximately 16,000 persons.

Purpose of FONSI Notice

Pursuant to HUD's environmental regulations, 24 CFR Part 50, an EA has been prepared by the HUD Houston Office to determine whether or not an EIS is required. It is the finding of the EA that there would be no significant impact upon the human environment and that the project is in compliance with the National Environmental Policy Act and related environmental laws and authorities cited at 24 CFR 50.4. Therefore, in accordance with the applicable regulations, a proposed FONSI has been prepared and a notice to the effect is hereby published. Pursuant to 40 CFR 1501.4(e)(2) of Council on Environmental Quality regulations, there will be a thirty (30) day comment period before HUD makes its final determination on the FONSI. Interested individuals, governmental agencies, and private organizations are invited to comment on the FONSI by the date and to the addresses set forth below.

Purpose of the Floodplain Notice

As required by Executive Order 11988, Floodplain Management, this notice shall serve as the second (final) notice explaining the Department's decision to approve the Fairfield Village Subdivision with the successful completion of the process described above. Public notice to this effect was published in the *Houston Chronicle* on March 16, 1986. The Harris County Water Control Improvement District No. 155 has approved a plan for reclaiming the area. A series of drainage channels has been designed to eliminate flooding from the subdivision. Application for a Final Letter of Map Amendment (FLOMA) will be made to the Federal Emergency Management Agency (FEMA) when all improvements have been completed. Until a FLOMA has been issued, flood insurance will be required on all residential properties shown to be within a designated 100-year floodplain by FEMA maps.

Additional Information and Comments

The EA which serves as the basis for the FONSI and supporting documentation are available for review until the close of the comment period at the HUD Houston Office and the Fort Worth Regional Office during regular business hours. Contacts concerning review should be made with Mr. James M. Wilson, Manager, HUD Houston Office, National Bank of Texas Building, 2211 Norfork, Suite 300, Houston, TX 77098–4096, Commercial Telephone No. (713) 229–3950 or FTS 526–7951, or L. J. Ramsbottom, Regional Environmental Officer, HUD Fort Worth Regional Office, 1600 Throckmorton Street, Fort Worth, TX 76113–2905, Commercial Telephone No. (817) 885–5482 or FTS 728–5428 (these are not toll-free commercial numbers).

Written comments on the FONSI should be submitted to the Forth Worth Regional Administrator, 1600 Throckmorton Street, P.O. Box 2905, Fort Worth, Texas 76113–2905 (Attention: Regional Environmental Officer) within thirty (30) days of the publication of this notice.

Dated: May 20, 1986.
Dorothy Williams,
Deputy Director, Office of Environment and Energy

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[A-21983]

Arizona; Public Land Exchange, Maricopa County, AZ

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of realty action, exchange of public lands in Maricopa County, Arizona.

SUMMARY: The following described public lands have been determined to be potentially suitable for exchange under Section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Gila and Salt River Meridian, Arizona

T. 1 N., R. 3 W.,
Secs. 5, 7;
T. 1 N., R. 4 W.,
Secs. 1, 11–14;
T. 1 N., R. 5 W.,
Sec. 27;
T. 2 N., R. 3 W.,
Secs. 4, 5, 8, 9, 14, 15, 17–22, 28–29, 33–35;
T. 2 N., R. 4 W.,
Sec. 1;
T. 2 N., R. 5 W.,
Secs. 1–10, 18, 19, 30;
T. 3 N., R. 4 W.,
Secs. 1, 11–14, 24, 25, 36;
T. 4 N., R. 4 W.,
Sec. 36;
T. 3 N., R. 5 W.,
Secs. 13–14, 23–26;
T. 5 N., R. 5 W.,
Secs. 6, 18–21, 28–32;
T. 1 S., R. 2 W.,
Secs. 8, 9, 12, 13, 24, 25, 30–32, 36;
T. 2 S., R. 2 W.,
Secs. 5, 6;
T. 1 S., R. 3 W.,
Secs. 34, 35.
Comprising 43,553.86 acres of public land.

Public lands to be transferred from the United States will be subject to the following reservations, terms and conditions.

1. A right-of-way for ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.

2. A reservation of all existing oil and gas leases until lease termination dates.

3. All valid existing rights, privileges and reservations of record on the date of patent issuance which would include rights-of-way and grazing permits.

A complete listing of legal descriptions for the lands listed in this Notice is available at the Phoenix District Office.

In accordance with the regulations of 43 CFR 2201.1(b), publication of this Notice will segregate the public lands described in this Notice from appropriation under the public land laws, including the mining laws, but not the mineral leasing laws or Geothermal Steam Act.

This Notice will cancel and replace the segregative effects on all previously published Notices on the public lands described herein.

The segregation of the above-described lands shall terminate upon issuance of a document conveying title to such lands or upon publication in the Federal Register of a notice of termination of the segregation or the passage of two years from the date of publication, whichever occurs first.

For a period of forty-five (45) days, from date of publication, interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Dated: May 20, 1986.
Marlyn V. Jones,
District Manager.

BILLING CODE 4310-84-M

Susanville District Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior; Susanville District Advisory Council, Susanville, California 96130.

ACTION: Postponement of District Advisory Council Meeting.

SUMMARY: Notice is hereby given that the Susanville District Advisory Council Meeting, scheduled for May 13–14, 1986, as noted in the Federal Register April 24, 1986, Vol. 51, No. 79, page 15547 is postponed. The new dates for the meeting are June 18–19, 1986.

FOR FURTHER INFORMATION CONTACT: Louisa Beld, Public Affairs Officer, Bureau of Land Management, 705 Hall Street, Susanville, CA 96130, 916/257-5381.

C. Rex Cleary,
District Manager.

BILLING CODE 4310-84-M

[W-49234]

Wyoming; Proposed Reinstatement of Terminated Oil and Gas Lease

Pursuant to the provisions of Pub. L. 97-451, 96 Stat. 2462-2466, and Regulation 43 CFR 3108.2-3(a) and (b)(1), a petition for reinstatement of oil and gas lease W-49234 for lands in Carbon County, Wyoming was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $7.00 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500.00 administrative fee and $106.25 to reimburse the Department for the cost of this Federal Register notice.

The lessee has met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease W-49234 effective March 1, 1985, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Andrew L. Tarshis,
Chief, Leasing Section.

BILLING CODE 4310-22-M

Colorado; Filing of Plats of Survey

May 19, 1986.

The plat of survey of the following described land will be officially filed in the Colorado State Office, Bureau of Land Management, Denver, Colorado, effective 10:00 a.m., May 19, 1986.

The supplemental plat showing amended lottings in section 30, T. 4 S., R. 96 W., Sixth Principal Meridian, Colorado, was accepted May 2, 1986.

This plat was prepared to meet certain administrative needs of this Bureau.

The plat, in three sheets, of the survey of the following described land will be officially filed in the Colorado State Office, Bureau of Land Management, Denver, Colorado, effective 10:00 a.m., July 10, 1986.

The plat, in three sheets, representing the dependent resurvey of portions of the east and south boundaries, and subdivisional lines, the segregation of certain mineral surveys, and the survey of the subdivision of section 36, T. 44 N. R. 6 W., New Mexico Principal Meridian, Colorado; the Dependent

resurvey of Capitol City Townsite and the segregation of certain mineral surveys in Unsurveyed Tps. 43 N., Rs. 5 and 6 W., New Mexico Principal Meridian, Colorado, Group No. 758, was accepted May 9, 1986.

This survey was executed to meet certain administrative needs of this Bureau.

All inquiries about this land should be sent to the Colorado State Office, Bureau of Land Management, 2020 Arapahoe Street, Denver, Colorado 80205.

Jack A. Eaves,

Acting Chief Cadastral Surveyor for Colorado.

[FR Doc. 86-11964 Filed 5-28-86; 8:45 am]

BILLING CODE 4310-84-M

Butte District, MT; District Advisory Council Meeting

Notice is hereby given in accordance with Pub. L. 94-579 and 43 CFR Part 1780 that a meeting of the Butte District Advisory Council will be held Thursday and Friday, June 26 and 27, 1986.

The meeting will begin at 1 p.m., June 26 in the Butte District Office conference room, 106 North Parkmont (Industrial Park), Butte Montana. The agenda will include (1) recreation access to public lands, (2) the district's land adjustment program, (3) surface management (3809) regulation administration, (4) the Centennial Mountains wilderness study, (5) a discussion of the district's range program, including the Bureau's riparian initiative, weed control, Cooperative Management Agreements and grazing fees, (6) the District's reforestation program, (7) Peregrine Falcon reintroduction efforts, and (8) hazardous waste management.

The meeting is open to the public. Interested persons may make oral statements to the council or file written statements for the council's consideration. Anyone wishing to make an oral statement should make advance arrangements with the district manager.

Summary minutes of the meeting will be maintained in the district office and will be available for public inspection and reproduction during regular business hours within 30 days following the meeting.

Dated: May 20, 1986.

Jack A. McIntosh,

District Manager, Butte District.

[FR Doc. 86-11974 Filed 5-28-86; 8:45 am]

BILLING CODE 4310-DN-M

Minerals Management Service

Development Operations Coordination Document; Exxon Co.

AGENCY: Minerals Management Service.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Exxon Company, U.S.A. has submitted a DOCD describing the activities it proposes to conduct on Leases OCS-G 1084 and 1091, Blocks 74 and 92, respectively, West Delta Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Grand Isle, Louisiana.

DATE: The subject DOCD was deemed submitted on May 18, 1986.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Rules and Production, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Phone (504) 838-0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected States, local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: May 19, 1986.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

Development Operations Coordination Document; Taylor Energy Co.

AGENCY: Minerals Management Service.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Taylor Energy Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 1187, Block 27, South Marsh Island Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Intracoastal City, Louisiana.

DATE: The subject DOCD was deemed submitted on May 19, 1986.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Rules and Production, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Phone (504) 838-0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected States, local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: May 19, 1986.

BILLING CODE 4310-MR-M

Royalty Management Advisory Committee; Cancellation of Meeting

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of cancellation of meeting.

On May 8, 1986, a notice was published in the Federal Register (51 FR

17108), announcing a meeting of the Royalty Management Advisory Committee on June 3, and June 4, 1986, at the Clarion Hotel, 3203 Quebec, Denver, Colorado to receive reports from six technical working panels.

The purpose of this notice is to announce cancellation of that meeting, which will be rescheduled at a later date.

The date and location of the rescheduled meeting will be announced in a subsequent Federal Register notice.

Dated: May 23, 1986.

William D. Bettenberg,

Director, Minerals Management Service.

Bureau of Reclamation

[INT-FES 86-10]

Grand Valley Unit, Stage Two Development, Colorado River Basin Salinity Control Project; Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department of the Interior has prepared a final environmental statement on a proposed salinity control project that would reduce salt loading to the Colorado River system by lining canal laterals in Mesa County in western Colorado.

Copies are available for inspection at the following locations:

Director, Office of Environmental Affairs, Department of the Interior, Bureau of Reclamation, Room 7423, Washington, DC 20240, Telephone: (202) 343-4091

Document Systems Management Branch, Library Section, Code D-823, Engineering and Research Center Library, Room 450, Denver, Colorado 80225, Telephone: (303) 236-6963, Hours: 7:30 a.m.-4:00 p.m.

Regional Director, Bureau of Reclamation, Upper Colorado Regional Office, 125 South State Street, P.O. Box 11568, Salt Lake City, Utah 84147, Telephone: (801) 524-5592

Grand Junction Projects Office, Bureau of Reclamation, 2597B 3/4 Road, P.O. Box 1869, Grand Junction, Colorado 81502, Telephone: (303) 242-8621

Single copies of the statement may be obtained on request to the Director, Office of Environmental Affairs, the Regional Director, or the Grand Junction Projects Office at the above addresses. Copies also will be available for inspection in libraries in the project vicinity.

Dated: May 23, 1986.

James E. Cook,

Acting Commissioner.

[FR Doc. 86-12026 Filed 5-28-86; 8:45 am]

BILLING CODE 4310-09-M

San Joaquin Valley Conveyance Project, California; Intent To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior's Bureau of Reclamation proposes to prepare an environmental impact statement for the San Joaquin Valley Conveyance Project, which would be located in portions of Merced, Madera, Fresno, Tulare, Kings and Kern Counties, California. The purpose of the project is to provide an additional water supply to the San Joaquin Valley to relieve the present groundwater overdraft, expected to increase to 2 million acre-feet per year by the year 2010. Other objectives of the project include drainage and fish and wildlife enactment.

Alternatives under consideration include various canal alignments, new construction and enlargements of existing canals. Five alternatives, including "No Action", will be evaluated:

(1) *Enlarged Westside/Mid-Valley Canal.* Under this alternative, the Bureau would proceed with the construction of two canals out of the Mendota Pool. The north branch would go from the Mendota Pool to a terminus at the Chowchilla River. The second and third stages of the project would enlarge the Delta-Mendota Canal (DMC) from O'Neill Forebay to Mendota Pool and either enlarge the California Aqueduct or the DMC from the Delta to O'Neill Forebay. The project would allow a total of 2,000 cfs of water to move through the facilities.

(2) *East Side Canal.* Under this alternative, and East Side Canal from the Delta to a terminus at the Kern River would be built. The maximum capacity of the canal would be 3,000 cfs.

(3) *East Side Canal to San Joaquin River/Mid-Valley Canal.* This alternative would combine features of Alternatives 1 and 2. An East Side Canal and the main branch of Mid-Valley Canal would be constructed. The capacity of the project would be 2,000 cfs.

(4) *Reduced East Side/Mid-Valley Canal.* Both an East Side Canal and a Mid-Valley Canal would be constructed. The capacity of the main branch would be less than in Alternative 3, but the difference would be made up by extending the East Side Canal to the White River. Capacity would be 2,000 cfs.

A workshop will be held to solicit information from interested public entities and persons to assist in determining the scope of the environmental impact statement and the significant issues related to the proposed alternatives. The workshop will be held on June 17, 1986, at 7:30 p.m., at the Convention Center, Apricot Room, 700 M Street, Fresno, California.

The contact person for the environmental impact statement is: Bill Payne, Environmental Specialist, Mid-Pacific Region (MP-750), 2800 Cottage Way, Sacramento, CA 95825, telephone (916) 978-5130.

Dated: May 23, 1986.

James E. Cook,

Acting Commissioner.

BILLING CODE 4310-09-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-143]

Certain Amorphous Metal Alloys and Amorphous Metal Articles; Decision to Extend Period for Determining Whether to Review an Initial Advisory Opinion

AGENCY: U.S. International Trade Commission.

ACTION: Extension of period for determining whether to review an initial advisory opinion.

SUMMARY: The Commission has extended from May 19, 1986, to June 5, 1986, its administrative deadline for determining whether to review the March 3, 1986, initial advisory opinion issued by the presiding administrative law judge in the above-captioned investigation.

FOR FURTHER INFORMATION CONTACT: P.N. Smithey, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0350.

SUPPLEMENTARY INFORMATION:

Background. Investigation No. 337-TA-143, entitled *Certain Amorphous Metal Alloys and Amorphous Metal Articles,* was conducted to determine whether there was a violation of section 337 of the Tariff Act of 1930 by the importation or sale of certain amorphous metal alloys and amorphous metal articles from Japan and West Germany. (*See* 48 FR 15963 (Apr. 13, 1983); 48 FR 43106 (Sept. 21, 1983); 49 FR 4047 (Feb. 1, 1984).) After finding a violation in the

importation of the accused articles, the Commission issued a general exclusion order, which prohibited the entry of amorphous metal articles manufactured abroad by casting processes disclosed in claims 1, 2, 3, 5, 6, or 12 of complainant Allied Corp.'s U.S. Letters Patent No. 4,221,257 (the '257 patent). (*See* 49 FR 42803 (Oct. 24, 1984); USITC Publication 1664 (October 1984).

In response to motions filed by certain respondents, the Commission currently is conducting advisory opinion proceedings to determine whether the modified casting processes of those respondents would infringe the '257 patent. (*See* Motion No. 143–86"C" filed by respondents Hitachi Metals, Ltd., and Hitachi Metals International, Ltd.; Commission Action and Order of July 28, 1985; Motion No. 143–89"C" filed by respondent Vacuumschmelze GmbH; Commission Action and Order of Sept. 11, 1985.) On March 3, 1986, the presiding administrative law judge issued an initial advisory opinion (IAO) stating that the respondents' modified processes are noninfringing.

The previously scheduled administrative deadline for the Commission to determine whether to review the IAO was the close of business on Monday, May 19, 1986. (*See* 50 FR 9534 (Mar. 19, 1986).) The Commission has determined that this administrative deadline will be extended to the close of business on Thursday, June 5, 1986.

Written submissions. Further submissions from the parties will not be accepted during the extended period for determining whether to review the IAO.

Public inspection. All nonconfidential documents filed in the current proceedings and the original investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0471. Hearing-impaired individuals are advised that information concerning the current proceedings and the original investigation can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

Issued: May 19, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337–TA–247]

Certain Sickle Guards; Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 337.

SUMMARY: Notice is hereby given that a complaint and a motion for temporary relief were filed with the U.S. International Trade Commission on April 24, 1986, pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), on behalf of National-Standard Company, 1618 Terminal Road, Niles, Michigan 49120. Supplements to the complaint were filed on May 9 and May 13, 1986. The complaint as supplemented alleges unfair methods of competition and unfair acts in the importation of certain sickle guards into the United States, and in their sale, by reason of alleged: (1) Direct, contributory, and induced infringement of claims 1, 4, 5, 7, and 8 of U.S. Letters Patent 3,978,645; (2) common law trademark infringement; (3) false designation of origin; and (4) passing off. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complainant requests that the Commission institute an investigation, conduct temporary relief proceedings, and issue a temporary exclusion order prohibiting importation and sale of the articles in question into the United States, except under bond, and temporary cease and desist orders. After a full investigation, the complainant requests that the Commission issue a permanent exclusion order and permanent cease and desist orders.

FOR FURTHER INFORMATION CONTACT: Robert D. Litowitz, Esq., or Gary L. Kaplan, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone 202–523–0083 and 202–523–1088, respectively.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 201.12).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on May 20, 1986, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation be instituted to determine whether there is a violation of subsection (1) of section 337 in the unlawful importation of certain sickle guards into the United States, or in their sale, by reason of alleged: (1) Direct, contributory, and induced infringement of claims 1, 4, 5, 7, and 8 of U.S. Letters Patent 3,978,645; (2) common law trademark infringement; (3) false representation of source; and (4) passing off, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) Pursuant to § 210.24(e) of the Commission's rules, the motion for temporary relief under subsections (e) and (f) of section 337 of the Tariff Act of 1930, which was filed on April 24, 1986, shall be forwarded to the presiding administrative law judge for an initial determination pursuant to § 210.53(b) of the rules;

(3) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—

National-Standard Company, 1618 Terminal Road, Niles, Michigan 49120

(b) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Kimber Die and Tool Company Ltd., Woodhall Works, Foxoak Street, Cradley Health, Warley, West Midlands, B64 5DH England

P.D. Raespe Sohne GMBH & Company, 565 Solingen 1, Stocken 17, Federal Republic of Germany

Busatis-Werke GMBu & Company, KG, 5630 Remscheid-Lennep, Postfach 5609, Huckeswagen, Federal Republic of Germany

OMNI-USA, Inc., 16236 San Dieguito Road, P.O. Box 8788, Rancho Santa Fe, California 92067
Herschel Corporation, 1301 N. 14th Street, Indianola, Iowa 50125
MCM Industries, 16401 S. Frontage Road, Oak Forest, Illinois 60452
Stocker & Son, Inc., 34 Suydam Lane, Bayport, New York 11705
Veldmaster, Inc., Subsidiary, Union Steel Corp. of South Africa, 34 S. Broadway, White Plains, New York 10601
Southern Supply Company, Inc., 8351 Moberly Lane, P.O. Box 270669, Dallas, Texas 75227
Omni Supply Inc., 8351 Moberly Lane, P.O. Box 270669, Dallas, Texas 75227

(c) Robert D. Litowitz, Esq., and Gary L. Kaplan, Esq., Office of Unfair Import Investigations, United States International Trade Commission, 701 E Street NW., Room 128, Washington, D.C. 20436, shall be the Commission investigative attorneys, party to this investigation; and

(4) For the investigation so instituted, Janet D. Saxon, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding administrative law judge. Pursuant to § 210.24(e) of the Commission's Rules of Practice and Procedure, the presiding administrative law judge shall determine as expeditiously as possible whether or not temporary relief proceedings should be instituted.

Responses must be submitted by the named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules (19 CFR 201.16(d) and 210.21(a)), such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Responses to the motion for temporary relief may be submitted by the named respondents in accordance with 210.24(e)(3) of the Commission's rules. Any such responses must be filed within 20 days after service of the motion. Extensions of time for submitting responses to the complaint and/or the motion for temporary relief will not be granted unless good cause therefore is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint and motion for temporary relief, except for any confidential information contained therein, are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202-523-0471. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

By order of the Commission.

Issued: May 22, 1986.

BILLING CODE 7020-02-M

[Investigation No. 701-TA-274 (Preliminary)]

Softwood Lumber From Canada

AGENCY: United States International Trade Commission.

ACTION: Institution of a preliminary countervailing duty investigation and scheduling of a conference to be held in connection with the investigation.

SUMMARY: The Commission hereby gives notice of the institution of preliminary countervailing duty investigation No. 701-TA-274 (Preliminary) under section 703(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Canada of softwood lumber, rough, dressed, or worked (including softwood flooring classified as lumber), provided for in items 202.03 through 202.30, inclusive, softwood siding, not drilled or treated, provided for in items 202.47 through 202.50, inclusive; other softwood lumber and siding, provided for in item 202.52; item 202.54; and softwood flooring provided for in item 202.60 of the Tariff Schedules of the United States, which are alleged to be subsidized by the Government of Canada. As provided in section 703(a), the Commission must complete preliminary countervailing duty investigations in 45 days, or in this case by July 3, 1986.

For further information concerning the conduct of this investigation and rules of general application, consult the Commission's Rules of Practice and Procedure, part 207, subparts A and B (19 CFR Part 207), and part 201, subparts A through E (19 CFR Part 201).

EFFECTIVE DATE: May 20, 1986.

FOR FURTHER INFORMATION CONTACT: Jim McClure (202-523-1793), Office of Investigations, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

SUPPLEMENTARY INFORMATION:

Background.—This investigation is being instituted in response to a petition filed on May 19, 1986 by the Coalition for Fair Lumber Imports, a group of U.S. softwood lumber manufacturers and associations representing U.S. softwood lumber manufacturers and foresters.

Participation in the investigation.—Persons wishing to participate in the investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules (19 CFR 201.11), not later than seven (7) days after publication of this notice in the Federal Register. Any entry of appearance filed after this date will be referred to the Chairwoman, who will determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Service list.—Pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)), the Secretary will prepare a service list containing the names and address of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance. In accordance with §§ 201.16(c) and 207.3 of the rules (19 CFR 201.16(c) and 207.3), each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service.

Conference.—The Commission's Director of Operation has scheduled a conference in connection with this investigation for 9:30 a.m. on June 10, 1986 at the U.S. International Trade Commission Building, 701 E Street NW., Washington, DC. Parties wishing to participate in the conference should contact Jim McClure (202-523-1793) not

later than June 5, 1986 to arrange for their appearance. Parties in support of the imposition of countervailing duties in this investigation and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference.

Written submission.—Any person may submit to the Commission on or before June 12, 1986 a written statement of information pertinent to the subject of the investigation, as provided in § 207.15 of the Commission's rules (19 CFR 207.15). A signed original and fourteen (14) copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the rules (19 CFR 201.8). All written submission except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired must be submitted separately. The envelope and all pages of such submission must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6).

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.12 of the Commission's rules (19 CFR 207.12).

By order of the Commission.

Issued: May 20, 1986.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[332-221]

The Effects of Eximbank Financing Programs on U.S. Industries and Employment

AGENCY: United States International Trade Commission.

ACTION: Termination of investigation.

SUMMARY: The Commission, following receipt on October 11, 1985, of a Congressionally mandated request from the Export-Import Bank of the United States (Eximbank), on December 31, 1985, instituted investigation No. 332-221 under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)). The purpose of the investigation was to assess the impact of the Bank's activities on industries and employment in the United States.

On February 3, 1986, the Commission received a written request from Eximbank Chairman Draper to defer further work on the investigation due to new budgetary constraints at Eximbank, which do not permit funding of the study. In response to Chairman Draper's request, the Commission has terminated the subject investigation. The request for termination of work on the study also indicated that Eximbank hoped to provide funding for the study in a future budget and would notify the Commission when Eximbank could again request that the investigation move forward.

Notice of the institution of the investigation was published in the **Federal Register** of January 8, 1986 (51 FR 787).

Effective Date: May 15, 1986.

Issued: May 20, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigations Nos. 701-TA-273 (Preliminary) and 731-TA-320-325 (Preliminary)]

Certain Unfinished Mirrors From Belgium, the Federal Republic of Germany, Italy, Japan, Portugal, Turkey, and the United Kingdom

Determination

On the basis of the record [1] developed in the subject investigations, the Commission determines,[2] pursuant to section 703(a) of the Tariff Act of 1930, that there is no reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Turkey of unfinished glass mirrors, 15 square feet and over in reflecting area, provided for in item 544.54 of the Tariff Schedules of the United States, which are allegedly being subsidized. The Commission also determines,[3] pursuant to section 733(a) of the Act, that there is a reasonable indication that an industry in the United States is materially injured by reason of such imports from Belgium, the Federal Republic of Germany, Italy, Japan, Portugal, and the United Kingdom, which are allegedly being sold at less than fair value (LTFV).

Background

The Commission instituted these investigations on April 1, 1986, following the receipt of a petition from the National Association of Mirror Manufacturers, Potomac, MD, which alleged that subsidized imports of the above articles from Turkey and LTFV imports from Belgium, the Federal Republic of Germany, Italy, Japan, Portugal, and the United Kingdom are being sold in the United States and that an industry in the United States is materially injured and threatened with material injury by reason of such imports. Notice of the institution of the Commission's investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of April 9, 1986 (51 FR 12221). The conference was held in Washington, DC, on April 23, 1986, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determinations in these investigations to the Secretary of Commerce on May 16, 1986. The Views of the Commission are contained in USITC Publication 1850 (May 1986), entitled "Certain Unfinished Mirrors from Belgium, The Federal Republic of Germany, Italy, Japan, Portugal, Turkey, and The United Kingdom: Determinations of the Commission in Investigation No. 701-TA-273 (Preliminary) and Determinations of the Commission in Investigations Nos. 731-TA-320 through 325 (Preliminary), Together With the Information Obtained in the Investigations."

By order of the Commission.

Issued: May 19, 1986.

DEPARTMENT OF LABOR

Employment and Training Administration

Final Planning Estimates for Program Year (PY) 1986 for Basic Labor Exchange Activities Under the Wagner-Peyser Act.

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice announces the final planning estimates for Program Year (PY) 1986 (July 1, 1986, through June 30, 1987) for basic labor exchange activities provided under the Wagner-Peyser Act.

FOR FURTHER INFORMATION CONTACT: Richard C. Gilliland, Director, United States Employment Service (Attention: TEES) 601 D Street, NW., Washington, DC 20213. Telephone: 202-376-6750.

SUPPLEMENTARY INFORMATION: In accord with section 6(b)(5) of the Wagner-Peyser Act, the Employment and Training Administration is publishing final estimates for each State's projected allotment for Program Year (PY) 1986 (July 1, 1986, through June 30, 1987). Preliminary planning estimates were published in the Federal Register on March 11, 1986. 51 FR 8373. The total amount of funds currently available for distribution to States for public employment service activities is $792,310,000 less $34,065,000 sequestered from the Fiscal Year (FY) 1986 appropriation, as mandated by the Balanced Budget and Emergency Deficit Control Act of 1985 (Pub. L. 99-177). An additional. $14,000,000 is being witheld to finance postage costs associated with the conduct of employment service activities; and $3,911,000 is being withheld to reflect a proposed reduction in the Department of Labor's trust fund authority, pending before Congress. Funds will be distributed in accord with formula criteria established in section 6(a) and (b) of the Wagner-Peyser Act. Civilian labor force (CLF) and unemployment data for Calendar Year 1985 were used in making the formula calculations.

The Secretary of Labor reserved three percent of the total available funds to assure that each State will have sufficient resources to maintain statewide employment service activities. In accordance with this provision, $22,208,720 has been set aside for distribution through the same administrative formula used since the Wagner-Peyser Act was amended by Pub. L. 97-177. See 51 FR 8373 (March 11, 1986); and 51 FR 2589 (January 17, 1986). The three percent distribution is included in the total allotment.

Of this total, $9,347,049 is allotted to thirteen States whose relative share decreased and which have a CLF below one million and are below the median CLF density. These States are held harmless at 100 percent of their PY 1985 relative share of resources. The remaining $12,859,671 is distributed to States losing in relative share from PY 1985 but who do not meet the CLF size and density criteria.

Signed at Washington DC, on May 12, 1986.

Roberts T. Jones,

Deputy Assistant Secretary of Labor.

BILLING CODE 4510-30-C

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Agency Records Schedules

AGENCY: National Archives and Records Administration, Office of Records Administration.

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes a notice at least monthly of all agency requests for records disposition authority (records schedules) which include records being proposed for disposal or which reduce the records retention period for records already authorized for disposal. The first notice was published on April 1, 1985. Records schedules identify records of continuing value for eventual preservation in the National Archives of the United States and authorize agencies to dispose of records of temporary value. NARA invites public comment on proposed records disposals as required by 44 U.S.C. 3303(a).

DATE: Comments must be received in writing on or before July 28, 1986.

ADDRESS: Address comments and requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Archives and Records Administration, Washington, DC 20408. Requesters must cite the control number assigned to each schedule when requesting a copy. The contol number appears in parenthesis immediately after the title of the requesting agency.

SUPPLEMENTARY INFORMATION: Each year U.S. Government agencies create billions of records in the form or paper, film, magnetic tape, and other media. In order to control the accumulation of records, Federal agencies prepare records schedules which specify when the agency no longer needs them for current business and what happens to the records after the expiration of this period. Destruction of the records requires the approval of the Archivist of the United States, which is based on a thorough study of their potential value for future use. A few schedules are comprehensive; they list all the records of an agency or one of its major subdivisions. Most schedules cover only one office, or one program, or a few series of records, and many are updates of previously approved schedules.

This public notice identifies the Federal agencies and their appropriate subdivisions requesting disposition authority, includes a control number assigned to each schedule, and briefly identifies the records scheduled for disposal. The complete records schedule contains additional information about the records and their disposition. Additional information about the disposition process will be furnished with each copy of a records schedule requested.

Schedules Pending Approval

1. Department of the Air Force, Directorate of Administration (N1–AFU–86–40). Medical Quality Assurance (QA) Records

2. Department of the Army, Records Management Operations Office (N1–AU–86–50). Reproduction manuscript cancellation files.

3. Department of the Army, Centers (N1–338–86–6). Facilitative records of US Army Centers, ca. 1950–85 (schedule provides for permanent retention of historically valuable Center records).

4. Department of the Army, Boards (N1–338–86–7). Facilitative records of U.S. Army Boards, ca. 1950–85 (schedule provides for permanent retention of historically valuable Board records).

5. Department of the Army, Tank, QM, Transportation Center/Commands (N1–338–86–8). Facilitative records of U.S. Army Center/Commands, ca. 1950–85 (schedule provides for permanent retention of historically valuable Center/Commands records).

6. Departments of the Army and the Air Force, Army and Air Force Exchange Service, Administration Division (N1–334–86–1). Administrative and operational records.

7. Farm Credit Administration (N1–103–86–1). Individual association case files including administrative correspondence, charters, bylaws, organization papers, and stockholder disclosure information.

8. U.S. General Accounting Office, Office of Civil Rights (NC1–217–85–1). Records relating to personnel matters, including merit selection, noncompetitive promotions, equal employment opportunity, discrimination complaints, adverse action cases, and other matters.

9. Department of the Interior, National Park Service (NC1–79–85–1). Comprehensive schedule covering headquarters and field records of the U.S. Park Police.

10. Department of Justice, Community Relations Service, Cuban and Haitian Entrant Program NC1–379–85–2). Grant case and policy files, entrant and unaccompanied minor case files, and program case and procedural files.

11. Department of State, Assistant Secretary, Office of the Comptroller (N1–59–86–3). General subject files concerning budgetary and administrative activities, travel vouchers, internal control, financial plans, and related materials.

Dated: May 21, 1986.

Frank G. Burke,

Acting Archivist of the United States.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[86–38]

Intent To Grant Limited Exclusive Patent Licenses; HealthMate, Inc., et al.

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Intent to Grant Limited Exclusive Patent Licenses.

SUMMARY: NASA hereby gives notice of intent to grant to HealthMate, Inc., of Northbrook, Illinois, and Power Controls International Pty., Ltd., of Sydney, Australia limited, exclusive, revocable licenses to practice the following patented inventions in Australia, Japan, Hong Kong and Singapore. The inventions are the foreign counterparts of the nonradioactive isotope version of U.S. Patent No. 4,142,101 for a "Low Intensity X-Ray and Gamma-Ray Imaging Device," which issued on February 27, 1979; U.S. Patent No. 4,510,476 for a "High Voltage Isolation Transformer," which issued on January 9, 1985; U.S. Patent No. 4,517,472 for a "High Voltage Power Supply," which issued on May 14, 1985; and U.S. Patent No. 4,521,688 for a "Three Dimensional and Tomographic Imaging Device for X-Ray and Gamma-Ray Emitting Objects," which issued on June 4, 1985. The proposed limited exclusive licenses will be for a limited number of years and will contain appropriate terms and conditions to be negotiated in accordance with the NASA Patent Licensing Regulations, 14 CFR Part 1245, Subpart 2. NASA will negotiate the final terms and conditions and grant the limited exclusive licenses unless, within 60 days of the date of this Notice, the Director of Patent Licensing receives written objections to the Grant, together with supporting documentation. The Director of Patent Licensing will review

all written responses to the Notice and then recommend to the Associate General Counsel (Intellectual Property) whether to grant the limited exclusive licenses.

DATE: Comments to this Notice must be received by July 28, 1986.

ADDRESS: National Aeronautics and Space Administration, Code GP Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. John G. Mannix, (202) 453–2430.

Dated: May 19, 1986.

Intent To Grant Limited Exclusive Patent Licenses; Techniblast

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Intent to Grant Limited Exclusive Patent Licenses.

SUMMARY: NASA hereby gives notice to grant to Techniblast of Seminole, Oklahoma, and Artech Corporation of Falls Church, Virginia, limited exclusive, royalty-bearing, revocable licenses to practice the inventions as described in U.S. Patent No. 3,754,976 for a "Peen Plating," which issued on August 28, 1973, and U.S. Patent No. 4,552,794 for a "Method of Coating a Substrate With a Rapidly Solidified Metal," which issued on November 12, 1985. The proposed limited exclusive licenses will be for a limited number of years and will contain appropriate terms and conditions to be negotiated in accordance with the NASA Patent Licensing Regulations, 14 CFR Part 1245, Subpart 2. NASA will negotiate the final terms and conditions and grant the limited exclusive licenses unless, within 60 days of the date of this Notice, the Director of Patent Licensing receives written objections to the grant, together with supporting documentation. The Director of Patent Licensing will review all written responses to the Notice and then recommend to the Associate General Counsel (Intellectual Property) whether to grant the limited exclusive licenses.

DATE: Comments to this Notice must be received by July 28, 1986.

ADDRESS: National Aeronautics and Space Administration, Code GP Washington, DC 20546.

Government-owned Inventions; Availability for Licensing

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Availability of Inventions for Licensing.

SUMMARY: The inventions listed below are owned by the U.S. Government and are available for domestic and, possibly foreign licensing.

Copies of patent applications cited are available from the National Technical Information Service (NTIS), Springfield, Virginia 22161 for $6.00 each ($10.00 outside North American Continent.) Requests for copies of patent applications must include the patent application serial number. Claims are deleted from the patent application copies sold to avoid premature disclosure.

DATE: May 29, 1986.

FOR FURTHER INFORMATION CONTACT: National Aeronautics and Space Administration, John G. Mannix, Director of Patent Licensing, Code GP, Washington, DC 20546, telephone (202) 453–2430.

Patent Application 641,152: 1-[Diorganooxyphosphonyl] methy 1]-2,4- and 2,6-Dinitro and Diamino Benzenes and Their Derivatives; filed August 16, 1984.

Patent Application 692,740: Ferroresonant Regulated Power Supply; filed January 18, 1985.

Patent Application 727,838: Brushless DC Motor Control System Responsive to Control Signals Generated by a Computer of the Like; filed April 26, 1985.

Patent Application 734,360: Polyenamines from Aromatic Diacetylinic Diketones and Diamines; filed May 15, 1985.

Patent Application: 738,816: Rapid Adhesive Specimen Bonding; filed May 29, 1985

Patent Application: 737, 018: Self-locking Double Retention Redundant Pull Pin Release; filed May 23, 1985.

Patent Application: 738,931: Fluid Leak Indicator; filed May 29, 1985.

Patent Application: 746,901: Copolyimides With a Combination of Flexibilizing Groups; filed June 20, 1985.

Patent Application: 745,977: Method of Fabricating an Imaging X-Ray Spectrometer; filed June 18, 1985.

Patent Application: 746,160: Segmented Tubular Cushion Springs and Spring Assembly; Filed June 18, 1985.

Patent Application: 748,532: Cure-in-place Composite Fastener; filed June 25, 1985.

Patent Application: 745,973: Long Grain Length Solar Pumped Box Laser; filed June 18, 1985.

BILLING CODE 7510-01-M

NATIONAL FOUNDATION ON ARTS AND HUMANITIES

President's Committee on the Arts and Humanities; Meeting

Thursday, June 19, 1986 at nine o'clock in the morning has been designated by the President's Committee on the Arts and Humanities for Plenary Meeting XII. This meeting has been scheduled at the Winterthur Museum in Wilmington, Delaware. This is a regularly scheduled meeting at which committee activities will be reviewed and progress reported. The meeting is expected to adjourn before lunch.

The Committee, charged with exploring ways to increase private support for the arts and the humanities, has generated private funds which augment the Committee's operational costs and support projects and programs which have been initiated by the President's Committee.

The primary presentations of the meeting will be that of—

Dr. Stanley N. Katz, president elect of the American Council of Learned Societies, who will speak on *Private Investment in the Public Sphere*

David Rockefeller, Jr., Chairman of Rockefeller Brothers Fund Executive Committee and Vice Chairman of Rockefeller Family and Associates, who will discuss the *Charitable Giving in America*

A special progress report will be made by Barry Gaither, project supervisor and Director of the Museum of the National Center of Afro-American Artists in Boston and Debra Spencer, who is project director of the President's Committee's model program, *Collections Survey of Black Universities.*

For further information individuals may call 202-682-5409.

May 21, 1986.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537-01-M

Visual Arts Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Visual Arts Advisory Panel (Crafts Fellowships Section) to the National Council on the Arts will be held on June 16-19, 1986 from 9:00 a.m. to 6:00 p.m., and on June 20, 1986 from 9:00 a.m. to 6:00 p.m. in Room 716 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682-5433.

John H. Clark,

Director, Council and Panel Operations, National Endowment for the Arts.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-369 and 50-370]

Consideration of Issuance of Amendments to Facility Operating Licenses and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing; Duke Power Co.

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. NPF-9 and NPF-17, issued to Duke Power Company (the licensee), for operation of the McGuire Nuclear Station, Units 1 and 2, located in Mecklenburg County, North Carolina.

The proposed amendments would expand subparagraph 2.K.e of Facility Operating License NPF-9 for Unit 1 and subparagraph 2.J.e of Facility Operating License NPF-17 for Unit 2 to authorize use of Transnuclear, Inc. multielement spent fuel shipping cask, Model Numbers TN-8 and TN-8L, for receipt of irradiated Oconee fuel. These subparagraphs of the licenses presently limit such receipt of Oconee spend fuel at McGuire to use of the NSF-4 (NAC-1) and NLI-1/2 casks, which are single-element casks. The new authorization would be in addition to existing authorized casks and would otherwise be subject to all existing requirements of license paragraphs 2.K (Unit 1) and 2.J (Unit 2). This change was requested in the licensee's application for amendment dated March 20, 1986.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment

request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

TN–8 and TN–8L are multielement truck casks which are physically capable of accommodating up to three PWR fuel assemblies. The two models have the same dimensions, but TN–8L is about one ton lighter than TN–8's forty tons because it has fewer external cooling fins and, hence, a lower maximum authorized heat load. These casks have received a Certificate of Compliance for radioactive materials packages, which was recently renewed by the Commission (Certificate No. 9015, Revision 12, expiration date January 31, 1991).

By letter dated March 20, 1986, the licensee notes that in order to maintain acceptable reserve spent fuel storage capacity (needed for potential full core off-loading, reload batch and upender access) in the shared Oconee Units 1 and 2 spend fuel pool, it is necessary to use a multielement spent fuel shipping cask. The licensee notes that in addition to maintaining the necessary shipment rate, miltielement casks have the advantage of fewer shipments (and hence lower probability of adverse offsite impact), lower station manpower requirements and reduced total radiation exposure to personnel.

The Commission has provided certain examples (48 FR 14870) of actions likely to involve no significant hazards consideration and of actions likely to involve significant hazards considerations. The request involved in this case does not match any of those examples. However, the staff has reviewed the licensee's request for the above amendments and has determined that should this request be implemented, it would not (1) involve a significant increase in the consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety for the following reasons.

The licensee's letter of March 20, 1986, includes cask drop evaluations for use of the TN–8 and TN–8L truck casks which demonstrate that results would be identical to those for the single-element cask drop. The new casks would not enter the spent fuel pool and would not cause significant structural damage or damage to any safety-related equipment. The requirements for obtaining a Certificate of Compliance, including those associated with offsite transportation accidents, impose more severe conditions on the cask and its contents than would be experienced during handling at the McGuire site. The fuel and cask would remain intact in the event of a dropped cask during handling at the McGuire site, and therefore the radiological consequences would be no more severe than those associated with use of the single-element casks. The licensee's evaluation also finds that use of the new casks is within the existing design capacities of the spend fuel cask handling and auxiliary cranes and lifting devices, including the guidelines of NUREG–0612, and does not require significant alteration of existing single-element cask handling procedures. Preliminary review by the Commission supports these findings by the licensee.

The Commission also finds that implementation of this request would not involve a significant increase in the probability of an accident previously evaluated. Previously evaluated cask accident casual mechanisms are not being changed by use of the new casks. Because the new casks require less manpower and handling and only one third as many shipments as the single-element casks for a given number of assemblies, the opportunity for and probability of an accident are significantly reduced.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make final determination unless it receives a request for a hearing.

Written comments may be submitted to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555 and should cite the publication date and page number of this Federal Register notice. Comments may also be delivered to Room 4000, Maryland National Bank Building, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Monday through Friday. Copies of comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC.

By June 27, 1986, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person who interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriation order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspects(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of an amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitation in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination of the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to B. J. Youngblood: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Mr. Albert Carr, Duke Power Company, 422 South Church Street, Charlotte, North Carolina 28242, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223.

Dated at Bethesda, Maryland, this 22nd day of May 1986.

For the Nuclear Regulatory Commission.

Paul O'Connor,

Acting Director, PWR Project Directorate #4, Division of PWR Licensing–A, NRR.

[FR Doc. 86-11931 Filed 5-28-86; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-275 and 50-323]

Issuance of Environmental Assessment and Finding of No Significant Impact; Pacific Gas and Electric Co.

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR-80 and DPR-82, issued to Pacific Gas and Electric Company (the licensee), for operation of the Diablo Canyon Nuclear Power Plant, Unit Nos. 1 and 2 located in San Luis Obispo County, California.

Identification of Proposed Action. The amendments would consist of changes to the operating licenses and Technical Specifications (TSs) and would authorize an increase of the storage capacity of the spent fuel pool (SFP) for each unit from 290 fuel assemblies to 1324 fuel assemblies with enrichments no greater than 4.5 weight percent U-235.

The amendments to the TSs are responsive to the licensee's application dated October 30, 1985. The NRC staff has prepared an Environmental Assessment of the Proposed Action, "Environmental Assessment By the Officer of Nuclear Reactor Regulation Relating to the Expansion of Spent Fuel Pools, Facility Operating License Nos. DPR-80 and DPR-82, Pacific Gas and Electric Company, Diablo Canyon Nuclear Power Plant Unit Nos. 1 and 2, Docket Nos. 50-275 and 323," dated May 21, 1986.

Summary of Environmental Assessment. The Final Generic Environmental Impact Statement (FGEIS) on Handling and Storage of Spent Light Water Power Reactor Fuel (NUREG-0575), Volumes 1-3, concluded that the environmental impact of interim storage of spent fuel was negligible and the cost of the various alternatives reflects the advantage of continued generation of nuclear power with the accompanying spent fuel storage. Because of the differences in SFP designs, the FGEIS recommended evaluating SFP expansions on a case-by-case basis.

For the Diablo Canyon Nuclear Power Plant, Unit Nos. 1 and 2, the expansion of the storage capacity of the SFPs will not create any significant additional radiological effects or non-radiological environmental impacts.

The additional whole body dose that might be received by an individual at the site boundary is less than 0.1 millirem per year; the estimated dose to the population within a 50-mile radius is estimated to be less than 0.1 person-rem per year. These doses are small compared to the fluctuations in the annual dose this population receives from exposure to background radiation. The occupational radiation dose for the proposed operation of the expanded spent fuel pools is estimated to be less than 2.5 person-rem per year. This is less than 1% of the average annual occupational dose.

The only non-radiological impact affected by the SFP expansion is the waste heat rejected to the Pacific Ocean. The increase in total plant waste heat is less than 0.1%. There is no significant environmental impact attributable to the waste heat from the plant due to this very small increase.

Finding of no Significant Impact

The staff has reviewed the proposed spent fuel pool expansion to the facilities relative to the requirements set forth in 10 CFR Part 51. Based on this assessment, the staff concludes that there are no significant radiological or non-radiological impacts associated with the proposed action and that the issuance of the proposed amendments to the licenses will have no significant

impact on the quality of the human environment. Therefore, pursuant to 10 CFR 51.31, an environmental impact statement need not be prepared for this action.

For further details with respect to this action, see (1) the application for amendments to the Technical Specifications dated October 30, 1986 and additional information provided by the licensee in letters dated September 19, December 20 and December 24, 1985 and January 28 (2 letters), March 11, and April 24 (2 letters), 1986, (2) the PGEIS on Handling and Storage of Spent Light Water Power Reactor Fuel (NUREG–0575), (3) the Final Environmental Statement for the Diablo Canyon Nuclear Power Plant, Units 1 and 2 issued May 1973, and (4) the Environmental Assessment dated May 21, 1986. These documents are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555 and at the California Polytechnic State University Library, Documents and Maps Department, San Luis Obispo, California 93407.

Dated at Bethesda, Maryland, this 21st day of May 1986.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Director, PWR Project Directorate No. 3, Division of PWR Licensing-A, NRR.

[FR Doc. 86–11930 Filed 5–28–86; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-369 and 50-370]

Duke Power Co.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to the Duke Power Company (the licensee) for the McGuire Nuclear Station, Units 1 and 2, located in Mecklenburg County, North Carolina.

Environmental Assessment

Identification of Proposed Action

The proposed amendments would authorize on an emergency basis a one-time release of the existing contents of the Conventional (non-radioactive) Wastewater Basin, containing trace amounts of tritium, into the Catawba River. Technical Specification (TS) 3.11.1.1. and its referenced Figure 5.1–4, "Site Boundary for Liquid Effluents" define the authorized discharge point for radioactive material released in liquid effluents to unrestricted areas as being only to Lake Norman. The proposed authorization would be accomplished by the addition of a footnote to TS Figure 5.1–4 at the discharge point for the Conventional Wastewater Basis into the Catawba River, stating that this discharge point is authorized for a one-time discharge of water which contains trace amounts of tritium in addition to the normally processed effluents of the Waste Water Collection Basin, effective the date of Commission approval. The change would not affect any existing limits or procedures regarding the processing of conventional (i.e., non-radioactive) contaminants.

The proposed amendment is in accordance with the licensee's request of May 20, 1986.

The Need for the Proposed Action

An unexpected release of tritium into the Conventional Wastewater Basin has created the need for prompt action as proposed above for two reasons, both stemming from the fact that the Basin is nearly full. First, excessive rainfall could result in an overflow of the Basin, resulting in an uncontrolled release. Second, lack of available volume in the Basin will impair the station's ability to process conventional (nonradiological) liquid waste as required by the NPDES permit issued by the State of North Carolina and, thereby, result in an extended plant outage.

Environmental Impacts of the Proposed Action

Non-radioactive chemical wastes from the McGuire Station (e.g., turbine building drains, water treatment system filter backwashes, demineralizer regeneration wastes) are routed through the Conventional Waste Water Treatment System (CWWTS) and subjected to physiocochemical treatment. The CWWTS includes a Basin of two parallel stream settling ponds with a capacity of about 2 million gallons each. Upon completion of treatment, the discharges from this system are released to the Catawba River downstream of Cowans Ford Dam. The discharge from the CWWTS may also be mixed with water from the Standby Nuclear Service Water Pond to dilute waste concentrations prior to discharge to the river. Waste containing radioactive material is not intented for the CWWTS; rather such waste is routed to separate Liquid Radwaste Systems (see FSAR section 11.2) for recycling, processing and disposal.

A. Radiological

By letter dated May 20, 1986, the licensee noted that tritium, but no other radionuclide, had entered the Basin and had subsequently been diluted to a concentration of 1.4×10^{-5} microcuries per milliliter. The licensee proposed to discharge the 4 million gallons of water in the Basin, along with its tritium, to the river at a rate of 500 gpm over a duration of 133 hours. The Basin discharge would also be mixed by equal flow from the Standby Nuclear Service Water Pond, such that the tritium concentration at the river release point would be 7×10^{-6} microcuries per milliliter. The concentration is well within the limit of 3×10^{-3} microcuries per milliliter specified by 10 CFR 20.106 and associated Appendix B, Table II, for tritium concentrations in water. The total activity which would be released by the proposed discharge would be about 0.25 curies of tritium, which is well within the annual tritium release from the plant estimated by the Commission in Table 3.3 of the Final Environmental Statement (NUREG–0063) to be about 940 curies per year.

The NRC has evaluated doses resulting from the proposed discharge using models and assumptions in Regulatory Guide 1.109, "Calculation of Annual Doses to Man from Routine Release of Reactor Effluents for the Purpose of Evaluating Compliance with 10 CFR Part 50, Appendix I." For tritium the dominant exposure pathway is drinking water. The fish consumption pathway also makes a small contribution to the dose. Other potential pathways (such as due to irrigation or swimming) are negligible because of the properties of tritium, i.e., tritium does not accumulate either in the food chain or the body and it does not constitute a significant source of external radiation. The total body dose to a child or infant assumed to drink water from the river release point and to consume fish located at this release point was calculated by the Commission to be about 0.01 millirem. Corresponding doses to an adult or teenager were lower (i.e., about 0.008 and 0.006 millirem, respectively). Section II.A of Appendix I to 10 CFR Part 50 states that the calculated annual total quantity of all radioactive material above background to be released from each nuclear power reactor to unrestricted areas should not result in an estimated annual dose or dose commitment from liquid effluents for any individual in an unrestricted area from all pathways of exposure in excess of 3 millirems to the total body. Because the doses calculated for the proposed river discharge represent only a very small contribution to this annual dose criterion of Appendix I, we find the proposed action to be consistent with Appendix I criterion.

The licensee calculated similar but lower doses in its letter of May 20, 1985. Unlike the licensee's calculations, the NRC results conservatively assume no credit for dilution of the tritium concentration within the river. Nevertheless, we find that the discharge concentrations of tritium and resultant doses determined by the NRC are sufficiently low as to represent no significant adverse impact on the quality of the human environment.

B. Non Radiological

The licensee states that the waste within the Conventional Wastewater Basin has completed the treatment process, and (except for the presence of tritium) is otherwise within the specifications for discharge required by the NPDES permit. The change does not affect any existing limits or procedures regarding the processing of conventional (i.e., non-radioactive) contaminants. Therefore, no additional or unanalyzed impact on the environment would result from non-radioactive effluents as a result of this proposed change.

C. Conclusions

Except for the presence of tritium, no additional or unanalyzed impact on the environment would result from non-radioactive effluents as a result of the proposed change. The very low concentrations of tritium within the Conventional Wastewater Basin are well below limits permitted by 10 CFR Part 20, and if discharged to the Catawba River as proposed, would result in insignificant doses consistent with the guidance of Appendix I to 10 CFR Part 50. Accordingly, the Commission concludes that the proposed action would result in no significant adverse impact to the quality of the human environment.

Alternative to the Proposed Action

Since we have concluded that the environmental effects of the proposed action are negligible, any alternatives to the actions proposed would not result in substantial improvement in the quality of the environment and therefore need not be evaluated.

The principal alternative would be to deny the requested amendments. That alternative, in effect, is the same as the "no action" alternative. Neither alternative would significantly reduce environmental impacts but would result in extended plant outage, and possibly result in uncontrolled discharges due to rain.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in connection with the Nuclear Regulatory Commission's Final Environmental Statement dated April 1975 or its addendum dated January 1981 related to this facility.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request of May 20, 1985, and except for the State of North Caroline, did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendments.

Based on this environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the request for amendments dated May 20, 1985, and the Commission's Final Environmental Statement dated April 1975 with its addendum dated January 1981, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Atkins Library, University of North Caroline, Charlotte (UNCC Station), North Carolina. 28242.

Dated at Bethesda, Maryland, this 23rd day of May 1985.

For the Nuclear Regulatory Commission.

Paul O'Connor,

Acting Director, PWR Project Directorate No. 4, Division of PWR Licensing-A.

[FR Doc. 86-12065 Filed 5-28-86; 8:45 am]

BILLING CODE 7590-01-M

Reassertion of Certain Regulatory Authority in the State of New Mexico

By letter dated March 18, 1986 Governor Toney Anaya of New Mexico, requested that the NRC reassert its authority over uranium milling and mill tailings in New Mexico. The Governor stated that because of severe budget constraints, as well as other compelling reasons, the State can no longer assume regulatory responsibility for uranium mill tailings. The other reasons found compelling by Governor Anaya related to legal problems in attempting to enforce Federal regulations directly, difficulties anticipated in upgrading the New Mexico regulations and mill surety arrangements and high staff turnover. A copy of the Governor's letter is on file in the Commission's Public Document Room at 1717 H Street, NW., Washington, DC.

Pursuant to the provisions of section 274j of the Atomic Energy Act of 1954, as amended, the Nuclear Regulatory Commission granted the Governor's request. The Commission found that it is necessary to terminate that part of New Mexico's agreement relinquishing NRC authority over uranium and thorium milling activities and mill tailings and to reassert NRC licensing and regulatory authority over these activities and the mill tailings produced in order to protect the public health and safety. This finding ensures that there will be no lapse of licensing and regulatory authority over these activities and materials upon relinquishment of this authority by the State of New Mexico. This reassertion of authority will become effective on June 1, 1986. This action does not affect the remaining portion of the New Mexico Agreement State Program which covers regulation of byproduct material (as defined in section 11(e)(1) of the Atomic Energy Act), source material, and special nuclear material in quantities not sufficient to form a critical mass.

Persons seeking licenses for activities within New Mexico involving byproduct material as defined in section 11e(2) of the Atomic Energy Act of 1954, as amended, or activities resulting in the production of such byproduct material should file such applications with the U.S. Nuclear Regulatory Commission, Uranium Recovery Field Office, Box 25325, Denver, Colorado 80225, Attention R. Dale Smith, Director.

Existing uranium milling licensees in New Mexico are being advised of this change in regulatory authority. Pursuant to a Commission order published with this notice, existing New Mexico licenses affected by this change will become effective NRC licenses under conditions set forth in the order.

For information regarding this reassertion action contact the NRC's Office of State Programs, Mr. Donald A. Nussbaumer (301-492-7767) or John F. Kendig (301-492-9880).

Dated at Washington, DC, this 22d day of May, 1986.

For the Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 86-2044 Filed 5-28-86; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-361 and 50-362] Denial of

Southern California Edison Co. et al.; Denial of Amendments to Facility Operating Licenses and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) has denied in part a request by the licensees

for an amendment to Facility Operating License Nos. NPF–10, and NPF–15 issued to the Southern California Edison Company, San Diego Gas and Electric Company, the City of Riverside, California and the City of Anaheim, California for operation of the San Onofre Nuclear Generating Station, Units 2 and 3, respectively, in San Diego County, California. The Notice of Consideration of Issuance of Amendments was published in the Federal Register on February 12, 1986 (51 FR 5278).

The amendment, as proposed by the licensees, would change the Unit 2 and 3 Technical Specifications. The licensees proposed to remove values associated with the secondary system (such as main steam isolation valves, and main feedwater isolation valves) from Table 3.6–1 of the Technical Specifications (TS). The justification provided by the licensees is: (1) General Design Criteria (GDC) 54 and 57 are not applicable to these secondary system isolation valves, as indicated in FSAR Table 6.2–35, and (2) some of these valves have requirements in other sections of the Technical Specifications. The Commission's staff finds that some of valves are not adequately covered the other Technical Specifications. Therefore, the staff finds that the proposed change to remove certain isolation valves associated with the secondary system is not acceptable. Therefore, this request is denied in part.

By June 16, 1986, the licensee may demand a hearing with respect to the denial described above and any person whose interest may be affected by this proceeding may file a writtten petition for leave to intervene.

A request for a hearing or petition for leave to intervene most be filed with the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Rules and Procedures Branch, Office of Administration, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date.

A copy of any petitions should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Charles R. Kocher, Esq., Southern California Edison Company, 2244 Walnut Grove Avenue, P.O. Box 800, Rosemead, California 91770 and Orrick, Herrington and Sutcliffe, Attention: David R. Pigott, Esq., 600 Montgomery Street, San Francisco, California 94111, attorney for the licensees.

For further details with respect to this action, see: (1) The applications for amendment dated January 25, April 27, and November 30, 1984, and the supplemental letter dated October 16, 1985, and (2) The Commission's Safety Evaluation issued with Amendments 48 and 35 to NPF–10 and NPF–15 dated May 16, 1986, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the General Library, University of California at Irvine, Irvine, California. A copy of Item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of PWR Licensing–B.

Dated at Bethesda, Maryland, this 16th day of May 1986.

For the Nuclear Regulatory Commission.

George W. Knighton,

Director, PWR Project Directorate No. 7, Division of PWR Licensing–B.

[FR Doc. 86–12066 Filed 5–28–86: 8:45 am]

BILLING CODE 7590–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 35–24104]

Filing Under the Public Utility Holding Company Act of 1935 ("Act")

May 22, 1986.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulged thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by June 16, 1986 to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the relevent applicant(s) and/or declarant(s) at the addresses specified below. Proof of service (by affidavit, or in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

New England Electric Transmission (70–7215)

New England Electric Transmission ("NEET"), 4 Park Street, Concord, New Hampshire 03301, an electric utility subsidiary of New England Electric System, a registered holding company, has filed a declaration pursuant to sections 6(a) and 7.

NEET seeks authority, during the period from July 1, 1986 to June 30, 1988, to enter into a line of credit with The First National Bank of Boston providing for borrowings, to be repaid in less than one year from the date thereof, up to aggregate amount outstanding (not including borrowing to be repaid with new borrowings) of $5 million.

Northeast Utilities (70–7240)

Northeast Utilities ("Northeast"), 174 Brush Hill Avenue, West Springfield, Massachusetts 01089, a registered holding company, has filed an application-declaration pursuant to sections 9(a), 10, and 12(c) of the Act and Rule 42 thereunder.

By orders dated December 10, 1981, and February 20, 1985 (HCAR Nos. 22323 and 23607), Northeast was authorized to issue and sell, from time to time through December 31, 1988, its authorized but unissued common shares pursuant to its Dividend Reinvestment and Common Share Purchase Plan ("Plan"). Northeast now intendes to amend and restate the Plan so that Northeast will no longer issue and sell, new shares direclty to the participants. Rather, it is proposed that an agent for the participants will, from time to time through December 31, 1989, apply dividends and optional cash payments to acquire, in the open market, approximately 2.5 million common shares per year, up to a maximum of 10 million common shares in the aggregate. The purchase price per share to a participant for shares purchased will be equal to the weighted average price paid by the agent for all shares during the period in which the participant's shares were purchased.

Columbus and Southern Ohio Electric Company (70–7257)

Columbus and Southern Ohio Electric Company ("C&SOE") a subsidiary of American Electric Power Company, Inc., a registered holding company, and Conesville Coal Preparation Company ("CCPC"), a wholly owned subsidiary of C&SOE, both located at 215 North Front Street, Columbus, Ohio 43215, have filed a proposal pursuant to sections 6, 7, 9, 10, 12(b) and 13(b) of the Act and Rules 45, 90 and 91 thereunder.

C&SOE proposes to continue the arrangements described in the initial

application and authorized by the Commission (HCAR No. 23463, October 26, 1984), with the following modifications: (i) That CaSOE's Conesville Coal Preparation Plant ("Plant") be transferred to CCPC; (ii) that the purchase of the Plant be financed by the issuance of CCPC of a 30 year promissory note and by the payment of cash by CCPC to CaSOE, which cash payment will be offset by an equivalent cash capital contribution by CaSOE to CCPC; (iii) that the interest rate on the note issued by CCPC to CaSOE will be equal to 11.15%, the effective interest cost of CaSOE's most recently issued series of First Mortgage Bonds (11% series due 1989, issued May 1985). The rate of return on the capital contribution by CaSOE is proposed to be 14.84% based on a weighted average rate of return of 15.40% on CaSOE's investment attributed to funds provided by the equity portion of CaSOE's capitalization consisting of common equity and preferred stock and (iv) that, in connection with the transfer, CaSOE and CCPC will also enter into an Amended Coal Washing Agreement pursuant to which CCPC will provide washing services to CaSOE at cost, including, but not limited to, costs attributable to CCPC's ownership of the Plant, interest costs attributable to the notes and an amount equal to CaSOE's return on equity.

Consolidated Natural Gas Company, et al. (70-7288)

Consolidated Natural Gas Company ("Consolidated"), a registered holding company, and its subsidiaries, Consolidated Natural Gas Service Company, Inc., CNG Coal Company, CNG Energy Company, CNG Research Company, The Peoples Natural Gas Company, Four Gateway Center, Pittsburgh, Pennsylvania 15222, Consolidated Gas Transmission Corporation, Consolidated System LNG Company, 445 West Main Street, Clarksburg, West Virginia 26301, CNG Producing Company, One Canal Place, Suite 3100, New Orleans, Louisiana 70130, West Ohio Gas Company, 504 Colonial Building, Lima, Ohio 45802, CNG Development Company, One Park Ridge Center, P.O. Box 15746, Pittsburgh, Pennsylvania 15244, The East Ohio Gas Company, The River Gas Company, 1717 East Ninth Street, Cleveland, Ohio 44114, Hope Gas, Inc. and Union Natural Gas Center West, Clarksburg, West Virginia 26301, have filed an application-declaration subject to sections 6(a), 6(b), 7, 9(a), 10 and 12(b) of the Act and Rules 43, 45 and 50 thereunder.

A notice of the original application-declaration was issued on May 15, 1986, HCAR No. 24395. Consolidated also proposes to acquire an aggregate of $51,600,000 in capital stock, $100 par value, to be issued and sold from time to time through June 15, 1987 by four subsidiary companies, as set forth below:

Company	Amount
CNG Coal Company	$900,000
CNG Development Company	21,000,000
CNG Producing Company	30,000,000
CNG Research Company	100,000
Total	51,600,000

New Orleans Public Service Inc. (70-7282)

New Orleans Public Service Inc. ("NOPSI"), 317 Baronne Street, New Orleans, Louisiana 70112, a subsidiary of Middle South Utilities, Inc., a registered holding company, has filed an application pursuant to section 6(b) of the Act and Rule 50(a)(5) thereunder.

NOPSI proposes to issue, pursuant to a negotiated private placement with one or more institutional investors, not to exceed $25 million aggregate principal amount of secured notes. The company requests authorization to negotiate the terms of the issuance of said notes. It may do so. Such terms are to be filed by amendment. The notes will be sold at the price of 100% of the principal amount, will have a maturity of not to exceed approximately 10 years, and will bear interest at a fixed rate per annum, estimated to be in the range of 9% to 12%. It is contemplated that the notes will be secured initially by a second lien on certain of NOPSI's assets (subordinate to the lien of its Mortgage). NOPSI proposes as soon as practicable after its earnings become sufficient to support the issuance of a sufficient amount first mortgage bonds or after the company is otherwise permitted by the terms of the Mortgage to issue first mortgage bonds (i.e., based upon retirements of bonds) to issue and deliver such bonds ("Collateral Bonds") as security for the notes. The subordinate lien therefore granted to secure the notes would then be released. In the event that by December 31, 1988, the notes are not secured by the Collateral Bonds, the fixed interest rate on the notes will thereafter be increased by up to 0.50%, and the notes will remain secured solely by the second lien until maturity.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34-23257; File Nos. SR-CBOE-86-02 and 04]

Self-Regulatory Organizations; Chicago Board Options Exchange Inc.; Order Approving Proposed Rule Changes

On January 13 and 29, 1986, the Chicago Board Options Exchange, Inc. ("CBOE") submitted to the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) under the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 thereunder,[2] proposed rule changes relating to expiration months. The proposals would allow CBOE to have (1) up to six expiration months in foreign currency options contracts, ranging from one to twelve months to expiration from the date of listing; [3] and (2) up to five expiration months in stock index options, also ranging from one to twelve months to expiration from the date of listing.[4]

At the present time CBOE employs the following patterns of expiration months: (1) S&P 100 stock options, four consecutive months;[5] (2) S&P 500 index options, two nearby consecutive months and the next three months from the March cycle;[6] and (3) foreign currency

---

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b-4 (1985).

[3] File No. SR-CBOE-86-02, noticed in Securities Exchange Act Release No. 22936 (January 24, 1986), 51 FR 4069 (January 31, 1986).

[4] File No. SR-CBOE-86-04, noticed in Securities Exchange Act Release No. 22976 (February 7, 1986), 51 FR 5626 (February 14, 1986). On March 6, 1986, CBOE submitted Amendment No. 1 to this filing deleting a provision describing the precise expiration month pattern for Standard & Poor's ("S&P") 500 index options because adoption of the instant proposal, which would apply to all of CBOE's index options, renders this provision unnecessary. Because of its technical nature the Commission did not publish separate notice of Amendment No. 1.

[5] Letter from Anne Taylor, Secretary and Associate General Counsel, CBOE, to Sharon Lawson, Attorney, Division of Market Regulation, SEC, dated April 28, 1986 ("CBOE Letter"). Currently, CBOE lists S&P 100 index option series that expire in June, July, August and September. *Id.*

[6] Currently, CBOE lists S&P 500 index option series that expire in June, July, September, and December and March. CBOE Letter, *supra note 5.*

options, three nearby consecutive months and the next two months from the March quarterly cycle.[7] The CBOE does not intend to use the authority it would possess under the proposals to change its current expiration months at this time, and had agreed to file any changes to these patterns as rule changes under section 19(b)(3)(A) of the Act.[8]

As described above, CBOE currently has authority to list series of index options in up to five different expiration months and series of foreign currency options in up to six different expiration months.[9] The instant rule filings would enlarge upon this existing authority by allowing CBOE to: (1) have discretion to select the precise arrangement of the same limited number of expiration months, subject to CBOE's agreement to file changes to existing patterns with the Commission under Section 19(b)(3)(A) of the Act;[10] and (2) list series of index options with 12 months to expiration.[11]

The Commission previously has indicated that the choice of expiration cycles may be left primarily to the business judgment of the exchanges, so long as each exercise of this judgement reflects an appropriate balance between ensuring that market participants are provided an array of expirations adequate to their investment demands and ensuring that this array does not cause an excessive dilution of liquidity in open options series.[12] The Commission believes that it is appropriate for an exchange in the first instance to exercise judgment as to what precise arrangement of a limited number of expiration months with a maximum time to expiration of twelve months best establishes this balance, with the Commission retaining the ability to review each particular exercise of this judgement under section 19(b)(2)(A) of the Act. The commission also believes the CBOE's proposal to allow twelve-month index options series represents an appropriate balance of the relevant considerations. The Commission has no reason to question CBOE's judgment that the twelve-month series allowed under CBOE's proposal will exhibit significantly less liquidity than the far-term eleven-month series currently available in S&P 500 index options.[13] Finally, the Commission finds that the CBOE's proposed new pattern for foreign currency options—three nearby months and the next two months from the March cycle—is appropriate.[14]

For these reasons, the Commission finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6 [15] and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[16] that the proposed rule changes are approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[17]

Dated: May 20, 1986.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. IC-15111; File No. 812-6327]

Application and Opportunity for Hearing; Commercial Life Insurance Co., et al.

May 21, 1986.

Notice is hereby given that Commercial Life Insurance Company ("Commercial"), Commercial Separate Account A ("Separate Account A"), and Continental Equities Corporation of America ("Continental Equities") (collectively, "Applicants"), filed an application on March 28, 1986, and an amendment thereto on April 25, 1986, for an order of the Commission, pursuant to section 6(c) of the Investment Company Act of 1940 ("Act"), exempting Applicants from the provisions of sections 2(a)(32), 22(c), 26 (a)(2), 27(c)(1), 27(c)(2) and 27(d) of the Act, and from Rules 6e-3(T)(b)(12), 6e-3(T)(b)(13), 6e-3(T)(c)(1) and 22c-1 promulgated thereunder, to the extent necessary to permit transactions described in the application. All interested persons are referred to the application on file with the Commission for a statement of Applicants' representations, which are summarized below, and are referred to the Act and the rules thereunder for the complete text of those provisions that are relevant to the application.

General Account Funding

Applicants state that Commercial, a subsidiary of The Continental Corporation, is a stock life insurance company organized under the laws of the State of Wisconsin, and Separate Account A is a segregated investment account of Commercial that is registered under the Act as a unit investment trust. Applicants further state that Continental Equities, a wholly-owned subsidiary of Commercial, is the principal underwriter and distributor of individual flexible premium variable life insurance contracts ("Contracts"), as defined in paragraph (c)(1) of Rule 6e-3(T), funded through Separate Account A.

Applicants state that under the Contracts, contractowners will be able to allocate premium payments and transfer (subject to certain restrictions) portions of the cash value among the general asset account of Commercial ("General Account") and the sub-accounts of Separate Account A. According to the application, each of the three sub-accounts of Separate Account A currently invests solely in the shares of the Continental Series Trust ("Fund") that are issued by one of its three portfolios, each having a specified investment objective. Applicants state that amounts allocated to the General Account earn interest at a rate not less than the guaranteed interest rate of 4% per annum. Applicants note that the allocation or transfer of funds to the General Account does not entitle a contractowner to share in the investment experience of the General Account.

Applicants state that the Contracts allow the contractowner, subject to

[7] CBOE letter, *supra* note 5. CBOE currently lists series of foreign currency options that expire in June, July, August, September and December.

[8] 15 U.S.C. 78s(b)(1)(A)(1982). CBOE Letter, *supra* note 5.

[9] The Commission approved these CBOE rules in Securities Exchange Act Release Nos. 22671 and 22802 (September 26, 1985 and February 28, 1986), 50 FR 40830 and 51 FR 7211. The Commission has approved similar rules for other exchanges. *See, e.g.*, Securities Exchange Act Release No. 23678 (September 27, 1986), 50 FR 41277 (six expiration months for Philadelphia Stock Exchange, Inc. ("Phlx") foreign currency options) ("Phlx Release"); and Securities Exchange Act Release Nos. 20330 and 20614 (October 28 and November 25, 1983), 48 FR 50281 and 50283 (New York and American Stock Exchange proposals, index options).

[10] Rule changes filed under Section 19(b)(3)(A) become effective upon filing with the Commission, but the Commission may abrogate such rules within 60 days of the date of their effectiveness. *See* Section 19(b)(3)(C) of the Act, 15 U.S.C. 78s(b)(3)(C) (1982).

[11] CBOE's rules currently allow series of index options with a maximum of 11 months to expiration. CBOE's rules already allow series of foreign currency options with 12 months to expiration.

[12] Securities Exchange Act Release No. 22802 (February 28, 1986), 51 FR 7211 (approving up to five expiration months for S&P 500 index options) ("S&P 500 Release").

[13] Although the existing far-term eleven-month series of S&P 500 index options exhibit little volume relative to the near-term months, the Commission assumes that volume for the proposed twelve-month series would be similar and not significantly less than for the existing eleven-months series. Cf. S&P 500 Release, *supra* note 12, n.10.

[14] The Commission previously has approved three consecutive nearby months and three additional months from a quarterly cycle for the Phlx. *See* Phlx Release, *supra note 9.* The CBOE rules currently provide only for two nearby consecutive months and the next these from the March cycle. The CBOE instituted its current foreign currency procedures on an interim basis while the instant omnibus filing was pending with the Commission.

BEST COPY AVAILABLE

certain limitations, to vary the frequency and amount of premium payments. Applicants state that the death benefits under the Contract will be the greater of: (i) The face amount on the date of death, or (ii) a specified percentage of the cash value. The death benefit will be reduced by any contract debt and, if death occurs during a grace period, any unpaid charges. Applicants generally note that a contractowner will have various rights under the Contract, including rights to a Contract loan, to request an increase or decrease in the face amount of the Contract, to a partial withdrawal of the Contract's cash value, and to a full surrender of the Contract.

Applicants request an exemption from Rule 6e–3(T)(c)(1) to resolve any uncertainty as to whether the term "flexible premium variable life insurance contract," as defined in that provision, includes flexible premium variable life insurance contracts under which contractowners may allocate amounts available for investment to the General Account.

Applicants assert that because paragraph (c)(1) does not explicitly require *exclusive* funding by a separate account, the Commission intended to permit allocation of premiums, and transfer of cash value, to general accounts as well as separate accounts. Applicants further assert that the requested relief is consistent with the Commission's administration of flexible premium variable life insurance under the Act prior to and after the adoption of Rule 6e–3(T), consistent with the Commission's administration of scheduled premium variable life insurance pursuant to Rule 6e–2 under the Act, and consistent with the Commission's administration of the Act in the context of variable annuities. Applicants believe that the General Account option will be beneficial to contractowners because it provides an additional funding option under the Contract. Applicants represent that the charges under the Contract that are equally applicable to the cash value allocated to the General Account and the cash value allocated to the sub-accounts of Separate Account A will be applied uniformly.

Applicants state that they recognize that any Commission order granting exemptive relief in this regard will not constitute a judgment of the Commission as to the propriety or impropriety of registration or non-registration of either interests in the General Account as securities under the Securities Act of 1933 or the General Account as an investment company under the Act.

Contingent Deferred Charge for Premium Taxes and Issuance Expenses

Applicants state that the Contract provides for the calculation of the amount of a contingent deferred surrender charge ("Surrender Charge") upon the issuance of the Contract and upon an increase in the face amount of the Contract. Applicants represent that the Surrender Charge set upon the issuance of the contract has three elements: (1) A charge equal to 9% of the initial premium for sales load, (2) a charge equal to 2% of the initial premium for premium taxes (the average rate expected to be paid on all contracts), and (3) a charge equal to $5 per $1,000 of Face Amount (minimum—$100, maximum—$400) plus $50 for administrative costs Commercial incurs in issuing the Contract. An additional Surrender Charge, calculated in the same manner, is set in the event a Contract's face amount is increased.

Applicants state that the 2% permium tax component of the Surrender Charge is designed to assist Commercial in recovering state taxes imposed on premiums that it receives under the Contracts. Applicants also state that the administrative charge component of the Surrender Charge is designed to reimburse Commercial for the cost of processing applications for Contracts, or requests for increases in a Contracts face amount, conducting medical examinations, determining insurability and the insured's risk class, and establishing or revising records relating to the Contract.

According to the application, the Surrender Charge will be imposed upon lapse or surrender during the first nine years following the issuance of the Contract or following a requested increase in a Contract's face amount. The application states that the Surrender Charge remains level for the first five years in the relevant nine-year period, and then reduces in annual increments until it becomes zero at the end of nine years.

Applicants request exemption from sections 2(a)(32), 22(c), 26(a)(2), 27(c)(1), 27(c)(2) and 27(d) and Rules 6e–3(T)(b)(12), 6e–3(T)(b)(13)(iii) and 22c-1 to the extent necessary to permit the administrative charge for issuance expenses and the 2% premium tax charge to be deducted upon a full or partial surrender of the Contract's cash value. Applicants state that imposition of these charges in the form of a contingent deferred charge, as described above, has several advantages for contractowners over a charge deducted entirely from premiums in the first Contract year. First, the amount of the contractowner's investment in Separate Account A is not reduced as it would be if these charges were taken in full in the first Contract year. Second, the total amount charged to any contractowner is no greater than if these charges were taken in full in the first Contract year, and it is less for contractowners who do not lapse or surrender during the first five Contract years. Third, deductions for the cost of insurance charge may be lower because the net amount at risk may be less when these charges are deferred rather than deducted up front. Fourth, in the event the death benefit is paid under the Contract, these charges are not deducted from the amount payable, thereby resulting in contractowners receiving the primary benefit of their Contracts (insurance protection) withut incurring such charges. Finally, if the death benefit is determined by multiplying the cash value on the date of death times the applicable death benefit factor, the fact that the Surrender Charge has not been deducted will favorably affect the amount of the death benefit since the cash value will be greater.

Applicants represent that the level of these two components of the Surrender Charge (*i.e.*, state premium tax and administrative charge components) are the same as they would have been if these charges had been deducted from premium payments prior to allocation to Separate Account A or the General Account, and that in setting the levels of these two components, Applicants did not take into account the time value of money or increase these charges to reflect the fact that not all contractowners will incur a Surrender Charge.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 16, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

Maritime Administration

[Docket S-789]

Farrell Lines Inc.; Application To Provide Trade Route 10 Service

Farrell Lines Incorporated (Farrell), by application dated February 18, 1986, has requested an amendment to Appendix B of Operating-Differential Subsidy Agreement, Contract MA/MSB-482 (OSDA) to provide Trade Route (TR) 10 (U.S. North Atlantic/Mediterranean) service with a C3-S-61b type vessel named AUSTRAL RAINBOW.

The service plan by Farrell would permit it to provide the service necessary to approximate its contractual requirements. Under ODSA MA/MSB-482, Farrell is authorized to make a minimum/maximum of 44/66 sailings per year on TR 10.

Farrell's application points out that it has been unable to make the minimum required sailings because of a shortage of necessary containerships. In Farrell's view, the operation of the AUSTRAL RAINBOW will allow for sufficient sailings necessary to approach the minimum number required. In addition, Farrell believes that the AUSTRAL RAINBOW will allow for expansion into a wider geographical area without jeopardizing its current biweekly service, the minimum necessary to remain competitive.

This application may be inspected in the Office of the Secretary, Maritime Administration. Any person, firm, or corporation having any interest in such request and desiring to submit comments concerning the application must file written comments in triplicate with the Secretary, Maritime Administration, Room 7300, Nassif Building, 400 Seventh Street SW., Washington, DC 20590. Comments must be received no later than 5:00 P.M. on June 12, 1986. This notice is published as a matter of discretion and publication should in no way be considered a favorable or unfavorable decision on the application, as filed or as may be amended. The Maritime Subsidy Board will consider any comments submitted and take such action with respect thereto as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 20.804 Operating-Differential Subsidies)

By Order of the Maritime Subsidy Board.

Dated: May 23, 1986.

BILLING CODE 4810-40-M

UNITED STATES INFORMATION AGENCY

Bureau of Educational and Cultural Affairs; University Affiliations Program; Application Notice for Fiscal Year 1986, Special Competition: Teacher Exchange

Summary

The Bureau of Educational and Cultural Affairs of the United States Information Agency will support the promotion of mutual understanding and development of academic expertise through affiliations between U.S. and foreign postsecondary institutions under a new program, "The Teacher Exchange Special Competition." The goals of the program are (a) to strengthen the academic, professional, and cross-cultural expertise of participating teachers and (b) to enhance the curriculum and instructional programs of selected countries in Latin America, the Caribbean, and the U.S. Particular emphasis is placed on enhancing the competence of teachers in their subject fields by demonstrating sound materials, resources and approaches to their subjects, sharing of information and expertise with the host country's educational system, and the compilation of materials for classroom use.

The Teacher Exchange Special Competition is designed to strengthen the ties between the United States and selected countries in Latin America and the Caribbean by expanding teacher exchanges to countries heretofore not participating in USIA's Teacher Exchange Program. The Program will support affiliations between postsecondary institutions to focus on the enhancement of subject matter competencies of experienced teachers in the U.S. and selected countries of Latin America and the Caribbean. Specific countries eligible for the competition include Antigua, Argentina, Barbados, Colombia, Costa Rica, the Dominican Republic, Ecuador, Grenada, Jamaica, Panama, St. Lucia, and Trinidad and Tobago.

Applications for grants are invited from U.S. institutions of postsecondary education. Grants of up to $50,000 each are available to support each project for two to three years. The affiliations will involve Latin American and Caribbean

elementary, secondary and postsecondary institutions and U.S. elementary, secondary schools, and postsecondary institutions. The universities' role is to liaison with local education authorities; to identify goals for the exchange of teachers programs; to plan, administer, and facilitate the exchanges; and to apply resources and expertise in subject fields as well as in-service training of professionals. Such institutions, in conjunction with local U.S. school authorities, would form affiliations with Latin American and Caribbean postsecondary institutions. These foreign colleges would work, in turn, with local education authorities in their respective countries. The purpose of such affiliations is to exchange elementary, secondary, and, under certain conditions, postsecondary teachers. As a result of the exchanges which should contribute to improvement in precollegiate eduction, it is expected that knowledge of teachers of the host country will increase, that mastery of their subjects will be enhanced, and that there will be a direct application of this new information upon their return to their own country. A maximum of five grants will be awarded in fiscal year 1986.

Applications on behalf of the collaborating school authorities and/or institutions are to be submitted by the U.S. postsecondary institution partner. Participating institutions and school districts should be prepared to: assign U.S. citizens or national teachers, faculty, or staff to the partner institutions, maintain said person(s) on full salary and benefits, provide for salary sharing and/or supplements as necessary, and receive visiting teachers from the partner school district(s). USIA funds are to be used for participant travel costs, materials, and modest supplements for maintenance expenses, if necessary.

Authority for this program is contained in the Mutual Eductional and Cultural Exchange Act of 1961, Pub. L. 87–256 (Fulbright-Hays Act). The purpose of the Fulbright program is ". . . to enable the government of the United States to increase mutual understanding between the people of the United States and people of other countries." Information collection involved in this program has been cleared by OMB Approval Number 3116–0179, expiration date 1/31/87.

Guidelines for Application

The U.S. and foreign postsecondary institutions will serve in a collaborative role with school districts in designing the affiliation program. Program emphasis should be placed on increasing the exchange teachers' knowledge in their respective subject fields and of the partner country, rather than on teaching methodology. Toward this end, the universities will offer assistance (i.e. orientation, language training, country briefings, inservice teacher training, or other activities) to enhance the participating school districts' exchanges. The U.S. postsecondary institution should be the fiscal agent for the grant.

The primary goal of the affiliation is to exchange precollegiate level teachers. To this end, at least 60% of the exchanges supported by the Agency should occur between classroom teachers primarily at the high school level. While the remainder of the exchanges may involve school administrators and administrators and/or faculty from the U.S. and foreign institutions of higher education, the thrust of the affiliation should involve exchanges of a substantive rather than an administrative nature. The duration of exchanges can vary from stays of four weeks to one semester or an academic year. The length of an individual exchange should support both the purpose of that specific exchange and the overall goals of the affiliation.

USIA funds are to be used for participant travel costs, modest compensation supplements to offset maintenance costs, and the collection, development and/or purchase of teaching materials. Institutional overhead is not allowed. Cost-sharing among institutions is a necessary condition of the affiliation and should reflect contributions from all institutions involved in the exchange. Projects supported by USIA must last a minimum of two years and a maximum of three years; the total request to USIA should not exceed $50,000, covering eligible expenses of all institutions for the two to three-year period.

In FY 1986, up to five grants will be available for affiliations with institutions in Latin America and the Caribbean. Eligible countries include Antigua, Argentina, Barbados, Colombia, Costa Rica, the Dominican Republic, Ecuador, Grenada, Jamaica, Panama, St. Lucia, and Trinidad and Tobago.

Proposals will be accepted either for the establishment of new affiliations or for the enhancement of existing affiliations in specific new directions. Proposals for funding ad hoc research projects and feasibility studies to plan affiliations will not be considered in this program.

All proposals recommended for funding will be subject to Agency review for conformity to relevant OMB and legal considerations. Funding of any proposal is subject to the regular procedures, regulations, and requirements for Bureau of Educational and Cultural Affairs grants, including review by the General Counsel's office.

Review Process

The review process is conducted in two stages—technical and substantive. Proposals that are technically ineligible (technical review criteria appear below) will not be forwarded to the substantive review committee for further consideration. Proposals must be received at USIA by *July 25, 1986.*

Project directors of ineligible proposals will be informed in writing by August 20, 1986. Technically eligible proposals will be forwarded for review to a committee of Agency officers representing appropriate area and academic expertise. Eligible proposals will be evaluated against specific criteria addressed to quality, feasibility, and area needs (see below).

Substantive Review Criteria

a. Focused academic goals, including the following elements:

Increasing the exchange participants' knowledge in their respective fields. Latin American and Caribbean teachers will have the opportunity to gain increased knowledge of subject matter, to improve their course content, and to gain first-hand knowlege of the U.S.;

U.S. teachers will also have the opportunity to expand their mastery of subject matter in their respective fields, such as applied linguistics for language teachers or area studies for social science teachers;

Institutions should plan to assist outgoing teachers in adapting their materials and expertise for most effective teaching in the receiving country;

b. A plan for demonstrating how the postsecondary institutions will implement the goals. Plans should include:

Evidence of close liaison with participating local school authorities and clearly stated mutual objectives for in-service training, exchange of teachers, and collection or creation of materials by exchange teachers for use in the classroom upon return to the host country;

Pre-departure programming with an area studies component covering political and social characteristics of the society, geographical influences, historical contexts, and cross-cultural relationships. Language proficiency is assumed, but specialized vocabulary or

reviews should be included in the pre-departure activities;

Field-study activities. The plan should include activities designed to expand the teachers' interactions to parts of the society other than the immediate school environment;

Involvement of exchange teachers in school activities beyond the traditional classroom role, serving for example as curriculum consultants or in other appropriate capacities;

Frequent and systematic review of the goals of the program, providing assistance to the participants in attaining their objectives, and modifications in exchange participants' assignments and activities as needed;

A plan for debriefing and academic activities for returning teachers. Debriefing activities should include an analysis of the impact of the exchange on the teachers. Academic activities should involve the teacher in presentations as well as activities to assess the utility of materials collected in the host country for classroom use;

c. Demonstration that the affiliation will enhance faculty and teacher development, curriculum revisions, and civic or community activities, including evidence of mutuality of benefits to the institutions and school systems involved in the exchanges;

d. Feasibility of program plan;

e. Academic experience of participants relevant to the goals of the proposed exchange plan (including linguistic proficiency, where required);

f. Evidence of strong mutual institutional commitment involving the schools and universities in the plans and governance of the affiliation through policy boards or committees on each side of the affiliation, including equal representation from all participating institutions within the country;

g. Description of a mechanism for bilateral communication and governance;

h. Demonstration that the partnership is likely to continue after the conclusion of the USIA grant;

i. Details of current teaching assignments of U.S. and foreign participants (may be included in bio-sketches);

j. Cost-effectiveness.

The USIA will also obtain overseas post assessments, in terms of need and feasibility;

Eligibility

Applications should be submitted by the U.S. postsecondary institutions on behalf of themselves, the cooperating U.S. school district(s), and the collaborating foreign school districts and institutions. Proposals will be accepted in all subject areas. (Institutions without departments of education may apply.) Institutions eligible to participate are:

1. Accredited, degree-granting public or private U.S. institutions of higher education;

2. Recognized institutions of higher education in the aforementioned countries of Latin America or the Caribbean, or consortia of such institutions;

3. U.S. elementary and secondary schools and/or school system;

4. Elementary and secondary schools and/or school system in the aforementioned countries of Latin America or the Caribbean.

Technical Review Criteria

Within the announced deadline, an original proposal and ten complete copies are to be submitted, including: abstract; narrative; budget; bio-sketches; required letters of agreement; and summary of international affiliations (see detailed requirements below under application procedures).

Application Procedures

Applicants must submit one original and ten (10) complete copies of their proposals to: Eugene C. Schaffer, Teacher Exchange Branch (E/ASX), United States Information Agency, 301 4th Street, SW., Washington, DC 20547.

In order to be eligible for review, project planning must begin by September 15, 1986. The proposal *must* include:

1. *Abstract:* A typed, double-spaced abstract, summarizing the project, not to exceed two pages.

2. *Narrative:* total text not to exceed fifteen (15) typed, doubled-spaced pages, including:

a. A brief (two-page) description of the participating institutions and participating departments;

b. A detailed description of the proposed affiliation program, including but not limited to: the name and qualifications of the designated project director; the proposed roster of participants or representative sample of potential participants and their qualifications, including language skills; a statement of need; a detailed, specific description of proposed activities, including when and where they will occur; the number of trips, itinerary and duration of travel; the per diem costs daily rate and number of days; and the anticipated benefits of the program; first-year exchange participants should be identified, if possible;

c. A plan for institutional evaluation of the program.

3. A detailed, *five-column budget:* outline specific expenditures and source(s) from which funds are anticipated; the budget should include any in-kind and cash contributions to the program made by the U.S. and Latin American or Caribbean postsecondary institutions and the U.S. and foreign schools.

Required format for budget

All the proposed expenditures should be individually listed, using the following format:

	USIA	U.S. Institute of higher education	U.S. Schools	Foreign Institute of higher education	Foreign schools
Year 1 Travel	$X	$X	$X	$X	$X
Maintenance Costs	$X	$X	$X	$X	$X
Materials Cost	$X	$X	$X	$X	$X
Salary & Benefits	n/a	$X	$X	$X	$X
Overhead Costs	n/a	$X	$X	$X	$X
Year 2 Travel	$X	$X	$X	$X	$X
Maintenance Costs	$X	$X	$X	$X	$X
Materials Costs	$X	$X	$X	$X	$X
Salary & Benefits	n/a	$X	$X	$X	$X
Overhead Costs	n/a	$X	$X	$X	$X
Year 3 Travel	$X	$X	$X	$X	$X
Maintenance Costs	$X	$X	$X	$X	$X
Materials Costs	$X	$X	$X	$X	$X
Salary & Benefits	n/a	$X	$X	$X	$X
Overhead Costs	n/a	$X	$X	$X	$X
Totals	$X	$X	$X	$X	$X

4. *Appendices* should be kept to a minimum but must include:

a. Bio-sketches of professional accomplishments of the potential participants, *not to exceed two pages in length each,* clearly indicating the level of language skills, overseas experience, knowledge of the prospective partner country as demonstrated through courses taught, relevant scholarly and non-scholarly travel, publications, and research activities. (Bio-sketches of actual exchange participants must be provided to USIA for their approval prior to the exchange taking place.);

b. Documentation of institutional support for the proposed affiliation, *including a signed letter of endorsement from the U.S. institution's (or consortium members') president, vice-president, chancellor, provost, or other administrator with signing authority, as well as a signed letter of endorsement from the President (or equivalent) of the foreign institution or consortium.* Both letters must specifically refer to the Teacher Exchange Program. (A general letter of agreement between the two institutions without reference to this specific program will not fulfill this requirement.);

c. Documentation of institutional commitment for the proposed affiliation from the U.S. and foreign schools, including a signed letter from the superintendent of schools or school administrators with signing authority;

d. A brief summary of ongoing, active international affiliations at partner institutions.

(U.S. institutions are reminded that in certain countries, host government approval must be obtained before any exchange program of this type may be carried out.)

5. *Budget Items:*

The Only Eligible Budget Items Are

a. Round-trip airfare for participants to the exchange site;

b. Support (addition to salary and/or benefits) or per diem for such specific items as housing, food, and other maintenance items while on exchange. The maximum amount that may be requested for per diem support may not exceed the rates set by the U.S. Department of State for overseas locations and the General Services Administration (GSA) per diem allowances for U.S. localities. (USIA will supply these rates upon request. Call Eugene Schaffer at (202) 485–2555.);

c. Costs for materials and resources;

(U.S. institutions are reminded that in certain countries restrictions may be placed on the export of local currency by the national government.)

Ineligible Budget Items

a. Institutional overhead;

b. Administrative expenses incurred in connection with the affiliation including telephone or telex expenses;

c. Expenses for student exchanges;

d. Costs for dependents;

e. Conference or seminar costs;

f. Any costs for non-U.S. citizens or nationals from the U.S. institution or schools; or non-nationals of the overseas host country.

6. *Deadlines:*

Complete proposal packages must be received on or before *July 25, 1986.*

As a courtesy, proposals received by *July 3, 1986* will be reviewed for technical eligibility upon receipt. Should they be found to be ineligible, notification will be sent by *July 15, 1986* to the applicant specifying the reason for ineligibility, so that complete proposals may be submitted by the application deadline. All corrected or supplementary materials must be received by *July 25, 1986.*

Applicants are responsible for the submission of complete applications. *All* required items must be received at USIA by *July 25 1986;* corrected or supplementary materials received after this date cannot be considered by the Agency

7. *Notification:*

All applicants will be notified of the results of the review process on or about *September 15, 1986.* Funded proposals will be subject to periodic reporting and evaluation requirements.

Inquiries

For questions concerning programming and budget, please contact: Eugene C. Schaffer, Teacher Exchange Branch (E/ASX), United States Information Agency, 301 4th Street SW., Washington, DC 20547, (202) 485–2555.

Dated: May 22, 1986.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 9:00 a.m. on Tuesday, June 3, 1986, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Application for Federal deposit insurance and for consent to exercise full trust powers:

Advisory Bank and Trust Company, an operating noninsured trust company, located in the IDS Tower, 80 South Eighth Street, Minneapolis, Minnesota.

Application for consent to purchase assets and assume liabilities:

The Third National Bank of Sandusky, Sandusky, Ohio, for consent to purchase certain assets of and assume the liability to pay deposits made in the Port Clinton Office of United Home Federal, Toledo, Ohio, a non-FDIC-insured institution.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 46,518-L
Banco Credito y Ahorro Ponceno, Ponce, Puerto Rico
Case No. 46, 522-SR (Amendment)
The Dayton Bank & Trust Company, Dayton, Tennessee
Case No. 46,523-SR (Amendment)
Sparta-Sanders State Bank, Sparta, Kentucky
Case No. 46,524-L
South Coast Bank, Costa Mesa, California
Case No. 46,535
The Bowery Savings Bank, New York City (Manhattan), New York

Memorandum and resolution re: Final amendments to Part 330 of the Corporation's rules and regulations, entitled "Clarification and Definition of Deposit Insurance Coverage," which eliminate the requirement that the deposit account records of an insured bank disclose the names of the settlor and trustee of the trust and contain an account signature card executed by the trustee.

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications, requests, or actions involving administrative enforcement proceedings approved by the Director or an Associate Director of the Division of Bank Supervision and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Reports of the Director, Office of Corporate Audits and Internal Investigations:

Summary Audit Report re:
State Bank of Farmersville, Farmersville, Illinois (2492) (Memo dated May 9, 1986)
Summary Audit Report re:
Mineola State Bank, Mineola, Iowa (2489) (Memo dated April 14, 1986)
Summary Audit Report re:
State Bank of Herndon, Kansas, Herndon, Kansas (6600) (Memo dated May 13, 1986)
Summary Audit Report re:
Farmers State Bank of Round Lake, Round Lake, Minnesota (2486) (Memo dated April 16, 1986)
Summary Audit Report re:
Cardwell State Bank, Cardwell, Missouri (2493) (Memo dated May 1, 1986)
Summary Audit Report re:
Missouri Delta Bank, Hayti, Missouri (2494) (Memo dated May 1, 1986)
Summary Audit Report re:
Security Bank & Trust Company, Midwest City, Oklahoma (2490) (Memo dated May 7, 1986)
Summary Audit Report re:
The First National Bank of Darrouzett, Darrouzett, Texas, NR-586 (Memo dated April 14, 1986)
Summary Audit Report re:
Park West Bank, N.A., Farmers Branch, Texas (5601) (Memo dated May 13, 1986)
Summary Audit Report re:
Riverside National Bank of Houston, Houston, Texas (2491) (Memo dated April 18, 1986)
Summary Audit Report re:
Trend Analysis of Liquidation, Site Audit Results (Memo dated May 14, 1986)
Summary Audit Report re:
Real Estate Owned Assets, Minneapolis Consolidated Office (memo dated May 8, 1986)
Summary Audit Report re:
Texas Instrument In-House Computer System Puerto Rico Consolidated Office (Memo dated April 30, 1986)

Discussion Agenda:

Memorandum and resolution re: Delegation of authority to amend purchase and assumption agreements.

Memorandum and resolution re: Withdrawal of proposed amendments to Part 330 of the Corporation's rules and regulations, entitled "Clarification and Definition of Deposit Insurance Coverage," which would have implemented recordkeeping requirements for deposits placed by deposit brokers.

Memorandum and resolution regarding petitions to reconsider certain prohibitions governing securities subsidiaries and affiliates contained in Part 337 of the Corporation's rules and regulations, entitled "Unsafe or Unsound Bank Practices."

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 - 17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898-3813.

Dated: May 27, 1986.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

2

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 9:30 a.m. of Tuesday, June 3, 1986, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(6), (c)(8), (c)(9)(A)(ii),

(c)(9)(B), and (c)(10) of Title , United States, Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, determination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs, thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8), (c)(9), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Memorandum and Resolution re:
Newport Harbor National Bank Newport Beach, California
Memorandum and Resolution re:
National Bank and Trust Company of Traverse City Traverse City, Michigan

Memorandum regarding the Corporation's assistance agreement with an insured bank.

Discussed Agenda:

Personnel actions regarding appointments, promotions, administrative pay increase, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunsine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–3813.

Dated: May 27, 1986.

Federal Deposit Insurance Corporation.

FEDERAL ELECTION COMMISSION

PREVIOUSLY ANNOUNCED DATE AND TIME: Thursday, May 22, 1986, 10:00 a.m.

CHANGE IN MEETING: The open meeting scheduled for this date was cancelled.

* * * * *

DATE AND TIME: Tuesday, June 3, 1986, 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC

STATUS: This meeting will be closed to the public.

ITEMS TO BE DISCUSSED:

Compliance matters pursuant to 2 U.S.C. 437g
Audits conducted pursuant to 2 U.S.C. 437g, 438(b), and Title 26, U.S.C.
Matters concerning participation in civil actions or proceedings or arbitration
Internal personnel rules and procedures or matters affecting a particular employee

* * * * *

DATE AND TIME: Thursday, June 5, 1986, 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC (Ninth Floor)

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED:

Setting of Dates of Future Meetings
Correction and Approval of Minutes
Status of Regulation Revision Projects Report
Routine Administrative Matters

NATIONAL CREDIT UNION ADMINISTRATION

Change in Subject of Meeting

The National Credit Union Administration Board determined that its business required that the previously announced closed meeting on May 21, 1986, include an additional item, which was closed to public observation: Mergers. Closed pursuant to exemptions (8) and (9)(A)(ii).

The Board unanimously voted to add this item to the closed agenda.

The previously announced items were:

1. Approval of Minutes of Previous Closed Meetings.
2. Administrative Actions under section 120 of the Federal Credit Union Act. Closed pursuant to exemptions (8) and (9)(A)(ii).
3. Administrative Actions under section 206 of the Federal Credit Union Act. Closed pursuant to exemptions (8) and (9)(A)(ii).
4. Special Assistance under section 208 of the Federal Credit Union Act. Closed pursuant to exemptions (8) and (9)(A)(ii).
5. Board Briefings. Closed pursuant to exemptions (8) and (9)(A)(ii).
6. Communications System. Closed pursuant to exemption (2).
7. Personnel Actions. Closed pursuant to exemptions (2) and (6).

The meeting was held at 11:00 a.m., in the Filene Board Room, 7th Floor, 1776 G Street, NW., Washington, D.C.

FOR MORE INFORMATION CONTACT: Rosemary Brady, Secretary of the Board, Telephone (202) 357–1100.

Part II

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 750 et al.

General Requirements for Surface Coal Mining and Reclamation Operations on Indian Lands; Permanent Regulatory Program—Use of Explosives: General Requirements; Programs for the Conduct of Surface Mining Operations Within Each State; Certification of Blasters in Federal Program States and on Indian Lands; Final Rule

VOL 51 ISS 103 MAY 29 1986 UMI

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 750, 816, 817, 900, 910, 912, 921, 922, 933, 937, 939, 941, 942, 947 and 955

General Requirements for Surface Coal Mining and Reclamation Operations on Indian Lands; Permanent Regulatory Program—Use of Explosives: General Requirements; Programs for the Conduct of Surface Mining Operations Within Each State; Certification of Blasters in Federal Program States and on Indian Lands

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: The Office of Surface Mining REclamation and Enforcement (OSM) of the U.S. Department of the Interior (DOI) is amending its rules on the use of explosives, and adding a new rule on the certification of blasters in Federal program States and on Indian lands. OSM also is revising its rules on Federal programs for States and on the Indian lands program to reference the new rule on the certification of blasters.

This rule adds similar provisions to the existing OSM rules on the use of explosives in surface and underground coal mining operations. It requires any blaster responsible for conducting blasting operations at a blasting site to be familiar with certain information, and to give direction and on-the-job training to persons who are not certified and who are assigned to the basting crew or assist in the use of explosives. In addition, it deletes from the previous rule on underground mining the requirement that persons responsible for blasting operations at a blasting site be familiar with the blasting plan.

This rule also adds a new part governing the training, examination and certification of blasters in Federal program States and on Indian lands. It covers the issuance, renewal, reissuance, suspension and revocation of an OSM blaster certification, replacement of a lost or destroyed certificate, and reciprocity to a holder of a certificate issued by a State regulatory authority. In addition, references to this new rule are added to the Indian lands program and to each Federal program for a State.

EFFECTIVE DATE: June 30, 1986.

FOR FURTHER INFORMATION CONTACT: Arthur Anderson, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, DC 20240; Telephone: (202) 343-1504 (Commercial or FTS).

SUPPLEMENTARY INFORMATION:

I. Background
II. Final Rule and Responses to Public Comments on Proposed Rule
III. Procedural Matters

I. Background

Requirement of 30 CFR Part 850

The OSM rules at 30 CFR Chapter VII, Subchapter M, govern the training, examination and certification of blasters. Part 850 of Subchapter M, 44 FR 9492 (March 4, 1983), establishes requirements and procedures applicable to the development of regulatory programs for these functions.

Section 850.12 of Part 850 provides that "[t]he regulatory authority is responsible for promulgating rules governing the training, examination, certification and enforcement of a blaster certification program for surface coal mining operations." Subsequent sections of Part 850 require that this blaster certification program include specified procedures.

As the regulatory authority in States with a Federal program for the regulation of surface coal mining operations, and on Indian lands, OSM is promulgating this final rule to comply with these requirements of Part 850 for Federal program States and Indian Lands.

History of Rule

The proposed rule was published on September 11, 1984. 49 FR 35714. A notice correcting the public comment period and hearing dates was published on September 25, 1984. 49 FR 37641. The public comment period was extended, a public meeting and a public hearing were announced, and several public hearings were cancelled by a notice published on November 19, 1984. 49 FR 45595.

The public comment period closed on November 29, 1984. OSM received comments on the proposed rule from 6 individuals and organizations. One request was received for a public meeting, and one for a public hearing, which were held on November 26 and 27, 1984, respectively, in Olympia, Washington. The public comments and a transcript of the public hearing are on file in the administrative record for this rule in the OSM Administrative Record Room, Room 5124, 1100 L Street, NW., Washington, DC.

II. Final Rule and Responses to Public Comments on Proposed Rule

The following text, which describes this final rule and responds to the public comments OSM received on the proposed rule, is organized by the part and section numbers of the affected provisions. Grammatical or stylistic changes that do not affect the substance of this final rule are not discussed.

In this final rule, proposed Part 855 has been moved from Subchapter M to Subchapter T and redesignated as Part 955. This was done to prevent misinterpretation of this part as establishing permanent program requirements that apply to State regulatory programs. Because proposed Part 855 was located in Subchapter M, which also includes existing Part 850, and because Part 850 Sets out permanent program requirements that apply to State regulatory programs, there existed the possibility that Part 855, through proximity with Part 850, might be misinterpreted as also establishing permanent program requirements applicable to State regulatory programs. OSM wishes to emphasize that Part 955 does not set standards for State regulatory programs, but applies only in Federal program States and on Indian lands.

This final rule includes a number of provisions that did not appear in the proposed rule. The new provisions affect Parts 750, 900, 910, 912, 921, 922, 933, 937, 939, 941, 942 and 947, which set out the programs governing surface coal mining and reclamation operation in Federal program States and Indian lands. The new provisions merely add to these Federal and Indian lands programs direct references to the blaster certification requirements of Part 955. These provisions are essentially technical, and within the purview of what was proposed.

Part 750—Requirements for Surface Coal Mining and Reclamation Operations on Indian Lands

Section 750.19 Certification of blasters.

Existing § 750.19, which previously required compliance with the forthcoming "Federally-administered blaster certification programs" is revised to reference specifically the corresponding provisions of this final rule at 30 CFR Part 955.

Part 816—Permanent Program Performance Standards—Surface Mining Activities

Section 816.61 Use of Exlposives: General requirements.

Section 816.61(c)(4)

Section 816.61(c)(4) requires any blaster who is responsible for conducting blasting operations at a

blasting site to be familiar with the blasting plan and site-specific performance standards, and to give direction and on-the-job training to persons who are not certified and who are assigned to the blasting crew or assist in the use if explosives.

While proposed § 816.61(c)(4) was directed at any "person responsible for blasing operations at a blasting site," this final rule is directed at any "blaster who is responsible for conducting blasting operations." The revised wording reflects the fact, which was implicit in the proposed rule, that the person responsible for blasting operations at a blasting site is the blaster who is conducting blasting operations. The revised wording follows from the requirement of existing § 816.61(c)(1) that "all blasting operations . . . shall be conducted under the direction of a certified blaster," and of existing § 816.61(c)(3) that "[a] blaster . . . shall be present at the firing of a blast."

Proposed § 816.61(c)(ii) would have explicitly specified that the person responsible for blasting operations at a blasting site must have a current blaster certificate. This provision was deleleted from this final rule as redundant in view of the added reference to a blaster in the introductory language of the paragraph. Under § 850.5 of this chapter a blaster by definition must be "certified under this part," so the proposed language is unnecessary.

Preemption of State Law

Several commenters asked OSM to explain whether the Act or this rule preempts any State law or regulation that otherwise would apply to persons who store, transport or use explosives in surface coal mining operations. Under 30 730.11(a) this rule will preempt only that State law or regulation which is inconsistent with, or precludes implementation of, the requirements of the Act or 30 CFR Chapter VII, which includes this rule. In either case the Secretary must follow the procedures specified in § 730.11(a) and identify the specific law or regulation.

Given the variety of State laws and regulations that apply to the storage, transportation or use of explosives in surface coal mining operations, it is not possible to predict which of them the Act or this rule might preempt. In any event, no State law or regulation will be preempted until it formally is identified as such by the Secretary.

Section 816.61(c)(4)(ii)

Section 850.13(a)(2) of 30 CFR requires the regulatory authority to establish procedures to insure the persons who are not certified and who are assigned to a blasting crew or assist in the use of explosives receive direction and on-the-job training from a blaster. The logical place to implement this requirement is in § 816.61, which contains general requirements governing the use of explosives.

Since the ultimate responsibility for providing on-the-job training necessarily lies with the blaster at the blasting site, this rule adds a new § 816.61(c)(4)(ii), which requires any blaster who is responsible for conducting blasting operations at a blasting site to give direction and on-the-job training to persons who are not certified and who are assigned to the blasting crew or assist in the use of explosives.

Part 817—Permanent Program Performance Standards—Underground Mining Activities

Section 817.61 Use of Explosives: General requirements.

Section 817.61(c)(4)

Section 817.61(c), which governs underground mining activities, contains provisions similar to those of § 816.61(c), which governs surface mining activities. This rule revises § 817.61(c)(4) in the same way and for the same reasons as discussed previously for § 816.61(c)(4).

In addition, this rule revises § 817.61(c)(4) by deleting the previous requirement that persons responsible for blasting operations at a blasting site be familiar with "the blasting plan." The reference to a blasting plan was included in § 817.61(c)(4) inadvertently when two similarly worded rules were promulgated concerning the use of explosives for surface and underground mining activities. 48 FR 9486 (March 4, 1983). However, as was explained in the preamble to the related final rule at 30 CFR 780.13(a), a blasting plan is not required for the underground mining activities governed by § 817.61. 48 FR 9789 (March 8, 1983). Therefore, this rule deletes from § 817.61(c)(4) the previous incorrect reference to a blasting plan.

Part 900—Introduction

Part 900 is an introduction to the State and Federal programs set out in subsequent parts of Subchapter T for the conduct of surface mining operations within each State. This final rule revises §§ 900.1, 900.11 and 900.13 of Part 900 to include references to new Part 955, which this final rule adds to Subchapter T. In addition, the previous wording of §§ 900.11 and 900.13 is revised somewhat to improve its clarity with no intended change in substance.

Part 910—Georgia

Part 910, which sets out the Federal program for the State of Georgia, is revised by adding a new § 910.955 to reference Part 955 as applying to the training, examination and certification of blasters for surface coal mining and reclamation operations in that State.

Part 912—Idaho

Part 912, which sets out the Federal program for the State of Idaho, is revised by adding a new § 912.955 to reference Part 955 as applying to the training, examination and certification of blasters for surface coal mining and reclamation operations in that State.

Part 921—Massachusetts

Part 921, which sets out the Federal program for the State of Massachusetts, is revised by adding a new § 921.955 to reference Part 955 as applying to the training, examination and certification of blasters for surface coal mining and reclamation operations in that State. In addition, existing § 921.850, which is superseded by § 921.955, is removed.

Part 922—Michigan

Part 922, which sets out the Federal program for the State of Michigan, is revised by adding a new § 922.955 to reference Part 955 as applying to the training, examination and certification of blasters for surface coal mining and reclamation operations in that State.

Part 933—North Carolina

Part 933, which sets out the Federal program for the State of North Carolina, is revised by adding a new § 933.955 to reference Part 955 as applying to the training, examination and certification of blasters for surface coal mining and reclamation operations in that State. In addition, existing § 933.850, which is superseded by § 933.955, is removed.

Part 937—Oregon

Part 937, which sets out the Federal program for the State of Oregon, is revised by adding a new § 937.955 to reference Part 955 as applying to the training, examination and certification of blasters for surface coal mining and reclamation operations in that State.

Part 939—Rhode Island

Part 939, which sets out the Federal program for the State of Rhode Island, is revised by adding a new § 939.955 to reference Part 955 as applying to the training, examination and certification of blasters for surface coal mining and reclamation operations in that State. In addition, existing § 939.850, which is superseded by § 939.955, is removed.

Part 941—South Dakota

Part 941, which sets out the Federal program for the State of South Dakota, is revised by adding a new § 941.955 to reference Part 955 as applying to the training, examination and certification of blasters for surface coal mining and reclamation operations in that State.

Part 942—Tennessee

Part 942, which sets out the Federal program for the State of Tennessee, is revised by adding a new § 942.955 to reference Part 955 as applying to the training, examination and certification of blasters for surface coal mining and reclamation operations in that State. In addition, existing § 942.855, which incorrectly references non-existent Part 855, is removed.

Part 947—Washington

Part 947, which sets out the Federal program for the State of Washington, is revised by adding a new § 947.955 to reference Part 955 as applying to the training, examination and certification of blasters for surface coal mining and reclamation operations in that State. In addition, existing § 947.850, which is superseded by § 947.955, is removed.

Part 955—Certification of Blasters in Federal Program States and on Indian Lands

As noted previously in the introduction to this portion of the preamble, proposed Part 955 was moved from Subchapter M to Subchapter T and redesignated as final Part 955. Thus, the comments OSM received on proposed Part 855 now apply to Part 955. To avoid the confusion that might result from repeated references to these two similar part numbers, the following discussion refers only to Part 955, with the understanding that it covers the correspondingly numbered sections of proposed Part 855.

Section 955.1 Scope.

Section 955.1 defines the scope of new Part 955, which establishes the program required by 30 CFR 850.12 for the training, examination and certification of blasters in Federal program States and on Indian lands. Part 955 governs the issuance, renewal, reissuance, suspension and revocation of an OSM blaster certificate, replacement of a lost or destroyed certificate, and reciprocity to a holder of a certificate issued by a State regulatory authority.

The purview of Part 955 is limited to Federal program States and Indian lands. Thus, for Federal lands in a State with a Federal program the training, examination and certification of blasters is governed by Part 955. However, for Federal lands in a State with a State regulatory program the training, examination and certification of blasters is governed by the State program, regardless of whether there is a Federal-State cooperative agreement. *See:* 30 CFR 740.11(a).

Relationship to State Law and Programs

Except as described under the heading *Preemption of State Law* in the preceding analysis of § 816.61(c)(4), this rule does not preempt any State law or regulation governing either the licensing or certification of blasters, or the storage, transportation or use of explosives in general. A State may require a blaster to comply with any State law or regulation that has not been identified by the Secretary as preempted by the Act or this rule.

Several commenters asked whether OSM plans to integrate the blaster certification program under Part 955 with similar State licensing or certification programs that already may exist in Federal program States. One suggested that OSM modify the rule to enable OSM and a State to issue jointly a single certificate. The commenter thought this would insure that a blaster becomes aware of any need to obtain authorization from both jurisdictions.

Another commenter suggested including in the rule a provision allowing OSM to enter into a cooperative agreement under which a qualified State agency would administer the OSM blaster certification program. This commenter thought that even though a State elected not to pursue primacy in the overall regulation of surface coal mining operations it might elect to administer the more limited blaster certification portion of the Federal program.

OSM currently has no plans to seek either joint Federal-State or independent State administration of the OSM blaster certification program established by this rule. Nor has OSM reached any conclusion on either the need for or the legality under the Act of a provision authorizing OSM to enter into a cooperative agreement for either joint or independent State administration of the program. Therefore, this final rule includes neither of the suggested provisions.

Another commenter was concerned about whether OSM would make the training and certification of blasters under Part 955 compatible with State procedures already in place. As discussed subsequent § 955.14(b), under the heading *Oral Examination*, this commenter thought the requirement for a written examination was incompatible with some existing State procedures.

OSM disagrees. While some requirements of Part 955 may be more stringent than those of some State procedures, they are not incompatible. OSM is aware of nothing in Part 955 that would prevent the holder of a State license or certificate from obtaining an OSM blaster certificate, or vice versa.

Section 955.2 Implementation.

In accordance with 30 CFR 750.19, 816.61(c) and 817.61(c), § 955.2 specifies that in Federal program States and on Indian lands the requirement that any person who is responsible for conducting blasting operations at a blasting site shall have a current blaster certificate is not effective until June 30, 1987. Before that date, §§ 750.19, 816.61(c) and 817.71(c) require that all blasting operations in Federal program States and on Indian lands be conducted by competent experienced persons who understand the hazards involved.

This is a new section added to the final rule to set out the specific date when the requirements of existing §§ 750.19, 816.61(c) and 817.61(c), as they relate to an OSM blaster certificate, will apply in Federal program States and on Indian lands. It does not change the date that otherwise would have applied under these existing sections. Nor does it affect the effective date of any other requirement of this part.

Under 30 CFR 816.61(c)(1) and 817.61(c)(1) the requirement that all blasting operations are to be conducted under the direction of a certified blaster does not become effective until 12 months after the implementation of a blaster certification program. The Indian Lands Program at 30 CFR 750.19 incorporates, §§ 816.61(c) and 817.71(c), and thus delays the effective date of the requirement for a blaster certificate on Indian lands for the same 12-month interval. This interval will give candidates for an OSM blaster certificate ample time to complete training, submit an application, pass the examination, and become certified before the requirement to have a certificate is implemented in Federal program States and on Indian lands.

Several commenters were concerned that delays in the availability of application forms, training materials, or the examination might minimize the value of this 12-month interval. OSM assures these commenters that the forms and other materials necessary to comply with Part 955 will be available on the effective date of this rule.

Notwithstanding the 12-month interval before the requirement for an OSM blaster certificate is implemented, OSM

advises everyone subject to this part to apply for a certificate as soon as is practicable after they meet the required qualifications. Anyone who submits an application at the last minute does so at his or her own risk. OSM neither will be responsible for nor will excuse any failure to meet the requirements of § 955.2, or of §§ 750.19, 816.61(c) or 817.61(c), due to the length of time involved in the certification process.

Section 955.5 Definitions.

Section 955.5, which did not appear in the proposed rule, defines a number of terms used in this part. It clarifies, but does not change, the substance of what was proposed.

Applicant is defined as a person who submits an application for an OSM blaster certificate. *Application* is defined as a request for an OSM blaster certificate submitted on the prescribed form, including the required fee and any applicable supporting evidence or other attachments. These definitions are added to this rule to supplant the inapt definitions of these same two terms in 30 CFR 701.5, which apply generally to Chapter 30 unless otherwise indicated.

Issue and *issuance* are defined as meaning to grant to an applicant his or her first OSM blaster certificate that is not granted through reciprocity. To qualify for the issuance of a certificate an applicant must meet certain qualifications, a number of which differ from those for the subsequent certificate renewal or reissuance, and all of which differ from those for a certificate through reciprocity. An applicant who previously had obtained a certificate through reciprocity, but no longer qualifies for or wishes to rely on reciprocity, must qualify for certificate issuance in the same manner as any other applicant. Hence, the terms *issue* and *issuance* do not apply to a first certificate that is granted through reciprocity.

Reciprocity is defined to mean the recognition by OSM of a blaster certificate issued by a State regulatory authority under an OSM-approved blaster certification program as qualifying an applicant for the grant of an OSM blaster certificate. For more information on reciprocity, see particularly the discussion of § 955.16.

Reissue and *reissuance* are defined as synonymous with the term *recertification* in 30 CFR 850.15(c), and as meaning to grant to an applicant who holds a renewed OSM blaster certificate, or who holds an OSM blaster certificate that expired more than 1 year prior to the date of his or her application, or who held an OSM blaster certificate that was revoked, a subsequent certificate that is not granted through reciprocity and for which additional training and examination are required.

As was noted in the proposed rule, Part 850, on which Part 955 is based, provides in § 850.15(c) for the "recertification" of blasters. In drafting Part 955 is was found that use of the term *recertification* would reduce the grammatical clarity of the rule. For this reason, the terms *reissue* and *reissuance* are substituted in its place. For more information on reissuance in relation to the renewal of a current or expired certificate, see the subsequent discussion of § 955.15(d), and for a revoked certificate see the subsequent discussion of § 955.17(e)(2).

Renew and *renewal* are defined as meaning to grant to an applicant who holds an issued or reissued OSM blaster certificate a subsequent certificate that is not granted through reciprocity and for which additional training and examination are not required.

Replace and *replacement* are defined as meaning to grant to an applicant a duplicate OSM blaster certificate as a substitute for one that was lost or destroyed.

Section 955.10 Information collection.

The information collection requirements in Part 955 are contained in §§ 955.12 (a)(2) and (b)(2), 955.13(a) and 955.15(g). Section 955.12 (a)(2) and (b)(2) require an applicant to obtain satisfactory evidence of having completed training in the use of explosives. Section 955.13(a) requires an applicant to provide on an OSM application form information pertinent to determining his or her qualifications for a blaster certificate, and ultimately to identifying him or her as the certificate holder. Section 955.15(g) requires a person who holds an OSM blaster certificate to notify OSM within 30 days of any change in his or her address. This information is needed by OSM to determine whether an applicant is qualified to obtain an OSM blaster certificate, and to administer the program once the certificate is issued.

Section 955.11 General requirements.

Section 955.11 lists the general requirements an applicant must meet to qualify for an OSM blaster certificate. It derives primarily from proposed § 955.11(a), with some changes. Proposed § 995.11(b) was deleted as redundant.

To qualify for an OSM blaster certificate under § 955.11, a person must:

(a) Be at least 20 years old prior to submitting an application, and at least 21 years old prior to the grant of a certificate;

(b) Have worked as a blaster or the equivalent, or have worked under the direction of a blaster or the equivalent, for either 1 or 2 of the 3 years preceding the submission of an application, the length of time depending on the applicant's current certification status;

(c) For certificate issuance or reissuance, have received on-the-job training, completed a training course, and obtained satisfactory evidence of having completed training, as provided in § 955.12;

(d) Be competent, possess practical knowledge of blasting techniques, understand the hazards involved in the use of explosives, and exhibit a pattern of conduct consistent with the acceptance of responsibility for blasting operations;

(e) Submit an application as specified in § 955.13;

(f) For certificate issuance or reissuance, pass a written examination as specified in § 955.14;

(g) For a certificate through reciprocity, meet the requirements of § 955.16; and

(h) Not be subject to suspension, revocation or other action under § 955.17.

The differences between these requirements and those in the proposed rule for each paragraph of this section are discussed under the following headings.

Section 955.11(a) Minimum age.

Under § 955.11(a), the minimum age at which a person may apply for an OSM blaster certificate is 20 years, and the minimum at which a person may be granted a certificate is 21 years. The proposed rule would have set the minimum age for the granting of a certificate at 18 years, but did not specify any minimum for submitting an application. The minimum age of 21 years is similar to current State requirements.

Several commenters thought that the proposed minimum age of 18 years was too young because, together with the 2-out-of-3 year minimum experience requirement of this rule for certificate issuance, it might prompt persons who were only 15 or 16 years old to work in a hazardous occupation. Several commenters also noted that other Federal and State laws which regulate the use of explosives specify a minimum age of 21 years. For example, the Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms rules on commerce in explosives at 27 CFR 55.49

specify that an applicant for a license or permit must be 21 years of age or older.

OSM agrees with these commenters that the proposed minimum age of 18 was too low, and that 21 years is the minimum age at which a person reasonably might be expected to have sufficient training, knowledge, experience and competence to accept responsibility for conducting blasting operations, and has revised this final rule accordingly.

Because of unavoidable delays that will result from the requirement for an examination and from administrative processing, a significant amount of time may elapse between the filing of an application and the grant of a certificate. To compensate for these delays, and enable an otherwise qualified applicant to obtain a certificate as soon as he or she reaches the age of 21, this final rule allows anyone over the age of 20 to submit an application. Once OSM determines that an underage applicant has met all of the other qualifications required by this part, it may grant a post-dated certificate to take effect on the applicant's 21st birthday.

Section 955.11(b) Experience.

Section 955.11(b), which corresponds with proposed § 955.11(a)(2), specifies both the kind and amount of experience an applicant must have to qualify for an OSM blaster certificate. It requires that an applicant either have been qualified and worked as a blaster or the equivalent, or have worked under the direction of a blaster or the equivalent, for a specified period of time.

The amount of experience an applicant must have depends on his or her certification status. For certificate issuance it is 2 years out of the 3 years preceding the submission of an application; for certificate renewal or reissuance it is 1 year out of the preceding 3. In each case the amount of experience is cumulative during the 3 years preceding the submission of an application. An applicant may aggregate experience gained as a blaster or the equivalent with that gained under the direction of a blaster or the equivalent. Likewise, an applicant may aggregate shorter periods of interrupted experience to reach the 1 or 2 year totals.

In determining whether the years of experience claimed by an applicant meet the time periods specified in the rule, OSM will consider not only the duration of the experience, but also the type of activity involved. Only that experience which otherwise meets the requirements of this rule will be counted toward satisfying the minimum time requirement.

Section 955.11(b) differs from the proposed rule in a number of ways. One, to improve the organization of the rule the on-the-job training requirement in proposed § 955.11(a)(2) was relocated to § 955.12(a) of this final rule, which includes a related requirement for the completion of a training course, and a reference to the on-the-job training requirement in § 955.12 was added to § 955.11(c).

Rule Recognizes Blaster or the Equivalent

Two, this section now enables a person to qualify for an OSM blaster certificate by working as or under the direction of either a blaster *or the equivalent*. The proposed rule did not recognize equivalent experience.

Several commenters maintained that proposed § 955.11(a)(2) was too strict because many persons with adequate qualifications for an OSM blaster certificate would not meet, or have worked under the direction of someone else who meets, the narrow definition of the term "blaster."

As defined by 30 CFR 850.5, "*Blaster* means a person directly responsible for the use of explosives in surface coal mining operations who is certified under this part." Thus, the only experience recognized by proposed § 955.11(a)(2) was that obtained specifically in surface coal mining operations as, or under the direction of, the holder of an OSM or State blaster certificate issued under Part 850.

With respect to the proposal to recognize experience gained only in surface coal mining operations, these commenters suggested that OSM also recognize equivalent blasting experience gained in activities such as quarrying, construction, other mining, management, consulting, education and sales. OSM agrees, and the final rule now recognizes equivalent blasting experience gained in such activities. Later in this discussion, general criteria are given on what type of experience OSM may accept as equivalent.

With respect to the proposal to recognize experience gained only under an OSM or State blaster certificate, these commenters also suggested that OSM recognize equivalent experience gained under a State license not issued under Part 850.

OSM had proposed to do this in the transition period immediately following promulgation of this rule, when no one possibly could have sufficient experience under an OSM or State blaster certificate, by interpreting the word "blaster" in this provision to include any person licensed, certified or otherwise authorized by OSM or a State to conduct blasting operations. Thus, OSM agrees with these commenters and intends the words "or the equivalent" in this final rule to include experience gained under equivalent State licensing or certification procedures. This will obviate any special interpretation in the transition period, and will apply throughout the life of the rule.

Due to the many types of blasting experience which applicants for an OSM blaster certificate might proffer as equivalent, it is not possible for OMS to set precise criteria for assessing equivalance. Generally, however, OSM will accept as equivalent only that experience gained in activities which reasonably approximate the environment, procedures, shot size, and hazards of surface coal mining operations. This must include sufficient practical experience with blasting technique, equipment and personnel in an actual working environment. Mere abstract experience with the theory and practice of blasting will not suffice. Likewise, OSM will recognize as equivalent only a license, certificate or other authorization to conduct blasting operations which qualifies the holder to act in a capacity reasonably approximating that of a blaster.

Under this rule an applicant for an OSM blaster certificate will have the burden of demonstrating to the satisfaction of OSM that his or her experience is equivalent to that obtained as, or under the direction of, a blaster.

One commenter asked OSM to consider whether persons who are not responsible for blasting operations at a blasting site might need an OSM blaster certificate, and to modify the experience requirement of the rule accordingly. This commenter cited, for example, mine management personnel who are directly responsible for but are precluded by union rules from taking an active part in blasting operations, and consultants who develop blasting plans but do not participate in on-site blasting activities.

Under 30 CFR 816.61(c), the only person who must have an OSM blaster certificate is one conducting blasting operations at a blasting site. Management personnel and consultants away from the site are not required to have a certificate, regardless of any direct or indirect responsibility they may have for the operations. If such a person wanted to obtain an OSM blaster certificate, whether he or she could qualify would depend on whether the management or consulting experience was equivalent to that obtained as, or under the direction of, a blaster.

Minimum Amount of Experience

And three, this section now requires less experience for certificate renewal and reissuance than it does for certificate issuance. The proposed rule would have required 2 years of experience for all of these certificates.

Several commenters said that the requirement of this section for blasting experience in 2 out of the 3 years preceding submission of an application was excessive. One thought that considering the requirements for training and examination, 1 year of experience was sufficient. Another suggested that to prevent "severe hardships" OSM should reduce the requirement during the first year of the program to only 1 year, with at least 75% of that year worked directly as a blaster.

One commenter asked OSM to reconsider the minimum amount of experience required for reissuance of an OSM blaster certificate. This commenter suggested a requirement of 1 year of experience out of the preceding 3 to accommodate certificate holders who through uncontrollable circumstances did not actively engage in blasting for the entire 3-year certificate term.

To the extent these comments relate to certificate issuance, OSM disagrees. For certificate issuance this final rule retains the requirement for 2 years of experience out of the 3-year period preceding the submission of an application. Notwithstanding any inconvenience the requirement for 2 years of experience might impose on a candidate for certificate issuance, the safety and welfare of people and property at the blasting site are more important.

Blasting is a dangerous occupation, and among the numerous State and Federal government officials, consultants, manufacturers and other experts contacted by OSM in drafting the proposed rule there was a consensus that 2 years of experience was the minimum needed to qualify as a blaster. OSM agrees with this consensus, and concludes that a minimum of 2 years of recent experience is necessary to give most potential candidates for certification a sufficiently thorough understanding of explosives for them to assume responsibility for blasting operations.

This requirement for 2 years of experience should not put anyone out of work or otherwise impose a severe hardship for several reasons. First, it is unlikely that any significant number of persons who currently are working at a level of responsibility equivalent to that of a blaster would lack the required 2 years of experience. This is particularly true since the rule allows an applicant to aggregate experience gained as a blaster or the equivalent with that previously gained under the direction of a blaster or the equivalent.

Second, not everyone who handles explosives or works on a blasting crew must have a blaster certificate, only the blaster who is responsible for conducting blasting operations at a blasting site. Thus, a person who does not qualify for an OSM blaster certificate may continue to earn an income in the blasting profession while gaining the required experience.

Finally, as described previously for § 955.2, OSM will not implement the requirement for an OSM blaster certificate in Federal program States and on Indian lands until 12 months after the effective date of this rule. This interval will give potential applicants additional time to gain the required 2 years of experience.

To the extent these comments relate to certificate renewal and reissuance, however, OSM agrees that 1 year of experience out of the 3 years preceding the submission of an application is sufficient. The amount of expereince necessary to maintain proficiency as a blaster obviously is less than what is required to acquire such proficiency in the first place. Once an applicant has qualified for and obtained an OSM blaster certificate, 1 year of experience out of the preceding 3 is sufficient to maintain proficiency. Thus, the experience requirement for certificate renewal and reissuance has been reduced from 2 years to 1 year.

Section 955.11(c) Training.

Section 955.11(c) corresponds with proposed § 955.11(a)(4). In the proposed rule, this provision implied that every applicant was required to complete training in order to qualify for an OSM blaster certificate. However, training is required only for certificate issuance and reissuance. Applicants for other types of certificates need not complete additional training. To clarify this requirement, the phrase "For certificate issuance or reissuance" was added to § 955.11(c).

In addition, the term "blaster," which modified the term "training," was deleted as superfluous. And a reference to the requirements for on-the-job training and obtaining satisfactory evidence of training were added to correspond with changes in final § 955.12. For more information on these changes, and on the training requirement in general, see the discussion under subsequent heading *§ 955.12 Training.*

Section 955.11(d) Competence.

Section 955.11(d) is the same as proposed § 955.11(a)(3).

Section 955.11(e) Application.

Section 955.11(e) corresponds with proposed § 955.11(a)(5). The reference to a fee in this section was deleted as superfluous because this final rule now includes the fee in the definition of application.

Section 955.11(f) Examination.

Section 955.11(f) corresponds with proposed § 955.11(a)(6). The proposed rule did not explicitly state that the requirement for an examination applies only to certificate issuance and reissuance. Since applicants for other types of certificates need not pass an examination, the phrase "For certificate issuance or reissuance" was added to this section. For more information on the examination requirement, see the discussion under subsequent heading *§ 955.14 Examination.*

Section 955.11(g) Reciprocity.

This is a new paragraph which did not appear in the proposed rule. It merely cross-references § 955.16, which governs the grant of a certificate through reciprocity, to make the list of general requirements in this section more complete.

Section 955.11(h) Suspension and revocation.

Section 955.11(h) is the same as proposed § 955.11(a)(7).

Section 955.12 Training.

Section 955.12 requires an applicant for certificate issuance or reissuance to have completed a training course. An applicant for certificate issuance also must have completed on-the-job training. This section also requires OSM to ensure that courses are available to train potential applicants on the required topics.

Proposed § 955.12(b)(2) would have authorized OSM to modify the training required of an applicant for certificate reissuance to reflect previous training. This provision was deleted from this final rule as unnecessary because new § 955.12(b)(1) now contains a modified training requirement for certificate reissuance which inherently accounts for previous training. OSM does not intend to modify further the training required for certificate reissuance.

Section 955.12(a) On-the-job training.

Section 955.12(a) is a new provision derived from proposed § 955.11(a)(2). Paragraph (a)(1) requires each applicant

for the issuance of an OSM blaster certificate who does not qualify as a blaster or the equivalent to have received on-the-job training, including practical field experience in blasting operations, from a blaster or the equivalent for 2 out of 3 years preceding the submission of his or her application. The time period that applies to this requirement derives from proposed § 955.11(a)(2), and is adopted for the same reasons as discussed previously for the minimum experience requirement of § 955.11(b)(1).

Paragraph (a)(1) references a narrow exception to its requirements in § 955.14(c)(2), which for reexamination provides that any person who fails the examination and submits a new application within 2 years of completing training need not repeat training, or resubmit evidence of having completed training. For more information on this exception, see the subsequent discussion of the referenced § 955.14(c)(2).

Paragraph (a)(2) of this section requires the applicant to have obtained from either the blaster or the equivalent who provided the on-the-job training, the relevant employer at the time the training was received, or some other knowledgable source, satisfactory evidence of having received on-the-job training in accordance with paragraph (a)(1). Satisfactory evidence must include sufficient information to demonstrate that the training was received, and enable OSM to contact either the blaster or the equivalent who provided the training, the employer, or the other knowledgable source, to verify this fact.

The applicant is given several options as to the source of the evidence because in some situations either the blaster who provided training or the employer may no longer be available to provide it. To avoid the problem of having to obtain satisfactory evidence from a blaster or employer with whom the applicant no longer is associated, or finding another sufficiently knowledgable source, OSM encourages blaster-trainees to obtain the required evidence on a routine basis as part of their training.

Section 955.12(b) Training course.

Section 955.12(b) corresponds with proposed § 955.12(a). Paragraph (b)(1) requires an applicant for the issuance or reissuance of an OSM blaster certificate to have completed a training course in specified topics. It references the same narrow exception to this requirement that was noted in the preceding discussion of § 955.12(a)(1).

Under this paragraph an applicant must complete training within 2 years of submitting an application. Depending on whether the application is for certificate issuance or reissuance, two different levels of training are required. For certificate issuance the training must cover the technical aspects of blasting operations, and State and Federal laws governing the storage, transportation and use of explosives, including the topics specified in 30 CFR 850.12(b). For certificate reissuance the training must cover any significant changes that have occurred in the topics specified in 30 CFR 850.15(b) since the applicant last completed a training course that was accepted by OSM for the issuance or reissuance of an OSM blaster certificate. If OSM determines that no significant changes have occurred, then OSM may waive this latter requirement.

Section 955.12(b)(2) requires an applicant to have obtained from his or her training provider satisfactory evidence that he or she completed training in accordance with paragraph (b)(1). At a minimum, such evidence will include the names and addresses of the applicant and the training provider, and the type, content and date(s) of the training.

The evidence need not follow any specific format, as long as it adequately documents that the applicant has completed the required training. In specifying the type of training, it should indicate the nature of the training provider and the form of instruction. It should specify the content of the training in sufficient detail for OSM to judge whether the topics specified in 30 CFR 850.13(b) were covered adequately. And it should specify the date the training was begun, or how long it lasted, and the date it was completed.

The applicant need not include evidence of any grade that may have been received in a course, and a passing grade will not be considered by OSM as a criterion in determining whether an applicant has completed adequate training. No grade is required because OSM considers its examination to be an adequate measure of what the applicant has learned. The applicant will have the burden of demonstrating to the satisfaction of OSM that he or she has completed adequate training.

Section 955.12(b) differs from the proposed rule in several ways. One, as was implicit in the proposed rule, this final rule explicitly states that the training requirement applies only to applicants for certificate issuance or reissuance. Applicants for the other types of certificates need not complete any additional training or submit a training voucher.

Two, the maximum time that may elapse between the dates when an applicant completes training and submits an application is reduced from 3 years to 2 years. OSM has concluded that a 3-year interval is too long to ensure that a training course is sufficiently up-to-date with respect to significant changes in the law and technology. OSM considered shortening the interval to 1 year, but concluded that this would unreasonably restrict not only the training option available to an applicant, but also the time available for an applicant to complete the remainder of the certification process.

Three, this final rule substitutes for the term "OSM or equivalent training" in the proposed rule the term "a training course." As discussed subsequently for § 955.12(b), OSM will not itself provide any of the training required by this part, and therefore the term "OSM or equivalent training" is inapt. Since proposed § 955.12(b)(1) would have required OSM to provide or otherwise ensure the availability of training courses, the requirement that an applicant for certificate issuance or reissuance have completed a training course was implicit in the proposed rule.

To meet the requirements of this section, a training course must be adequate to prepare the applicant to assume responsibility for conducting blasting operations at a blasting site. This may include a correspondence course in which the trainee receives interactive instruction and feedback, but does not include unsupervised self-study of either prepared matter materials or random information on the required subjects.

A commenter asked OSM to provide specific criteria on what would constitute acceptable training, including the amount of time involved. OSM has concluded that specific criteria might limit unduly the training options available to potential applicants, with few offsetting benefits. Therefore, this rule provides only general criteria. For more information on the training requirement in general, see the notice of final rulemaking for 30 CFR 850.13. 48 FR 9438–9480 (March 4, 1983).

And four, final § 955.12(a)(1) now requires different levels of training for certificate issuance and reissuance. Proposed § 955.12(a) would have required applicants for both types of certificates to complete the same level of training. Proposed § 955.12(b)(2), however, would have authorized OSM to modify the training required for reissuance to reflect previous training an applicant had received. In response to public comments, OSM has included a modified training requirement for certificate reissuance directly in

paragraph (b)(1), and has deleted the corresponding provision of proposed § 955.12(b)(2).

OSM received a number of comments on the provision for modification of the training requirement. One commenter asked whether OSM had developed any criteria for determining the training required for certificate reissuance. This commenter suggested that OSM should require additional training only when a blaster must use new procedures, and thought that any training given to certificate holders would only duplicate training already offered by the Mine Safety and Health Administration (MSHA).

Revised § 955.12(b)(1) now bases the training required for certificate reissuance on any significant changes that have occurred in the topics specified in 30 CFR 850.13(b) since the applicant last completed a training course that was accepted by OSM for the issuance or reissuance of an OSM blaster certificate. A potential applicant for certificate reissuance will be able to meet this requirement in most instances by taking a short refresher course. When no significant changes have occurred, OSM may waive this requirement entirely. OSM will not require anyone to duplicate training that already had been provided by MSHA, or any other adequate course, within the applicable 2-year period.

Section 955.12(c) Availability.

Section 955.12(c) corresponds with proposed section 955.12(b)(1). It requires OSM to ensure that courses are available as provided in 30 CFR 850.13(b) to train persons who are subject to Part 955 and responsible for the use of explosives in surface coal mining operations. This implements the requirement of § 850.13(b) that "[t]he regulatory authority shall ensure that courses are available to train persons responsible for the use of explosives in surface coal mining operations."

Section 955.12(b) differs from the proposed rule in a number of ways. One, as discussed previously in the introduction to this section, proposed paragraph (b)(2) was deleted in view of the two different levels of training included in final paragraph (b)(1).

Two, the phrase "subject to this part" was added to clarify that OSM must ensure the availability of courses only to the extent it is the regulatory authority. Under 30 CFR 850.13(b), the regulatory authority need only ensure that courses are available to persons under its jurisdiction. With respect to such courses, the jurisdiction of OSM as regulatory authority is limited to those persons who are subject to this part in Federal program States and on Indian lands.

And three, the requirement in proposed paragraph (b)(1) for OSM to provide courses has been deleted. Although one commenter agreed with this requirement, OSM has concluded that there is no need for it to duplicate the courses that already are available, or may be offered in the future, to provide the training required by section 955.12(b).

This same commenter also recommended that OSM develop a self-study training program. OSM does not intend to do so. As discussed previously for section 955.12(b), OSM has concluded that while a correspondence course in which a trainee receives interactive instruction and feedback may meet the training requirement of this section, unsupervised self-study of either prepared materials or random information on the required subjects will not. OSM is not prepared to engage in the interactive training a correspondence course would require. However, OSM will attempt to make available to potential applicants a list of courses, including any taught by correspondence, that meet the requirements of section 955.12(b).

This commenter also asked whether course instructors would need to have an OSM blaster certificate. The answer is no. Many fully competent instructors may not have sufficient, recent, practical experience to qualify for a certificate. Furthermore, the requirement for a blaster certificate applies only to persons responsible for conducting blasting operations at a blasting site.

Another commenter suggested that OSM should add to section 955.12 a new paragraph that would enable a surface mining permittee to train potential applicants for an OSM blaster certificate. OSM has not adopted this suggestion because the additional provision is unnecessary. Nothing in section 955.12 would preclude a permittee from providing the required training.

Section 955.13 Application.

Section 955.13 governs the application process for an OSM blaster certificate. It specifies the required application procedures, including the payment of an application fee and the submission of evidence of any applicable training, and requires OSM to make available a prescribed form on which an application must be submitted.

Section 955.13(a) Submission procedures.

Section 955.13(a) requires any person seeking an OSM blaster certificate to: (1) Complete and submit to OSM an application on the prescribed form; (2) include as part of the application a specified nonrefundable fee; (3) for certificate issuance or reissuance, include as part of the application satisfactory evidence of having completed training as provided in section 955.12; and (4) submit the application and fee a specified number of days in advance of a specified reference date, the number of days and the reference date in each case depending upon whether the application is for certificate issuance, renewal, reissuance, or a certificate through reciprocity.

Section 955.13(a)(1) Prescribed form.

For a discussion of the prescribed application form, see the subsequent heading *§955.13(b) Application form.*

Section 955.13(a)(2) Application fee.

Section 955.13(a)(2) requires an applicant to include as part of his or her application a fee that ranges in amount from $28 to $122, depending on the type of certificate sought. The proposed rule would have required the applicant to submit a fee "with the application," while this final rule requires the applicant to include the fee "as part of the application" since the term "application" now is defined by section 955.5 to include the fee.

The specified application fees are adopted under the authority of section 9701 of Pub. L. 97–258, 96 Stat. 1061 (31 U.S.C. 9701), which prior to editorial revision and recodification was section 501 (31 U.S.C. 483(a)) of the Independent Offices Appropriation Act (IOAA). Section 9701 authorizes an agency to prescribe regulations establishing a charge for a service or thing of value provided by the agency. The charge must be fair and based on costs to the government, the value of the thing or service to the recipient, the public policy or interest served, and other relevant facts.

The application fees in section 955.13(a)(2) were derived by calculating the direct and indirect costs OSM expects to incur in the certification process. For the issuance or reissuance of a certificate, the application fee includes the cost of clerical processing, technical review, and the cost of the examination. For reexamination, the fee includes only the cost of the examination.

For renewal or replacement of a certificate, or a certificate through reciprocity, the fee includes only the cost of processing the application and

certificate, since no examination is required. There is no fee for a temporary certificate, the cost of which is covered by the underlying application fee.

As shown by the following table, the application fee for the issuance or reissuance of an OSM blaster certificate is $122. This includes the costs OSM expects to incur in the clerical processing and technical review of the application; developing, administering, renting the facility for, and grading the examination; and processing the certificate. The application fee for reexamination of an applicant who has failed the examination on a previous attempt is $61, which covers the cost of the examination.

FEE CALCULATION FOR CERTIFICATE ISSUANCE AND REISSUANCE [1]

Activity	Time allotted (hours/appl.)	Hourly rate of pay: Clerical (GS–4)	Hourly rate of pay: Technical (GS–9)	Cost/applicant (dollars)
Application:				
Clerical processing	2	$7		$14
Technical review	3		$11	33
Examination:				
Develop	[2] 3		11	33
Administer	[3] 0.2		11	2
Facility	[4]			[4] 4
Grading	2		11	22
Certification: Process certificate	2	7		14
Total				$122

[1] Based on 1986 U.S. Government pay schedule.
[2] 300 hours/exam/year divided by 100 applicants/exam/year.
[3] 5 hours/exam divided by 25 applicants/exam.
[4] $100/exam divided by 25 applicants/exam.

The application fees for renewal and for a certificate through reciprocity are each $61. The fee calculation for these certificates is similar to that for issuance and reissuance, except that the cost of an examination is not included. For certificate replacement the application fee is $28, which includes only the cost of the clerical processing of the application and certificate.

One commenter said that a fee of $122 for certificate issuance and reissuance was "inflated and unjustifiable" because the number of hours OSM projected it would take to review and process an application, and to develop the examination, was excessive. The basis for this commenter's conclusions was his experience with administering a State blaster certification program.

OSM has reviewed the proposed fee schedule in light of this comment, but nevertheless has adopted the schedule as proposed. The hours projected for each activity in the fee calculation are reasonable estimates of the average amounts of time it will take OSM to issue or reissue a blaster certificate.

The amount of time allotted to each activity is an average for all certificates. While some certificates may take less time, others will take more. These allotted times cover both the development of the certification process, and its subsequent administration.

OSM does not intend merely to rubber-stamp an application, but to review thoroughly the applicant's training, experience, employment history, and other qualifications, and where there is any question, to verify the accuracy of the information provided.

The time allotted to developing, administering and grading the examination reflects the need to review and update the examination on a regular basis, and to insure that it fairly and accurately measures an applicant's qualifications. The time allotted to processing the certificate covers not only the actual issuance of the certificate itself, but also the maintenance of records, and any subsequent communications with certificate holders.

If experience shows that any application fee in this rule does not reasonably reflect OSM's costs, OSM will propose a new rule to adjust the fee accordingly.

Another commenter believed OSM should not charge a fee for a certificate through reciprocity. This commenter thought OSM was not justified in charging an applicant who already had paid a fee to a State for a similar service.

OSM disagrees. The fee for a certificate through reciprocity is an estimate of the actual costs OSM will incur in the certification process. As it is the applicant for a certificate through reciprocity who causes OSM to incur these costs, it is reasonable for the applicant to bear these costs through the payment of a fee.

Section 955.13(a)(3) Evidence of training.

This is a new paragraph that did not appear in the proposed rule. It requires an applicant for certificate issuance or reissuance to include as part of the application satisfactory evidence of having completed training as provided in section 955.12. As with the application fee described previously under section 955.13(a)(2), this evidence is defined by section 955.5 as part of the application. For more information on the requirement for evidence of training, see the preceding discussion of section 995.12.

Section 955.13(a)(4) Examination date.

This is a new paragraph that did not appear in the proposed rule. It was derived from proposed section 955.13(b), and requires an applicant for certificate issuance or reissuance to specify in the application the date when he or she desires to take a previously scheduled examination. While proposed section 955.13(b) explicitly required the application form to include provision for the applicant to specify the desired examination date, final section 955.13(b) now covers the application form only in general terms. To facilitate the interpretation of subsequent section 955.13(a)(5), which uses the date of examination as the benchmark for determining when an applicant for certificate issuance or reissuance must submit an application, the explicit requirement for the applicant to specify the examination date was retained in section 955.13(a)(4).

Section 955.13(a)(5) Submission deadlines.

Proposed section 955.13(a)(3) was renumbered as section 955.13(a)(5). It requires an applicant for certificate issuance, renewal or reissuance to submit his or her application not less than 60 days before certain specified dates. For certificate issuance the deadline is 60 days before the date on which the applicant desires to take a previously scheduled examination. For renewal it is 60 days before the expiration date of the applicant's current certificate. And for reissuance it is 60 days before the date on which the applicant desires to take a previously scheduled examination that will be held at least 60 days before the expiration date of the applicant's current certificate.

The term "previously" was added to modify the term "scheduled examination" in this section to clarify the requirement that the applicant must conform with the current application

schedule published by OSM. OSM does not intend to adopt this schedule retroactively on the basis of requests it might receive from applicants for a particular examination date.

The deadline for submitting an application for certificate issuance or reissuance is keyed to the examination date in order to give OSM advance notice of how many people wish to attend, and thus enable OSM to schedule the necessary personnel and facilities. It is expected that OSM routinely will circulate an examination schedule for the information of prospective applicants.

These deadlines will give OSM the minimum amount of time it needs for processing the application, holding the examination, and the timely issuance, renewal or reissuance of any resulting certificate. Under this provision the applicant is responsible for submitting an application in time to obtain a certificate by a desired date, to gain admission to a particular examination, or to prevent the expiration of his or her certificate.

The direct consequence of a failure to meet any of these deadlines is limited to potential delay in the issuance, renewal or reissuance of a certificate beyond the date when one is needed or desired by the applicant. An indirect consequence may be the expiration of a certificate, and the resulting loss of authorization for the holder to work as a blaster.

Unless OSM issues a temporary certificate, a person whose certificate expires for any reason may not assume responsibility for blasting operations at a blasting site until the expired certificate is renewed or reissued.

Section 955.13(b) Application form.

Section 955.13(b) requires OSM to make available to any person seeking an OSM blaster certificate an application form and instructions for its completion. The form must include a statement in accordance with law that the information provided is true and accurate to the best knowledge and belief of the applicant, and require the signature of the applicant.

Proposed section 955.13(b) specified the contents of the application form in consideration detail. OSM has concluded that there is no need for so detailed a rule, and that the more general requirement of this final rule is sufficient. Notwithstanding this general requirement, the application form OSM will make available under this final rule will seek, and the applicant will be required to provide, essentially the same information as specified in the proposed rule.

OSM has adopted a prescribed form to simplify the application process from the standpoints of both the applicant and OSM. The form will assist the applicant in determining and providing the information required to qualify for each of the various types of certificates. It also will assist OSM by imposing on the application process a high degree of organization, uniformity and consistency.

One commenter suggested that OSM should require the applicant to have a notary attest to his or her signature on the application form. OSM did not adopt this suggestion because the required statement in accordance with law is sufficient to ensure the authenticity of the applicant's signature, as well as the accuracy of the information submitted in the application.

Section 955.14 Examination.

Section 955.14 governs the timing, completion, administration and content of the examination each applicant for the issuance or reissuance of an OSM blaster certificate is required to pass.

Section 955.14(a) Certificate issuance and reissuance.

Section 955.14(a) requires an applicant for the issuance or reissuance of an OSM blaster certificate to pass the written examination specified in paragraph (b) of this section, on the technical aspects of blasting and State and Federal laws governing the storage, transportation and use of explosives, as provided in 30 CFR 850.14. The applicant must pass the examination *after* submitting the application; passing a previous examination does not fulfill this requirement.

The requirement in proposed section 955.14(a) that an applicant pass a practical examination has been deleted; this final rule requires only a written examination. The reasons for this change are given in the following discussion of section 955.14(b).

OSM received numerous public comments concerning the examination requirement of section 955.14(a). Summaries of these comments, and OSM's responses, appear in the following discussion of sections 955.14 (b) through (e).

Section 955.14(b) Administration and content.

Section 955.14(b) requires OSM on a regular basis to schedule and hold a written examination on the technical aspects of blasting, and State and Federal laws governing the storage, transportation and use of explosives, as provided in 30 CFR 850.14. At a minimum the examination must cover the topics specified in 30 CFR 850.13(b), and include: (1) Objective questions; (2) blasting log problems; and (3) initiation system and delay sequence problems. The examination will be offered only in the English language.

Practical Examination Deleted

As discussed previously for paragraph (a), the requirement for a practical examination has been deleted from section 955.14(b)(1). OSM has concluded that a written examination is adequate to measure an applicant's grasp of blasting theory and practice, and that a hands-on practical examination would be difficult to administer and grade objectively. Together with the requirement of section 955.11(b) for practical field experience, the written problems contained in the examination will adequately measure an applicant's practical skills. For these reasons the proposed requirement for a practical examination was deleted from this rule.

Several commenters maintained that the examination should stress the practical aspects of blasting, as opposed to abstract theory. While OSM will not conduct a practical examination, it agrees with these commenters and will try to design the written examination in a way that measures as far as possible those aspects of blasting which are of practical significance to the conduct of safe and responsible blasting operations.

Oral Examination

Several commenters suggested that as an alternative to a written examination, the rule should provide for oral examination. They maintained that there are persons who otherwise may be qualified to hold an OSM blaster certificate, but lack the reading and writing skills necessary to pass a written examination. An oral examination, they concluded, would provide an alternative way to evaluate these persons.

These commenters identified two major categories of persons who may not be able to pass a written examination. One category includes persons with limited formal education who have learned blasting theory and technique primarily through practical experience. The other category includes persons who may be proficient in a language such as Spanish or Navajo, but could not pass a written examination in the English language.

One commenter described a miner-training program for a workforce consisting primarily of Navajo Indians, which is conducted in the Navajo language and includes oral examination.

This commenter noted that the regulations of the State of New Mexico authorize oral examination of Native Americans for blaster certification, and that the use of oral examination does not appear to have any negative effect on safety. This commenter suggested adding to this rule regulatory language similar to that of New Mexico, which would give OSM discretion to examine an applicant orally upon request in certain limited circumstances.

OSM appreciates the concerns of these commenters, but has not revised the rule to authorize oral examination. The existing rule at 30 CFR 850.14(a)(1) requires the regulatory authority to give candidates for blaster certification "a written examination." As here, a number of commenters on proposed section 850.14 requested that OSM also provide for oral examination. The reasons why OSM kept the requirement for a written examination are set out in the preamble to that final rule. 48 FR 9439–9440 (March 4, 1983). None of the comments on this current rule give OSM any reason to change that existing requirement.

The laws and regulations governing blasting are written in the English language. All of the information published by the Institute of Makers of Explosives on the safe storage, transportation and use of explosives is in the English language. In order to understand the technical specifications of explosives, prepare blast designs, submit the required records, interpret safety notices and other information, and give direction and on-the-job training to persons under his or her supervision, a blaster must be able to read and write the English language. The only effective way to measure adequately a candidate's ability to understand these materials and do these things is through a written examination in the English language.

Anyone who cannot pass the written examination required to qualify for certification nevertheless may work under the direction of a blaster on a blasting crew. Thus, the requirement to pass a written examination will not, by itself, prevent any miner from earning a living in the blasting profession.

Because this rule governs the certification of blasters on Indian lands, OSM is particularly sensitive to any affect the rule might have on Indians. OSM realizes that the requirement to pass a written examination in the English language may prevent some Indian miners from qualifying for an OSM blaster certificate, and that in some instances this may have an economic impact on some individuals. However, these impacts are offset by the need for OSM to consider the general need to assure the safety of fellow miners and other persons in the vicinity of the blasting site. To enhance protection of the health and safety of all who may be affected, this rule requires all applicants to pass a written examination in the English language.

Initiation System and Delay Sequence

Proposed section 955.14(b)(2)(iii) required the examination to include a "practical wiring simulation problem." Several commenters noted that this type of problem applies only to electrical initiation systems, but not to others, such as gas initiation, which a blaster might use. These commenters suggested that instead of a wiring simulation problem the examination should include a delay sequence simulation.

OSM agrees with these comments, and has revised section 955.14(b)(2)(iii) to eliminate the unintentional bias toward electrical systems. This section now requires the examination to include more general "[i]nitiation system and delay sequence problems," which will not be geared to any particular type of system.

Validation of Examination

Several commenters asked whether, and to what extent, OSM would validate the blaster certification examination, both from technical and equal employment opportunity standpoints.

From a technical standpoint, these commenters were concerned that a too hasty implementation of this rule might not give OSM sufficient time to design a technically valid examination. They noted that under section 955.14(c) an applicant who failed a poorly designed examination could repeat the examination only 1 time in the subsequent 12-month period. This, they believed, might prevent some applicants from meeting the requirement for an OSM blaster certificate within the required 12 months after the effective date of this rule.

OSM appreciates the concerns of these commenters, but it already has prepared what it considers to be a technically valid examination.

Nor should the limit of 2 examinations in a 12-month period under § 955.14(c) have a detrimental effect on any significant number of applicants. OSM is required by § 955.14(b)(1) to hold examinations on a regular basis. In view of the 12-month grace period provided by § 955.2, and even if much of this period is used to obtain the required training, most applicants will be able to take examination 2 times, if necessary, before they are required to have a certificate.

If OSM finds that any defect in the examination is causing a significant number of applicants to fail, it will consider steps to alleviate any resulting hardship. However, it seems most appropriate to make any revision to this regulation after actual experience has been obtained with the examination.

From an equal employment opportunity standpoint, OSM has determined that a validity study does not need to be conducted for the examination to be used as part of the process for determining whether individuals should be certified as blasters.

A validity study is required in certain circumstances by the Uniform Guidelines on Employee Selection Procedures of the Equal Employment Opportunity Commission (the EEOC guidelines, or the guidelines). 29 CFR Part 1607.

The EEOC guidelines apply to tests and other selection procedures used as a basis for employment decisions, including licensing and certification. Essentially, they require an agency to conduct a validity study of each examination for an applicable license or certificate.

In promulgating the existing rules at 30 CFR Subchapter M governing the certification of blasters, OSM interpreted the EEOC guidelines as applying to the examination for blaster certification. 44 FR 38321–38323 (1979), 45 FR 82086–82087 (1980), 47 FR 12781 (1982), and 48 FR 9488 (1983). Under this interpretation, OSM apparently would be required to conduct a validity study of the examination.

In light of the comments on the proposed rule, OSM has reexamined its previous interpretation of the EEOC guidelines to determine how they apply to the examination for blaster certification. OSM has concluded that its previous interpretation of the guidelines as applying to the blaster certification process was incorrect, and that a validity study of the examination is not required by law. Any decision by OSM to do a validity study is strictly a matter of agency policy.

By their own terms, the EEOC guidelines do not cover the blaster certification process. As the guidelines state, they "will be applied by . . . Federal agencies subject to section 717 of Title VII [of the Civil Rights Act of 1964, as amended by the Equal Employment Opportunity Act of 1972]." 29 CFR 1607.2A. However, the referenced section 717 of the Civil Rights Act applies only to "personnel actions affecting employees or applicants for

employment . . . in executive agencies." 42 U.S.C. 2000e–16(a).

Thus, the purview of the guidelines is limited to Federal personnel actions in executive agencies, and they apply to the blaster certification process only to the extent it affects such actions. But while blaster certification may be a prerequisite to employment as a blaster in the private sector, it is unrelated to any Federal personnel action. So neither section 717 nor the guidelines apply to the certification process.

Even if the EEOC guidelines could be construed as applying to the blaster certification process in general, the examination given to a candidate for certification is not a "selection procedure" as defined by the guidelines, and thus does not raise the need for a validity study.

The guidelines presume that any selection procedure which has an adverse impact on employment is discriminatory unless the procedure has been validated in accordance with the guidelines. 29 CFR 1607.3A. Selection procedures include tests which are used as a basis for any employment decision. "Employment decisions include . . . licensing and certification, to the extent that licensing and certification may be covered by Federal equal employment opportunity law." 29 CFR 1607.2B.

Under these provisions, an examination is not a selection procedure unless the underlying certification is covered by some Federal equal employment opportunity law. But the blaster certification process is not covered by section 717 of the Civil Rights Act, and OSM is aware of no other civil rights law which is applicable to the certification process. So the examination for blaster certification is not selection procedure covered by the guidelines.

Even where they are not mandatory, the EEOC guidelines may "be applied . . . by any . . . . Federal agency which adopts them." 29 CFR 1607.2A. However, OSM has decided as a matter of agency policy that applying the guidelines to the blaster certification process might raise irreconcilable conflicts with its overriding concern for protecting the public health and safety and the environment. OSM will make every effort to design an examination that is non-discriminatory, but considering the hazards inherent in blasting operations it will place primary emphasis on how well the examination will serve to minimize those hazards.

Modification of Examination

Proposed § 955.14(b)(3) would have authorized OSM to modify the examination given to an applicant for certificate reissuance to reflect a previous examination the applicant had passed. This provision was deleted from this final rule. OSM has concluded that an applicant for certificate reissuance should take and pass the same examination as an applicant for certificate issuance. Thus, there is no need for a provision authorizing OSM to modify the examination.

Additional Issues

One commenter noted that the proposed rule did not specify any locations where OSM would hold examinations, and recommended holding them near the mining operations affected by this rule.

OSM agrees that as far as practicable the examinations should be held in locations that are convenient to applicants. This rule does not specify any locations so that OSM will have maximum flexibility in selecting suitable examinations sites. The application submission deadlines in § 955.13(a)(5) will give OSM sufficient advance notice of the demand for an examination at a particular site, and enable it to relocate an examination to a more convenient site in appropriate circumstances.

One commenter asked whether OSM would make available to the public in advance of the examination a large number of questions from which it would select a smaller number for each version of the examination. While OSM does plan to prepare several different versions of the examination, to preserve the integrity of the examination OSM will not disclose any of the questions in advance. The list of topics in 30 CFR 850.13(b) and the general description of the examination in § 955.14(b)(2), in conjunction with the completion of adequate formal training, will give each candidate for an OSM blaster certificate adequate notice of what the examination questions will cover.

Several commenters suggested that OSM should divide the examination into sections, and require an applicant to retake only those sections which he or she fails to pass. The knowledge and skills required to conduct safe blasting operations are comprehensive in scope and not readily separable into discrete parts. A piecemeal approach to examination or reexamination would not accurately measure an applicant's overall qualifications. Furthermore, OSM believes that any benefits which a piecemeal approach to the examination might provide to applicants would not justify the resulting substantial increase in the administrative cost burdens which would be incurred by OSM. Therefore, this suggestion was not adopted in the final rule.

Several commenters recommended that OSM develop a different examination for each type of blast initiation system, and then restrict the resulting certificate to operations employing that system. They also suggested that a certificate might be restricted to operations in a particular State or region where that initiation system was in use. An applicant who wished to qualify for all types of systems or all jurisdictions would have to seek a comprehensive certificate.

This recommendation is evaluated in the subsequent discussion of § 955.15(b), under the heading *Restricted Certification*. OSM has determined that it will not be appropriate to issue restricted certificates, either on the basis of initiation system or of jurisdiction, hence, different examinations will not be required. The examination will cover blasting concepts of general application, will pertain equally to all systems, and will be the same for all Federal program States and Indian lands.

Section 955.14(c) Reexamination.

Section 955.14(c)(1)

Section 955.14(c)(1) allows an applicant who fails the examination to apply for reexamination by submitting a new application, including the prescribed fee. However, no person may take the examination more than 2 times in any 12-month period. Applicants are advised to keep a copy of each application for reference in preparing any subsequent applications.

Because a significant amount of time may elapse between failure and reexamination, with corresponding changes in the information provided by the applicant, a candidate for reexamination must submit an entire new application. Except where the applicant is not required to resubmit a training voucher, an application for reexamination does not differ from an initial application for the same type of certificate. Because the costs associated with processing the new application and conducting the reexamination are the same as for an original application, the applicant also is required to submit a new fee.

For determining how many times an applicant has taken the examination, the 12-month period is measured back in time from the date on which the applicant desires to repeat the examination. If more than 1 previous examination falls within that 12-month period OSM will not admit the applicant for reexamination on that date. OSM has adopted this limit to ensure that candidates for reexamination have

BEST COPY AVAILABLE

sufficient time to study and gain the additional experience needed to prevent repeated examination failures.

One commenter maintained that the proposed limit of 2 examinations in a 12-month period was unnecessarily restrictive. This commenter suggested a frequency of no more than 1 examination in any 60 day period, and if the examination were divided into sections no more than 1 examination in any 30 day period. This commenter also recommended increasing the allowed frequency of reexamination during the first year-and-a-half of the program.

This commenter recommended more frequent reexamination for three reasons: One, the proposed limit might put miners who failed the examination out of work in the early part of the program. Two, the limit on reexamination, in conjunction with retesting requirements, could impede miners from moving from State-to-State. And three, this commenter disagreed with the statement in the proposed rule that a limit on reexamination was needed to give applicants who failed the examination time to gain more practical experience.

OSM disagrees, and has adopted none of the suggested alternatives. Nothing in the proposed rule will put a qualified applicant for an OSM blaster certificate out of work. An applicant who fails the examination the first time can take it a second time as soon as a new application and fee are processed and a subsequent examination is held. Anyone who is reasonably diligent in submitting applications should be able to take and retake the examination if necessary in the 12-month period between the effective date of this rule and the date when the requirement for a certificate is implemented. And anyone who fails to pass the examination before the requirement for a certificate is implemented can continue to work as a member of a blasting crew.

Nor will the limit on reexamination impede the movement of blasters from State to State. An OSM blaster certificate is valid in all Federal program States and on all Indian lands. The holder of a certificate may work in any of these jurisdictions without restriction. Although a blaster who wants to work in a State with a State regulatory program must have a State blaster certificate, the limit on reexamination under this rule will not prevent an applicant for a State certificate from taking the State examination.

OSM continues to believe that an applicant who fails the examination 2 times in a 12-month period will benefit from gaining additional practical experience before reexamination. Although the examination is in written form, it measures not only blasting technique, but also the practical knowledge an applicant gains through on-the-job training and experience. This rule will increase the likelihood that an applicant who fails the examination repeatedly will gain the added theoretical and practical knowledge needed to pass it on a subsequent attempt.

One commenter suggested that OSM should limit reexamination to those topics an applicant failed to pass on the previous attempt. As discussed previously for § 955.14(b), OSM will not divide the examination into separate sections, either for initial examination or for reexamination.

One commenter concluded that an applicant who failed the examination at the start of a 12-month period, and again at the end of the period could not take the examination again for 1 full year. This interpretation of the rule is incorrect. On the anniversary of the first attempt the applicant would be eligible to take the examination a third time without exceeding the limit of 2 examinations in a 12-month period.

Section 955.14(c)(2)

Under § 955.14(c)(2), any person who fails the examination and submits a new application within 2 years of completing training as provided in § 955.12(a) need not repeat training or resubmit evidence of having completed training. This is a new provision that did not appear in the proposed rule. It was added to clarify that retraining is not necessarily required for reexamination, and to eliminate the unnecessary resubmission of evidence when OSM already has evidence of current training on file for the applicant. An applicant for reexamination who does not submit a new application within 2 years of completing training must repeat training and submit new evidence of having completed training. Any application for reexamination must otherwise meet the requirements for an original application.

Section 955.14(d) Failure to attend.

Except where the applicant shows and OSM finds good cause, § 955.14(d) authorizes OSM to reject the pending application of anyone who fails to take the examination after OSM has granted his or her request for admission. This section is essentially the same as proposed.

OSM will administer this section as follows:

Either before or after the examination is held, an applicant may show OSM that he or she has good cause for failing to take it. For example, medical, employment or other unforeseen circumstances may make it impracticable for an applicant to take the examination. By notifying OSM sufficiently in advance of the examination date, the applicant may learn whether OSM will reject his or her application, and adjust his or her plans accordingly.

To make the showing an applicant should send OSM a letter describing the cause of the failure, and indicating the new date, if any, when the applicant desires to take the examination. Within a reasonable time after receiving the letter, OSM will notify the applicant of its decision.

If OSM has not received such a letter from an applicant who fails to take the examination, OSM will notify the applicant that he or she has 30 days to show good cause and to request a subsequent examination date, after which OSM may reject his or her application.

OSM will have complete discretion in determining whether an applicant shows good cause for failing to take the examination, and its decision will be final and not subject to appeal. An applicant whose application is rejected under § 956.14(e) may reapply for an OSM blaster certificate by submitting a new application.

Section 955.15 Certification.

Section 955.15 governs: (a) The processing of an application for an OSM blaster certificate; (b) the grant of a certificate; (c) the term of a certificate; (d) the limits on certificate renewal; (e) the grant of a temporary certificate; (f) the conditions of certification; and (g) notice of a certificate holder's change of address.

Section 955.15(a) Processing of application.

Section 955.15(a) governs the processing of an application for an OSM blaster certificate. It establishes procedures for: (1) Notifying an applicant of the receipt of, and of any deficiency in, his or her application; (2) notifying an applicant that his or her request for admission to a scheduled examination either is granted or denied; and (3) rejecting an application.

This section differs from the proposed rule in two ways. One, unlike proposed paragraph (a), which required OSM to notify only an applicant for certificate issuance or reissuance of the status of his or her application, and of any deficiency, final paragraph (a)(1) requires OSM to provide this notice to every applicant. This change eliminates the inconsistent treatment the proposed

BEST COPY AVAILABLE

rule gave to applicants for different types of certificates.

And two, paragraph (a)(2) is added to require explicitly that when OSM determines that an applicant has failed to qualify for an OSM blaster certificate, OSM shall reject his or her application and notify him or her accordingly. The authority given to OSM by this section was implicit throughout the proposed rule, as was the requirement for notice to the affected applicant. This section merely defines that authority in concrete terms, as well as the criterion OSM is to apply in rejecting an application. In administering this section OSM will determine that an applicant has failed to qualify for an OSM blaster certificate only after the applicant has had a reasonable opportunity to comply with the procedures established by this part.

Section 955.15(b) Grant of certificate.

Section 955.15(b) requires OSM to:

(1) Issue or reissue an OSM blaster certificate to any qualified applicant who completes the applicable training, passes the examination, and is found by OSM to be competent and to have the necessary knowledge and experience to accept responsibility for blasting operations;

(2) Renew one time the issued or reissued OSM blaster certificate of any qualified applicant;

(3) Replace the OSM blaster certificate of any qualified applicant who presents satisfactory evidence that his or her certificate was lost or destroyed;

(4) Grant an OSM blaster certificate through reciprocity as provided in § 955.16; or

(5) Reinstate a suspended, or reissue a revoked, OSM blaster certificate as provided in § 955.17(e).

The term "grant" did not appear in the proposed rule. To simplify the language of the rule, it is used to refer generally to certificate issuance, renewal, reissuance and replacement, and to certification through reciprocity. The term "qualified applicant" is included in this section to insure that all of the requirements of Part 955 are taken into consideration by OSM in deciding to grant or deny a certificate to a particular applicant.

Paragraph (b)(5) is a new provision that did not appear in the proposed rule. It does not impose any new requirement, but merely references subsequent § 955.17(e), which governs the reinstatement of a suspended certificate and the reissuance of a revoked certificate.

Restricted Certification

Several commenters suggested that OSM should issue several classes of certificates, based on the different blast initiation systems currently in use. To be certified for all systems, a blaster would have to obtain a comprehensive certificate. OSM did not adopt this suggestion. A candidate who qualifies for an OSM blaster certificate through training and experience with one initiation system will be able to use any other system safely. The principles that enable a blaster to control ground vibration, airblast, and flyrock are uniform from system to system. OSM will neither require training in, nor base either the examination or certification on, any particular type of blast initiation system.

One commenter suggested that OSM should restrict an OSM blaster certificate to a specific State or region. OSM did not adopt this suggestion. An OSM blaster certificate will entitle the holder to work as a blaster in all Federal program States and on all Indian lands. The requirements of Part 955 will ensure that a blaster is qualified to conduct safe blasting operations, regardless of the State or region involved.

Also, as discussed previously for § 955.1, under the heading *Relationship to State Law and Programs*, in addition to complying with any Federal requirements a blaster must comply with applicable State law and regulations. To the extent the requirements for certification under Part 955 do not meet the needs of a particular State, the State may impose additional non-conflicting requirements. Thus, there is no reason to tailor an OSM blaster certificate to the requirements of any State or region.

One commenter wanted OSM to grant a certificate only to those persons who truly need it to work as a blaster in a Federal program State or on Indian lands, but deny a certificate to those who want one only for the status it might convey. Another commenter thought that any qualified candidate should be able to obtain a certificate.

OSM disagrees with the former commenter, and agrees with the latter. This rule does not authorize OSM to consider an applicant's need in evaluating his or her qualifications for an OSM blaster certificate. There is no way by which OSM objectively could measure the need for a certificate. Therefore, OSM will issue an OSM blaster certificate to any applicant who has the required qualifications, and will not attempt to assess the applicant's need or motive.

Section 955.15(c) Term of certificate.

Section 955.15(c) specifies the terms of the different types of OSM blaster certificates. Under this section, OSM will issue a certificate for a term to expire 3 years from the date of issuance.

A renewed or reissued certificate will expire 3 years from the expiration date of the applicant's current or expired certificate. This will provide continuity of certification without penalizing an applicant who applies in a timely manner. And it will preclude the possibility of extending the certificate term by submitting a late application. The term "expired" was added to paragraphs (c)(2) and (c)(3) to clarify the intent of the proposed rule, in which the term "current" was ambiguously used to refer to both in-force and expired certificates. Neither the term "current" nor the term "expired" applies to a temporary certificate, and the granting of a temporary certificate has no effect on the term of any subsequent certificate.

A replacement certificate will expire on the same date as the applicant's lost or destroyed certificate.

A certificate granted through reciprocity will expire 60 days after the expiration date of the corresponding State certificate. This 60 day extension will prevent a potential lapse of OSM certification in the period when OSM is processing a reciprocity application. Since an applicant may qualify for reciprocity only after the corresponding State certificate is granted, the OSM certification process necessarily will lag that of the State. If the State and OSM certificates expired on the same date it would not be possible for an applicant to requalify for reciprocity before the OSM certificate expired.

Section 955.15(d) Limits on renewal.

Section 955.15(d) prohibits OSM from renewing an OSM blaster certificate more than 1 time. It also prohibits OSM from renewing an OSM blaster certificate that expired more than 1 year prior to the date of an application for renewal. To extend a renewed certificate, or one that has been expired for more than 1 year, the certificate holder must apply to OSM for certificate reissuance.

The limitation to a single certificate renewal will ensure that each blaster is trained and examined at 6-year intervals, and thus ensure that he or she continues to have the competence, knowledge and experience necessary to accept responsibility for conducting blasting operations.

One commenter disagreed with the proposed limit on certificate renewal as unnecessary and counterproductive, while agreeing that a certificate holder should be required to demonstrate continuing proficiency. As an alternative

to renewal, this commenter suggested the concept of certificate continuance. To qualify for certificate continuance, an applicant merely would have to provide evidence of sufficient recent experience.

OSM did not adopt this suggestion. Certificate continuance would not give a blaster adequate incentive to maintain his or her initial proficiency, or to keep abreast of current developments. The lack of a requirement for periodic training and examination would deprive a blaster of the incentive to obtain necessary information and feedback on a regular basis in an organized training course. And it would severely reduce the ability of OSM to reevaluate a blaster's qualifications at regular intervals.

The prohibition in this rule against the renewal of a certificate that expired more than 1 year prior to the date of an application for renewal is a new provision that was suggested in the proposed rule. It fills a gap in the proposed rule regarding how OSM should treat an applicant who holds an expired certificate. OSM has concluded that since an applicant who holds such a certificate would not have worked as a blaster for at least 1 year, and possibly more, he or she would be likely to need the additional training, and should be required to pass the examination required for certificate reissuance.

The proposed rule solicited public comment on whether the final rule should set such a 1-year deadline. Only one comment was received on this issue. The commenter suggested that 90–120 days before the expiration date of an OSM blaster certificate, OSM should send to the holder a notice of expiration. The period of 90–120 days was suggested to give the holder time to meet the 60-day deadline for submitting an application, as required by § 955.13(a)(4). This commenter also suggested that OSM should notify any blaster whose certificate had expired, and then issue a temporary certificate if an application for renewal or reissuance was submitted within 30 days. If this notice were provided, the commenter thought the 1-year limit that was suggested in the proposed rule was neither necessary nor appropriate.

OSM disagrees with this comment regarding the 1-year limit on renewal of an expired certificate. As was explained previously, this limit is included in the final rule. There is, however, no time limit for submitting an application for the reissuance of an expired certificate.

OSM agrees with the comment, however, that a notice of certificate expiration would be useful to blasters, and although not required to do so by this rule OSM will provide such notice on a discretionary basis in administering the blaster certification program. Approximately 60 days before a certificate is due to expire, OSM will attempt to send the blaster written notice of the need for renewal or reissuance.

This advance notice will be entirely discretionary, and any failure of OSM to provide it will have no effect on any requirement of Part 955. Along with this notice OSM also may provide a copy of the application form, and updated information concerning training, the examination, or other requirements. As this advance notice should be sufficient to inform a blaster of the need to extend his or her certificate, OSM will not provide any additional notice once a certificate has expired.

Finally, OSM agrees with this commenter that the period during which an applicant may request a temporary certificate should not extend beyond 30 days after certificate expiration, and has revised this rule accordingly. For more information on the affected provision, see the following discussion of § 955.15(e).

Section 955.15(e) Temporary certificate.

Section 955.15(e) authorizes OSM, in its discretion, to issue a temporary OSM blaster certificate for a maximum term of 90 days to any applicant who demonstrates that his or her current certificate is about to expire, or expired within 30 days prior to the date of his or her application, for reasons beyond his or her control.

The proposed rule did not set a deadline by which an applicant must request a temporary certificate. However, as noted in the preceding discussion of § 955.15(d), a commenter suggested the 30-day limit adopted in this rule. OSM has concluded that this 30-day limit is necessary to ensure that a temporary certificate does not extend unreasonably beyond the date of the expired certificate, and that a temporary certificate is granted only to persons who are likely to meet the qualifications for the grant of a regular certificate.

Section 955.15(f) Conditions of certification.

Section 955.15(f) requires the holder of an OSM blaster certificate to comply with the conditions specified in 30 CFR 850.15 (d) and (e). These conditions concern protecting a certificate, exhibiting a certificate upon request, and prohibitions against the assignment or transfer of a certificate and the delegation of a blaster's responsibility.

Section § 955.15(g) Change of address.

Section 955.15(g) requires the holder of an OSM blaster certificate to notify OSM in writing within 30 days of any change in his or her address.

This new provision, which did not appear in the proposed rule, merely extends the proposed requirement for current address information in the application. It will enable OSM to maintain up-to-date records on where to send the notices required by § 955.15(a), as well as the discretionary notice of impending certificate expiration previously discussed under § 955.15(e).

Section § 955.16 Reciprocity.

Section 955.16 governs the grant of an initial or subsequent OSM blaster certificate through reciprocity. It applies only to persons who hold a current blaster certificate issued by a State regulatory authority, and only to the grant of a certificate by OSM. It does not apply when the holder of an OSM blaster certificate moves from one Federal program State to another, or to or from Indian lands. While a State may impose additional nonconflicting requirements, an OSM blaster certificate is valid in any Federal program State or on any Indian lands, and in these jurisdictions there is no need for a blaster to seek reciprocity from the State.

Proposed § 955.16(d) was deleted from this rule because replacement of a certificate granted through reciprocity is covered adequately by the general provision for certificate replacement in § 955.15(b)(3).

Section § 955.16(a) Grant of certificate.

Section 955.16(a) combines proposed paragraphs (a) and (b) to eliminate duplication. It requires OSM to grant an OSM blaster certificate through reciprocity to any qualified applicant who holds a current blaster certificate granted by a State regulatory authority under an OSM-approved State blaster certification program. The State must have an approved blaster certification program, and not merely an approved State program, since in some instances the latter might exist without the former.

This section now states that an applicant for a certificate through reciprocity need not otherwise demonstrate that he or she meets the age, experience, knowledge, competence, training and examination requirements of Part 955. This new provision was added to clarify the implicit intent of the proposed rule.

The proposed rule would have required that the OSM-approved State blaster certification program have "rules

no less effective than this part." This phrase was deleted from the final rule as superfluous because an OSM-approved State program necessarily must meet this standard.

The application, certification, suspension and revocation, and other applicable procedures for a certificate through reciprocity are specified elsewhere in Part 955.

OSM received several public comments that misinterpreted the scope of this section. One commenter used the term "State regulatory authority" as applying to any State agency with jurisdiction over the licensing or certification of persons for the storage, transportation or use of explosives. Under this rule, however, the term "State regulatory authority" applies only to a State agency administering the Act under a State regulatory program. For the definition of the term "regulatory authority," see 30 CFR 700.5.

Another commenter misinterpreted this rule as affecting the right of a State to grant or deny reciprocity to the holder of an OSM or out-of-State blaster certificate. This rule governs only the grant of a certificate through reciprocity by OSM. It does not require any State either to grant or to deny reciprocity to a blaster licensed or certified by either OSM or another State.

Section § 955.16(b) Subsequent certificate.

Section 955.16(b) governs the grant of a subsequent certificate to a person who holds an OSM blaster certificate granted through reciprocity. Paragraph (b)(1) authorizes the holder to obtain a subsequent certificate either through reciprocity, or by meeting directly the applicable requirements of Part 955 for certificate issuance, renewal or reissuance. Paragraph (b)(2) prohibits OSM from recognizing a certificate granted through reciprocity as qualifying an applicant for certificate issuance, renewal or reissuance.

This section will prevent an applicant from using reciprocity as the initial step toward obtaining full OSM certification. An applicant granted an OSM certificate through reciprocity must continue to rely on reciprocity unless he or she otherwise qualifies under the procedures of this part for the issuance, renewal or reissuance of a certificate.

One commenter noted that if OSM withdrew approval of a State blaster certification program there could be blasters whose OSM blaster certificates were based on reciprocity with that State program. This commenter was concerned that a blaster in this situation would no longer be able to rely on reciprocity to obtain a renewed or reissued OSM blaster certificate, but would have to meet the training and examination requirements of Part 955. This commenter concluded that in this situation a blaster who previously had qualified for a certificate through reciprocity should be exempt from meeting any additional training and examination requirements.

OSM disagrees. This rule provides for reciprocity to avoid duplicating the requirements of approved State blaster certification programs with rules no less effective than Part 955. If OSM withdrew the approval of a State blaster certification program any basis for reciprocity would cease to exist. Moreover, a State program for which approval is withdrawn may have included inadequate provision for training and examination. It would be inconsistent for OSM on the one hand to withdraw approval of a deficient State program, but on the other hand to exempt an applicant for an OSM blaster certificate from additional training and testing on the basis of that deficient program.

Due to the variety of situations that might arise, it is not possible to specify the effect of State program withdrawal on each OSM blaster certificate that is based on reciprocity. If OSM finds it necessary to withdraw the approval of a State blaster certification program, upon promulgating a Federal program for that State it will inform any affected blasters of what they must do to comply with Part 955.

Section 955.17 Suspension and revocation.

Section 955.17 governs the suspension and revocation of an OSM blaster certificate. It specifies: (a) The cause, nature and duration of a suspension or revocation: and procedures for (b) notice and hearing; (c) decision and appeal; (d) surrender of a certificate; (e) certificate reinstatement and reissuance; and (f) conformance with State action.

Section 955.17(a) Cause, nature and duration.

Section 955.17(a)(1) authorizes, or upon a finding of willful conduct of the blaster requires, OSM to suspend for a definite or indefinite period, revoke or take other necessary action on the certificate of an OSM-certified blaster for any of the reasons specified in 30 CFR 850.15(b). The term "OSM-certified" was added to modify the term "blaster" in this and other paragraphs of this section to clarify that this rule applies only to certificates issued under this part.

The reasons for suspension and revocation specified in 30 CFR 850.15(b) include noncompliance with any order of the regulatory authority; unlawful use in the workplace of, or current addiction to, alcohol, narcotics or other dangerous drugs; violation of any provision of State or Federal explosives laws or regulations; and providing false information or a misrepresentation to obtain certification.

Section 955.17(a)(2) requires OSM to suspend the certificate of the blaster as soon as is practicable where it has reliable information which demonstrates that the storage, transportation or use of explosives by an OSM-certified blaster is likely to threaten public safety or the environment.

Section 955.17(a)(3) requires OSM to make the nature and duration of a suspension, revocation or other action commensurate with the cause of the action and what the blaster does to correct it. The wording of this section is essentially the same as the last sentence of proposed paragraph (a)(1). It was relocated in a separate paragraph to clarify that this requirement applies not only to a suspension, revocation or other action under paragraph (a)(1), but also to a suspension under paragraph (a)(2).

Section 955.17(b) Notice and hearing.

Section 955.17(b) requires OSM, when practicable, to provide to the affected certificate holder written notice and an opportunity for an informal hearing prior to suspending, revoking or taking other action on an OSM blaster certificate. It requires OSM to limit any action taken without such notice and opportunity to a temporary suspension for a maximum term of 90 days pending a decision on final suspension, revocation or other action after such notice and opportunity have been provided.

This section differs from the proposed rule in several ways. The term "affected blaster" was changed to "certificate holder" because the former term would have been inapt in situations where OSM revoked a certificate before it provided the required notice, as the holder of a revoked certificate would not meet the definition of "blaster." This change does not affect the substance of the rule. Also, the period of a temporary suspension was limited to a maximum of 90 days. This will insure that a certificate holder subject to a termporary suspension is given a reasonably prompt opportunity for a hearing.

Section 955.17(c) Decision and appeal.

Section 955.17(c) requires OSM to notify the certificate holder of its final decision affecting his or her OSM blaster certificate, including the reason

for any suspension, revocation or other action, by certified mail within 30 days after written notice and an opportunity for an informal hearing. The term "certificate holder" was substituted for the term "affected blaster" for the same reason as previously discussed for § 955.17(b). If the certificate was issued through reciprocity, OSM also must notify the State regulatory authority of its action.

In addition, in any decision suspending, revoking or taking other action on an OSM blaster certificate, § 955.17(c) requires OSM to grant to the certificate holder the right of appeal to the Department of the Interior Board of Land Appeals under 43 CFR 4.1280 to 4.1286. The specific reference to the applicable appeal procedures, which did not appear in the proposed rule, was added for the information of potential appellants. OSM is required to grant the right of appeal in the decision itself because such a grant is a prerequisite to appeal under the referenced provisions.

Section 955.17(d) Surrender of certificate.

Section 955.17(d) requires a certificate holder, upon receiving written notice of a suspension, revocation or other action, immediately to surrender to OSM his or her OSM blaster certificate to OSM in the manner specified in the notice. Again, the term "certificate holder" was substituted for the proposed term "the blaster" for the reasons previously discussed for § 955.17(b). A requirement that the notice be in writing was added to eliminate ambiguity. And finally, the phrase "in the manner specified in the notice" was added to clarify how the blaster is to accomplish the surrender. This latter change, which requires OSM to inform the blaster of the applicable procedures, will make it easier for a blaster to comply with this section.

Section 955.17(e) Reinstatement and reissuance.

Section 955.17(e) governs the reinstatement or reissuance of a suspended or revoked OSM blaster certificate. Paragraph (e)(1) requires OSM to reinstate a suspended certificate when (i) the term of a definite suspension expires, or (ii) when the former certificate holder demonstrates and OSM finds that the cause of an indefinite suspension has been corrected. The term "former certificate holder" was substituted for the proposed term "blaster" for the reasons previously discussed for a similar change in § 955.17(b). Upon reinstatement, OSM must return the certificate to the blaster with written notice.

Paragraph (e)(2) requires OSM to reissue a certificate to an applicant whose certificate was revoked if his or her application demonstrates, and OSM finds, (i) that the cause of the revocation has been corrected, and (ii) that the applicant meets all other applicable requirements of Part 955. This section combines the overlapping requirements of proposed §§ 955.17(e) and 955.17(f) to eliminate unnecessary duplication and simplify the rule. It does not change the substance of what was proposed.

Section 955.17(f) Conformance with State action.

Section 955.17(f) corresponds with proposed § 955.17(g). It requires OSM to suspend, revoke or take other commensurate action on an OSM blaster certificate granted through reciprocity if the State regulatory authority suspends, revokes or takes other action on the corresponding State certificate.

III. Procedural Matters

Federal Paperwork Reduction Act

The information collection requirements in this rule were submitted to the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1029-0063. The information is needed to meet the requirements of sections 504, 515, 516, 710 and 719 of Pub. L. 95-87, and will be used by OSM in the certification of blasters. The obligation to respond is mandatory.

Executive Order 12291

The DOI has examined this rule according to the criteria of Executive Order 12291 (February 17, 1981) and has determined that it is not major and does not require a regulatory impact analysis. The proposed changes will not have an adverse effect on the investment or productivity of United States coal operators. Employment in the coal industry will not be significantly affected since the rule will not affect coal production procedures. There also will be no effect on the ability of United States coal operators to compete with foreign coal operators in the domestic or export markets. While some costs may increase, they will be offset by corresponding increases in safety, which will benefit both coal operators and the public in general.

Regulatory Flexibility Act

The DOI has determined, pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, that this rule will not have a significant economic impact on a substantial number of small entities because the cost to an operator or blaster for a certificate is minimal.

National Environmental Policy Act

To the extent this rule governs the certification of blasters in Federal Program States it is part of a Federal program, the promulgation of which is exempt under section 702(d) of the Act, 30 U.S.C. 1292(d), from compliance with section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4332(2)(C).

To the extent this rule governs the certification of blasters on Indian lands, OSM has prepared an environmental assessment (EA) and has made a finding that it would not significantly affect the quality of the human environment. The EA and finding of no significant impact are on file in the administrative record for this rule in the OSM Administrative Record Room at 1100 L Street, NW., Washington, DC.

Author

The author of this final rule is Arthur Anderson, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue, NW., Washington, DC 20240; Telephone: 202-343-1504 (Commercial or FTS).

Certification

An application form for an OSM blaster certificate may be obtained from any OSM office. Contact your nearest OSM office to determine the dates, locations and times of any certification examinations that may be scheduled for your vicinity. Your application for a certificate must be submitted to and approved by OSM before you may take the examination.

Dated: April 14, 1986.

J. Steven Griles,

Assistant Secretary for Land and Minerals Management.

PART 750—REQUIREMENTS FOR SURFACE COAL MINING AND RECLAMATION OPERATIONS ON INDIAN LANDS

1. The authority citation for Part 750 continues to read as follows:

Authority: 30 U.S.C. 1201–1328; 5 U.S.C. 301.

2. Section 750.19 is revised to read as follows:

§ 750.19 Certification of blasters.

A person seeking to conduct blasting operations on Indian lands shall comply with the requirements of §§ 816.61(c) and 817.61(c) and Part 955 of this chapter.

PART 816—PERMANENT PROGRAM PERFORMANCE STANDARDS—SURFACE MINING ACTIVITIES

3. The authority citation for Part 816 reads as follows:

Authority: Pub. L. 95–87 (30 U.S.C. 1201 *et seq.*), unless otherwise noted.

4. Paragraph (c)(4) of § 816.61 is revised to read as follows:

§ 816.61 Use of explosives: General requirements.

* * * * *

(c) * * *

(4) Any blaster who is responsible for conducting blasting operations at a blasting site shall:

(i) Be familiar with the blasting plan and site-specific performance standards; and

(ii) Give direction and on-the-job training to persons who are not certified and who are assigned to the blasting crew or assist in the use of explosives.

* * * * *

PART 817—PERMANENT PROGRAM PERFORMANCE STANDARDS—UNDERGROUND MINING ACTIVITIES

5. The authority citation for Part 817 continues to read as follows:

Authority: Pub. L. 95–87 (30 U.S.C. 1201 *et seq.*).

6. Paragraph (C)(4) of § 817.61 is revised to read as follows:

§ 817.61 Use of explosives: General requirements.

* * * * *

(c) * * *

(4) Any blaster who is responsible for conducting blasting operations at a blasting site shall:

(i) Be familiar with the site-specific performance standards; and

(ii) Give direction and on-the-job training to persons who are not certified and who are assigned to the blasting crew or assist in the use of explosives.

PART 900—INTRODUCTION

7. The authority citation for Part 900 continues to read as follows:

Authority: Secs. 102, 201, 405, 503, 504, 505 and 523 of Pub. L. 95–87 (30 U.S.C. 1201, 1211, 1235, 1253, 1254, and 1273).

8. Section 900.1 is revised to read as follows:

§ 900.1 Scope.

This part sets forth the purpose and organization of Parts 901–955 of this subchapter.

9. Section 900.11 is revised to read as follows:

§ 900.11 Organization of this subchapter.

Parts 901 through 950 are reserved for each State alphabetically. The program applicable within each State is codified in the part for that State. In addition, Part 955 establishes rules pursuant to Part 850 of this chapter for the training, examination and certification of blasters by OSM for surface coal mining operations in States with Federal programs and on Indian lands.

10. Section 900.13 is revised to read as follows:

§ 900.13 Federal programs and Federal coal exploration programs.

The rules for each Federal program and Federal coal exploration program are codified below under the assigned part for the particular State. Rules governing the training, examination and certification of blasters for surface coal mining operations in States with Federal programs are codified in part 955, and referenced by each Federal program.

PART 910—GEORGIA

11. The authority citation for Part 910 continues to read as follows:

Authority: Pub. L. 95–87, The Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.*

12. Section 910.955 is added to read as follows:

§ 910.955 Certification of blasters.

Part 955 of this chapter, *Certification of Blasters in Federal Program States and on Indian Lands*, shall apply to the training, examination and certification of blasters for surface coal mining and reclamation operations.

PART 912—IDAHO

13. The authority citation for Part 912 continues to read as follows:

Authority: Pub. L. 95–87, The Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.*, 91 Stat 445.

14. Section 912.955 is added to read as follows:

§ 912.955 Certification of blasters.

Part 955 of this chapter, *Certification of Blasters in Federal Program States and on Indian Lands*, shall apply to the training, examination and certification of blasters for surface coal mining and reclamation operations.

PART 921—MASSACHUSETTS

15. The authority citation for Part 921 continues to read as follows:

Authority: Pub. L. 95–87, The Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.*

§ 921.850 [Removed]

16. Section 921.850 is removed.

17. Section 921.955 is added to read as follows:

§ 921.955 Certification of blasters.

Parts 955 of this chapter, *Certification of Blasters in Federal Program States and on Indian Lands*, shall apply to the training, examination and certification of blasters for surface coal mining and reclamation operations.

PART 922—MICHIGAN

18. The authority citation for Part 922 continues to read as follows:

Authority: Pub. L. 95–87, 91 Stat. 445 (30 U.S.C. 1201 *et seq.*).

19. Section 922.955 is added to read as follows:

§ 922.955 Certification of blasters.

Part 955 of this chapter, *Certification of Blasters in Federal Program States and on Indian Lands*, shall apply to the training, examination and certification of blasters for surface coal mining and reclamation operations.

PART 933—NORTH CAROLINA

20. The authority citation for Part 933 continues to read as follows:

Authority: Pub. L. 95–87, The Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.*, 91 Stat. 445.

§ 933.850 [Removed]

21. Section 933.850 is removed.

22. Section 933.955 is added to read as follows:

§ 933.955 Certification of blasters.

Part 955 of this chapter, *Certification of Blasters in Federal Program States and on Indian Lands*, shall apply to the training, examination and certification of blasters for surface coal mining and reclamation operations.

PART 937—OREGON

23. The authority citation for Part 937 continues to read as follows:

Authority: Pub. L. 95–87, The Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.*

24. Section 937.955 is added to read as follows:

§ 937.955 Certification of blasters.

Part 955 of this chapter, *Certification of Blasters in Federal Program States and on Indian Lands*, shall apply to the training, examination and certification of blasters for surface coal mining and reclamation operations.

PART 939—RHODE ISLAND

25. The authority citation for Part 939 continues to read as follows:

Authority: Pub. L. 95–87, The Surface Mining Control and Reclamation Act of 1977, 91 Stat. 445 *et seq.* (30 U.S.C. 1201 *et seq.*).

§ 939.850 [Removed]

26. Section 939.850 is removed.

27. Section 939.955 is added to read as follows:

§ 939.955 Certification of blasters.

Part 955 of this chapter, *Certification of Blasters in Federal Program States and on Indian Lands*, shall apply to the training, examination and certification of blasters for surface coal mining and reclamation operations.

PART 941—SOUTH DAKOTA

28. The authority citation for Part 941 continues to read as follows:

Authority: Pub. L. 95–87, The Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.*, 91 Stat. 445.

29. Section 941.955 is added to read as follows:

§ 941.955 Certification of blasters.

Part 955 of this chapter, *Certification of Blasters in Federal Program States and on Indian Lands*, shall apply to the training, examination and certification of blasters for surface coal mining and reclamation operations.

PART 942—TENNESSEE

30. The authority citation for Part 942 continues to read as follows:

Authority: Pub. L. 95–87, The Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

§ 942.855 [Removed]

31. Section 942.855 is removed.

32. Section 942.955 is added to read as follows:

§ 942.955 Certification of blasters.

Part 955 of this chapter, *Certification of Blasters in Federal Program States and on Indian Lands*, shall apply to the training, examination and certification of blasters for surface coal mining and reclamation operations.

PART 947—WASHINGTON

33. The authority citation for Part 947 continues to read as follows:

Authority: Pub. L. 95–87, The Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

§ 947.850 [Removed]

34. Section 947.850 is removed.

35. Section 947.955 is added to read as follows:

§ 947.955 Certification of blasters.

Part 955 of this chapter, *Certification of Blasters in Federal Program States and on Indian Lands*, shall apply to the training, examination and certification of blasters for surface coal mining and reclamation operations.

SUBCHAPTER T—PROGRAM FOR THE CONDUCT OF SURFACE MINING ACTIVITIES WITHIN EACH STATE

36. In Subchapter T, Part 955 is added to read as follows:

PART 955—CERTIFICATION OF BLASTERS IN FEDERAL PROGRAM STATES AND ON INDIAN LANDS

Sec.

955.1 Scope.
955.2 Implementation.
955.5 Definitions.
955.10 Information collection.
955.11 General requirements.
955.12 Training.
955.13 Application.
955.14 Examination.
955.15 Certification.
955.16 Reciprocity.
955.17 Suspension and revocation.

Authority: Pub. L. 95–87 (30 U.S.C. 1201 *et seq.*). Sec. 955.13 also issued under sec. 9701, Pub. L. 97–258 (31 U.S.C. 9701).

§ 955.1 Scope.

This part establishes rules pursuant to Part 850 of this chapter for the training, examination and certification of blasters by OSM for surface coal mining operations in States with Federal programs and on Indian lands. It governs the issuance, renewal,

reissuance, suspension and revocation of an OSM blaster certificate, replacement of a lost or destroyed certificate, and reciprocity to a holder of a certificate issued by a State regulatory authority.

§ 955.2 Implementation.

In accordance with §§ 750.19, 816.61(c) and 817.61(c) of this chapter, after June 30, 1987, in Federal program States and on Indian lands any person who is responsible for conducting blasting operations at a blasting site shall have a current OSM blaster certificate.

§ 955.5 Definitions.

As used in this part:

Applicant means a person who submits an application for an OSM blaster certificate.

Application means a request for an OSM blaster certificate submitted on the prescribed form, including the required fee and any applicable supporting evidence or other attachments.

Issue and *issuance* mean to grant to an applicant his or her first OSM blaster certificate that is not granted through reciprocity.

Reciprocity means the recognition by OSM of a blaster certificate issued by a State regulatory authority under an OSM-approved blaster certification program as qualifying an applicant for the grant of an OSM blaster certificate.

Reissue and *reissuance* are synonymous with the term *recertification* in § 850.15(c) of this chapter, and mean to grant to an applicant who holds a renewed OSM blaster certificate, or who holds an OSM blaster certificate that expired more than 1 year prior to the date of his or her application, or who held an OSM blaster certificate that was revoked, a subsequent certificate that is not granted through reciprocity and for which additional training and examination are required.

Renew and *renewal* mean to grant to an applicant who holds an issued or reissued OSM blaster certificate a subsequent certificate that is not granted through reciprocity and for which additional training and examination are not required.

Replace and *replacement* mean to grant to an applicant a duplicate OSM blaster certificate as a substitute for one that was lost or destroyed.

§ 955.10 Information collection.

The information collection requirements in this part were approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1029–0063. This information is needed to meet the requirements of sections 504, 515, 516, 710 and 719 of Pub. L. 95–87, and will be used by OSM in the certification of blasters. The obligation to respond is mandatory.

§ 955.11 General requirements.

To qualify for an OSM blaster certificate, a person shall:

(a) Be at least 20 years old prior to submitting an application, and at least 21 years old prior to the grant of a certificate;

(b) In the 3 years prior to submitting an application have been qualified and worked as a blaster or the equivalent, or have worked under the direction of a blaster or the equivalent, for the following cumulative length of time:

(1) Certificate issuance—2 years; or

(2) Certificate renewal or reissuance—1 year;

(c) For certificate issuance or reissuance, have received on-the-job training, completed a training course, and obtained satisfactory evidence of having completed training, as provided in § 955.12;

(d) Be competent, possess practical knowledge of blasting techniques, understand the hazards involved in the use of explosives, and exhibit a pattern of conduct consistent with the acceptance of responsibility for blasting operations;

(e) Submit an application as provided in § 955.13;

(f) For certificate issuance or reissuance, pass a written examination as provided in § 955.14;

(g) For a certificate through reciprocity, meet the requirements of § 955.16; and

(h) Not be subject to suspension, revocation or other action under § 955.17.

§ 955.12 Training.

(a) *On-the-job training.* Except as provided in § 955.14(c) for reexamination, each applicant for the issuance of an OSM blaster certificate who does not qualify as a blaster or the equivalent shall:

(1) Have received on-the-job training, including practical field experience in blasting operations, from a blaster or the equivalent for 2 out of the 3 years preceding the submission of his or her application; and

(2) Have obtained from the blaster or the equivalent, the relevant employer, or other knowledgable source, satisfactory evidence of having received on-the-job training in accordance with paragraph(a)(1) of this section.

(b) *Training course.* Except as provided in § 955.14(c) for reexamination, each applicant for the issuance or reissuance of an OSM blaster certificate shall:

(1) Within 2 years prior to submitting an application, have completed a training course as follows:

(i) For certificate issuance the course shall cover the technical aspects of blasting operations and State and Federal laws governing the storage, transportation and use of explosives, including the topics specified in § 850.13(b) of this chapter; or

(ii) For certificate reissuance the course shall cover any significant changes that have occurred in the topics specified in § 850.13(b) of this chapter since the applicant last completed a course that was accepted by OSM for the issuance or reissuance of an OSM blaster certificate. If OSM determines that no siginficant changes have occurred, OSM may waive this requirement; and

(2) Have obtained from the training provider satisfactory evidence that he or she has completed training in accordance with paragraph(b)(1) of this section.

(c) *Availability.* OSM shall ensure that courses are available as provided in § 850.13(b) of this chapter to train persons subject to this part who are responsible for the use of explosives in surface coal mining operations.

§ 955.13 Application.

(a) *Submission procedures.* Any person seeking an OSM blaster certificate shall:

(1) Complete and submit to OSM an application on the form prescribed by paragraph (b) of this section;

(2) Include as part of the application a nonrefundable fee as follows:

(i) Issuance or reissuance	$122
(ii) Reexamination	$61
(iii) Renewal	$61
(iv) Replacement	$28
(v) Reciprocity	$61;

(3) For certificate issuance or reissuance, include as part of the application satisfactory evidence of having completed training as provided in § 955.12;

(4) For certificate issuance or reissuance, specify in the application the date when the applicant desires to take a previously scheduled examination; and

(5) Submit the application in advance of the date of examination, or of certificate expiration, as follows:

(i) For certificate issuance, not less than 60 days before the date on which the applicant desires to take a previously scheduled examination;

(ii) For certificate renewal, not less than 60 days before the expiration date of the applicant's current certificate;

(iii) For certificate reissuance, not less than 60 days before the date on which the applicant desires to take a previously scheduled examination that will be held at least 60 days before the expiration date of the applicant's current certificate; or

(iv) For a certificate through reciprocity, not less than 45 days before the expiration date of the applicant's current certificate.

(b) *Application form.* OSM shall make available to any person seeking an OSM blaster certificate an application form and instructions for its completion. The form shall include a statement in accordance with law that the information provided is true and accurate to the best knowledge and belief of the applicant, and shall require the signature of the applicant.

§ 955.14 Examination.

(a) *Certificate issuance or reissuance.* After submitting an application, each applicant for the issuance or reissuance of an OSM blaster certificate shall pass a written examination, as provided in paragraph (b) of this section.

(b) *Administration and content.* (1) On a regular basis OSM shall schedule and hold a written examination on the technical aspects of blasting operations and State and Federal laws governing the storage, transportation and use of explosives, as provided in § 850.14 of this chapter.

(2) The examination at a minimum shall cover the topics specified in §850.13(b) of this chapter, and shall include:

(i) Objective questions;

(ii) Blasting log problems; and

(iii) Initiation system and delay sequence problems.

(c) *Reexamination.* (1) Any person who fails the examination may apply to OSM for reexamination by submitting a new application, including the prescribed fee, but no person may take the examination more than 2 times in any 12-month period.

(2) Any person who fails the examination and submits a new application within 2 years of completing training as provided in § 955.12(a) need not repeat, or resubmit evidence of having completed, training.

(d) *Failure to attend.* Except where the applicant shows and OSM finds good cause, OSM may reject the pending application of any applicant who fails to take the examination after OSM has granted his or her request for admission.

§ 955.15 Certification.

(a) *Processing of application.* (1) Upon receiving an application for an OSM blaster certificate OSM shall:

(i) Notify the applicant of the receipt of, and of any deficiency in, the application.

(ii) Where applicable, notify the applicant that his or her request for admission to a scheduled examination either is granted or denied.

(2) When OSM determines that an applicant has failed to qualify for an OSM blaster certificate, OSM shall reject his or her application and notify him or her accordingly.

(b) *Grant of certificate.* OSM shall:

(1) Issue or reissue an OSM blaster certificate to any qualified applicant who completes the applicable training, passes the examination, and is found by OSM to be competent and to have the necessary knowledge and experience to accept responsibility for blasting operations;

(2) Renew one time the issued or reissued OSM blaster certificate of any qualified applicant;

(3) Replace the OSM blaster certificate of any qualified applicant who presents satisfactory evidence that his or her certificate was lost or destroyed;

(4) Grant an OSM blaster certificate through reciprocity as provided in § 955.16; or

(5) Reinstate a suspended, or reissue a revoked OSM blaster certificate as provided in § 955.17(e).

(c) *Term of certificate.* OSM shall grant an OSM blaster certificate for a term to expire as follows:

(1) Issuance—3 years after issue date;

(2) Renewal—3 years after expiration date of applicant's current or expired certificate;

(3) Reissuance—3 years after expiration date of applicant's current or expired certificate;

(4) Replacement—same expiration date as replaced certificate; or

(5) Reciprocity—30 days after expiration date of corresponding State certificate.

(d) *Limits on renewal.* (1) OSM shall not renew an OSM blaster certificate more than 1 time. A blaster who seeks to extend a renewed certificate may apply to OSM for certificate reissuance.

(2) OSM shall not renew an OSM blaster certificate that expired more than 1 year prior to the date of an application for renewal. An applicant who desires to extend a certificate that expired more than 1 year prior to the date of his or her application may apply to OSM for certificate reissuance.

(e) *Temporary certificate.* Upon request of an applicant who demonstrates that his or her current OSM blaster certificate is about to expire, or expired within 30 days prior to the date of his or her application, for reasons beyond his or her control, OSM may issue a non-renewable temporary OSM blaster certificate for a maximum term of 90 days.

(f) *Conditions of certification.* Any person who holds an OSM blaster certificate shall comply with the conditions specified in §§ 850.15 (d) and (e) of this chapter.

(g) *Change of Address.* Any person who holds an OSM blaster certificate shall notify OSM in writing within 30 days of any change in his or her address.

§ 955.16 Reciprocity.

(a) *Grant of certificate.* OSM shall grant an OSM blaster certificate through reciprocity to any qualified applicant who demonstrates that he or she, and whom OSM finds, holds a current State blaster certificate granted by a State regulatory authority under an OSM-approved State blaster certification program. An applicant for a certificate through reciprocity need not otherwise demonstrate that he or she meets the age, experience, knowledge, competence, training or examination requirements of this part.

(b) *Subsequent certificate.* (1) Any person who holds an OSM blaster certificate granted through reciprocity may qualify for a subsequent certificate either through reciprocity or by meeting directly the applicable requirements of this part for certificate issuance, renewal or reissuance.

(2) OSM shall not recognize a certificate granted through reciprocity as qualifying an applicant for certificate issuance, renewal or reissuance.

§ 955.17 Suspension and revocation.

(a) *Cause, nature and duration.* (1) OSM may, and upon a finding of willful conduct of the blaster OSM shall, suspend for a definite or indefinite period, revoke or take other necessary action on the certificate of an OSM-certified blaster for any of the reasons specified in § 850.15(b) of this chapter.

(2) Where OSM has reliable information which demonstrates that the storage, transportation or use of explosives by an OSM-certified blaster is likely to threaten public safety or the environment, OSM shall suspend his or her certificate as soon as is practicable.

(3) OSM shall make the nature and duration of a suspension, revocation or other action under this section commensurate with the cause of the action and what the person whose

certificate is subjected to the action does to correct it.

(b) *Notice and hearing.* When practicable, OSM shall give a certificate holder written notice and an opportunity for an informal hearing prior to suspending, revoking or taking other action on his or her OSM blaster certificate. OSM shall limit any action taken without such notice and opportunity to a temporary suspension for a maximum term of 90 days pending a decision on a final suspension, revocation or other action after such notice and opportunity have been provided.

(c) *Decision and appeal.* By certified mail within 30 days after giving written notice and an opportunity for an informal hearing, OSM shall notify the certificate holder in writing of its final decision on his or her OSM blaster certificate, including the reasons for any suspension, revocation or other action. If the certificate was granted through reciprocity, OSM shall notify the State regulatory authority of its action. In any decision suspending, revoking or taking other action on an OSM blaster certificate, OSM shall grant to the certificate holder the right of appeal to the Department of the Interior Board of Land Appeals under 43 CFR 4.1280 to 4.1285.

(d) *Surrender of certificate.* Upon receiving written notice that his or her OSM blaster certificate was suspended, revoked or subjected to other action, a certificate was suspended, holder immediately shall surrender the certificate to OSM in the manner specified in the notice.

(e) *Reinstatement and reissuance.* (1) OSM shall reinstate a suspended OSM blaster certificate by returning the certificate to the former certificate holder with notice of reinstatement when:

(i) The term of a definite suspension expires; or

(ii) The former certificate holder demonstrates, and OSM finds, that the cause of an indefinite suspension has been corrected.

(2) OSM shall reissue an OSM blaster certificate to an applicant whose certificate was revoked if his or her application demonstrates, and OSM finds, that:

(i) The cause of the revocation has been corrected; and

(ii) The applicant meets all other applicable requirements of this part.

(f) *Conformance with State action.* OSM shall suspend, revoke or take other commensurate action on an OSM blaster certificate granted through reciprocity if the State regulatory authority suspends, revokes or takes other action on the corresponding State certificate.

Part III

Department of Health and Human Services

Social Security Administration

20 CFR Part 404

Coverage of Employees of State and Local Governments; Proposed Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Part 404

Coverage of Employees of State and Local Governments

AGENCY: Social Security Administration, HHS.

ACTION: Proposed rule.

SUMMARY: The Social Security Administration is revising the regulations in Subpart M of 20 CFR Part 404 to expand them and make them clearer and easier for the public to use and to reflect two legislative changes under the Social Security Amendments of 1983 (Pub. L. 98–21). These regulations contain the rules on providing Social Security coverage under title II of the Social Security Act for the services of employees of State and local governments and interstate instrumentalities. The existing regulations have been updated to state:

(1) How States and interstate instrumentalities may initiate an agreement with the Secretary of Health and Human Services, to provide Social Security coverage of services of their employees and employees of a State's political subdivisions;

(2) That these agreements, either in their entirety or for one or more coverage groups, may no longer be terminated;

(3) That groups whose coverage has been terminated in the past can again be included in their States' agreements;

(4) How States and interstate instrumentalities may appeal decisions affecting these agreements;

(5) The revised due dates for payment of contributions;

(6) Procedures for refunds or credits of contributions;

(7) Procedures for charging of interest; and

(8) Procedures for the Secretary's review of assessments and claims for credit or refund.

DATE: Comments must be received on or before September 26, 1986.

ADDRESSES: Comments should be submitted in writing to the Acting Commissioner of Social Security, Department of Health and Human Services, P.O. Box 1585, Baltimore, Maryland 21203, or delivered to the Office of Regulations, Social Security Administration, 3–A–3 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235 between 8:00 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Cliff Terry, Legal Assistant, 6401 Security Boulevard, Baltimore, Maryland 21235, (301) 594–7519.

SUPPLEMENTARY INFORMATION:

Introduction

This proposal substantially revises the Social Security Administration's (SSA) rules on Social Security coverage of employees of State and local governments and interstate instrumentalities. These changes will improve the organization of, and clarify the current regulations. They also update the entire subpart to reflect policies and statutory amendments which are in effect but are not in current regulations.

Background

State and local government employees are exempt from mandatory coverage under Social Security. Section 218 of the Social Security Act (the Act) requires that the Secretary of Health and Human Services when requested by a State, shall enter into an agreement to provide retirement, survivor's, disability and hospital insurance coverage of the services of employees of a State or its political subdivisions. If an interstate instrumentality (which to the extent practicable is treated as a State) makes the request, the Secretary may enter into such an agreement. By this agreement Social Security protection is provided for the groups of employees the State brings under the agreement. State and local government employees covered under an agreement have the same benefit rights and responsibilities as other employees who have Social Security coverage. The amount of the payments made by the State for Social Security protection of State and local employees is the same as is paid by private sector employers and employees who are mandatorily covered by the Federal Insurance Contributions Act, 26 U.S.C. 3101 et seq. The State assumes full financial and reporting responsibility for the coverage provided under its agreement. The agreement may not be terminated in its entirety or with respect to any coverage group under that agreement.

All States, Puerto Rico, and the Virgin Islands have agreements with the Secretary. Currently these agreements provide coverage to approximately 13 million employees. About $22.4 billion in Social Security contributions was paid on the total of about $159 billion in covered wages for State and local employees reported for calendar year 1984.

Considerations in Preparing This Comprehensive Revision

Most of the current regulations governing the coverage of employees of State and local governments were written in the 1950's and early 1960's. Some of the current rules have not been changed since they were originally published in May 1955. In preparing this comprehensive revision, we not only looked at the structure of the subpart and the language used in the current sections, but also evaluated the policies and procedures not in the subpart. Most of the procedures describe how and when a State will make reports or pay contributions. We examined the reporting procedures with the purpose of simplifying the reports, reducing their number where possible, and establishing due dates to reduce bookkeeping requirements for the States. We looked at the periods when contributions are due following modification of an agreement or after an assessment for underpayment is made and brought those due dates in line with the time allowed for paying contributions (§ 404.1249). These latter changes will speed up the flow of contributions to the Social Security trust funds.

Delayed Effective Date

Section 7 of Pub. L. 94–202 (42 U.S.C. 405a) requires that any regulation or modification of a regulation which pertains, directly or indirectly, to the frequency or due dates for payments and reports required under section 218(e) of the Social Security Act not become effective until eighteen months after it is published as a final rule in the Federal Register. Section 404.1249 affects those due dates and is discussed under "Major Changes." However, only § 404.1249(b)(2)(ii) is subject to the 18 month delayed effective date. Most of the rules in the section are already in effect and the more frequent deposit of contributions is mandated by section 342 of Pub. L. 98–21 for calendar months beginning after December 1983.

Major Changes and New Material

Evidence

Section 404.1203 is a new section which describes in general terms our rules about requesting evidence from a State of wages paid to employees and contributions due on those wages. We discuss in this section what we do when we need evidence, the State's responsibility for supplying accurate wage information and any evidence

needed to verify the accuracy of reports related to those wages, and what happens if a State does not submit the requested evidence.

Initiating, modifying, and continuing agreements

Sections 404.1205 through 404.1219 are new. The agreement for coverage establishes the legal relationship between the Secretary and the State regarding Social Security coverage for the services of covered employees. These proposed new sections reflect longstanding policies on which groups of employees may be covered, what provisions must be in an agreement, and how an agreement may be modified.

In addition, §§ 404.1218 and 404.1219 reflect the provisions of section 103 of Pub. L. 98–21, enacted April 20, 1983. Section 103 provides that no agreement may be terminated, either in its entirety or with respect to any coverage group, on or after April 20, 1983. Section 103 applies without regard to whether a notice of intent to terminate was filed before Pub. L. 98–21 was enacted. Section 103 also repealed the prohibition formerly in section 218(g)(3) of the Act against resumption of coverage. Coverage previously terminated may be resumed by a modification to the State's agreement.

Onsite review

Sections 404.1230 through 404.1234 are new.

Under current § 404.1250(e) SSA, with the cooperation of the States, has been conducting onsite reviews of States' recordkeeping practices for employees whose services are covered under an agreement. These reviews are to determine whether a State is:

(1) Reporting the wages for services of employees covered by the agreement;

(2) Paying Social Security contributions on those wages; and

(3) Keeping proper records of the amounts paid to each covered employee and when they were paid.

After these reviews are completed, we furnish the State's Social Security Administrator a report of the results about the State's compliance with its section 218 agreement, including problems which need resolution and reporting errors which must be corrected. We may also recommend procedures the State may implement to improve its information gathering, recordkeeping, and reporting systems, and those of its political subdivisions. Our experience with various State Social Security systems has given us the opportunity to see how each State handles various problems. Thus, we are in a position to suggest procedures which have been beneficial to other States.

We now propose to issue under the Secretary's authority in sections 218(i) and 1102 of the Act, regulations which reflect many of the practices which have evolved between SSA and the States in this area. The primary points are:

(1) These proposed regulations provide for review, "on site," of all pertinent source records maintained by the State or its political subdivisions. This will enable us to evaluate the records from which wage reports and contribution returns were prepared and how those records were compiled, processed, and maintained. These reviews may include discussions with the employee(s) working with those records. They would be conducted in cooperation with the State Social Security Administrator.

(2) Section 205(d) gives the Secretary the power to issue subpoenas requiring the attendance and testimony of witnesses and the production of any evidence relating to a matter under review. Proposed § 404.1232(d) implements this statutory provision for onsite review.

Back pay to employees

We propose adding a section on "back pay" to employees. This section defines "back pay," describes two different types of "back pay," and tells how the State should allocate each when reporting. Section 404.1242.

Due date for contribution returns and wage reports

Section 404.1249(a)(2) reflects the provisions of section 342 of Pub. L. 98–21, enacted April 20, 1983. Effective for calendar months after Decembr 1983, section 342 provides that contribution payments for wages paid in the first 15 days of a calendar month are due on the last day of that month, and contribution payments for wages paid after the fifteenth day of a calendar month are due on the fifteenth day of the next month. (For convenience, we refer to the first 15 days of a calendar month as the first half of the month, and to the rest of that month as the second half.)

In § 404.1249(b)(2)(ii), we propose changing the due date for paying contributions and filing contribution returns to align it with the date of the notice that the agreement or modification has been signed. At present, a State or interstate instrumentality must, for the calendar quarter in which the Secretary signs the agreement or modification, or any of the following four calendar quarters, pay any contributions due and file the contribution returns for each of those calendar quarters on or before the last day of the second month of the next calendar quarter. We propose changing this due date so that within 90 days of the date of the notice that the Secretary has signed the agreement or modification, the State may submit a *single* contribution return and pay all contributions due for:

(1) The month in which the agreement or modification is signed;

(2) Any prior months in that year; and

(3) Any subsequent months before January 1984 (half-months after December 1983) whose contribution return and payment due date is within that 90-day period.

This proposal would eliminate the requirement that a State or interstate instrumentality file a contribution return for each calendar quarter in the year of execution.

We propose excepting from the "frequency of deposit" rules those periods whose normal contribution return and payment due date fall within the 90-day period. For example, if the Secretary signs a modification of an agreement on September 19, 1986, contributions for wages paid in September 1986 an any previous months would be due by December 18, 1986. However, the contributions and contribution returns for the first half of October which would be due by October 31, would, under the proposed rule, not be due until December 18 because October 31 would fall within the 90-day period. This would give the States a full 90 days to modify their internal procedures to take account of the modifications to their agreement before they must tally, report on, and pay the new amount of contributions due. This change would also simplify the State's reporting procedure by requiring a single contribution return for the affected months.

In accordance with section 7 of Pub. L 94–202 (42 U.S.C. 405a) proposed § 404.1249(b)(2)(ii), if adopted, would not be effective until 18 months after it is published as a final rule in the Federal Register.

Adding interest to contributions

Where a State does not pay its Social Security contributions by the due date, section 218(j) of the Act requires that we add interest to any unpaid contributions. However, section 218(h)(2) of the Act permits interest-free adjustments of underpayments of contributions in the manner and at the times prescribed by regulation. Section 404.1265 sets out when we add interest to the unpaid amount of a State's contributions. The

situations in which we propose to add interest are:

(1) When a State fails to pay its contributions when due under § 404.1249 (this is a continuation of the policy in current regulation § 404.1225); and

(2) When a State discovers, after it has filed the contribution returns or wage report under proposed § 404.1249(b)(2), that it omitted or incorrectly reported some wages and must file a corrective report for the additional wages resulting in an underpayment of contributions. (This is similar to the situation described in current regulation § 404.1261, except that the State would no longer be permitted to pay the underpaid amount interest-free.)

Where our audit shows that an underpayment of the State's contributions due on the wages it has reported for a calendar year is 5 percent or less of the total due, the State may request that the interest be waived provided the State deposited the underpaid amount within 30 days after our notification of the amount due. The request for waiver must also be made within 30 days after our notification of the amount due. (This rule would replace several different rules described in current regulation § 404.1261.)

On behalf of their political subdivisions, States enter into agreements to provide Social Security coverage of the services of the employees of those subdivisions. Thereafter the State relies on those subdivisions to submit timely reports of the wages paid those employees and to forward the correct amount of contributions. Frequently those subdivisions have manual accounting procedures or a minimal number of employees who do this work. Consequently they are not always able to compute and submit the correct amount of contribution payments to the State by the due date. Therefore, we propose a rule whereby if a State underpays the correct amount of contributions due by 5 percent or less and pays the underpaid amont within 30 days of our notification of the amount due it may request within that same 30-day period that it be permitted to pay the underpaid amount without interest. This provision would take into account the problems faced by the States in obtaining reports and contributions from small subdivisions having limited staff support. This proposal also recognizes that the States are in a unique and different situation from private employers who have the records of their employees' wages readily accessible. This process simplifies the bookkeeping procedures for verifying that the correct amount of contributions have been paid on the wages reported for a calendar year and generally allow us to finalize those figures at the end of each year. Each request will be evaluated on an individual basis. Due to the wide variance in the number of employees involved in each State we decided that automatically waiving interest based on a flat percentage rate would, in terms of dollars, penalize States which do not have large numbers of employees in covered positions while a flat dollar amount would, in terms of percent of total contributions, penalize States with large numbers of employees in covered positions. During the period July 1, 1980 through June 30, 1981, we found that of the 50 States, Puerto Rico and the Virgin Islands, 43 had underpaid their contributions by less than 5 percent. The amount of 5 percent, we feel, therefore reflects our experience with most States. This approach accommodates the States in limited circumstances while recognizing that virtually all contributions are deposited timely. We feel this is a reasonable approach to a situation encompassing the 50 States, Puerto Rico, the Virgin Islands and 63 interstate instrumentalities wherein the range of total contributions for the States for the same July 1980–June 1981 period was $29,000 to $2,000,000,000. We will not recalculate the 5 percent rule based upon correction reports submitted by the States after the year is closed out for audit purposes.

An exception to these situations is where the contributions are erroneously paid to the Internal Revenue Service (IRS). In that circumstance, under certain conditions, instead of our adding interest on the contributions erroneously paid to the IRS, a State must submit the IRS refund, including interest (if any) the IRS transmitted to the entity, in order to obtain credit for its payment. This exception is similar to that described in current regulation § 404.1261(b). The rationale for this is that these contributions paid to IRS had been allocated to the trust funds.

Manner of payment of contributions by State

Section 404.1262 discusses the manner in which a State shall pay its contributions.

We propose § 404.1262 to require that States pay their contributions through the use of electronic transfer of funds beginning 3 months after the effective date of these rules. About one-third of the States currently use the electronic transfer of funds method. In order to assure a smooth transition to the use of electronic transfer of funds, SSA may extend the time limitation by an additional 3 months. Any State using the electronic transfer of funds method will, under proposed § 404.1249(b)(4), have to release its funds in sufficient time to reach the Federal Reserve bank designated by SSA by the due date.

Current regulations, § 404.1223, require that a State pay its contributions in money to the Federal Reserve bank, or any of its branches, serving the district in which the State is located. Under this rule, a State can pay its contributions to a Federal Reserve bank or branch which is serving its district but which is geographically farthest from the State capital. By maintaining the collected contributions in an interest bearing checking account, a State can take advantage of the extra time it takes the distant bank to clear the check. At the same time it would have met the due date for paying its contributions to the Social Security trust funds, yet the amount may not be transferred to the trust funds for several additional days. This situation was not as apparent under the old quarterly reporting system but it became more apparent when State contribution payments were required monthly, and especially now that payments are required twice a month. Therefore, we propose requiring that States use the electronic transfer of funds method to pay their contributions to the Federal Reserve bank or branch which is designated by SSA rather than to any Federal Reserve bank or branch serving the district in which the State is located.

Reconsideration

We propose adding §§ 404.1291 through 404.1294. Section 218(s) of the Social Security Act provides that where the Secretary assesses a State for an amount due under its agreement, disallows a State's claim for a credit or refund of an overpayment, or allows a State a credit or refund of an overpayment, the Secretary shall review that decision if, within 90 days after the Secretary notifies the State of the assessment, disallowance, or allowance, the State requests that review. The Secretary has delegated this review function to the Commissioner of Social Security.

Currently, if a State disagrees with SSA's assessment, disallowance, or allowance, it must request a review by the Commissioner. Present procedures permit revision of a decision without a review by the Commissioner if a decision can be made which is favorable to the State. If a decision is revised, we send the State a reconsidered determination and give the State an additional 90-day period within which to request that the

Commissioner review the reconsidered determination. However, all affirmations of the initial decision must be reviewed by the Commissioner.

We propose to amend the regulations to allow an appropriate SSA official to issue a reconsidered determination in all section 218(s) review cases. The State would retain the right to request the Commissioner to review the reconsidered determination.

We also propose providing in § 404.1291 that in limited situations, the reconsideration process may be waived, e.g., where a major policy is at issue. This would expedite the presentation of significant issues to the Commissioner.

Proposed §§ 404.1290 through 404.1298 describe the procedures we will follow when a State requests review of an assessment of an amount due from a State under its agreement, an allowance to the State of a credit or refund of an overpayment, or a disallowance of a State's claim for a credit or refund of an overpayment.

Summary of Changes

Definitions

Section 404.1202

We have added a new section which contains definitions of terms which have special meanings as used throughout this subpart.

Evidence

Section 404.1203

This is a new section which is described under Major Changes.

Authorized State officials

Section 404.1204

This is a new section which requires that a State designate the official authorized to act on its behalf, and that it inform SSA of any change in officials or his or her authority.

What groups of employees may be covered

Sections 404.1205 through 404.1212

This is a new group of sections which discuss in general terms what groups of employees may be covered, other groupings of employees and the services which may or may not be covered. We have also included a description of the referendum procedures States must follow in providing coverage to certain groups of employees. These referendum procedures reflect the requirements in sections 218(d) (3) and (7) of the Act (42 U.S.C. 418(d) (3) and (7)).

There are a number of special provisions in the Act which relate to specific States. These provisions establish procedures for a State to provide coverage for employees in specified positions. For example, section 218(d)(6)(G) of the Act (42 U.S.C. 418(d)(6)(G)) gives several States the option of providing coverage for employees in positions under a retirement system where these States are paid from Federal grants for administering unemployment compensation. Since these various provisions have limited applicability and are rarely used, we have not included them in these regulations.

How coverage is obtained and continues

Sections 404.1214 through 404.1219

These are new sections which generally reflect the procedures for establishing and continuing coverage under an agreement.

In § 404.1214(d) we set out what provisions an agreement must include.

Section 404.1215(b) indicates that when an agreement is modified, the State may specify a controlling date for determining retroactive coverage for employees. That controlling date can be no earlier than the date the modification is mailed or otherwise delivered to the Secretary.

Section 404.1216 describes how an agreement may be modified to correct various errors.

Section 404.1217 explains that coverage under an agreement continues indefinitely.

Section 404.1218 explains how coverage which has been terminated may be resumed.

How to identify employees who are covered

Sections 404.1220 through 404.1223

These are similar to current §§ 404.1240 through 404.1243.

We have rewritten these sections in simpler language but have not changed the existing policies. We also deleted material which was procedural in nature and material which was in other sections.

Section 404.1220 describes how we assign identification numbers to the State and its political subdivisions, coverage groups, etc. covered by a State's agreement. Section 404.1221 requires that each employee have a Social Security number and tells when and how the employee can get that number. Section 404.1223 requires that the State show an employee's Social Security number on all reports, etc., concerning that employee.

What records of coverage must be kept

Sections 404.1225 and 404.1226

These are similar to current §§ 404.1256 and 404.1230, respectively.

Section 404.1225 describes what records of an employee's remuneration a State or its political subdivisions must keep, where they are to be maintained, and for how long. Section 404.1226 sets out when statements of earnings must be given to each employee.

Review of compliance by State with its agreement

Sections 404.1230 through 404.1234

These new sections involving onsite reviews are discussed under "Major Changes".

How to report wages and contributions

Section 404.1237 is a revision of current § 402.1250. The basic rule is that a State must report each year, by coverage group, the wages paid each covered employee during that year.

Section 404.1239 is a revision of current § 404.1250a. This section permits a State to combine the wages of an employee who performs covered services for more than one coverage group up to the annual wage limitation and pay Social Security contributions on that amount. Otherwise, the wages reported for an employee by all of the coverage groups might exceed the annual wage limitation. And the State, by paying Social Security contributions on the wages reported separately by each coverage group, would pay more than the maximum amount of Social Security contributions required each year.

Section 404.1242 is a proposed new section which describes "back pay" to an employee and how it must be reported. This section is discussed under "Major Changes".

Sections 404.1243 and 404.1247 are revisions of current §§ 404.1254 and 404.1251, respectively. Section 404.1243 describes what means a State may use to make reports, e.g., forms, magnetic tape, etc. Section 404.1247 requires that a State shall report wages for the calendar year in which they were paid.

Section 404.1249 is the current § 404.1255a. Paragraph (a)(2) of this section contains the twice a month "frequency of deposit" rule mandated by section 342 of Pub. L. 98–21, the Social Security Amendments of 1983. Paragraph (b)(2) contains the due dates for filing contribution returns and wage reports and also the "annual reporting" rules. Paragraph (b)(2)(i) and (b)(2)(iii) are virtually identical to current section 404.1255(c)(2)(i) and (iii). Paragraph

(b)(2)(ii) which is described in "Major Changes" as having been significantly changed is subject to the 18 month delay in its effective date to comply with section 7 of Pub. L. 94–202 (42 U.S.C. 405a). Paragraph (c) on payments by a third party on account of sickness or accident disability is virtually identical to current § 404.1255a(a)(2) which we published in the Federal Register as a final rule on September 30, 1983, at 48 FR 44771. We propose to delay the effective date of only paragraph (b)(2)(ii) for 18 months after it is published as a final rule in the Federal Register. This delay would in no way effect the current rules that are merely incorporated in the new section, since they are already in effect. The delay would also in no way delay the effect of the "frequency of deposit" requirement since it is mandated by statute.

What is a State's liability for contributions

Sections 404.1255 and 404.1256

These sections are a revision of current §§ 404.1222 and 404.1222a.

Section 404.1255 describes the amount of Social Security contributions a State is liable for and when that liability begins. Section 404.1256 describes the conditions under which a State's liability for contributions may be limited when an employee performs services in one or more coverage groups.

Figuring the amount of the State's contributions

Sections 404.1260 through 404.1263

These sections are a revision of current §§ 404.1221, 404.1223, and 404.1224.

These sections describe how a State's contributions are computed and when and how they must be paid. Section 404.1262 is discussed under "Major Changes".

If a State fails to make timely payments.

Sections 404.1265 through 404.1267

These sections are a revision of current §§ 404.1225 through 404.1227, and § 404.1261.

Section 404.1265 sets out that interest at the rate prescribed in section 218(j) of the Act is added if a State fails to pay timely its contributions when due under § 404.1249. This section is discussed under "Major Changes".

Section 404.1267, which accords with section 218(j) of the Act, authorizes the Secretary to offset the Social Security contributions a State has not paid against amounts due a State under another provision of the Social Security Act. To date, we have not used this provision.

How to adjust errors in reports and contributions.

Sections 404.1270 through 404.1276

These sections revise current §§ 404.1260 through 404.1263 and 404.1265 through 404.1268. Proposed § 404.1276 is new.

Sections 404.1271 and 404.1273 describe how we handle payments made by a State which exceed the amount of contributions for which it is liable.

If an employee performs covered services for a State and one or more political subdivisions, or for two or more political subdivisions, and more than the required amount of Social Security contributions is collected from the employee, § 404.1275 describes how the employee may claim a refund of those excess payments.

Proposed new § 404.1276 explains how we handle situations where employees' wages have been erroneously reported and Social Security contributions have been erroneously paid to the Internal Revenue Service.

How overpayments of contributions are credited or refunded

Sections 404.1280 through 404.1284

These sections revise §§ 404.1264, 404.1261(d), and 404.1265 through 404.1267.

When a State pays more than the required amount of Social Security contributions, the State may request that we credit or refund the overpaid amount.

Proposed § 404.1284 would highlight a provision which is in current § 404.1261(d). That provision allows the Secretary, in limited situations, to offset an underpayment of contributions against an overpayment. In proposed § 404.1284(b) we indicate the State will be given an opportunity to pay the contributions due before those amounts are offset against any credit which is due the State.

How assessments for underpayments of contributions are made

Sections 404.1285 through 404.1289

These sections revise current §§ 404.1280 through 404.1283.

Proposed § 404.1285 sets out that a State is liable for an amount due under an agreement until the Secretary is satisfied the State has paid that amount. If the Secretary is not satisfied that a State has paid the correct amount, the Secretary issues an assessment for the outstanding amount.

Section 404.1286 sets out the time limits within which the Secretary must issue an assessment for an amount due. Section 404.1287 sets out exceptions to the time limits within which the Secretary must issue an assessment.

Section 404.1289 points out when we may accept a wage report which a State submits after the time periods described in § 404.1286 expire.

Secretary's review of decisions on credits, refunds, or assessments

Sections 404.1290 through 404.1296

These sections revise current §§ 404.1270 through 404.1274 and also include proposed new sections to provide for reconsideration of appealed administrative decisions. The latter sections are discussed under "Major Changes". In rewriting these sections, we eliminated the requirement that a State must file its request for review in duplicate.

How a State may seek court review of Secretary's decision

Sections 404.1297 through 404.1299

These sections are a revision of current §§ 404.1275–404.1277.

Redesignation Table

To assist users of this document we are including a table which shows the section numbers as redesignated in the proposed regulations:

REDESIGNATION TABLE

Current Section	Proposed Section
404.1201	404.1205

Regulatory Procedures

Executive Order 12291—The Secretary has determined that this is not a major rule under Executive Order 12291. Therefore, a regulatory impact analysis is not required.

Paperwork Reduction Act of 1980—Sections 404.1204, 404.1205(c), 404.1214(d), 404.1215, 404.1216, 404.1219, 404.1220(b), (c), and (e), 404.1223, 404.1225, 404.1237, 404.1239, 404.1251, 404.1256(b), 404.1271, 404.1282, and 404.1292 of this proposed rule contain information collection requirements. As required by section 3504(h) of the Paperwork Reduction Act of 1980, we will submit a copy of this proposed rule to the Office of Management and Budget (OMB) for its review of these information collection requirements. Other organizations and individuals desiring to submit comments on the information collection requirements should direct them to the agency official designated for this purpose whose name appears in this preamble, and to the Office of Information and Regulatory Affairs, OMB, New Executive Office Building (Room 3208), Washington, DC 20503, ATTN: Desk Officer for HHS.

Regulatory Flexibility Act—The Secretary of the Department of Health and Human Services certifies that these proposed amendments will not have a significant economic impact on a substantial number of small entities, including small governmental jurisdictions. Under the terms of the agreement under section 218 of the Act, a State is responsible for paying the contributions and filing the reports necessary to provide Social Security coverage for the services of its employees or those employees of one or more of its political subdivisions.

Some of the proposed amendments describe the economic consequences when these responsibilities are not met. However, we expect those measures will impact on a limited number of small entities and will not have a significant economic impact on those entities. Any economic impact involved in the regulations reflecting sections 103 and 342 of Pub. L. 98–21 result directly from the statutory amendments, not from the regulations.

Therefore, we believe that initial and final regulatory analyses under the Regulatory Flexibility Act are not required.

List of Subjects in 20 CFR Part 404

Administrative practice and procedure, Death benefits, Disabled, Old-Age, Survivors and Disability Insurance, Social Security Administration.

Dated: January 10, 1986.

Martha A. McSteen,

Acting Commissioner of Social Security.

Approved: March 6, 1986.

Otis R. Bowen,

Secretary of Health and Human Services.

20 CFR Part 404, Subpart M is revised to read as follows:

Subpart M—Coverage of Employees of State and Local Governments

General

Sec.
404.1200 General effect of section 218 of this Act.
404.1201 Scope of this subpart.
404.1202 Definitions.
404.1203 Evidence.
404.1204 Designating officials to act on behalf of the State.

What Groups of Employees May be Covered

404.1205 Absolute coverage groups.
404.1206 Retirement system coverage groups.
404.1207 Divided retirement system coverage groups.
404.1208 Ineligible employees.
404.1209 Mandatorily excluded services.
404.1210 Optionally excluded services.
404.1211 Interstate instrumentalities.
404.1212 Policemen and firemen.

How Coverage Under Agreements Is Obtained and Continues

404.1214 Agreement for coverage.
404.1215 Modification of agreement.
404.1216 Modification of agreement to correct an error.
404.1217 Continuation of coverage.
404.1218 Resumption of coverage.
404.1219 Dissolution of political subdivision.

How To Identify Covered Employees

404.1220 Identification numbers.
404.1221 Employee's Social Security number.
404.1223 Duties of State with respect to employee's Social Security number.

What Records of Coverage Must Be Kept

404.1225 Records.
404.1226 Statements to employees.

Review of Compliance by State With its Agreement

404.1230 Onsite review program.
404.1231 Scope of review.
404.1232 Conduct of review.
404.1234 Reports of review's findings.

How To Report Wages and Contributions

404.1237 Wage reports and contribution returns—general.
404.1239 Wage reports for employees performing services in more than one coverage group.
404.1242 Back pay.
404.1243 Use of reporting forms.
404.1247 When to report wages.
404.1249 When and where to make deposits of contributions and to file contribution returns and wage reports.
404.1251 Final reports.

What is a State's Liability for Contributions

404.1255 State's liability for contributions.
404.1256 Limitation on State's liability for contributions for multiple employment situations.

Figuring the Amount of the State's Contributions

404.1260 Amount of contributions.
404.1262 Manner of payment of contributions by State.
404.1263 When fractional part of a cent may be disregarded.

If a State Fails To Make Timely Payments

404.1265 Addition of interest to contributions.
404.1267 Failure to make timely payments.

How Errors in Reports and Contributions Are Adjusted

404.1270 Adjustments in general.
404.1271 Adjustment of overpayment of contributions.
404.1272 Refund or recomputation of overpayments which are not adjustable.
404.1275 Adjustment of employee contributions.
404.1276 Reports and payments erroneously made to Internal Revenue Service-transfer of funds.

How Overpayments of Contributions Are Credited or Refunded

404.1280 Allowances of credits or refunds.
404.1281 Credits or refunds for periods of time during which no liability exists.
404.1282 Time limitations on credits or refunds.
404.1283 Exceptions to the time limitations on credits or refunds.
404.1284 Offsetting underpayments against overpayments.

How Assessments for Underpayments of Contributions Are Made

404.1285 Assessments of amounts due.

Sec.
404.1288 Time limitations on assessments.
404.1287 Exceptions to the time limitations on assessments.
404.1289 Payment after expiration of time limitations for assessment.

Secretary's Review of Decisions on Credits, Refunds, or Assessments

404.1290 Review of decisions by the Secretary.
404.1291 Reconsideration.
404.1292 How to request reconsideration.
404.1293 Time for filing request for reconsideration.
404.1294 Notification to State after reconsideration.
404.1295 Commissioner's review.
404.1296 Commissioner's notification to the State.

How a State May Seek Court Review of Secretary's Decision

404.1297 Review by court.
404.1298 Time for filing civil action.
404.1299 Final judgments.

Subpart M—Coverage of Employees of State and Local Governments

Authority: (Secs. 205, 218, and 1102 of the Social Security Act, 53 Stat. 1368, 64 Stat. 514, 49 Stat. 647, section 5 of Reorganization Plan No. 1 of 1953, 67 Stat. 631; 42 U.S.C. 405, 418 and 1302.

General

§ 404.1200 General effect of section 218 of the Act.

Under section 218 of the Social Security Act (the Act) a State may ask the Secretary of Health and Human Services to enter into an agreement to extend Federal old-age, survivors, disability and hospital insurance coverage under title II of the Act to groups of employees of the State and its political subdivisions. The Secretary shall enter into such agreement. State and local government employees, after being covered under an agreement, have the same benefit rights and responsibilities as other employees who are mandatorily covered under title II. The State assumes full financial and reporting responsibility for all groups covered under its agreement. The agreement may not be terminated in its entirety or with respect to any coverage group under that agreement.

§ 404.1201 Scope of this subpart.

This subpart contains the rules of the Social Security Administration (SSA) about:

(a) How a State enters into and modifies an agreement;

(b) What groups of employees a State can cover by agreement;

(c) How a State must identify covered employees and what records it must keep on those employees;

(d) Periodic reviews of the source records kept on covered employees;

(e) How and when a State must report wages and pay contributions;

(f) What the State's liability for contributions is and how SSA figures the amount of those contributions;

(g) What happens if a State fails to pay its contributions timely;

(h) How errors in reports and contribution payments are corrected;

(i) How overpayments of contributions are credited or refunded;

(j) How assessments are made if contributions are underpaid; and

(k) How a State can obtain administrative or judicial review of a decision on a credit, refund, or assessment.

§ 404.1202 Definitions.

Terms which have special meaning in this subpart are described in this section. Where necessary, further explanation is included in the section where the term is used.

Agreement—The agreement between the Secretary of Health and Human Services and the State containing the conditions under which retirement, survivors, disability and hospital insurance coverage is provided for State and local government employees.

Allowance of a credit or refund—The written notice to a State of the determination by SSA of the amount owed to the State by SSA and the basis for the determination.

Assessment—The written notice to a State of the determination by SSA of the amount (contributions or accrued interest) owed to SSA by the State and the basis for the determination.

Contributions—Payments made under an agreement which the State deposits in a Federal Reserve bank. The amounts are based on the wages paid to employees whose services are covered under an agreement. These amounts are equal to the taxes imposed under the Internal Revenue Code on employers and employees in private employment.

Contribution return—Form used to identify and account for all contributions actions.

Coverage—The extension of Social Security protection under title II of the Act (retirement, survivors, disability, and hospital insurance) by agreement between the Secretary of Health and Human Services and a State to employees of the State and its political subdivisions or by agreement between the Secretary of Health and Human Services and an interstate instrumentality to employees of the interstate instrumentality.

Coverage group—The grouping by which employees are covered under an agreement.

Disallowance of a State's claim for credit or refund—The written notice of a State of the determination by SSA that the State's claim for credit or refund is denied and the basis for the determination.

Employee—An employee as defined in section 210(j) of the Act. Usually, the common-law control test is used in determining whether an employer-employee relationship exists. The term also includes an officer of a State or political subdivision.

Governmental function—The traditional functions of government: legislative, executive, and judicial.

Interstate instrumentality—An independent legal entity organized by two or more States to carry out one or more functions. For Social Security coverage purposes under section 218 of the Act, an interstate instrumentality is treated, to the extent practicable, as a "State."

Modification—A change to the agreement between the Secretary of Health and Human Services and a State which provides coverage of the services of employees not previously covered or which alters the agreement in some other respect.

Overpayment—A payment of more than the correct amount of contributions or interest.

Political subdivision—A separate legal entity of a State which usually has specific governmental functions. The term ordinarily includes a county, city, town, village, or school district, and in many States, a sanitation, utility, reclamation, drainage, flood control, or similar district. A political subdivision includes an instrumentality of a State, one or more political subdivisions of a State, or a State and one or more of its political subdivisions.

Proprietary function—A business engaged in by a State or political subdivision such as a public amusement park or public parking lot.

Retirement system—A pension, annuity, retirement, or similar fund or system established by a State or political subdivision.

Secretary—The Secretary of Health and Human Services or authorized delegate.

SSA—The Social Security Administration.

State—Includes the fifty States, Puerto Rico, and the Virgin Islands. It does not include the District of Columbia, Guam or American Samoa. "State" also refers to an interstate instrumentality where applicable.

Underpayment—A payment of less than the correct amount of contributions or interest.

Wage Reports—Forms used to identify employees who were paid wages for covered employment and the amounts of those wages paid. This includes corrective reports.

We—The Social Security Administration.

§ 404.1203 Evidence.

(a) *State's responsibility for submitting evidence.* The State, under the provisions of the agreement, is responsible for accurately reporting the wages paid employees for services covered by the agreement and for paying the correct amount of contributions due on those wages. This responsibility includes submitting evidence to verify the accuracy of the reports and payments.

(b) *Failure to submit requested evidence.* The State is required to submit information timely to SSA. If we request additional evidence to verify the accuracy of reports and payments, we specify when that evidence must be submitted. If we do not receive the evidence timely, and the State provides no satisfactory explanation for its failure to submit the evidence timely, we may proceed, if appropriate, on the basis of the information we have. Proceeding on the basis of the information we have permits us to credit the wage records of employees properly, where possible, while continuing to work with the State to resolve remaining discrepancies.

§ 404.1204 Designating officials to act on behalf of the State.

Each State which enters into an agreement shall designate the official or officials authorized to act on the State's behalf in administering the agreement. Each State shall inform SSA of the name, title, and address of the designated official(s) and the extent of each official's authority. For example, a State may indicate that the State official is authorized:

(a) To enter into an agreement and execute modifications to the agreement;

(b) To enter into agreements to extend or re-extend the time limit for assessment or credit;

(c) To make arrangements in connection with onsite reviews;

(d) To request administrative review of an assessment, an allowance of a credit or refund, or a disallowance of a credit or refund; or

(e) To carry out the ministerial duties necessary to administer the agreement. Each State shall inform SSA timely of changes in designated officials or changed in their authority.

What Groups of Employees May Be Covered

§ 404.1205 Absolute coverage groups.

(a) *General.* An absolute coverage group is a permanent grouping of employees, e.g., all the employees of a city or town. It is a coverage group for coverage and reporting purposes. When used for coverage purposes, the term also refers to groups of employees whose positions are not under a retirement system. An absolute coverage group may include positions which were formerly under a retirement system and, at the State's option, employees who are in positions under a retirement system but who are ineligible (see § 404.1206) to become members of that system.

(b) *What an absolute coverage group consists of.* An absolute coverage group consists of one of the following employee groups:

(1) State employees performing services in connection with the State's governmental functions;

(2) State employees performing services in connection with a single proprietary function of the State;

(3) Employees of a State's political subdivision performing services in connection with that subdivision's governmental functions;

(4) Employees of a State's political subdivision performing services in connection with a single proprietary function of the subdivision;

(5) Civilian employees of a State's National Guard units; and

(6) Individuals employed under an agreement between a State and the U.S. Department of Agriculture as agricultural products inspectors.

(c) *Designated coverage groups.* A State may provide coverage for designated (i.e., selected) absolute coverage groups of the State or a political subdivision. When coverage is extended to these designated groups, the State must specifically identify each group as a designated absolute coverage group and furnish the effective date of coverage and any optional exclusion(s) for each group. Where a State has provided coverage to designated absolute coverage groups, the State may, by modifying its agreement, extend that coverage to any absolute coverage group in the state.

§ 404.1206 Retirement system coverage groups.

(a) *General.* Section 218(d) of the Act authorizes coverage of services of employees in positions under a retirement system. For purposes of obtaining coverage, a system may be considered a separate retirement system authorized by section 218(d)(6)(A) or (B) of the Act. Under this section of the Act a State may designate the positions of any one of the following groupings of employees as a separate retirement system:

(1) The entire system;

(2) The employees of the State under the system;

(3) The employees of each political subdivision in the State under the system;

(4) The employees of the State and the employees of any one or more of the State's political subdivisions;

(5) The employees of any combination of the State's political subdivisions;

(6) The employees of each institution of higher learning, including junior colleges and teachers colleges; or

(7) The employees of a hospital which is an integral part of a political subdivision.

If State law requires a State or political subdivision to have a retirement system, it is considered established even though no action has been taken to establish the system.

(b) *Retirement system coverage groups.* A retirement system coverage group is a grouping of employees in positions under a retirement system. Employees in positions under the system have voted for coverage for the system by referendum and a State has provided coverage by agreement or modification of its agreement. It is not a permanent grouping. It exists only for referendum and coverage purposes and is not a separate group for reporting purposes. Once coverage has been obtained, the retirement system coverage group becomes part of one of the absolute coverage groups described in § 404.1205(b).

(c) *What a retirement system coverage group consists of.* A retirement system coverage group consists of:

(1) Current employees—all employees whose services are not already covered by the agreement, who are in positions covered by the same retirement system on the date an agreement or modification of the agreement is made applicable to the system;

(2) Future employees—all employees in positions brought under the system after an agreement or modification of the agreement is signed; and

(3) Other employees—all employees in positions which had been under the retirement system but which were not under the retirement system when the group was covered (including ineligibles

BEST COPY AVAILABLE

who had been optionally excluded from coverage).

(d) *Referendum procedures.* Prior to signing the agreement or modification, the governor or an official of the State named by the governor (for an interstate instrumentality, its chief executive officer) must certify to the Secretary that:

(1) All eligible employees were given at least 90 days' notice of the referendum;

(2) All eligible employees were given an opportunity to vote in the referendum;

(3) Only eligible employees were permitted to vote in the referendum;

(4) Voting was by secret written ballot on the question of whether service in positions covered by the retirement system should be included under an agreement;

(5) The referendum was conducted under the supervision of the governor or agency or individual named by him; and

(6) A majority of the retirement system's eligible employees voted for coverage under an agreement.

The State has two years from the date of a favorable referendum to enter into an agreement or modification extending coverage to the retirement system coverage group. If the referendum is unfavorable, another referendum cannot be held until at least one year after that unfavorable referendum.

(e) *Who is covered.* If a majority of the eligible employees in a retirement system vote for coverage, all employees in positions in that retirement system become covered.

(f) *Coverage of employees in positions under more than one retirement system.*

(1) If an employee occupies two or more positions each of which is under a different retirement system, the employee's coverage in each position depends upon the coverage extended to each position under each system.

(2) If an employee is in a single position which is under more than one retirement system (because the employee's occupancy of that position permits her or him to become a member of more than one retirement system), the employee is covered when the retirement system coverage group including her or his position is covered under an agreement unless (A) he or she is not a member of the retirement system being covered and (B) he or she is a member of a retirement system which has not been covered. This rule also applies to the coverage of services in policemen's and firemen's positions in interstate instrumentalities and in those States named in § 404.1212(c)(1).

§ 404.1207 Divided retirement system coverage groups.

(a) *General.* Under section 218(d)(6)(C) of the Act certain States and under section 218(k)(2) of the Act all interstate instrumentalities may divide a retirement system based on whether the employees in positions under that system want coverage. The States having this authority are Alaska, California, Connecticut, Florida, Georgia, Hawaii, Illinois, Massachusetts, Minnesota, Nevada, New Jersey, New Mexico, New York, North Dakota, Pennsylvania, Rhode Island, Tennessee, Texas, Vermont, Washington, and Wisconsin.

(b) *Divided retirement system coverage group.* A divided retirement system coverage group is a grouping under a retirement system of positions of members of the system who voted for coverage and positions of individuals who become members of the system (the "yes" group), and positions of members of the system who did not elect coverage and ineligible employees (see § 404.1208) (the "no" group). For purposes of this section, the term "member" also includes individuals who have an option to become members of the retirement system but have not done so. The position of a member in the "no" group can be covered if, within two years after the agreement or modification extending coverage to the "yes" group is executed, the State provides an opportunity to transfer the position to the covered "yes" group and the individual occupying the position makes a written request for the transfer. The members of the "no" group can also be covered if, by referendum, a majority of them vote for coverage. If the majority votes for coverage, all positions of the members of the "no" group become covered. There is no further subdivision of the "no" group into those who voted for and those who voted against coverage. If the State requests, the ineligibles in the "no" group may become part of the "yes" group and have their services covered.

(c) *Referendum procedures.* To divide a retirement system, the State must conduct a referendum among the system's employees. If the system is to be divided, the governor or an individual named by him must certify to the Secretary that:

(1) The referendum was held by written ballot on the question of whether members of a retirement system wish coverage under an agreement;

(2) All members of the retirement system at the time the vote was held had the opportunity to vote;

(3) All members of the system on the date of the notice of the referendum was issued were given at least 90 days' notice regarding the referendum;

(4) The referendum was conducted under the supervision of the governor or agency or person designated by him; and

(5) The retirement system was divided into two parts, one composed of positions of members of the system who voted for coverage and the other composed of the remaining positions under the retirement system.

After the referendum the State may include those members who chose coverage under its agreement as a retirement system coverage group. The State has two years from the date of the referendum to enter into an agreement or modification extending coverage to that group.

§ 404.1208 Ineligible employees.

(a) *Definition.* An ineligible is an employee who, on first occupying a position under a retirement system, is not eligible for membership in that system because of a personal disqualification like age, physical condition, or length of service.

(b) *Coverage of ineligible employees.* A State may, in its agreement or any modification to the agreement, provide coverage for the services of ineligible employees in one of three ways:

(1) As part of or as an addition to an absolute coverage group;

(2) As part of a retirement system coverage group covering all positions under the retirement system; or

(3) As part of or as an addition to a retirement system coverage group composed of those members in positions in a retirement system who chose coverage.

§ 404.1209 Mandatorily excluded services.

Some services are mandatorily excluded from coverage under a State's agreement. They are:

(a) Services of employees who are hired to relieve them from unemployment;

(b) Services performed in an institution by a patient or inmate of the institution;

(c) Transportation service subject to the Federal Insurance Contributions Act;

(d) Certain emergency services in case of fire, storm, snow, volcano, earthquake, flood or other similar emergency; and

(e) Services other than agricultural labor or student services which would be excluded from coverage if performed for a private employer.

BEST COPY AVAILABLE

§ 404.1210 Optionally excluded services.

Certain services and positions may, if the State requests it, be excluded from coverage. These exclusions may be applied on a statewide basis or selectively by coverage groups. They are:

(a) Services in any class or classes of elective positions;

(b) Services in any class or classes of part-time positions;

(c) Services in any class or classes of positions where the pay is on a fee basis;

(d) Any agricultural labor or student services which would also be excluded if performed for a private employer; and

(e) Services performed by election officials or election workers if the payments for those services in a calendar year are less than $100.

§ 404.1211 Interstate instrumentalities.

For Social Security coverage purposes under section 218 of the Act, interstate instrumentalities are treated, to the extent practicable, as States, that is:

(a) They must be legally authorized to enter into an agreement with the Secretary;

(b) They are subject to the same rules that are applied to the States;

(c) They may divide retirement systems and cover only the positions of members who want coverage; and

(d) They may provide coverage for firemen and policemen in positions under a retirement system.

§ 404.1212 Policemen and firemen.

(a) *General.* For Social Security coverage purposes under section 218 of the Act, a policeman's or fireman's position is any position so classified under State statutes or court decisions. Generally, these positions are in the organized police and fire departments of incorporated cities, towns, and villages. In most States, a policeman is a member of the "police" which is an organized civil force for maintaining order, preventing and detecting crimes, and enforcing laws. The terms "policeman" and "fireman" do not include services in positions which, although connected with police and firefighting functions, are not policeman or fireman positions.

(b) *Providing coverage.* A State may provide coverage of:

(1) Policemen's and firemen's positions not under a retirement system as part of an absolute coverage group;

(2) Policemen's or firemen's positions, or both, as part of a retirement system coverge group for the States specified in paragraph (c) (1) of this section; or

(3) Firemen's positions only as a separate retirement system as set forth in paragrph (c) (2) of this section.

(c) *Policmen and firement in positions under a retirement system.* (1) Some States and all interstate instrumentalities may provide coverage for employees in policemen's or fireman's positions, or both, which are under a retirement system by following the majority vote referendum procedures in § 404.1206(d). The States are Alabama, California, Florida, Georgia, Hawaii, Idaho, Kansas, Maine, Maryland, Mississippi, Montana, New York, North Carolina, North Dakota, Oregon, Puerto Rico, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virigina, and Washington. Some States and all interstate instrumentalities may use the desire for coverage procedures in § 404.1207. The States are California, Florida, Georgia, Hawaii, New York, North Dakota, Tennessee, Texas, Vermont, and Washington.

(2) All States not listed in paragraph (c) (1) of this section may provide coverage for employees in firemen's positions which are under a retirement system by:

(i) Following the referendum procedures in § 404.1206(d); and

(ii) Submitting a certification by the governor, or an individual named by her or him, to the Secretary that extending coverage to this group of employees will improve their overall benefit protection.

How Coverage Under Agreements Is Obtained and Continues

§ 404.1214 Agreement for coverage.

(a) *General.* A State may enter into a written agreement with the Secretary to provide for Social Security coverage for its employees or the employees of one or more of its political subdivisions. An interstate instrumentality may enter into a similar agreement for its employees. These agreements cover employees in groups of positions or by types of services rather than the individual employees.

(b) *Procedures.* A State or interstate instrumentality may request coverage by submitting to SSA a proposed written agreement for the desired coverage.

(c) *Authority to enter into an agreement for coverage.*

(1) *Federal law.* Section 218(a) of the Act requires the Secretary to enter into an agreement, at the request of the State, to extend Social Security coverage to the State's employees or those of its political subdivisions. Section 218(k) authorizes the Secretary to enter an agreement, at the request of an interstate instrumentality, to extend Social Security coverage to the employees of the interstate instrumentality.

(2) *State law.* State law must authorize a State or an interstate instrumentality to enter into an agreement with the Secretary for Social Security coverage.

(d) *Provisions of the agreement.* The agreement must include:

(1) A description of the specific services to be covered and excluded;

(2) The State's promise to pay, to the Secretary of the Treasury, contributions equal to the sum of the taxes which would be required under the Federal Insurance Contributions Act from employers and employees if the employment were in the private sector;

(3) The State's promise to comply with the regulations the Secretary prescribes for carrying out the provisions of section 218 of the Act; and

(4) Identification of the political subdivisions, coverage groups, or services being covered and the services that are excluded.

The agreement must be signed by the authorized State or interstate instrumentality official and the Secretary or his or her designee.

(e) *Effective date.* The agreement must specify an effective date of coverage. However, the effective date cannot be earlier than the last day of the sixth calendar year preceding the year in which the agreement is agreed to by the Secretary and the State. The agreement is effective after the effective date.

(f) *Applicability of agreement.* The agreement establishes the continuing relationship between the Secretary and the State or interstate instrumentality except as it is modified (see §§ 404.1215–404.1217).

§ 404.1215 Modification of agreement.

(a) *General.* A State or interstate instrumentality may modify in writing its agreement, for example, to:

(1) Exclude, in limited situations, employee services or positions previously covered;

(2) Include additional coverage groups; or

(3) Include as covered services:

(i) Services of covered employees for additional retroactive periods of time; and

(ii) Services previously excluded from coverage.

(b) *Controlling date for retroactive coverage.* A State may specify in the modification a date to make all individuals in the coverage group who were in an employment relationship on that date eligible for retroactive coverage. This date is known as the controlling date for retroactive coverage. It can be no earlier than the date the modification is mailed or otherwise

delivered to the Secretary nor can it be later than the date the modification is signed by the Secretary. If the State does not designate a controlling date, the date the modification is signed by the Secretary is the controlling date.

(c) *Conditions for modification.* The provisions of section 218 of the Act which apply to the original agreement also apply to a modification to the agreement.

(d) *Effective date.* Generally, a modification must specify an effective date of coverage. However, the effective date cannot be earlier than the last day of the sixth calendar year preceding the year in which the modification is agreed to by the Secretary and the State. The modification is effective after the effective date.

§ 404.1216 Modification of agreement to correct an error.

(a) *General.* If an agreement or modification contains an error, the State may correct the error by a subsequent modification to the agreement. For example, the agreement or modification incorrectly lists a covered service as an optionally excluded service or shows an improper effective date of coverage. In correcting this type of error, which affects the extent of coverage, the State must submit a modification along with evidence to establish that the error occurred. However, a modification is not needed to correct minor typographical or clerical errors. For example, an agreement or modification incorrectly lists School District No. 12 as School District No. 13. This type of error can be corrected based on a written request from the appropriate official of the State or interstate instrumentality.

(b) *Correction of errors involving erroneous reporting to the IRS.* Where a State or political subdivision makes reports and payments to the Internal Revenue Service under the provisions of the Federal Insurance Contributions Act which apply to employees in private employment in the mistaken belief that this action would provide coverage for its employees, the State may provide the desired coverage for those same periods of time by a subsequent modification to its agreement. If State law permits, the State may make that coverage effective with the first day of the first period for which the erroneous reports and payments were made. (In this instance, the limitation on retroactive coverage described in § 404.1215(d) is not applicable). Where the State does not want to provide such retroactive coverage or is not permitted to do so by State law, the State may provide the coverage for the affected coverage group as of a specified date (§ 404.1215(b)). The coverage would then apply to the services performed by individuals as members of the coverage group (1) who were employees on that date, and (2) whose wages were erroneously reported to IRS, and (3) for whom a refund of FICA taxes has not been obtained at the time the Secretary executes the modification.

§ 404.1217 Continuation of coverage.

The coverage of State and local government employees continues as follows:

(a) *Absolute coverage group.* Generally, the services of an employee covered as a part of an absolute coverage group (see § 404.1205) continue to be covered indefinitely. A position covered as a part of an absolute coverage group continues to be covered even if the position later comes under a retirement system. This includes policemen's and firemen's positions which are covered with an absolute coverage group.

(b) *Retirement system coverage group.* Generally, the services of employees in positions covered as a part of a retirement system coverage group continue to be covered indefinitely. For a retirement system coverage group made up of members who chose coverage, a position continues to be covered until it is removed from the retirement system and is no longer occupied by a member who chose coverage or by a new member of the system. Coverage is not terminated because the positions are later covered under additional retirement systems or removed from coverage under a retirement system, or because the retirement system is abolished with respect to the positions. However, if the retirement system has been abolished, newly created or reclassified positions or positions in a newly created political subdivision cannot be covered as a part of the retirement system coverage group. If the retirement system is not abolished, a newly created or reclassified position is a part of the coverage group if the position would have been a part of the group had it existed earlier. If the retirement system coverage group is made up of members who chose coverage, the newly created or reclassified position is a part of the coverage group if it is occupied by a member who chose coverage or by a new member.

§ 404.1218 Resumption of coverage.

Before 1983, an agreement could be terminated in its entirety or with respect to one or more coverage groups designated by the State. Coverage of any coverage group which has been previously terminated may be resumed by a modification to the agreement.

§ 404.1219 Dissolution of political subdivision.

If a political subdivision whose employees are covered under the agreement is legally dissolved or otherwise ceases to exist, the State shall give us satisfactory evidence of its dissolution or nonexistence. The evidence must establish that the entity is not merely inactive or dormant, but that it will never again have employees. We will notify the State whether the evidence is satisfactory.

How to Identify Covered Employees

§ 404.1220 Identification numbers.

(a) *State and local government.* (1) When a State enters into an agreement with the Secretary under section 218 of the Act, SSA assigns one identification number to the State (if State employees are covered under the agreement) and one identification number to each political subdivision included under the agreement. Similarly, in the case of an agreement with an interstate instrumentality, SSA assigns one identification number to the instrumentality. SSA notifies the appropriate official of the State or instrumentality of the number assigned.

(2) If a State or political subdivision is paying wages for covered transportation service (as determined under section 210(k) of the Act) which are subject to the Federal Insurance Contributions Act, the appropriate IRS Service Center assigns an identification number to the State or political subdivision. The IRS Service Center procedures for issuing identification numbers to States or political subdivisions may be found in 26 CFR 31.6011(b)–1.

(b) *Coverage group number for coverage groups.* If a State's agreement provides coverage for a State or a political subdivision based on designated proprietary or governmental functions, the State shall furnish a list of those groups. The list shall identify each designated function and the title and business address of the official responsible for filing each designated group's wage report with the State. SSA assigns a coverage group number to each designated group based on the information furnished in the list.

(c) *Unit numbers for payroll record units.* SSA assigns, at a State's request, unit numbers to payroll record units within a State or political subdivision. When a State requests separate payroll record unit numbers, it must furnish the following:

(1) The name of each payroll record unit for the coverage group; and

(2) The title and business address of the official responsible for each payroll unit.

(d) *Unit numbers where contribution amounts are limited.* An agreement, or modification of an agreement, may provide for the computation of contributions as prescribed in § 404.1256 for some employees of a political subdivision. In this situation, SSA assigns special unit numbers to the political subdivision to identify those employees. SSA does not assign a special unit number to a political subdivision in which the contributions for all employees are computed as prescribed in § 404.1256.

(e) *Use.* The State shall show the appropriate SSA issued identifying number, including any coverage group or payroll record unit number, on records, reports, returns, and claims to report wages, adjustments, and contributions.

§ 404.1221 Employee's Social Security number.

Each employee subject to this subpart must have a Social Security number. To get a Social Security number, the employee must go to the nearest Social Security district or branch office. The employee must apply for the number within seven days after starting work. Section 422.107 of this title describes the information the employee must give when applying for a Social Security number. Section 422.110 of this title describes how an employee may change his or her name or other identifying information submitted in connection with an application for a Social Security number.

§ 404.1223 Duties of State with respect to employee's Social Security number.

The State shall enter the employee's name and Social Security number exactly as shown on the employee's Social Security number card on all records, returns, reports, and claims. If the employee does not have a Social Security number card and has not filed an application for one with SSA, the State shall inform the employee of the provisions in § 404.1221. The State shall request the employee to present the number card as soon as it is received.

What Records of Coverage Must Be Kept

§ 404.1225 Records.

(a) *Who keeps the records.* Every State which enters into an agreement shall keep, or require the political subdivisions whose employees are included under its agreement to keep, accurate records of all remuneration (whether in cash or in a medium other than cash) paid to employees performing services covered by that agreement. These records shall show for each employee:

(1) The employee's name, address, and Social Security number;

(2) The total amount of remuneration (including any amount withheld as contributions or for any other reason) and the date the remuneration was paid and the period of services covered by the payment;

(3) The amount of remuneration which constitutes wages (see § 404.1041 for wages and §§ 404.1047–404.1059 for exclusions from wages); and

(4) The amount of the employee's contribution, if any, withheld or collected, and if collected at a time other than the time such payment was made, the date collected. If the total remuneration (paragraph (a)(2) of this section) and the amount which is subject to contribution (paragraph (a)(3) of this section) are not equal, the reason shall be stated.

The State shall keep copies of all returns, reports, schedules, and statements required by this subpart, copies of claims for refund or credit, and copies of documents about each adjustment made under § 404.1265 or § 404.1271 as part of its records. These records may be maintained by the State or, for employees of a political subdivision, by the political subdivision. Each State shall use forms and systems of accounting as will enable the Secretary to determine whether the contributions for which the State is liable are correctly figured and paid.

(b) *Place and period of time for keeping records.* All records required by this section shall:

(1) Be kept at one or more convenient and safe locations accessible to reviewing personnel (see § 404.1232(a));

(2) Be available for inspection by reviewing personnel at any time; and

(3) Be maintained for at least four years from the date of the event recorded. (This four-year requirement applies regardless of whether, in the meantime, the employing entity has been legally dissolved or otherwise ceases to exist or, before 1983, the agreement was terminated in its entirety or in part.

§ 404.1235 Statements to employees.

Each State shall ensure that an IRS Form W–2 or similar written statement is provided to each individual performing services covered under its agreement. The Form W–2 or statement shall be furnished to the employee not later than January 31 of the year following the calendar year covered by the statement. If the employee leaves the employ of the State or political subdivision before the end of a calendar year, the Form W–2 or statement shall be furnished to the employee on the day on which the last payment of wages is made to the employee

Review of Compliance By State With Its Agreement

§ 404.1230 Onsite review program.

To ensure that the services of employees covered by a State's agreement are reported and that those employees receive Social Security credit for their covered earnings, we periodically review the source records upon which a State's contribution returns and wage reports are based. These reviews are designed:

(a) To measure the effectiveness of the State's systems for ensuring that all wages for those employees covered by its agreement are reported and Social Security contributions on those wages are paid;

(b) To detect any misunderstanding of coverage or reporting errors and to advise the State of the corrective action it must take; and

(c) To find ways to improve a State's recordkeeping and reporting operations for the mutual benefit of the State and SSA.

§ 404.1231 Scope of review.

The onsite review focuses on four areas:

(a) State's controls and recordkeeping—to assess a State's systems for assuring timely receipt, correctness, and completeness of wage reports and contribution returns;

(b) Instruction, education, and guidance a State provides local reporting officials—to assess a State's systems for assuring on a continuing basis that all reporting officials and their staffs have the necessary instructions, guidelines, and training to meet the State's coverage, reporting and recordkeeping requirements;

(c) Compliance by reporting officials—to assess a State's systems for assuring that the reporting officials in the State have adequate recordkeeping procedures, are properly applying the appropriate provisions of the State's agreement, and are complying with reporting requirements; and

(d) Quality control with prompt corrective action—to assess a State's systems for assuring that its reports and those of its political subdivisions are correct, for identifying the causes and extent of any deficiencies, and for promptly correcting these deficiencies.

§ 404.1232 Conduct of review.

(a) Generally. SSA staff personnel conduct the onsite review. Occasionally, members of the Office of the Inspector General, Department of Health and Human Services (HHS), may conduct or participate in the review.

(b) The review is done when considered necessary by SSA or HHS or, if practicable, in response to a State's specific request for a review.

(c) All pertinent source records prepared by the State or its political subdivisions are reviewed, on site, to verify the wage reports and contribution returns. We may review with the appropriate employees in a subdivision those source records and how the information is gathered, processed, and maintained. We notify the State's Social Security Administrator when we plan to make the review and request her or him to make the necessary arrangements.

(d) The review is a cooperative effort between SSA and the States to improve the methods for reporting and maintaining wage data to carry out the provisions of the agreement. If SSA considers it necessary to obtain certain information, we may subpoena employees to testify and to produce books, payment and other records, correspondence, papers, or documents which are relevant to any matter in question.

§404.1234 Reports of review's findings.

We provide the State Social Security Administrator with reports of the review's findings. These reports may contain coverage questions which need development and resolution and reporting errors or omissions for the State to correct promptly. These reports may also recommend actions the State can take to improve its information gathering, recordkeeping, and wage reporting systems, and those of its political subdivisions.

How to Report Wages and Contributions

§404.1237 Wage reports of contribution returns—general.

(a) *Wage reports.* Each State shall report each year the wages paid each covered employee during that year. With the wage report the State shall also identify, as prescribed by SSA, each political subdivision by its assigned identification number and, where appropriate, any coverage group or payroll record unit number assigned.

(b) *Wage reports of remuneration for agricultural labor.* A State may exclude from its agreement any services of employees the remuneration for which is not wages under section 209(h)(2) of the Act. Section 209(h)(2) excludes as wages the cash remuneration an employer pays employees for agricultural labor which is less than $150 in a calendar year, or, if the employee performs the agricultural labor for the employer on less than 20 days during a calendar year, the cash remuneration is computed on a time basis. If a State does exclude the services and the individual meets the cash-pay or 20-day test described in §404.1056, the State shall identify on the wage report and on any adjustment report each individual performing agricultural labor and the amount paid to her or him.

(c) *Contribution returns.* The State shall forward the contribution return as set out in §404.1240(b). It shall make contribution payments under §404.1262.

§404.1238 Wage reports for employees performing services in more than one coverage group.

(a) *Employee of State in more than one coverage group.* If a State employee is in more than one coverage group, the State shall report the employee's total wages, up to the annual wage limitations in §404.1047, as though the wages were paid by only one of the coverage groups.

(b) *Employee of political subdivision in more than one coverage group.* If an employee of a political subdivision is in more than one coverage group, the State shall report the employee's total wages, up to the annual wage limitations in §404.1047, as though the wages were paid by only one of the coverage groups.

(c) *Employee of State and one or more political subdivisions.* If an individual performs covered services as an employee of the State and an employee of one or more political subdivisions and the State agreement does not provide for limiting contributions under section 218(e)(2) of the Act, the State and each political subdivision shall report the amount of covered wages it paid the employee up to the annual wage limitations in §404.1047.

(d) *Employee of more than one political subdivision.* If an individual performs covered services as an employee of more than one political subdivision and the State agreement does not provide for limiting contributions under section 218(e)(2) of the Act, each political subdivision shall report the covered wages it paid the employee up to the annual wage limitations in § 404.1047.

(e) *Employee performing covered services for more than one political entity where section 218(e)(2) of the Act is applicable.* If an agreement provides for limiting contributions under section 218(e)(2) of the Act, the reporting officials compute the total amount of wages paid the employee by two or more political subdivisions of a State, or a State and one or more of its political subdivisions, which were subject to section 218(e)(2) of the Act. The State reports the amount of wages paid up to the annual wage limitations in § 404.1047. The employee is treated as having only one employer. If the employee also had wages not subject to section 218(e)(2) of the Act, the State shall report those wages separately.

§ 404.1242 Back pay.

(a) *"Back pay" defined.* Back pay is pay received in one period of time which would have been paid in a prior period of time except for a wrongful or improper action taken by an employer. It includes pay made under Federal or State laws intended to create an employment relationship (including situations where there is unlawful refusal to hire) or to protect an employee's right to wages.

(b) *Back pay under a statute.* Back pay under a statute is a payment by an employer following an award, determination or agreement approved or sanctioned by a court or administrative agency responsible for enforcing a Federal or State statute protecting an employee's right to employment or wages. Examples of these statutes are:

(1) National Labor Relations Act or a State labor relations act;

(2) Federal or State laws providing reemployment rights to veterans;

(3) State minimum wage laws; and

(4) Civil Rights Act of 1964.

Payments based on legislation comparable to and having a similar effect as those listed in this paragraph may also qualify as having been made under a statute. Back pay under a statute, excluding penalties, is wages if paid for covered employment. It is allocated to the periods of time in which it should have been paid if the employer had not violated the statute. A State must file a wage report and pay the contributions due for all periods involved in the back pay award under the rules applicable to those periods.

(c) *Back pay not under a statute.* Where the employer and the employee agree on the amount payable without any award, determination or agreement approved or sanctioned by a court or administrative agency, the payment is not made under a statute. This back pay cannot be allocated to prior periods of time but must be reported by the State for the period in which it is paid.

§ 404.1243 Use of reporting forms.

(a) *Submitting wage reports.* In the form and manner required by SSA, a State shall submit an annual report of

the covered wages the State and its political subdivisions paid their employees. Any supplemental, adjustment, or correctional wage report filed is considered a part of the State's wage report.

(b) *Correction of errors.* If a State fails to report or incorrectly reports an employee's wages on its wage report, the State shall submit a corrective report as required by SSA.

(c) *Reporting on magnetic tape or other media.* After approval by SSA, a State may substitute magnetic tape or other media for any form required for submitting a report or reporting information.

§ 404.1247 When to report wages.

A State shall report wages for the calendar year in which they were actually paid. If the wages were constructively paid in a prior calendar year, the wages shall be reported for the prior year (see § 404.1042(b) regarding constructive payment of wages).

§ 404.1249 When and where to make deposits of contributions and to file contribution returns and wage reports.

(a) *Deposits of contributions.* The State shall pay contributions in the manner required in § 404.1262. (For failure to make deposits when due see § 404.1265). The contribution payment is considered made when received by the appropriate Federal Reserve bank or branch (see § 404.1262). Except as provided in paragraphs (b)(2) and (3) and paragraph (c) of this section, contributions are due and payable as follows:

(1) *For wages paid before July 1, 1980.* Contribution payments for wages paid in a calendar quarter are due on the 15th day of the second month following the end of the calendar quarter during which the wages were paid.

(2) *For wages paid beginning July 1, 1980 and before January 1984.* Contribution payments for wages paid in a calendar month are due within the thirty day period following the last day of that month.

(3) *For wages paid after December 1983.* Contribution payments for wages paid in the first half of a calendar month are due on the last day of that month. Contribution payments for wages paid in the second half of that calendar month are due on the fifteenth day of the next month. (For purposes of this section, the first half of a calendar month is the first 15 days of that month and the second half is the remainder of that month.)

(b) *Contribution returns and wage reports.* (1) *Where to be filed.* The State shall file the original copies of all contribution returns, wages reports, and adjustment reports with the SSA.

(2) *When to be filed.* (i) *For years prior to execution of agreement or modification.* If an agreement or modification provides for the coverage of employees prior to the year of execution of the agreement or modification, the State shall pay contributions due and shall file the contribution returns and wage reports within 90 days after the date of the notice that the Secretary has signed the agreement or modification.

(ii) *For year of execution of agreement or modification.* If the agreement or modification provides for the coverage of employees for the year of execution of the agreement or modification, the State may, within 90 days after the date of the notice that the Secretary has signed the agreement or modification, submit a single contribution return and pay all contributions due for the following periods:

(A) The month in which the agreement or modification was signed;

(B) Any prior months in that year; and

(C) Any subsequent months before January 1984 (half-months after December 1983) whose contribution return and payment due date is within this 90 day period. The State shall file wage reports for that year by February 28 of the year following the date of execution or within 90 days of the date of the notice, whichever is later.

(iii) *For years after execution of agreement or modification.* Except as described in paragraph (b)(2)(ii) of this section, when the State pays its contributions under paragraph (a) of this section, it shall also file a contribution return. The State shall file the wage report for any calendar year after the year of execution of agreement or modification by February 28 of the following calendar year.

(iv) For good cause shown, and upon written request by a State, the Secretary may allow additional time for filing the reports and paying the related contributions described in paragraphs (b)(2)(i) and (b)(2)(ii) of this section.

(3) *Due date is on a weekend, legal holiday or Federal nonworkday.* If the last day for filing the wage report falls on a weekend, legal holiday or Federal nonworkday, the State may file the wage report on the next Federal workday. If the due date for paying contributions for the wages paid in a period (as specified in paragraph (a) of this section) falls on a weekend, legal holiday or Federal nonworkday, the State shall pay the contributions and shall file the contribution return no later than—

(i) The preceding Federal workday for wages paid in July 1980 through December 1983;

(ii) The next Federal workday for wages paid before July 1980 or after December 1983.

(4) *Submitting reports and payments.* When submitting the contribution returns or wage reports the State shall release them in time to reach SSA by the due date. When submitting contribution payments as described in § 404.1262, the State shall release the payments in time to reach the appropriate Federal Reserve bank or branch by the due date. In determining when to release any returns, reports, or payments the State shall provide sufficient time for them to timely reach their destination under the method of submission used, e.g., mail or electronic transfer of funds.

(c) *Payments by third party on accounts of sickness or accident disability.* Where a third party makes a payment to an employee on account of sickness or accident disability which constitutes wages for services covered under a State agreement, the wages will be considered, for purposes of the deposits required under this section, to have been paid to the employee on the date on which the employer receives notice from the third party of the amount of the payment. No interest will be assessed for failure to make a timely deposit of contributions due on such wages for which a deposit was made after December 1981 and before July 1982, to the extent that the failure to make the deposit timely is due to reasonable cause and not willful neglect.

§ 404.1251 Final reports.

If a political subdivision is legally dissolved or otherwise ceases to exist, the State shall file a final report on that entity. The report shall include each coverage group whose existence ceases with that of the entity. It shall:

(a) Be marked "final report";

(b) Cover the period during which final payment of wages subject to the agreement is made; and

(c) Indicate the last date wages were paid.

With the final report, the State shall submit a statement showing the title and business address of the State official responsible for keeping the State's records and of each State and local official responsible for keeping the records for each coverage group whose existence is ended. The State shall also identify, as prescribed by SSA, each political subdivision by its assigned number and, where applicable, any

coverage group or payroll record unit number assigned.

What is a State's Liability for Contributions

§ 404.1255 State's liability for contributions.

A State's liability for contributions equals the sum of the taxes which would be imposed by sections 3101 and 3111 of the Internal Revenue Code of 1954, if the services of the employees covered by the State's agreement were employment as defined in section 3121 of the Code. The State's liability begins when those covered services are performed, for which wages are actually or constructively paid to those individuals, including wages paid in a form other than cash (see § 404.1041(d)). If an agreement is effective retroactively, the State's liability for contributions on wages paid during the retroactive period begins with the date of execution of the agreement or applicable modification. Where coverage of a coverage group has been terminated, the State is liable for contributions on wages paid for covered services even if the wages are paid after the effective date of termination of coverage.

§ 404.1256 Limitation on State's liability for contributions for multiple employment situations.

(a) *Limitation due to multiple employment.*

Where:

(1) An individual in any calendar year performs covered services as an employee of a State and as an employee of one or more political subdivisions of the State, or as an employee of more than one political subdivision; and

(2) The State provides all the funds for payment of the amounts which are equivalent to the taxes imposed on the employer under FICA on that individual's remuneration for those services; and

(3) No political subdivision reimburses the State for paying these amounts, the State's agreement or modification of an agreement may provide that the State's liability for the contributions on that individual's remunerations shall be computed as though the individual had performed services in employment for only one political subdivision. The State then totals the individual's covered wages from all these governmental employers and computes the contributions based on that total subject to the wage limitations in § 404.1047.

(b) *Identification of employees in multiple employment.* An agreement or modification of an agreement providing for the computation of contributions as described in paragraph (a) of this section shall identify the class or classes of employees to whose wages this method of computing contributions applies. For example, the State may provide that such computation shall apply to the wages paid to all individuals for services performed in positions covered by a particular retirement system, or to the wages paid to all individuals who are members of any two or more coverage groups designated in an agreement or modification. The State shall promptly notify SSA if the conditions in paragraph (a) of this section are no longer met by any class or classes of employees identified in an agreement or modification. In its notification, the State shall identify each class of employees and the date on which the conditions ceased to be met.

(c) *Effective date.* In the agreement or modification, the State shall provide that the computation of contributions shall apply to wages paid after the effectifve date stated in the agreement or modification. That date may be the last day of any calendar year; however, it may be no earlier than January 1 of the year in which the agreement or modification is submitted to SSA.

Figuring the Amount of the State's Contributions

§ 404.1260 Amount of contributions.

The State's contributions are equal to the product of the applicable contribution rate (which is equivalent to both the tax rates imposed under sections 3101 and 3111 of the Internal Revenue Code) times the amount of wages actually or constructively paid for covered services each year (subject to the wage limitations in § 404.1047) to the employee by the employer.

§ 404.1262 Manner of payment of contributions by State.

Beginning 3 months after the effective date of these regulations, a State shall pay the contributions it is required under its agreement to pay to the Secretary of the Treasury using the electronic transfer of funds. (We may extend this time limitation by an additional three months.) When paying its contributions, the State shall deposit its payment at the specific Federal Reserve bank or branch designated by SSA.

§ 404.1263 When fractional part of a cent may be disregarded.

In paying contributions to a Federal Reserve bank or branch, a State may disregard a fractional part of a cent unless it amounts to one-half cent or more, in which case it shall be increased to one cent. Fractional parts of a cent shall be used in computing the total of contributions.

If a State Fails To Make Timely Payments

§ 404.1265 Addition of interest to contributions.

(a) *Contributions not paid timely.* (1) *General.* If a State fails to pay its contributions to the appropriate Federal Reserve bank or branch (see § 404.1262), when due under § 404.1249(a), we add interest on the unpaid amount of the contributions beginning with the date the payment was due, except as described in paragraphs (b) and (c) of this section. Interest, if charged, begins with the due date even if it is a weekend, legal holiday or Federal nonwork day. Interest is added at the rate prescribed in section 218(j) of the Act.

(2) *Corrective reports.* If, after submitting its wage report, a State files a corrective report of additional wages which results in an underpayment of contributions, we assess interest to the underpaid amount. We add the interest beginning with the date the contributions on those wages were initially due to the date the contributions are paid.

(b) *Verifying contributions paid against reported wages.* We check the computation of contributions to verify that a State has paid the correct amount of contributions on the wages it reports for a calendar year (see § 404.1249(b)(2)). If we determine that a State paid less than the amount of contributions due for that year, we add interest to the amount of the underpayment. We would add interest beginning with the date the unpaid contributions were initially due to the date those contributions are paid. However, if the total amount of the underpayment is 5 percent or less than the contributions due for a calendar year based upon the State's wage report and the State deposits the underpaid amount within 30 days after the date of our notification to the State of the amount due, the State may request that the interest on the underpaid amount be waived for good cause. This request must be made within 30 days of our notification of the State of the amount due. Such requests will be evaluated on an individual basis. The evaluation will include, but not be limited to, consideration of such factors as the circumstances causing the late payment, the State's past record of late payments and the amount involved.

Examples:

(1) The records of a political subdivision for the month of June are destroyed by fire. The State makes an estimated deposit of contributions for the month of June for that political subdivision and deposits contributions for the month of June for all other political subdivisions based on actual records. At the time SSA verifies contributions paid against reported wages, we discover that the State has paid only 97% of its total liability for the year. Within 30 days after we notify it of the amount due, the State asks that we waive the interest on the unpaid amount and the State deposits the unpaid amount. In this situation, we would waive the interest on the unpaid contributions.

(2) We would waive interest if:

(i) Some of the political subdivisions made small arithmetical errors in preparing their reports of wages,

(ii) After verification of the contributions paid against reported wages, SSA discovers that minimal additional contributions are due,

(iii) Within 30 days of our notice to the State regarding this underpayment the State, which usually makes its deposits timely, pays the amount due, and

(iv) Within that same 30 day period the State requests that we waive the interest due.

(3) We would not waive interest where a State frequently has problems depositing its contributions timely. Reasons given for the delays are, e.g., the computer was down, the 5 p.m. mail pickup was missed, one of the school district reports was misplaced. If requested we would not waive interest on this State's late payment of contributions based upon its past record of late payments and because of the circumstances cited.

(c) *Contributions erroneously paid to IRS.* If contributions are erroneously paid to the IRS: (1) On or before the due date for paying the contributions to SSA, and (2) a refund (including interest, if any) is issued by IRS, and (3) the State deposits an amount equal to the entire IRS refund at the appropriate Federal Reserve bank (see § 404.1262), and (4) the State makes the deposit within 30 days after IRS issued the refund, SSA will not add interest on the underpaid amount.

(d) *Due date is on a weekend, legal holiday or Federal nonworkday.* If the last day of the 30 day periods specified in paragraphs (b) and (c) of this section is on a weekend, legal holiday or Federal nonworkday, the State shall make the required deposit or request for waiver by the next Federal workday.

§ 404.1267 Failure to make timely payments.

If a State does not pay its contributions when due, the Secretary has the authority under section 218(j) of the Act to deduct the amounts of the unpaid contributions plus interest at the rate prescribed in section 218(j) of the Act from any amounts certified by her or him to the Secretary of the Treasury for payments to the State under any other provision of the Social Security Act. The Secretary notifies the Secretary of the Treasury of the amounts deducted and requests that the amount be credited to the Trust Funds. Amounts deducted are considered paid to the State under the other provision of the Social Security Act.

How Errors in Reports and Contributions Are Adjusted

§ 404.127 Adjustments in general.

States have the opportunity to adjust errors in the payment of contributions. A State but not its political subdivisions is authorized to adjust errors in the underpayment of contributions. Similarly, the State shall file all claims for credits or refunds and SSA makes the credits and refunds only to the State. Generally, we do not refund contributions in cash to a State unless the State is not expected to have future liability for contributions under section 218 of the Act.

§ 404.1271 Adjustment of overpayment of contributions.

(a) *General.* If a State pays more than the correct amount of contributions, the State shall adjust the overpayment with the next contribution return filed on which the amount owed equals or exceeds the amount of the overpayment.

(b) *Overpayment due to overreporting of wages.*—(1) *Report to file.* If the overpayment is due to the State's reporting more than the correct amount of wages paid to one or more employees during a reporting period and the overpayment is not adjusted under paragraph (a) of this section, the State shall file a report on the appropriate form showing:

(i) The corrected wage data as prescribed by SSA; and

(ii) The reason why the original reporting was incorrect.

(2) *Refund or credit of overpayment where section 218(e)(2) of the Act not applicable.* If:

(i) The State collected contributions from employees in excess of the amount of taxes that would have been required under section 3101 of the Internal Revenue Code; and

(ii) The State paid to the Secretary of the Treasury those contributions plus a matching amount in excess of the taxes which would have been required from an employer under section 3111 of the Code; and

(iii) The service of the employees in question would have constituted employment under section 3121(b) of the Code; and

(iv) Section 218(e)(2) of the Act does not apply (see § 404.125(a)),

then the State shall adjust the overpaid contributions under paragraph (b)(1) of this section. With its adjustment the State, where appropriate, shall include on the prescribed form a statement that the employees from whom the excess contributions were collected have not received nor expect to receive a refund of excess contributions under section 6413(c) of the Internal Revenue Code of 1954 (see § 404.1275(b)). Generally, if the State does not include this statement with its adjustment request, we only refund or credit the State for up to one-half of the overpaid amount.

(c) *Refund or credit of overpayment where section 218(e)(2) of the Act applicable.*—(1) *General.* If—

(i) The overreporting of the amount of wages paid to one or more employees during a reporting period(s) is due to a computation of contributions under § 404.1256 for a year or years prior to the year in which the agreement or modification providing for the computation is entered into, or

(ii) The overreporting is due to a failure to compute contributions as required under § 404.1256,

the State shall adjust the overpayment under paragraph (b)(1) of this section. An overpayment due to overreported wages which does not result from the computation of contributions or a failure to compute contributions under § 404.1256 shall also be adjusted by the State under paragraph (b)(1) of this section. If the adjustment of the overpayment results in an underreporting of wages for any employee by the State or any political subdivision, the State shall include with the report adjusting the overpayment a report adjusting each underreporting. If the adjustment of the overpayment does not result in an underreporting of wages for any employee by the State or any political subdivision, the State shall include with the report adjusting the overpayment a statement that the adjustment of the overpayment does not result in any underreporting.

(2) *Amount of refund or credit.* If the State collects excess contributions from employees, the State's claim for refund or credit is limited to the overpaid amounts. (See § 404.1275 relating to

adjustment of employee contributions.) If—

(i) The State collected the correct amount of contributions from employees based on the amount of wages reported and the Forms W–2 issued to the employees show only the amount of contributions actually collected, but the amount of wages reported is being adjusted downward, or

(ii) The State collects excess contributions from employees but Forms W–2 have not been issued for an amount of wages which is being adjusted downward,

the State may claim a refund or credit for the overpaid amounts. Where the State's claim for refund or credit is for the total overpaid amount, the adjustment report shall include a statement that excess contributions have not been collected from employees, or, where excess contributions have been collected, that Forms W–2 have not been issued and that, when issued, they will show the correct amount of employee contributions.

§ 404.1272 Refund or recomputation of overpayments which are not adjustable.

(a) *General.* If a State pays more than the correct amount of contributions or interest to the appropriate Federal Reserve bank or branch (see § 404.1262), and no adjustment in the amount of reported wages is necessary, that State may file a claim for refund or recomputation of the overpayment.

(b) *Form of claim.* No special form is required to make a claim for a refund or recomputation. If a credit is taken under § 404.1271, a claim is not required.

(c) *Proof of representative capacity.* If a report or return is made by an authorized official of the State who ceases to act in an official capacity and a claim for a refund is made by a successor official, the successor official must submit with the claim written evidence showing that he or she has the authority to make a claim for and receive a refund of any contributions paid by the former official. The written evidence is not necessary if the successor official has previously filed one or more reports or returns which contain her or his signature and official title.

§ 404.1275 Adjustment of employee contributions.

(a) *General.* The amount of contributions a State deducts from an employee's remuneration for covered services, or any correction of that amount, is a matter between the employee and the State or political subdivision. The State shall show any correction of an employee's contribution on statements it furnishes the employee under § 404.1226. Where the State issues an employee a Form W–2 and then submits an overpayment adjustment but claims less than the total overpaid amount as a refund or credit, the State shall not correct the previously issued Form W–2 to reflect that adjustment.

(b) *Multiple employment involved.* If a State and one or more of its political subdivisions, or two or more political subdivisions, pay an employee wages during a calendar year but collect an amount of contributions which exceeds the amount of taxes which would have been imposed by section 3101 of the Internal Revenue Code, the employee may claim a credit or refund of the excess contributions by complying with sections 31(b) and 6413(c) of the Internal Revenue Code of 1954.

(c) *Credit or refund of self-employment tax.* An individual who properly reported self-employment income may, because of retroactive coverage under a State agreement of her or his services as an employee, pay more than the maximum amount of tax due for a year or years. If the individual wishes to claim a credit or refund of the overpayment of the tax on the self-employment income, the individual may file a claim under section 6511(d)(5) of the Internal Revenue Code.

§ 404.1276 Reports and payments erroneously made to Internal Revenue Service—transfer of funds.

(a) *General.* In some instances, State or local governmental entities not covered under an agreement make reports and pay contributions to IRS under the Federal Insurance Contributions Act (FICA) procedures applicable to private employers in the mistaken belief that this provides Social Security coverage under section 218 of the Act for their employees. In other instances, entities which are covered under an agreement erroneously report to IRS, or a State or local government employee reports other employees to IRS or reports to IRS as a self-employed individual. Where these reports and payments are erroneously made to IRS, the State may correct the error and obtain coverage under its agreement as described in paragraphs (b) through (f) of this section.

(b) *Political subdivision not included in the State agreement.* We notify the State that if it desires coverage, it may be provided by either a regular modification or an error modification, depending on the circumstances (§§ 404.1215 and 404.1216). In most cases, the State may obtain coverage by a regular modification. If a regular modification cannot be used (e.g., State law does not permit the retroactive effective date which would be desired), the State may use an error modification. The effective date of either modification depends on the facts of the situation being corrected.

(c) *Political subdivision included in the agreement.* If a political subdivision included in the agreement erroneously makes reports and payments under FICA procedures, the State must correct the reportings for periods not barred by the statute of limitations. If the covered entity reported both under the agreement and under FICA procedures, we notify IRS and make necessary corrections in the earnings records. We also advise the State that the entity which reported under FICA procedures should request a refund of payments erroneously made to IRS.

(d) *State and local government employees erroneously reported as employees of individual or as self-employed.*—(1) *Covered entity.* If employees of a covered entity are erroneously reported as employees of an individual or as self-employed, we advise the State that the individual who made the reports should request a refund from IRS for periods not barred by the statute of limitations. We require the State to file correctional reports and returns for any periods open under the State and local statute of limitations.

(2) *Noncovered entity.* We advise the State that the individual who made the reports should request a refund from IRS for the periods not barred by the statute of limitations. If the State wishes to provide coverage, it must submit a modification as discussed in paragraph (b) of this section. If the State does not wish to provide coverage, we void the reports. Amounts reported for periods barred by the statute of limitations remain on the earnings records.

(3) *Filing wage reports and paying contributions.* Generally, the entity or individual that makes the erroneous reports and payments requests the refund from IRS for periods not barred by the statute of limitations. The State files the necessary reports with SSA and pays any contributions due. The reports shall conform to the coverage provided by the agreement to the extent permitted by the statute of limitations. The due date for these reports depends on whether original reports or adjustment reports are involved. Reports and contribution returns for the entire retroactive period of coverage provided by a regular or error modification are due 90 days after the date of execution of the modification. The time limitations for issuing assessments and credits or refunds extend from this due date. Thus,

SSA may issue assessments or credits or refunds for periods barred to refund by IRS. The State may request that reports and payments for the IRS barred periods be considered made under the agreement as described in paragraph (f) of this section.

(f) *Use of transfer procedure.* In limited situations, the State may request that reports and payments the State or a political subdivision (but not an individual) erroneously made under FICA procedures and which have been posted to the employees' earnings record be considered made under the State's agreement. We use a tranfer procedure to do this. The transfer procedure may be used only where (1) the periods are open to assessment under the State and local statute of limitations; (2) the erroneous reports to be transferred are posted to SSA's records; (3) the periods are barred to refund under the IRS statute of limitations; and (4) a refund is not obtained from IRS by the reporting entity.

How Overpayments of Contributions Are Credited or Refunded

§ 404.1280 Allowance of credits or refunds.

If a State pays more than the amount of contributions due under an agreement, SSA may allow the State, subject to the time limitations in § 404.1282 and the exceptions to the time limitations in § 404.1283, a credit or refund of the overpayment.

§ 404.1281 Credits or refunds for periods of time during which no liability exists.

If a State pays contributions for any period of time for which contributions are not due, but the State is liable for contributions for another period, we credit the amount paid against the amount of contributions for which the State is liable. We refund any balance to the State.

§ 404.1282 Time limitations on credits or refunds.

(1) *General.* To get a credit or refund, a State must file a claim for a credit or refund of the overpaid amount with the Secretary before the applicable time limitation expires. The State's claim for credit or refund is considered filed with the Secretary when it is delivered or mailed to the Secretary. Where the time limitation ends on a weekend, legal holiday or Federal nonworkday, we consider a claim timely filed if it is filed on the next Federal workday.

(b) *Time limitation.* Subject to the exceptions in § 404.1283, a State must file a claim for credit re refund of an overpayment before the end of the latest of the following time period:

(1) Three years, 3 months, and 15 days after the year in which the wages in question were paid or alleged to have been paid; or

(2) Three years after the due date of the payment which included the overpayment; or

(3) Two years after the overpayment was made to the Secretary of the Treasury.

§ 404.1283 Exceptions to the time limitations on credits or refunds.

(a) *Extension by agreement.* The Secretary may extend the applicable time period in § 404.1282 if the State and the Secretary agree in writing to the extension before that time period ends. The extension is effective when the Secretary signs the agreement. A claim for credit or refund filed by the State before the extended period ends is considered filed within the applicable time period in § 404.1282.

(b) *Revision of employee's earnings record.* If the Secretary, under section 205(c)(5)(A), (B), or (E) of the Act, revises a wage entry on an individual's earnings record, a claim for credit or refund of the overpayment resulting from the revision is considered filed within the applicable time limitations in § 404.1282 if (1) the state files the claim before the secretary's decision revising the earnings record becomes final or (2) the State files a claim regarding revision of the earnings record which is erroneous because of fraud.

§ 404.1284 Offsetting underpayments against overpayments.

(a) *State fails to make adjustment for allowance of credit.* If SSA notifies a State that a credit is due the State, and the State does not make the adjustment for the allowance of the credit, SSA offsets the credit against any contributions or interest due. Before making the offset, SSA will give the State an opportunity to make the adjustment.

(b) *State fails to make adjustment for underpayment of contributions or interest due.* If SSA notifies a State that contributions or interest are due, and the State does not pay the contributions or interest, SSA offsets the contributions or interest due against any credit due the State. Before making the offset, SSA will give the State an opportunity to pay the underpayment or interest due.

How Assessments for Underpayments of Contributions Are Made

§ 404.1285 Assessments of amounts due.

A State is liable for any amount due (which includes contributions or interest) under an agreement until the Secretary is satisfied that the amount has been paid to the Secretary of the Treasury. If the Secretary is not satisfied that a State has paid the amount due, the Secretary issues an assessment for the amount due subject to the time limitations in § 404.1286 and the exceptions to the time limitations in §§ 404.1287 and 404.1289. If detailed wage information is not available, the assessment is issued based on the following:

(1) The largest number of individuals whose services are known to be covered under the agreement is used for computation purposes;

(2) The individuals are assumed to have maximum creditable earnings each year;

(3) The earnings are considered wages for covered services; and

(4) The amount computed is increased by twenty percent to insure that all covered wages are included in the assessment.

If the State pays the amount assessed and the assessed amount is later determined to be more than the amount actually due, we issue a refund or credit to that State for the excess amount. When the assessment is issued within the applicable time limitation, there is no time limit on collecting the amount due. An assessment is issued on the date that it is mailed or otherwise delivered to the State.

§ 404.1286 Time limitations on assessments.

Subject to the exceptions to the time limitations in §§ 404.1287 and 404.1289, a State is not liable for an amount due under an agreement unless the Secretary makes an assessment for that amount before the later of the following periods ends:

(1) Three years, 3 months, and 15 days after the year in which the wages, upon which the amount is due, we paid; or

(2) Three years after the date the amount became due.

Where the time limitation ends on a weekend, legal holiday or Federal nonworkday, an assessment is considered timely if the Secretary makes the assessment on the next Federal workday.

§ 404.1287 Exceptions to the time limitations on assessments.

(a) *Extension by agreement.* The Secretary may extend the applicable time limitation in § 404.1286 if the State and the Secretary agree in writing to the extension before that time limitation ends. The extension is effective when the Secretary signs the agreement. If the

Secretary makes an assessment before the extended time limitation ends it is considered to have been made within the applicable time limitation in § 404.1286.

(b) *The 365-day period.* If a State files a report before the applicable time limitation in § 404.1286 (or any extension under paragraph (a) of this section) ends and makes no payment or pays less than the correct amount due, the Secretary may assess the State for the amount due after the applicable time limitation has ended. However, the Secretary must make the assessment no later than the 365th day after the day the State makes payment to the Secretary of the Treasury. The Secretary can only make this assessment on the wages paid to the reported individuals for the reported periods. The Secretary, in making this assessment, credits the amount paid by the State on these individuals' wages for those reported periods.

(c) *Revision of employee's earnings record.* If, under section 205(c)(5) (A) or (B) of the Act, the Secretary credits wages to an individual's earnings record, he or she may make an assessment for any amount due on those wages before the Secretary's decision on revising the individual's earnings record becomes final. (Sections 404.822(c) (1) and (2) describe the time limits for revising an earnings record where an individual has applied for monthly benefits or a lump-sum death payment or requested that we correct his earnings record.)

(d) *Overpayment of contributions on wages of employee having other wages in a period barred to assessment.* If the Secretary allows a State a credit or refund of an overpayment for wages paid or alleged to have been paid an individual in a calendar year but the facts upon which the allowance is based establish that contributions are due on additional other wages paid that individual in that year which are barred to assessment, we may make an assessment notwithstanding the periods of limitation in § 404.1286. The assessment, however, must be made before or at the time we notify the State of the allowance of the credit or refund. In this situation, the Secretary reduces the amount of the State's credit or refund by the assessed amount and notifies the State accordingly. For purposes of this paragraph, the assessment shall only include contributions and not interest as provided for in section 218(j) of the Act.

Example: The State files an adjustment report timely to correct an error in the amount reported as wages for an employee. The correction reduces the employee's wages for the year to less than the maximum amount creditable. The employee has other earnings in the same year which were not reported because of the previously reported maximum amounts. The applicable time limitation for assessing contributions on wages for the year has expired before the credit was allowed. The Secretary may assess for the underpaid contributions but no later than the date of the notice to the State that its claim for a credit had been allowed.

(e) *Evasion of payment.* The Secretary may make an assessment of an amount due at any time where the State's failure to pay the amount due results from the fraudulent attempt of an officer or employee of the State or political subdivision to defeat or evade payment of that amount.

§ 404.1289 Payment after expiration of time limitation for assessment.

The Secretary accepts wage reports filed by a State even though the applicable time limitation described in § 404.1286 (or as the time limitation is extended under § 404.1287) has expired, provided:

(a) The State pays to the Secretary of the Treasury the amount due on the wages paid to employees performing services in the coverage group in the calendar years for which the wage reports are being made; and

(b) The State agrees in writing with the Secretary to extend the time limitation for all employees in the coverage group in the calendar years for which the wage reports are being made.

In this situation, the time period for assessment is extended until the Secretary notifies the State that the wage reports are accepted. Where the State pays the amount due within the time period as extended under this section, the amount shall not include interest as provided for in section 218(j) of the Act.

Secretary's Review of Decisions on Credits, Refunds, or Assessments

§ 404.1290 Review of decisions by the Secretary.

(a) *Delegation of authority.* The Secretary, who has the authority under section 218(s) of the Act to review decisions on credits, refunds or assessments, has delegated this authority to the Commissioner of Social Security.

(b) *What decisions will be reviewed.* A State, under section 218(s) of the Act, may request review of an assessment of an amount due from a State, an allowance to the State of a credit or refund of an overpayment, or a disallowance of the State's claim for credit or refund of an overpayment. The Commissioner may review regardless of whether the amount assessed has been paid or whether the credit or refund has been accepted by the State. Prior to the Commissioner's review, however, an assessment, allowance or disallowance may be reconsidered under §§ 404.1291–404.1293.

§ 404.1291 Reconsideration.

After the State requests review of the assessment or allowance or disallowance of a credit or refund, and prior to the Commissioner's review, that decision will be reconsidered, and affirmed, modified, or reversed. We notify the State of the reconsidered determination and the basis for it. The State may request the Commissioner to review this reconsidered determination under § 404.1294(b). In limited situations, SSA and the State may agree that the reconsideration process should be waived, e.g., where a major policy is at issue.

§ 404.1292 How to request reconsideration.

(a) *Form of request.* No particular form of request is required. However, a request for reconsideration must:

(1) Identify the assessment, allowance or disallowance being questioned;

(2) Describe the specific issue on which the reconsideration is requested;

(3) Contain any additional information or argument relevant to that issue; and

(4) Be signed by an official authorized to request the reconsideration on behalf of the State.

(b) *Submitting additional material.* A State has 90 days from the date it requests reconsideration to submit additional evidence it wishes considered during the reconsideration process. The time limit for submitting additional evidence may be extended upon written request of the State and for good cause shown.

§ 404.1293 Time for filing request for reconsideration.

(a) *Time for filing.* The State must file its request for reconsideration within 90 days after the date of the notice of assessment, allowance, or disallowance. Usually, the date of the request for reconsideration is considered the filing date. Where the 90-day period ends on a weekend, legal holiday or Federal nonworkday, a request filed on the next Federal workday is considered as timely filed.

(b) *Extension of time.* For good cause shown, and upon written application by a State filed prior to the expiration of the time for filing a request for reconsideration, additional time for filing the request may be allowed.

§ 404.1294 Notification to State after reconsideration.

(a) The State will be notified in writing of the reconsidered determination on the assessment, allowance, or disallowance, and the basis for the determination.

(b) If the State does not agree with the reconsidered determination, it has 90 days from the date of notice of the reconsidered determination to request the Commissioner to review that determination. The rules on what the request should contain and the time for filing the request are the same as in §§ 404.1292 and 404.1293.

§ 404.1295 Commissioner's review.

Upon request by the State, the Commissioner will review the reconsidered determination (or the assessment, allowance or disallowance as initially issued if reconsideration is waived under § 404.1291). If necessary, the Commissioner may request the State to furnish additional evidence. Based upon the evidence considered in connection with the assessment, allowance or disallowance and any additional evidence submitted by the State or otherwise obtained by the Commissioner, the Commissioner affirms, modifies, or reverses the assessment, allowance or disallowance.

§ 404.1296 Commissioner's notification to the State.

The Commissioner notifies the State in writing of the decision on the assessment, allowance, or disallowance, and the basis for the decision.

How a State May Seek Court Review of Secretary's Decision

§404.1297 Review by court.

(a) *Who can file civil action in court.* A State may file a civil action under section 218(t) of the Act requesting a district court of the United States to review any decision the Commissioner makes for the Secretary under section 218(s) of the Act concerning the assessment of an amount due, the allowance of a credit or refund, or the disallowance of a claim for credit or refund.

(b) *Where the civil action must be filed.* A State must file the civil action in the district court of the United States for the judicial district in which the State's capital is located. If the civil action is brought by an interstate instrumentality, it must file the civil action in the district court of the United States for the judicial district in which the instrumentality's principal office is located. The district court's judgment is final except that it is subject to review in the same manner as judgments of the court in other civil actions.

(c) *No interest on credit or refund of overpayment.* SSA has no authority to pay interest to a State after final judgment of a court involving a credit or refund of an overpayment made under section 218 of the Act.

§404.1298 Time for filing civil action.

(a) *Time for filing.* The State must file the civil action for a redetermination of the correctness of the assessment, allowance or disallowance within 2 years from the date the Commissioner mails to the State the notice of the decision under §404.1296. Where the 2-year period ends on a Saturday, Sunday, legal holiday or Federal nonwork day, an action filed on the next Federal workday is considered timely filed.

(b) *Extension of time for filing.* The Commissioner, for good cause shown, may upon written application by a State filed prior to the end of the two-year period, extend the time for filing the civil action.

§404.129 Final judgments.

(a) *Overpayments.* Payment of amounts due to a State required as the result of a final judgment of the court shall be adjusted under §§404.1271 and 404.1272.

(b) *Underpayments.* Wage reports and contribution returns required as the result of a final judgment of the court shall be filed under §§404.1237 through 404.1251. We will assess interest under §404.1285 where, based upon a final judgment of the court, contributions are due from a State because the amount of contributions assessed was not paid by the State or the State had used an allowance of a credit or refund of an overpayment.

Department of Transportation

Federal Aviation Administration

14 CFR Part 71

Establishment of Airport Radar Service Areas; Rule

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket Nos. 85-AWA-7 and 85-AWA-10]

Establishment of Airport Radar Service Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action designates Airport Radar Service Areas (ARSA) at Dallas Love Field, Dallas, TX, and Dulles International Airport, Washington, DC. Each location designated is a public airport at which a nonregulatory Terminal Radar Service Area (TRSA) is currently in effect. Establishment of each ARSA will require that pilots maintain two-way radio communication with air traffic control (ATC) while in the ARSA. Implementation of ARSA procedures at each of the affected locations will reduce the risk of midair collision in terminal areas and promote the efficient control of air traffic.

EFFECTIVE DATES: 0901 UTC, July 3, 1986, for Dallas Love Field, Dallas, TX, and 0901 UTC August 28, 1986, for Dulles International Airport, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Burns, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

On April 22, 1982, the National Airspace Review (NAR) plan was published in the Federal Register (47 FR 17448). The plan encompassed a review of airspace use and the procedural aspects of the air traffic control (ATC) system. The FAA published NAR Recommendation 1-2.2.1, "Replace Terminal Radar Service Areas (TRSA) with Model B Airspace and Service (Airport Radar Service Areas)," Notice 83-9 (48 FR 34286, July 28, 1983) proposing the establishment of ARSA's at Columbus, OH, and Austin, TX. Those locations were designated ARSA's by SFAR No. 45 (48 FR 50038, October 28, 1983) in order to provide an operational confirmation of the ARSA concept for potential application on a national basis. The original expiration dates for SFAR 45, December 22, 1984, for Austin and January 19, 1985, for Columbus were extended to June 20, 1985 (49 FR 47170, November 30, 1984).

On March 6, 1985, the FAA adopted the NAR recommendation and amended Parts 71, 91, 103, and 105 of the Federal Aviation Regulations (14 CFR Parts 71, 91, 103, and 105) to establish the general definition and operating rules for an ARSA (50 FR 9552), and designated Austin and Columbus airports as ARSA's as well as the Baltimore/Washington International Airport, Baltimore, MD (50 FR 9250). Thus far the FAA has designated 11 ARSA's as published in the Federal Register on November 1, 1985 (50 FR 45718), 11 ARSA's on December 9, 1985 (50 FR 50254), 12 ARSA's on February 7, 1986 (51 FR 4872), 11 ARSA's on March 10, 1986 (51 FR 8284), 6 ARSA's on April 7, 1986 (51 FR 11886), and 7 ARSA's on May 5, 1986 (51 FR 16610), in the implementation of this NAR recommendation.

On September 30, 1985, the FAA proposed to designate ARSA's at Dallas Love Field under Airspace Docket No. 85-AWA-7 (50 FR 39822) and at Dulles International Airport under Airspace Docket No. 85-AWA-10 (50 FR 39822). This rule designates ARSA's at these airports. Interested parties were invited to participate in this rulemaking proceeding by submitting comments on the proposals to the FAA. Additionally, the FAA has held informal airspace meetings for each of the proposed airports. In response to public comments received the FAA has modified several of the proposals.

Related Rulemaking

In addition to the airports addressed here and those previously designated or delayed, the FAA published proposed ARSA designations for 2 additional airports on September 30, 1985 (50 FR 39822).

Discussion of Comments

The FAA has received comments on the basic ARSA program as well as comments directed toward the proposed individual designations. Additionally, several of the comments on individual designations are common or speak to the basic program itself. Discussion of the comments is divided into two sections. The first addresses common and ARSA program comments, the second addresses comments on the proposals at particular locations.

ARSA Program Comments

Comments received from the Aircraft Owners and Pilots Association (AOPA) and several others claimed that the notification for some of the informal airspace meetings held for some of the candidate airports was inadequate. The schedule of the meetings was published in the Notice of Proposed Rulemaking (NPRM) on September 30, 1985 (50 FR 39822). Additionally, the FAA sent announcements to individuals, fixed-base operators, aviation user organizations, and to the news media organizations in each airport's area. The ARSA program has received considerable coverage in newsletters and official publications of aviation organizations and the schedule of the meetings mailed to members. Furthermore, a 213-day comment period was provided for Airspace Docket No. 85-AWA-7, and a 137-day comment period was provided for Airspace Docket No. 85-AWA-10 in which the public could make comment to the public docket on the proposals. For the above reasons the FAA believes the opportunity was sufficient to permit full public comment on the proposals.

AOPA and others commented that, notwithstanding the statement by the FAA in the Regulatory Evaluation contained in the notice, increased air traffic controller personnel and equipment would be needed to handle the increased traffic expected due to the mandatory provisions of the ARSA. FAA's experience with the current ARSA's has been that while there is an increase in the amount of traffic being handled by controllers, this increase is significantly offset by the reduction in the amount of control instructions that must be issued under ARSA procedures as compared to TRSA procedures. However, the FAA recognizes that the potential exists for a need to establish additional controller positions at some facilities due to increased workload should the expected efficiency improvements in handling traffic not fully offset the increased number of aircraft handled. Further, FAA does not expect to incur additional equipment costs in implementing the ARSA program. In some instances, previously adopted plans to replace or modify older existing equipment may be rescheduled to accommodate the ARSA program. However, no new equipment is expected to be required as a result of the ARSA program.

Several commenters, including AOPA disagreed with the FAA's conclusion that the additional air traffic could be accommodated with existing manpower at locations where TRSA participation was low. The FAA's conclusion for the total program was in part based upon the fact that participation in the existing TRSA's was quite high and, therefore, an increase from the present levels to

100% would not be a significant change. The commenters, while not agreeing with this conclusion, claimed that the FAA's rationale did not apply where participation was low and thus additional manpower would be needed at these locations if ARSA was designated. The FAA recognizes that participation in the TRSA program is relatively low at some of the candidate locations. However, this is in large part due to the controllers' walkout of 1981 and the subsequent reduction in fully qualified controllers which led to the discontinuance of TRSA services. A sufficient number of controllers is assigned at the facilities to which the commenters refer and those facilities are ready to provide the service to the increased number of pilots. This factor was considered by the FAA in its initial evaluation of the ARSA program.

AOPA claimed the staffing at one facility more than doubled in the year prior to implementation of their ARSA. The facility's authorized staffing of 28 controllers did not change. In the facility in question, on January 1, 1985, there were 27 controllers on board but in January 1986, there were the authorized 28 on board. The FAA finds the AOPA claim to be without merit.

The Soaring Society of America (SSA) objected to the ARSA program because it does not provide the same level of safety and service to all classes of aviation. As with other regulations, this rule affects different operators in different ways depending on their respective need to operate in controlled airspace or near the airports involved. The FAA does not agree that this variation in impact is reason not to adopt a rule which benefits the majority of users.

The SSA claims the FAA is changing the criteria that an operating control tower is the only requirement for an airport to be eligible for an ARSA. The FAA has not departed from the NAR criteria which would replace TRSA with ARSA at airports with an operating control tower served by a level III, IV, or V Radar Approach Control Facility.

The SSA claimed that the ARSA rule should state that the ultimate responsibility for separation from other aircraft operating in VFR conditions rests with the pilot. While the FAA agrees that such is the case, the agency does not agree that the ARSA rule must so state. Unless a new or amending provision to the Federal Aviation Regulations (FAR) specifically deletes, amends, or supersedes existing sections, the existing regulations still apply. The ARSA rule (50 FR 9252, 9257, March 6, 1985) did not alter the sections of the FAR that establish that level of responsibility.

AOPA faulted the FAA's implementation of the ARSA program. The FAA stated in the proposal that the benefits of standardization and simplicity were nonquantifiable, and that the safety benefits anticipated by the FAA were not attributable to any given candidate but were based upon implementation of the program on a national basis. According to AOPA this evidenced the need to further evaluate the program at the current locations so that benefits could be individually assessed and each candidate evaluated accordingly. The FAA does not agree. The benefits of standardization and simplicity would always be nonquantifiable regardless of the amount of evaluation, yet they received considerable emphasis by the NAR Task Group. Overall national midair collision accident rates are relatively low, and accident rates within individual categories of airspace are lower still. Additionally, accidents at specific locations are random occurrences. Therefore, estimates of potential reductions in absolute accident rates resulting from the ARSA program cannot realistically be disaggregated below the national level. Additionally, the FAA does not believe that these considerations should be cause for delaying a program that was recommended by a majority of the members of the National Airspace Review, and which has already produced positive results at most of the designate locations.

Numerous commenters also objected to the proposals based upon their belief that air traffic in several of the proposed locations was too great for the ARSA program. The FAA believes that such a point argues strongly for the establishment of an ARSA rather than the converse.

Some commenters, including AOPA, predicted that user costs incurred due to delays will be greater than was estimated by the FAA, and that these costs will be experienced more at some sites than at others. In the NPRM, FAA acknowledged that initial delay problems would vary from site to site, that estimates of delays were quite preliminary, that at some facilities the transition process is expected to go very smoothly, and that at other sites delay problems will dominate the initial adjustment period. These cost estimates are expected to be transitory in nature in that actual delays will be reduced as pilots and controllers become experienced with ARSA procedures. This has been the case at the three locations where ARSA has been in effect for an appreciable period, and is the trend at those locations more recently designated.

AOPA discounted the FAA delay estimates claiming that they were based upon a standard ARSA. The FAA does not agree. FAA's preliminary delay estimates were based upon the ARSA proposed for the individual locations, whether standard or modified.

Several commenters questioned the validity of FAA's estimates of the time savings expected to be realized as a result of the greater flexibility allowed air traffic controllers in handling traffic within an ARSA. FAA wants to reemphasize that its estimates of expected savings in time and money which will result from the greater flexibility allowed air traffic controllers in handling traffic within an ARSA are quite preliminary. These estimated savings may or may not offset the delay anticipated at some sites after initial establishment of an ARSA, but are expected to provide overall time savings to all traffic, IFR as well as VFR, which will exceed delay as controllers gain experience with ARSA operating procedures.

Other commenters questioned the operating cost and passenger time values used to calculate delay costs and time savings. The values used are weighted averages of overall activity within an aircraft category for various aircraft types, and represent a typical mix of air passengers. FAA recognizes that for some specific operations actual operating cost and passenger time values will exceed the average values used, while in other cases, the actual values will be less. However, weighted averages represent the most appropriate and equitable measure to use when assessing *overall* impacts. Further, because the delay resulting from implementing ARSA procedures is expected to be transitory and efficiency improvements in the movement of traffic are ultimately expected to result, those operators whose variable cost and passenger time values exceed the averages used in the regulatory evaluation may in fact realize above average benefits.

AOPA claimed that at least half the number of nonradio equipped (NORDO) aircraft in the United States, or 20,900 aircraft, would have to purchase two-way radios in order to enter the ARSA and land at or depart from airports within the ARSA. This is well in excess of the number estimated by the FAA. The FAA does not agree with the AOPA conclusion because each airport receiving ARSA designation has an

airport traffic area requiring two-way radio communications at the primary airport at present. Therefore, no additional cost will be incurred for purchase of radios for aircraft landing at or departing from primary airports receiving ARSA designation.

Further, some commenters, including AOPA, expressed concern that older 360 channel transceivers would not be adequate to operate within an ARSA. Frequencies compatible with 360 channel transceivers are available at all ARSA locations. Therefore, operators of 360 channel equipment will not need to install new radios to operate within an ARSA.

SSA claimed that some FAA field personnel had indicated that a transponder would be needed to enter an ARSA, and thus, the cost to implement the program was grossly underestimated. An operable two-way radio is the only avionics required for flight in an ARSA. A transponder is not required and the costing estimates are correct.

AOPA and other commenters stated that the proposed ARSA's would derogate rather than improve safety, as a result of increased frequency congestion, pilots concentrating on their instruments and placing too much reliance upon ATC rather than "see and avoid," and the compression of air traffic into narrow corridors as pilots elect to circumnavigate an ARSA rather than receive ARSA services. In addition to increasing the risk of aircraft collision, the commenters claimed that compression would increase the impact of aircraft noise on underlying communities and cause aircraft to be flown closer to obstructions.

As indicated above, while an increased number of aircraft will be using radio frequencies, the amount of "frequency time" needed for each aircraft is reduced in an ARSA compared to the current TRSA. This has been the experience of the FAA at the current ARSA facilities.

AOPA claims that since the communications and readback procedures in ARSA's do not differ from those utilized in TRSA's there would be no reduction in "frequency time" needed for each pilot to acknowledge instructions or information, and thus, the partial offset indicated by the FAA was not justified. The offset is based upon fewer as well as shorter transmissions for each pilot, thus the FAA does not agree with this claim.

The FAA evaluated the flow of air traffic around the Austin, TX, and Columbus, OH, ARSA's during the confirmation period to determine if compression was occurring. This evaluation was performed by observing the radar at Austin, TX, and by both radar observations and the use of extracted computer data at Columbus, OH. Following the designation of an ARSA at Baltimore/Washington International Airport (BWI), the FAA evaluated the flow of air traffic there for a period of 90 days by observing the radar and extracting computer data to determine if compression was occurring. Additionally, the FAA has continually monitored for the possibility of compression of all recently designated locations. Compression has not been detected at any of these locations. However, compression of air traffic is a site-specific effect that could occur at a particular location regardless of its absence elsewhere. Thus, although the FAA does not believe compression of traffic will occur at any of the proposed airports, the agency will continue to monitor each designated ARSA and make adjustments if necessary.

AOPA, SSA, and other commenters claimed that the FAA provided no demonstrable evidence that the ARSA program would improve aviation safety. The FAA continues to believe the implementation of the ARSA program will enhance aviation safety. The program requires two-way radio communication between ATC and all pilots within the designated areas. Air traffic controllers will thus be in a much improved position to issue complete traffic information to the pilots involved, and thus, safety will be improved.

AOPA, and several other commenters, requested the VFR corridors be established at several of the subject locations along routes that are currently contained within an airport traffic area (ATA). The NAR Task Group noted in their evaluation of the TRSA program that under FAR § 91.87 pilots operating under VFR to or from a satellite airport within an ATA are excluded from the two-way radio communications requirement. The Task Group noted that this was acceptable until the volume of air traffic at the primary airport dictated the installation of a radar approach control. The Task Group recommended, and the FAA adopted, the ARSA program as a safety improvement addressing this problem. Thus, the FAA does not believe provisions for VFR corridors that penetrate an ATA in most cases are warranted or in keeping with that recommendation.

SSA claimed that the grouping of ARSA's such as that adopted in the Sacramento Valley area would create "squeezing" of traffic in the corridors between the blocks of ARSA airspace. One area in question, between Sacramento and Beale Air Force Base (AFB), is approximately 20 miles wide. The FAA does not agree that "squeezing" will occur in this area. Additionally, other user organizations have requested VFR corridors between adjacent or grouped ARSA's and these ARSA's have been modified to accommodate this request.

AOPA and others commented that several of the proposals will require pilots to violate FAR § 91.79 (14 CFR 91.79) regarding minimum safe altitudes. The section states in part, "Except when necessary for takeoff or landing, no person may operate an aircraft below . . . an altitude of 1,000 feet above the highest obstacle within a horizontal radius of 2,000 feet of the aircraft [when over any congested area of a city, town, or settlement, or over any open air assembly of persons]." The commenters claim that the 1,200-foot base altitude of the 5- to 10-mile portion of the ARSA will force pilots to violate FAR § 91.79 where obstacles extend more than 200 feet above the ground. There are two alternatives available to pilots in such a situation which permit compliance with the regulation. Namely, pilots may participate in ARSA services and thus not be limited to the 1,200-foot base, and secondly, a pilot may deviate 2,000 feet horizontally from the obstacle.

Furthermore, AOPA claims that the above response does not adequately respond to the issue. They claim that deviations of 2,000 feet horizontally would increase workload and reduce the efficiency of see-and-avoid, and thus, potentially reduce safety. The FAA does not encourage deviation but encourages participation which will not require deviation and will result in controllers providing radar assistance for see-and-avoid.

SSA, and other commenters, claimed that designation of these ARSA's may negatively impact cross-country glider flights operating out of airports 20 miles, or more, from these ARSA's. While some deviations may be required, the FAA does not agree that the minor deviations that may be required will result in negatively impacting cross-country glider operations.

Several commenters noted that the proposal did not contain an environmental assessment. Under existing environmental regulations the proposed establishment of a Terminal Control Area (TCA) or a TRSA does not require an enviromental assessment. The agency environmental regulations have not yet been amended to reflect ARSA procedures. However, because the potential environmental impact and regulatory effects of ARSA designation fall between those of the TCA and

TRSA designations, the FAA finds that no environmental assessment is required for an ARSA designation.

AOPA, the Experimental Aircraft Association (EAA), and other commenters indicated that the FAA had failed to demonstrate a need for the ARSA program itself, as well as a need for several of the individual proposed locations. Additionally, comments were received that faulted some of the features of the ARSA. Most of these comments went beyond the scope of the subject proposal and were addressed when the FAA adopted the recommendation of National Airspace Review (NAR) Task Group 1–2.2 (50 FR 9252, March 6, 1985). However, the FAA believes the need for the ARSA program was adequately demonstrated by the task group that reviewed the TRSA program and recommended the ARSA as the former's replacement. The task group faulted the TRSA program in several of its aspects and through consensus agreement determined the preferred features of the ARSA prior to making their recommendation to the FAA. Justification for the ARSA program has been the subject of previous FAA rulemaking, and the program was adopted after consideration of public comment. Response to comments on ARSA's at particular locations is made below.

AOPA, EAA, SSA, and others commented that several of the proposed ARSA's failed to meet the criteria for designation. The criteria for this group of candidates was recommended by the NAR Task Group and adopted by the FAA. Namely, ". . . excluding TCA locations, all airports with an operational airport traffic control tower and currently contained within a TRSA serviced by a Level III, IV, or V radar approach control facility shall have [an ARSA] designated; unless a study indicates that such designation is inappropriate for a particular location." (49 FR 47184, November 30, 1984).

AOPA, EAA, and others commented that the existence of a TRSA in the above mentioned category should not be considered as justification for an ARSA. After a review of all comments received to the above referenced proposal, the FAA adopted that NAR recommendation (50 FR 9252, March 6, 1985). Therefore, absent a finding that designation would be inappropriate, the existence of a TRSA within that criteria is deemed sufficient for designation.

AOPA, EAA, and others indicated that several of the proposed locations do not meet the criteria that the FAA is considering for future ARSA candidates. The FAA has circulated proposed criteria for future application. However, whatever the nature of any criteria eventually adopted, this group of locations which qualify as ARSA candidates under the adopted NAR criteria would not be affected.

Several commenters suggested the top of the ARSA be lowered from 4,000 feet above field elevation. Absent strong justification for lowering this altitude, the FAA has not adopted these recommendations. The agency's rationale for nonadoption is set forth immediately above.

Several commenters, including AOPA and EAA, indicated that at several of the proposed ARSA's the TRSA was working quite well and that there was no need to change something that was working. The FAA acknowledges that TRSA's are functional and beneficial, to a point. However, the NAR Task Group did not fault individual TRSA locations but the TRSA program itself and recommended its replacement. The FAA concurred with that assessment and has determined that the ARSA program is an improvement over the TRSA program from the standpoints of both safety and service. Thus, the quality of service being provided at TRSA locations should not constitute a roadblock to improvement.

Several commenters claimed the reduced separation standards of the ARSA program would derogate rather than enhance safety. The elimination of the Stage III separation requirements was recommended by users, all of whom are vitally interested in aviation safety, and adopted by the FAA. This aspect of the ARSA program received considerable FAA attention during the confirmation period at Austin, TX, and Columbus, OH. The FAA agrees with the task group that the Stage III separation standards are not needed for safety in a mandatory participation area.

Several commenters requested that the ARSA be described in statute rather than nautical miles. Numerous user organizations and the NAR itself have recommended that the FAA adopt nautical-mile description rather than statute. It is the intention of the FAA to establish all new descriptions according to that recommendation.

Several commenters objected to proposals where the ARSA was in proximity to other airports. According to these commenters pilots would not know whether they should be in contact with the ARSA approach control facility or in contact with the control tower at the secondary airport, or on unicom. The FAA does not view this situation as different from that existing at many of these locations today. Through pilot education programs and experience with ARSA procedures this situation will improve. Also, as at present, when a pilot contacts the wrong FAA facility the controllers will give appropriate instructions.

AOPA, SSA, and other commenters objected to several of the proposed ARSA's based upon the claim that the FAA had failed to evaluate the cumulative effect of the proposed ARSA's and other regulatory airspace. The evaluation for each ARSA included all factors known to the FAA, including the proximity of other regulatory airspace.

AOPA and SSA objected to the ARSA's based upon a claim that an insufficient amount of pilot education had been accomplished by the agency. AOPA cited South Bend, IN, as an example where there were 19 days between the informal airspace meeting and the closing of the comment period, and SSA claimed that the comment period and a single informal airspace meeting were insufficient. The FAA does not agree. The example cited by AOPA and SSA referenced the comment period, not the total period to provide for pilot education. Pilot education will continue after the comment period has ended and beyond the effective data of the ARSA's. Further user meetings will be held for each designated location following implementation of the ARSA's.

Underlying a great many of the comments received was the idea that some provision should be made so that pilots could continue their current practices without contacting the responsible ATC facility. While the FAA has made modifications from the standard ARSA in cases where circumstances warrant, the basic thrust of the ARSA program is to require two-way communication with the responsible approach control facility, and not to make modifications in the program to provide for nonparticipation.

AOPA commented that FAA underestimated the one-time cost of distributing Letters to Airmen and the Advisory Circular, and neglected costs related to the informal public meetings. Both of these issues were discussed in the detailed regulatory evaluation of the NPRM, which has been available in the regulatory docket since publication of the NPRM. The availability of this detailed evaluation was indicated in the introductory paragraph of the regulatory evaluation summary included in the Federal Register NPRM (50 FR 39822, 39824, September 30, 1985). AOPA's comments assumed that every active pilot would be notified at least once. However, FAA intends to mail

individual Letters to Airmen only to those pilots living in the vicinity of ARSA sites, and consequently its cost estimate is less than that of AOPA. The total one-time cost of distributing Letters to Airmen and the Advisory Circular was also prorated to reflect only those sites included in the notice, and both total and prorated cost estimates were provided in the notice. Further, as FAA indicated in the detailed regulatory evaluation, the expenses associated with public meetings will be incurred regardless of whether or not an ARSA is ultimately established at a proposed site, and consequently these expenses are more appropriately considered sunken costs attributable to the rulemaking process rather than implementation costs of the ARSA program. Similarly, information on ARSA's following the establishment of a new site will also be disseminated at aviation safety seminars conducted throughout the country by various district offices. These seminars are regularly provided by the FAA to discuss a variety of aviation safety issues, and, therefore, will not involve additional costs strictly as a result of the ARSA program.

Additionally, no significant costs are expected to be incurred as a result of the follow-on user meetings. These meetings are being held at public or other facilities which are being provided free of charge or at nominal cost. Further, because these meetings are being conducted by local FAA facility personnel, no travel, per diem, or overtime cost will be incurred by regional or headquarters personnel.

SSA faulted the FAA for using the aviation safety seminars for pilot education on ARSA's. They claim these seminars do not reach many pilots and the seminars are reserved during this year for the FAA "Back to Basics" program. The FAA does not agree. The aviation safety seminars are for all pilots and for education on all aspects of aviation which would include the ARSA program.

SSA, and other commenters questioned whether the FAA considered the impact of the proposed ARSA's on individuals in making its Regulatory Flexibility Determination, and whether the threshold for determining if a significant economic impact on a substantial number of small entities had been exceeded because some small entities might be impacted. The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by government regulations. Small entities are independently owned and operated small businesses and small not-for-profit organizations. Individual citizens, as such, are not considered small entities under the terms of the RFA; however, an individual whose business is a sole proprietorship would be considered a small entity under the RFA. Some of the small entities which could be potentially affected by implementation of the ARSA program include the fixed-base operators, flight schools, agricultural operations and other small aviation businesses located at satellite airports located within 5 miles of the ARSA center. If the mandatory participation requirement were to extend down to the surface at these airports, where under current regulations participation in the TRSA and radio communication with ATC is voluntary, operations at these airports might be altered, and some business could be lost to airports outside of the ARSA core. Because FAA is excluding almost every satellite airport located within the 5-mile ring to avoid adversely impacting their operations, and in some cases will achieve the same purposes through Letters of Agreement between ATC and the affected airports establishing special procedures for operating to and from these airports, FAA expects to virtually eliminate any adverse impact on the operations of small satellite airports which potentially could result from the ARSA program. Similarly, FAA expects to eliminate potential adverse impacts on existing flight training practice areas, as well as, soaring, ballooning, parachuting, ultralight, and banner towing activities, by developing special procedures which will accommodate these activities through local agreements between ATC facilities and the affected organizations. For these reasons, a substantial number of small entities, defined in FAA Order 2100.14, "Regulatory Flexibility Criteria and Guidance," as more than one-third (but not less than eleven) of the small entities subject to a proposed rule, clearly will not be impacted by this rulemaking. Therefore, adoption of this final rule will not result in a significant economic impact on a substantial number of small entities.

Numerous commenters objected to the ARSA designations claiming they would simply provide the FAA with the basis for additional regulatory restrictions. The FAA does not believe this to be a valid objection. While the agency has no current plans for further regulatory action which imposes additional restrictions, such action if it should ever become a reality would be the subject of additional rulemaking and would of necessity be judged on its own merits, as should these proposals.

The Air Line Pilots Association (ALPA) concurred with the proposal as an improvement in operational efficiency and a significant contribution to a reduction of midair collision potential.

The Air Transport Association (ATA) endorsed the proposed designations as an improvement in safety with specific comments indicated below.

The General Aviation Manufacturers Association endorsed the ARSA's as an improvement in safety and concurred with the FAA's philosophy regarding some deviation from the standard model.

Comments were received which were supportive of each of the ARSA's addressed here as an improvement in aviation safety, and stating that participation by all pilots was only equitable and that normal safety concerns dictated mandatory two-way communications. The FAA agrees.

Comments on Particular Locations

Dallas Love Field, Dallas, TX

AOPA claimed that numerous towers are located southeast of the Love Field inner core and nonparticipants will be unable to maintain obstacle clearance in this area. The vast majority of these towers are located in the inner core or surface area of the ARSA and within the existing airport traffic area. Participation in this surface area has been and will continue to be mandatory. For this reason, the FAA does not agree. Additionally, the general issue of obstacle clearance has been addressed above.

One commenter faulted the FAA notification for the informal airspace meeting. The notifications for the Dallas informal airspace meeting were mailed on February 3, 1986, which was 77 days in advance of the meeting. It is incumbent on all persons holding airmen certification to keep the FAA advised of current addresses in order for any mailings to be effective.

Other comments received criticized the ARSA program in general terms; these comments have been addressed earlier in this document under "ARSA Program Comments."

The local AOPA representative at the informal airspace meeting stated that he believed the Dallas ARSA proposal was sound and would be an improvement over the present TRSA.

The ATA representative expressed confidence that the ARSA for Dallas Love Field was a good idea and would enhance safety.

Dulles International Airport, Washington, DC

One commenter claimed that considerable additional costs would be incurred by NORDO aircraft being required to circumnavigate the ARSA. The FAA does not agree. Only minor altitude adjustments or horizontal deviations may be incurred from those presently required. Also, means exist to accommodate any deviations by NORDO aircraft through prior coordination with the facility.

AOPA and others claimed that NORDO aircraft based at Glascock Field would have to install two-way radios at considerable expense to operate in the ARSA. While it is true the aircraft owners may, of their own choosing, elect to install radios in their aircraft, the FAA does not find this to be necessary. As discussed above, means exist to coordinate NORDO operations with the controlling facility.

Several commenters claimed that traffic circumnavigating the ARSA to the east would be forced to navigate through a narrow corridor between the ARSA and the Washington, DC, TCA. The distance between the ARSA and TCA is approximately one mile narrower than that presently existing between the TCA and the Dulles TRSA. Additionally, the vertical dimension of the ARSA in this area is less than 1,500 feet, allowing pilots to avoid compression with minor altitude adjustments. For these reasons, the FAA does not agree that compression will occur. The issue of compression has also been addressed in general terms earlier in this document.

AOPA claimed the cutout in the vicinity of the Bull Run Mountains has an unidentifiable boundary and suggested this boundary be moved east and aligned parallel to a north-south road in this area. Although the FAA attempts to use existing landmarks as much as is practical, using this road as a boundary is not practical due to the excessive airspace that would be eliminated from the ARSA.

AOPA claimed the ARSA will either restrict or discourage instrument training at Dulles Airport. The FAA does not agree. Although some gains in traffic may be realized by Dulles Approach Control, the increase should not be so significant that it would adversely affect instrument traffic. All instrument training traffic is now required to contact approach control for an approach clearance and would continue to do so.

AOPA and others claimed that aircraft overflying the area would need to circumnavigate the Dulles ARSA incurring additional flying time and expense. The FAA does not agree. The figures used by AOPA are for both those aircraft participating in the present TRSA and those circumnavigating the terminal airspace. Although the TRSA was voluntary, the participation in TRSA by overflights was quite high. Additionally, the upper altitude limit of the ARSA will be significantly lower than that of the TRSA and aircraft could choose to overfly with little or no altitude adjustment. For these reasons, the FAA does not agree that additional flying time and expense will be incurred.

SSA claimed that although normal towing, training and practice areas for sailplanes would not be impacted, their cross-country routes may be negatively impacted by the ARSA. As stated above, the FAA will continue to monitor these operations and, if necessary, take action to lessen these impacts.

Other commenters spoke against the ARSA in general. These comments have been addressed above under general comments.

ALPA and ATA voiced support of the Dulles ARSA stating they believe it will enhance safety.

Other Comments

A number of other comments were received addressing matters beyond the scope of these proposals such as charting, the number of frequencies depicted on a chart, the general design features of an ARSA, etc. The FAA will give consideration to all of the points raised in these comments but will not address them as a part of this rulemaking.

Regulatory Evaluation

Those comments which addersed information presented in the Regulatory Evaluations of the notices for the dockets included in this final rule have been discussed above. A detailed Regulatory Evaluation of this final rule has been placed in the regulatory docket.

Briefly, the FAA finds that a direct comparison of the costs and benefits of this rule is difficult for a number of reasons. Many of the benefits of the rule are nonquantifiable, especially those associated with simplification and standardization of terminal airspace procedures. Further, the benefits of standardization result collectively from the overall ARSA program, and as discussed previously, estimates of potential reductions in absolute accident rates resulting from the ARSA program cannot realistically be disaggregated below the national level. Therefore, it is difficult to specifically attribute these benefits to individual ARSA sites. Finally, until more experience has been gained with ARSA operations, estimates of *both* the efficiency improvements resulting in time savings to aircraft operators, and the potential delays resulting from mandatory participation, will be quite preliminary.

ATC personnel at some facilities anticipate that the process will go very smoothly, that delays will be minimal, and that efficiency gains will be realized from the start. Other sites anticipate that delay problems will dominate the initial adjustment period.

FAA believes these adjustment problems will only be temporary, and that once established, the ARSA program will result in an overall improvement in efficiency in terminal area operations at those airports where ARSA's are established. These overall gains which FAA expects for the group of ARSA sites established by this rule typify the benefits which FAA expects to achieve nationally from the ARSA program. These benefits are expected to be achieved without any additional controller staffing or radar equipment costs to the FAA.

In addition to these operational efficiency improvements, establishment of these ARSA sites will contribute to a reduction in midair collisions. The quantifiable benefits of this safety improvement could range from less than $100 thousand, to as much as $300 million, for each accident prevented.

For these reasons, FAA expects that the ARSA sites established in this rule will produce long term, ongoing benefits which will exceed their costs, which are essentialy transitional in nature.

Regulatory Flexibility Determination

Under the terms of the Regulatory Flexibility Act, the FAA has reviewed this rulemaking action to determine what impact it may have on small entities. FAA's Regulatory Flexibility Determination was published in the NPRM, and those comments which addressed it have been discussed above. For the reasons presented in the NPRM and clarified in the Discussion of Comments, FAA has determined that this rulemaking action is not expected to affect a substantial number of small entities. Therefore, the FAA certifies that this regulatory action will not result in a significant economic impact on a substantial number of small entities.

The Rule

This action designates Airport Radar Service Areas (ARSA) at Dallas Love Field, TX, and Dulles International Airport, Washington, DC. Each location designated is a public airport at which a

BEST COPY AVAILABLE

nonregulatory Terminal Radar Service Area is currently in effect. Establishment of each ARSA will require that pilots maintain two-way radio communication with air traffic control while in the ARSA. Implementation of ARSA procedures at each of the affected locations will reduce the risk of midair collision in terminal areas and promote the efficient control of air traffic.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; and (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

List of Subjects in 14 CFR Part 71

Aviation safety, Airport radar service areas.

Adoption of the Amendment

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a) and 1354(a); 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. Section 71.301 is amended as follows:

Dallas Love Field, TX [New]

The airspace extending upward from the surface to and including 4,300 feet MSL within a 5-mile radius of the Dallas Love Field (lat. 32°50'49"N., long. 96°51'05"W.) excluding that airspace within the Dallas-Forth Worth, TX, (DFW) Terminal Control Area (TCA), and excluding that airspace extending clockwise from a line bearing 340° from lat. 32°54'25"N., long. 96°51'20"W., to a line bearing 136° from lat. 32°54'25"N., long. 96°51'20"W., and that airspace extending upward from 2,000 feet MSL to and including 4,500 feet MSL within a 10-mile radius of the airport extending clockwise from the point where the 10-mile radius intersects the DFW TCA northwest of the Dallas Love Field to the 340° bearing from lat. 32°54'25"N., long. 96°51'20"W., and that airspace extending upward from 3,000 feet MSL to and including 4,500 feet MSL within a 25-mile radius of the airport extending clockwise from a line bearing 340° from lat. 32°54'25"N., long. 96°51'20"W., to a line bearing 136° from lat. 32°54'25"N., long. 96°51'20"W., and that airspace extending upward from 2,000 feet MSL to and including 4,500 feet MSL within a 10-mile radius of the airport clockwise from a line bearing 136° from lat. 32°54'25"N., long. 96°51'20"W. to a line bearing 136° from lat. 32°51'45"N., long. 96°54'30"W., excluding that airspace within the DFW TCA.

Dulles International Airport, Washington, DC [New]

That airspace extending upward from the surface to and including 4,300 feet MSL within a 5-mile radius of the Dulles International Airport (lat. 38°56'36"N., long 77°27'29"W.) and lying west of a line extending from the 008° bearing from the airport on the 5-mile arc to the 190° bearing from the airport on the 5-mile arc, and upward from the surface to 3,000 feet MSL east of that line, and that airspace extending upward from 1,700 feet MSL to and including 4,300 feet MSL within a 10-mile radius of the airport from the 146° bearing from the airport clockwise to the 036° bearing from the airport, excluding the airspace beyond 8 miles between the 234° bearing from the airport clockwise to the 271° bearing from the airport, and that airspace extending upward from 1,700 feet MSL upward to and including 3,000 feet MSL within a 10-mile radius of the airport from the 036° bearing from the airport clockwise to the 146° bearing from the airport, excluding that airspace east of the west boundary of the Washington, DC, Terminal Control Area.

Issued in Washington, DC, on May 22, 1986.

Daniel J. Peterson,

Manager, Airspace—Rules and Aeronautical Information Division.

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 779, 780, 783, 784, 816, and 817

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program; Fish and Wildlife Resources Information and Plan; Protection of Fish, Wildlife, and Related Environmental Values; Proposed Rule

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 779, 780, 783, 784, 816, and 817

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program; Fish and Wildlife Resource Information; Fish and Wildlife Plan; Protection of Fish, Wildlife, and Related Environmental Values

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Proposed rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) of the U.S. Department of the Interior (DOI) proposes to amend its rules with respect to fish and wildlife resource information and planning requirements, and standards applied to the protection of fish and wildlife values. The purpose of this proposal is to comply with recent court decisions and to revise and clarify the rules. The revised rules would amend reinstated fish and wildlife permitting requirements and would provide added protection to endangered or threatened species.

DATES:

Written comments

OSM will accept written comments on the proposed rule until 5 p.m. eastern daylight time on August 7, 1986.

Public hearings

Upon request, OSM will hold public hearings on the proposed rule in Washington, DC; Denver, Colorado; and Knoxville, Tennessee, at 9:30 a.m. local time on July 31, 1986. Upon request, OSM also will hold public hearings in the States of Georgia, Idaho, Massachusetts, Michigan, North Carolina, Oregon, Rhode Island, South Dakota, and Washington at times and on dates to be announced prior to the hearings. OSM will accept requests for public hearings until 5:00 p.m. eastern daylight time on July 7, 1986.

ADDRESSES:

Written comments

Hand-deliver to the Office of Surface Mining, Administrative Record, Room 5315, 1100 L Street, NW., Washington, DC; or mail to the Office of Surface Mining, Administrative Record, Room 5315–L, 1951 Constitution Avenue, NW., Washington, DC 20240.

Public hearings

Department of the Interior Auditorium, 18th and C Streets, NW., Washington, DC; Brooks Towers, 2d Floor Conference Room, 1020 15th Street, Denver, Colorado; and the Hyatt House, 500 Hill Avenue, SE., Knoxville, Tennessee. The addresses for any hearings scheduled in the States of Georgia, Idaho, Massachusetts, Michigan, North Carolina, Oregon, Rhode Island, South Dakota, and Washington will be announced prior to the hearings.

Requests for public hearings

Submit orally or in writing to the person and address specified under "FOR FURTHER INFORMATION CONTACT."

FOR FURTHER INFORMATION CONTACT: Charles H. Wolf, Office of Surface Mining, U.S. Department of the Interior, Ten Parkway Center, Pittsburgh, Pennsylvania 15220; telephone: 412–937–2829.

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures
II. Background
III. Discussion of Proposed Rule
IV. Procedural Matters

I. Public Comment Procedures

Written Comments

Written comments submitted on the proposed rule should be specific, should be confined to issues pertinent to the proposed rule, and should explain the reason for any recommended change. Where possible, commenters should submit five copies of their comments (see "ADDRESSES"). Comments received after the close of the comment period (see "DATES") may not be considered or included in the Administrative Record for the final rule.

Public Hearings

OSM will hold public hearings on the proposed rule on request only. The times, dates, and addresses scheduled for the hearings at three locations are specified previously in this notice (see "DATES" and "ADDRESSES"). The times, dates, and addresses for the hearings at the remaining locations have not yet been scheduled, but will be announced in the Federal Register at least 7 days prior to any hearings which are held at these locations.

Any person interested in participating at a hearing at a particular location should inform Charles Wolf (see "FOR FURTHER INFORMATION CONTACT") either orally or in writing of the desired hearing location by 5:00 p.m. eastern daylight time on July 10, 1986. If no one has contacted Mr. Wolf to express an interest in participating in a hearing at a given location by that date, the hearing will not be held. If only one person expresses an interest, a public meeting rather than a hearing may be held and the results included in the Administrative Record.

If a hearing is held, it will continue until all persons wishing to testify have been heard. To assist the transcriber and ensure an accurate record, OSM requests that persons who testify at a hearing give the transcriber a written copy of their testimony. To assist OSM in preparing appropriate questions for clarification of issues, OSM also requests that persons who plan to testify submit to OSM at the address previously specified for the submission of written comments (see "ADDRESSES") an advance copy of their testimony.

II. Background

The Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.* (the Act) sets forth general regulatory requirements governing surface coal mining operations and surface impacts of underground coal mining. Sections 515(b)(24) and 516(b)(11) of the Act, 30 U.S.C. 1265(b)(24) and 1266(b)(11), require that surface coal mining and reclamation operations shall:

> to the extent possible using the best technology currently available, minimize disturbances and adverse impacts of the operation on fish, wildlife, and related environmental values, and achieve enhancement of such resources where practicable;

In addition, Section 515(b)(2) of the Act, 30 U.S.C. 1265(b)(2), requires that the operator restore mined land to a condition capable of supporting the uses which it was capable of supporting prior to any mining or higher or better uses. Section 516(b)(10) imposes that same requirement on underground mines with such modifications as is necessary to accommodate distinct differences.

To implement the requirements of these provisions and the provisions of other statutes and regulations protecting fish and wildlife resources, OSM promulgated 30 CFR 779.20, 780.16, 783.20, 784.21, 816.97, and 817.97 on March 13, 1979 as a part of the permanent regulatory program (44 FR 15356, 15359, 15364, 15369, 15410, 15437).

Representatives of the coal industry, the States of Virginia and Illinois, and certain environmental groups challenged OSM's previous permitting rules as legally inconsistent with the Act, *In re: Permanent Surface Mining Regulation Litigation*, No. 79–1144 (D.D.C., 1980). There, the plaintiffs argued that there was no statutory authorization in

Sections 507, 508, or 515(b)(24) of the Act to require fish and wildlife information in the permit application or the reclamation plan. Since sections 507 and 508 of the Act gave the regulatory authority power to decide on other necessary requirements, plaintiffs contended that the challenged rules usurped the role Congress had delegated to the States by creating a uniform system of permit-data requirements, which left no flexibility for consideration of State-specified conditions.

The district court, while sustaining the Secretary's general authority to promulgate additional requirements in response to the separate industry challenge, remanded 30 CFR 779.20 and 780.16, which provided permit requirements for fish and wildlife resources information on the basis that there was no statutory authority in this specific case. See *In re: Permanent Surface Mining Regulation Litigation* No. 79–1144, slip op. at 39 (D.D.C. February 26, 1980). OSM subsequently suspended the remanded rules (45 FR 51547, August 4, 1980).

The coal industry appealed the District Court decision sustaining the Secretary's authority to require additional information. The United States Court of Appeals for the District of Columbia Circuit, sitting *en banc*, sustained Judge Flannery's decision that such a specific statutory reference is not necessary. *In re: Permanent Surface Mining Regulation Litigation*, 653 F.2d 514, 527 (1981).

Because the Appeals Court opinion specifically noted that it did not address the district Court's decision remanding the fish and wildlife rules (653 F.2d at 517), OSM did not revise the fish and wildlife information requirements during regulatory reform efforts in 1983. Therefore, the suspension of the 1979 regulations remained in effect.

In his March 5, 1984 District Court brief, the Secretary asked the court to vacate its earlier judgement in light of the Appeals Court opinion so that fish and wildlife permit requirements could be promulgated. *In Re: Permanent Surface Mining Regulation II, Government Brief, p. 130, N. 78.*

The District Court on October 1, 1984, held that the effect of the Court of Appeals decision was to reinstate the suspended regulations and ordered that 30 CFR 779.20 and 780.16 be reinstated until a new rulemaking considered the permitting requirement for fish and wildlife. See *In re: Permanent Surface Mining Regulation Litigation* II, No. 79–1144 (D.D.C., 1984) slip op. at p. 58. On February 21, 1985, OSM reinstated 30 CFR 779.20, 780.16, 783.20, and 784.21 (50 FR 7274). This proposal would amend these reinstated rules.

On June 30, 1983, OSM revised §§ 816.97 and 817.97 (48 FR 3012) to minimize duplication between regulations and to ensure that they were well-reasoned. On October 1, 1984, portions of these rules were remanded to modify requirements pertaining to endangered or threatened species and the protection of wildlife from toxic ponds. *Id.* This proposal would amend these rules in response to the court's decision.

Existing §§ 779.20 and 783.20 require fish and wildlife resources information to be included in permit applications. They are essentially the same except § 779.20 refers to surface mining and § 783.20 to underground mining. Existing §§ 780.16 and 784.21 require a plan for the protection and enhancement of fish and wildlife values to be included in permit applications. They are essentially the same except that § 780.16 refers to surface mining and § 784.21 refers to undergound mining. Furthermore, existing §§ 816.97 and 817.97 provide performance standards for the protection of fish, wildlife, and related environmental values. They are essentially the same except that § 816.97 refers to surface mines and § 817.97 refers to underground mines. To simplify this preamble, OSM will discuss proposed changes to §§ 779.20, 780.16, and 816.97 with the understanding that the discussion will also apply to the corresponding proposed §§ 783.20, 784.21 and 817.97. Where proposed changes are not the same, differences will be noted. OSM solicits comments on whether or not there are distinct differences between surface and underground mining that would justify differences in these regulations.

III. Discussion of Proposed Rules

A. Fish and Wildlife Permitting Requirements

Existing § 779.20 requires pre-mining fish and wildlife resources information based on published data, written guidance from agencies, and a site-specific study. Existing § 780.16 requires that each permit application contain a fish and wildlife plan that details how fish and wildlife resources will be protected and enhanced. OSM suspended §§ 779.20 and 780.16 on August 4, 1980 [45 FR 51547] and reinstated these same requirements on February 21, 1985 [50 FR 7274]. During the period when the Federal rules were suspended State regulatory authorities could omit or, if desired, adopt special permitting rules pertaining to fish and wildlife. OSM specifically requests comments on whether the experiences and events of the past four and one-half years when the Federal rules were suspended justify Federal regulation in this subject area and, if so, whether it is necessary to require both premining resource information and protection and enhancement plans.

In this rulemaking OSM is proposing to amend the fish and wildlife permitting requirements that were reinstated on February 21, 1985. Proposed § 780.16 would revise and incorporate the requirements of the existing §§ 779.20 and 780.16. Proposed § 780.16(a) would replace the resource information requirements of existing § 779.20 and proposed § 780.16(b) would replace the planning requirements of existing § 780.16. Proposed § 780.16(a) would use the paragraph heading "Resource information" and proposed § 780.16(b) would use the paragraph heading "Protection and enhancement plan." Existing § 779.20 is proposed to be deleted.

OSM requests comments on whether fish and wildlife information and planning requirements can be effectively addressed under one section as proposed or should remain as separate and distinct sections as found in the existing rules under Parts 779 and 780.

Resource Information

Existing § 779.20(a) provides that each application shall include a study of fish and wildlife and their habitats within the proposed mine plan area and portions of the adjacent areas where effects on such resources may reasonably be expected to occur. Similarly, proposed § 780.16(a) would require fish and wildlife information to be included in each application for the permit area and adjacent areas. OSM has substituted the term permit area for mine plan area because mine plan area is no longer defined in § 701.5 (Definitions) and has been, with limited exceptions, deleted from the rules. Both permit area and adjacent area are defined in § 701.5.

Existing § 779.20(a) requires each application to include a study of fish and wildlife and their habitats whereas proposed § 780.16(a) would require each application to include fish and wildlife resource information. This change is proposed because the word "study" generally implies a need for site-specific information. However, even under the previous rule, the level of site-specific information required could vary considerably. In the preamble to the previous rule, the following comment response appeared:

The Office agrees that a minimum amount of site-specific information almost invariably is required to determine the applicability of secondary information to specific sites . . . However, the Office has concluded that the regulations as written provide adequate discretion for the regulatory authority to determine levels of detail for studies based on the adequacy of existing information. (44 FR 15029, March 13, 1979).

Upon further analysis, OSM now does not believe that site-specific information will always be needed. In many instances existing information is available to accurately and adequately describe fish and wildlife and an area in order to protect important species and design a fish and wildlife enhancement plan. This information is most often available from State or Federal fish and wildlife agencies. Many States have completed or are in the process of completing computer-based fish and wildlife baseline data systems with detailed inventory information on plant and animal species, habitat requirements, site locations, and life cycles. In many instances this information will be sufficient to provide species protection and to develop habitat restoration and enhancement plans. Many State fish and game agencies already have developed guidance on vegetation species, use of waters, optimal terrain, use of wooded and open areas, etc. for wildlife enhancement in general and for certain species. Site-specific information such as the number of white-footed mice per hectare or number of deer per hectare would not, under most circumstances, result in more definitive wildlife protection and enhancement measures than one based on existing data that includes habitat types and species occurrence in the area.

OSM recognizes that fish and wildlife agencies may not always have sufficient fish and wildlife resource information available to develop a protection and enhancement plan. Proposed § 780.16(a) provides the regulatory authority with the authority to require site-specific studies if sufficient information is not available on which to base protection and enhancement measures. The word "information" is used in the proposed rule to more accurately account for those situations where data for secondary sources is sufficient to satisfy the requirements of the regulatory authority and State and Federal agencies with statutory responsibilities for fish and wildlife. The authority for regulatory agencies to require site-specific studies has been retained in the proposed rule but the restriction that a study be the only means to achieve compliance would be removed.

Existing § 779.20(b) requires the applicant to contact the regulatory authority prior to initiating fish and wildlife studies to determine what fish and wildlife information will be required. The proposed rule would delete this provision because prior contact with the regulatory authority may not be necessary or desirable in every State. Such a procedure of case-by-case determinations may be workable in States where there is a small number of large mines, as in the Western United States. However, Eastern States with large numbers of small mines may find it more appropriate to set forth in either rules or guidance documents their requirements for fish and wildlife information. For example, the Kentucky Department of Fish and Wildlife Resources, in conjunction with the Kentucky Department of Surface Mining Reclamation and Enforcement has published guidelines to assist coal mine operators to prepare the fish and wildflife sections of permit applications (1982, Technical Reclamation Memorandum #3). These guidelines establish minimum information requirements and identify situations when contact with the regulatory authority and Department of Fish and Wildlife is recommended. Such flexibility is needed in the Federal rules to enable State to continue to develop regulatory programs that are administratively efficient and within budget and personnel constraints while still protecting important fish and wildlife values.

Existing § 779.20(c) requires the regulatory authority, in consultation with appropriate State and Federal fish and wildlife agencies and other agencies with similar responsibilities to determine the level of detail and the areas of such studies according to published data, written guidance from agencies, and site-specific information. Proposed § 780.16(a) continues to provide for the regulatory authority to make this determination; however, the decision would only have to be in accordance with any written guidance provided by State and Federal fish and wildlife agencies and would not necessarily be based upon site-specific studies. Written guidance may be provided by class of application (i.e., geographic location and land use) or by individual application. The rule recognizes the regulatory authorities' central role in making the decision and the expertise and statutory responsibilities of fish and wildlife agencies regarding the scope and level of information submitted in applications.

Upon receipt of an administratively complete application, written notification of the permit applicant's intention to mine would be provided by the regulatory authority to State and Federal fish and wildlife agencies in accordance with § 773.13(a)(3). Fish and Wildlife agencies could provide written comments to the State regulatory authority based on their knowledge of fish and wildlife resources in the area of the proposed operation. The Department of the Interior, Fish and Wildlife Service, has expressed concern that in a few States it is unable to provide meaningful comments because the permit application is on file in locations remote to the Service's Regional or Field Office and the notice required by § 773.13(a)(3) may not contain sufficient information. In response to this concern, OSM is proposing that paragraph (c) be included in § 780.16 which would require that, upon request, the regulatory authority shall provide the resource information and the protection and enhancement plan to the U.S. Department of the Interior, Fish and Wildlife Service's Regional or Field Office and that the information be provided within 10 days of receipt of the request. In most States, the location of the permit application is easily accessible to the Service's review and it would be unnecessary to provide this material. Mine operators would be expected to comply with the resource information requirements in State program rules and technical guidance documents, and all other requests for resource information from regulatory authority.

Proposed § 780.16(a) would go beyond the requirements of existing § 779.20 by setting specific minimum requirements for resource information that must be included in each application. It would establish a minimum standard in the event that no guidance has been established by fish and wildlife agencies. Proposed paragaph (a)(1) would require the reporting of any listed and proposed threatened, or endangered species of plants or animals and their critical habitats listed under Federal or State statutes. Proposed paragraph (a)(2) would require the reporting of species such as eagles, migatory birds, or other animals identified as requiring special protection under State and Federal law. Proposed paragraph (a)(3) would provide the same requirement for habitats of unusually high value for fish and wildlife. These habitats include such areas as important streams, wetlands, riparian areas, cliffs, migration routes, and areas offering special shelter or protection, and reproduction and wintering areas.

Information on other habitats and species would be required if the regulatory authority after consultation with appropriate State and Federal agencies with fish and wildlife responsibilities deemed it necessary. OSM's revision of the rule is intended to ensure the minimum reporting of resource information on species and habitats with special significance. Resource information on species and habitats of lesser importance could be required at the discretion of the regulatory authority or upon guidance from the State and Federal agencies with statutory responsibilities for fish and wildlife.

Protection and Enhancement Plan

Existing § 780.16 is titled "Fish and Wildlife Plan." To describe the same subject content in the proposed rule, OSM would adopt the paragraph heading "Protection and enhancement plan" because it more accurately conveys the purpose of the plan and logically fits under the proposed section heading "Fish and wildlife information."

Existing § 780.16(a)(1) requires a plan in each permit application that states how the applicant will minimize disturbances and adverse impacts on fish and wildlife and related environmental values and enhance those resources where practicable. Proposed § 780.16(b) would retain this requirement with the exception that there would be no specific provision in the rules similar to existing § 780.16(a)(2) that would provide the applicant an opportunity to state that enhancement of fish and wildlife resources can not be practicably achieved. OSM would delete this provision because it believes that enhancement of fish and wildlife values is practicable for almost all postmining land uses and that a regulatory authority can judge an applicant's response without a statement of reasons why enhancement is not practicable.

Existing § 780.16(a) and proposed § 780.16(b) both require the protection and enhancement measures to be consistent with performance standards for the protection of fish, wildlife, and related environmental values found in existing § 816.97. These performance standards address endangered and threatened species; bald and golden eagles; protection measures involving powerlines, roads, physical barriers, and wetlands; and the selection of plant species for wildlife enhancement.

Proposed § 780.16(b) does not include the language of the existing rule whereby the plan is required to include the mine plan area and portions of the adjacent area as determined by the regulatory authority. Such language was thought unnecessary since proposed § 780.16(a) requires resource information for the permit area and adjacent areas and that this same geographic area would also apply to protection and enhancement plans.

Existing § 780.16(b) requires a statement explaining how the applicant will utilize impact control measures, management techniques, and monitoring methods to protect and enhance threatened and endangered species and their critical habitats, species protected by State or Federal law and their habitats, species identified through consultation with fish and wildlife agencies, and habitats of unusually high value. Proposed § 780.16(b) has a similar requirement. Rather than repeat the species and habitats to be protected, paragraph (b) would include a cross-reference to paragraph (a). Proposed paragraph (b)(3)(i) would require a description of measures that will be used to protect species and habitats during the active mining phase of operation. Such measures may include the establishment of buffer zones; the selective location and special design of haul roads and powerlines; and the monitoring of surface water quality and quantity. Proposed paragraph (b)(3)(ii) would require a description of measures that will be used during the reclamation and postmining phase of operation to restore and enhance aquatic and terrestrial habitat. Such measures may include restoration of streams and other wetlands; retention of ponds and impoundments; establishment of vegetation for wildlife food and cover; and the placement of perches and nest boxes. This proposed language is intended to provide more explicit guidance in interpreting the statutory requirement that is present in existing § 780.16.

The statutory authority for proposed § 780.16(b) is derived from § 515(b)(24) of the Act which does not limit the consideration of protection and enhancement plans to any category of fish and wildlife. Accordingly, in the proposed rule, plans are required even though there may not be any endangered or threatened species or habitat of unusually high value within the popoosed permit area and adjacent areas. Plans must provide for minimizing disturbance and adverse impacts to the extent possible on fish, wildlife, and related environmental values, and achieve enhancement of such resources where practicable. State and Federal fish and wildlife agencies will have an opportunity to comment on the adequacy of protection and enhancement plans under § 733.13(a)(3)(ii) which provides for the notification and request for comment when regulatory authorities determine that a permit application is administratively complete.

As noted above, in some States it is difficult for the U.S. Department of the Interior, Fish and Wildlife Service, to review the permit application because of its location. Therefore, proposed § 780.16(c) would provide that, upon request, the regulatory authority shall provide the resource information required under paragraph (a) and the protection and enhancement plan required under paragraph (b) to the Service's Regional or Field Office for review. Most Federal Fish and Wildife regional or field offices will have access to the permit application without having to be provided with the material.

The proposed rule also includes several minor word changes to improve the clarity of the existing rule. None of these changes are believed to be substantive in nature.

B. Performance Standards

OSM would amend § 816.97 to include three substantive changes that are in response to the District Court's decision of October 1, 1984. *In re: Permanent Surface Mining Regulation Litigation,* No. 79–1144, slip op. at pp. 58–63 (D.D.C.). Two of these amendments pertain to endangered or threatened species while the third concerns the exclusion of wildlife from toxic ponds.

Proposed § 816.97(b) would prohibit surface mining activity that "is likely to" jeopardize the continued existence of endangered or threatened species listed by the Secretary or which "is likely to" result in the destruction or adverse modification of designated critical habitats of such species. It differs from existing § 816.97(b) because the existing rule only prohibits mining operations that would jeopardize endangered species and their critical habitat. This threshold of protection was found by the court to violate section 7(a)(2) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1536(a)(2)) which states that Federal agencies and the Secretary shall:

> insure that any action authorized, funded, or carried out by such agency . . . *is not likely to* jeopardize the continued existence of any endangered species or result in the destruction or adverse modification of habitat of such species . . .

The second change relates to existing § 816.97 which requires operators to promptly report to the regulatory authority any endangered or threatened species within the permit area of which the operator becomes aware. This

provision is limited to Federally-listed endangered or threatened species. The limitation was challenged. OSM argued that endangered or threatened species listed by the State are not necessarily entitled to protection under Federal law. The court ruled that although this was correct, section 515(b)(24) of the Act is not so limited and requires that disturbances to fish, wildlife, and related environmental values be minimized. The deletion of any express reference to State-listed species from the previous rule was found by the Court to be contrary to section 515(b)(24). Accordingly, proposed § 816.97(b) would require operators to report State- or Federally-listed endangered or threatened species.

The final amendment to existing § 816.97 would reinstate a previous provision that required each operator to fence, cover, or use other appropriate methods to exclude wildlife from ponds which contain hazardous concentrations of toxic-forming material. Proposed § 816.97(e)(4) is the same as previous 30 CFR 816.97(d)(3) (1982). In deleting the provision from the previous rule, OSM maintained that there was little evidence of harm to wildlife as a result of unprotected toxic ponds on the site of any mining operation and that if such circumstances should arise the requirements of existing § 816.97(a) to minimize disturbances and adverse impacts on wildlife by utilizing the best technology currently available would be sufficient to require fencing and other protective measures. The court rejected these arguments because the absence of evidence of harm to wildlife also supported the retention of the fencing requirement and the court believed existing § 816.97(a) did not provide the regulatory authority with sufficient guidance. The proposed addition of § 816.97(e)(4) would correct this omission.

Paragraphs (e)(2) and (e)(3) would be repromulgated solely to change punctuation to reflect the addition of paragraph (e)(4) and not to adopt substantive changes.

Effect In Federal Program States

The rules proposed today, if adopted, would be applicable through cross-referencing in those States with Federal programs. This includes Georgia, Idaho, Massachusetts, Michigan, North Carolina, Oregon, Rhode Island, South Dakota, Tennessee, and Washington. The Federal programs for these States appear at 30 CFR Parts 910, 912, 921, 922, 933, 937, 939, 941, 942, and 947, respectively. Comments are specifically solicited as to whether unique conditions exist in any of these States relating to this proposal which should be reflected either as changes to the national rules or as State-specific amendments to any or all of the Federal programs.

Guide For Protection and Enhancement of Fish and Wildlife Values For Surface Coal Mine and Reclamation Operations. Technical Reclamation Memorandum #3. 21 pp.; appendixes.

IV. Procedural Matters

Federal Paperwork Reduction Act

The information collection requirements in the proposed rule have been submitted to the Office of Management and Budget under 44 U.S.C. 3507. The information is needed to meet the requirements of Section 515 (b)(24) of Pub. L. 95-87, and will be used by OSM to assess the impact of proposed mining operations on fish and wildlife resources and the adequacy of proposed protection and enhancement plans.

The obligation to respond is mandatory.

Burden estimates and potential duplication are important clearance issues. Therefore, we are requesting that respondents inform OSM during the public comment period on the proposed rule as to how long it takes to comply with the reporting requirements of the rule and the costs associated with the reporting. This will give OSM an opportunity to re-evaluate its burden estimates and revised estimates where necessary.

Executive Order 12291

The DOI has examined the proposed rule according to the criteria of Executive Order 12291 (February 17, 1981) and has determined that it is not major and does not require a regulatory impact analysis.

Regulatory Flexibility Act

The DOI also has determined, pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, that the proposed rule will not have a significant economic impact on a substantial number of small entities. The rule will allow small coal operators increased flexibility in meeting permitting standards.

National Environmental Policy Act

OSM has prepared an environmental assessment (EA) on the impacts on the human environment of this proposed rulemaking. This EA is on the final in the OSM Administrative Record at the address listed in the "Addresses" section of this preamble. An EA on file rule will be completed and a final conclusion reached on the significance of any resulting impacts before issuance of the final rule.

List of Subjects

30 CFR Part 779

Coal mining, Environmental protection, Reporting and recordkeeping requirements, Surface mining.

30 CFR Part 780

Coal mining, Reporting and recordkeeping requirements, Surface mining.

30 CFR Part 783

Coal mining, Environmental protection, Reporting and recordkeeping requirements, Underground mining.

30 CFR Part 784

Coal mining, Reporting and recordkeeping requirements, Underground mining.

30 CFR Part 816

Coal mining, Environmental protection, Reporting and recordkeeping requirements, Surface mining.

30 CFR Part 817

Coal mining, Environmental protection, Reporting and recordkeeping requirements, Underground mining.

Accordingly, it is proposed to amend 30 CFR Parts 779, 780, 783, 784, 816 and 817 as follows:

Dated: September 24, 1985.

James E. Cason,

Deputy Assistant Secretary for Land and Minerals Management.

PART 779—SURFACE MINING PERMIT APPLICATIONS—MINIMUM REQUIREMENTS FOR INFORMATION ON ENVIRONMENTAL RESOURCES

1. The authority citation for Part 779 is revised to read as follows:

Authority: Pub. L. 95-87 (30 U.S.C. 1201 *et seq.*), unless otherwise noted.

§ 779.20 [Removed]

2. Section 779.20 is removed.

PART 780—SURFACE MINING PERMIT APPLICATIONS—MINIMUM REQUIREMENTS FOR RECLAMATION AND OPERATION PLAN

3. The authority citation for Part 780 is revised to read as follows:

Authority: Pub. L. 95–87 (30 U.S.C. 1201 *et seq.*), unless otherwise noted.

4. Section 780.16 is revised to read as follows:

§ 780.16 Fish and wildlife information.

(a) *Resource information.* Each application shall include fish and wildlife resource information for the permit area and adjacent area. The scope and level of detail for such information shall be determined by the regulatory authority in accordance with any written guidance provided by State and Federal agencies with responsibilities for fish and wildlife and shall, at a minimum include the existence of any:

(1) Listed and proposed endangered or threatened species of plants or animals and their critical habitats listed by the Secretary under the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), and those species and habitats protected by similar State statutes;

(2) Eagles, migratory birds, and other species identified as requiring special protection under State or Federal law; and

(3) Habitats of unusually high value for fish and wildlife such as important streams, wetlands, riparian areas, cliffs supporting raptors, areas offering special shelter or protection, migration routes, and reproduction and wintering areas.

(b) *Protection and enhancement plan.* Each application shall include a description of how, to the extent possible using the best technology currently available, the operator will minimize disturbances and adverse impacts on fish and wildlife and related environmental values, including compliance with the Endangered Species Act, during the surface coal mining and reclamation operations and how enhancement of these resources will be achieved where practicable. This description shall—

(1) Be consistent with the requirements of § 816.97 of this chapter;

(2) Apply, at a minimum, to species and habitats identified under paragraph (a) of this section; and

(3) Include—

(i) Protective measures that will be used during the active mining phase of operation. Such measures may include the establishment of buffer zones, the selective location and special design of haul roads and powerlines, and the monitoring of surface water quality and quantity.

(ii) Enhancement measures that will be used during the reclamation and postmining phase of operation to develop aquatic and terrestrial habitat. Such measures may include restoration of streams and other wetlands, retention of ponds and impoundments, establishment of vegetation for wildlife food and cover, and the placement of perches and nest boxes.

(c) Upon request, the regulatory authority shall provide the resource information required under paragraph (a) of this section and the protection and enhancement plan required under paragraph (b) of this section to the U.S. Department of the Interior, Fish and Wildlife Service Regional or Field Office for their review. This information shall be provided within 10 days of receipt of the request from the Service.

PART 783—UNDERGROUND MINING PERMIT APPLICATIONS—MINIMUM REQUIREMENTS FOR INFORMATION ON ENVIRONMENTAL RESOURCES

5. The authority citation for Part 783 is revised to read as follows:

Authority: Pub. L. 95–87 (30 U.S.C. 1201 *et seq.*), unless otherwise noted.

§ 783.20 [Removed]

6. Section 783.20 is removed.

PART 784—UNDERGROUND MINING PERMIT APPLICATIONS—MINIMUM REQUIREMENTS FOR RECLAMATION AND OPERATION PLAN

7. The authority citation for Part 784 is revised to read as follows:

Authority: Pub. L. 95–87 (30 U.S.C. 1201 *et seq.*), unless otherwise noted.

8. Section 784.21 is revised to read as follows:

§ 784.21 Fish and wildlife information.

(a) *Resource information.* Each application shall include fish and wildlife resource information for the permit area and adjacent area. The scope and level of detail for such information shall be determined by the regulatory authority in accordance with any written guidance provided by State and Federal agencies with responsibilities for fish and wildlife and shall, at a minimum, include the existence of any:

(1) Listed and proposed endangered or threatened species of plants or animals and their critical habitats listed by the Secretary under the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), and those species and habitats protected by similar State statutes;

(2) Eagles, migratory birds, or other species identified as requiring special protection under State or Federal law; and

(3) Habitats of unusually high value for fish and wildlife such as important streams, wetlands, riparian areas; cliffs supporting raptors, areas offering special shelter or protection, migration routes, and reproduction and wintering areas.

(b) *Protection and enhancement plan.* Each application shall include a description of how, to the extent possible using the best technology currently available, the operator will minimize disturbances and adverse impacts on fish and wildlife and related environmental values, including compliance with the endangered species act, during the surface coal mining and reclamation operations, and how enhancement of these resources will be achieved where practicable. This description shall—

(1) Be consistent with the requirements of § 817.97 of this chapter;

(2) Apply, at a minimum, to species and habitats identified under paragraph (a) of this section; and

(3) Include:

(i) Protective measures that will be used during the active mining phase of operation. Such measures may include the establishment of buffer zones, the selective location and special design of haul roads and powerlines, and the monitoring of surface water quality and quantity.

(ii) Enhancement measures that will be used during the reclamation and postmining phase of operation to develop aquatic and terrestrial habitat. Such measures may include restoration of streams and other wetlands, retention of ponds and impoundments, establishment of vegetation for wildlife food and cover, and the placement of perches and nest boxes.

(c) Upon request, the regulatory authority shall provide the resource information required under paragraph (a) of this section and the protection and enhancement plan required under paragraph (b) of this section to the U.S. Department of the Interior, Fish and Wildlife Service Regional or Field Office for their review. This information shall be provided within 10 days of receipt of the request from the Service.

PART 816—PERMANENT PROGRAM PERFORMANCE STANDARDS—SURFACE MINING ACTIVITIES

9. The authority citation for Part 816 continues to read as follows:

Authority: Pub. L. 95–87 (30 U.S.C. 1201 *et seq.*), unless otherwise noted.

10. In § 816.97 paragraphs (b), (e)(2), and (e)(3) are revised and paragraph (e)(4) is added to read as follows:

§ 816.97 Protection of fish, wildlife, and related environmental values.

* * * * *

(b) *Endangered or threatened species.* No surface mining activity shall be conducted which is likely to jeopardize the continued existence of endangered or threatened species listed by the Secretary or which is likely to result in the destruction of adverse modification of designated critical habitats of such species in violation of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*). The operator shall promptly report to the regualtory authority any State- or Federally-listed endangered or threatened species within the permit area of which the operator becomes aware. Upon notification, the regulatory authority shall consult with appropriate State and Federal fish and wildlife agencies and, after consultation, shall identify whether, and under what conditions, the operator may proceed.

* * * * *

(e) * * *

(2) Locate and operate haul and access roads so as to avoid or minimize impacts on important fish and wildlife species or other species protected by State or Federal law;

(3) Design fences, overland conveyors, and other potential barriers to permit passage for large mammals, except where the regulatory authority determines that such requirements are unnecessary; and

(4) Fence, cover, or use other appropriate methods to exclude wildlife from ponds which contain hazardous concentrations of toxic-forming materials.

* * * * *

PART 817—PERMANENT PROGRAM PERFORMANCE STANDARDS—UNDERGROUND MINING ACTIVITIES

11. The authority citation for Part 817 is revised to read as follows:

Authority: Pub. L. 95-87 (30 U.S.C. 1201 *et seq.*), unless otherwise noted.

In § 817.97 paragraphs (b), (e)(2), and (e)(3) are revised and paragraph (e)(4) is added to read as follows:

§ 817.97 Protection of fish, wildlife, and related environmental values.

* * * * *

(b) *Endangered or threatened species.* No surface coal mining operations shall be conducted which is likely to jeopardize the continued existence of endangered or threatened species listed by the Secretary or which is likely to result in the destruction of adverse modification of designated critical habitats of such species in violation of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*). The operator shall promptly report to the regulatory authority any State- or Federally-listed endangered or threatened species within the permit area of which the operator becomes aware. Upon notification, the regulatory authority shall consult with appropriate State and Federal fish and wildlife agencies and, after consultation, shall identify whether, and under what conditions, the operator may proceed.

* * * * *

(e) * * *

(2) Locate and operate haul and access roads so as to avoid or minimize impacts on important fish and wildlife species or other species protected by State or Federal law;

(3) Design fences, overland conveyors, and other potential barriers to permit passage for large mammals, except where the regulatory authority determines that such requirements are unnecessary; and

(4) Fence, cover, or use other appropriate methods to exclude wildlife from ponds which contain hazardous concentrations of toxic-forming materials.

Part VI

Department of Defense

General Services Administration

National Aeronautics and Space Administration

48 CFR Part 31

Federal Acquisition Regulation (FAR); Legislative Lobbying Costs; Proposed Rule

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 31

Federal Acquisition Regulation (FAR); Legislative Lobbying Costs

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are considering a change to Federal Acquisition Regulation (FAR) 31.205–22(f), Legislative lobbying costs, to clarify its intent.

DATES: Comments should be submitted to the FAR Secretariat at the address shown below on or before July 28, 1986 to be considered in the formulation of a final rule.

ADDRESS: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets NW., Room 4041, Washington, DC 20405. Please cite FAR Case 86–27 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Ms. Margaret A. Willis, FAR Secretariat, Telephone (202) 523–4755.

SUPPLEMENTARY INFORMATION:

A. Background

The Defense Acquisition Regulatory Council and the Civilian Agency Acquisition Council have received complaints that contractors have denied Government auditors access to records regularly maintained, on the basis of the "25 percent" rule in FAR 31.205–22(f). Accordingly, the Councils are proposing to restructure and rewrite the paragraph to clarify its meaning. The proposed coverage does not constitute a change in policy.

B. Regulatory Flexibility Act

The proposed revision of FAR 31.205–22 will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601, et seq.) because it only clarifies the intent of the present coverage and does not constitute a significant revision.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) does not apply because the proposed revision to FAR 31.205–22 does not impose any additional reporting or recordkeeping requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, et seq.

List of Subjects in 48 CFR Part 31

Government procurement.

Dated: May 23, 1986.

Lawrence J. Rizzi,

Director, Office of Federal Acquisition and Regulatory Policy.

Therefore, it is proposed that 48 CFR Part 31 be amended as set forth below:

PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

1. The authority citation for Part 31 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2453(c).

2. Section 31.205–22 is amended by revising paragraph (f) to read as follows:

31.205–22 Legislative lobbying costs.

* * * * *

(f) Time logs, calendars, or similar records shall not be required to be created for purposes of complying with this subsection during any particular calendar month when: (1) the employee engages in lobbying (as defined in paragraphs (a) and (b) of this subsection) less than 25 percent of the employee's compensated hours of employment during that calendar month, and (2) the organization has not materially misstated any allowable or unallowable costs within the preceding five-year period. When conditions (1) and (2) of this paragraph are met, contractors are not required to establish records in addition to those already required and maintained to support the allowability of claimed costs. Also, when conditions (1) and (2) of this paragraph are met, the absence of time logs, calendars, or similar records will not serve as a basis for disallowing costs by contesting estimates of lobbying time spent by employees during a calendar month.

Part VII

Environmental Protection Agency

Dicofol; Intent To Cancel Registrations of Pesticide Products Containing Dicofol; Denial of Applications for Registration of Pesticide Products Containing Dicofol; Conclusion of Special Review; Notice of Final Determination

VOL 51 ISS 103 MAY 29 1986 UMI

ENVIRONMENTAL PROTECTION AGENCY

[OPP-30000/37C; FRL-3023-5]

Dicofol; Intent To Cancel Registrations of Pesticide Products Containing Dicofol; Denial of Applications For Registration of Pesticide Products Containing Dicofol; Conclusion of Special Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Final Determination.

SUMMARY: EPA initiated a Special Review to consider whether the pesticide registrations for all registered uses of dicofol should be modified or cancelled. This was published in the Federal Register of March 21, 1984 (49 FR 10569). The Special Review was initiated because EPA believed that there were substantial risks to the environment associated with the presence of DDT and related impurities (DDTr) as contaminants of technical dicofol. EPA also expressed concern about the possible oncogenicity of dicofol. In the Federal Register of October 10, 1984 (49 FR 39820), EPA announced the availability of Position Document 2/3 (PD 2/3) and its proposed decision to cancel registrations of pesticide products containing dicofol. EPA issued in the Federal Register of August 15, 1985 (50 FR 33008), an amended notice proposing to allow the continuation of the registrations of pesticide products containing dicofol if a number of modifications to the registrations were implemented. This proposal was based upon new information received by EPA concerning the registrants' proposal to lower the DDTr contamination levels in their technical products and EPA's conclusion that there is limited evidence that dicofol poses an oncogenic risk to humans through dietary and worker exposure. This notice concludes the Special Review and announces EPA's final decision to cancel registrations and deny applications of all pesticide products containing dicofol unless certain modifications are made to the pesticide product registrations.

DATE: Requests for a hearing by a registrant, applicant, or other adversely affected person must be received by June 30, 1986 or, for a registrant or applicant, within 30 days from their receipt by mail of this notice, whichever date is the later applicable deadline.

ADDRESSES: Requests for a hearing must be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Bruce Kapner, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460. Office location and telephone number: Rm. 711, Crystal Mall Building #2, 1921 Jefferson Davis Highway, Arlington, VA. (703-557-3262).

SUPPLEMENTARY INFORMATION: This notice is organized into six units. Unit I is the Introduction. Unit II describes the legal framework within which this notice is issued. Unit III sets forth EPA's assessment of the risks and benefits associated with the continued use of dicofol products. Unit IV sets forth the regulatory actions required by this notice. Unit V contains the comments of the Secretary of Agriculture, the Scientific Advisory Panel, and other public comments and EPA's response to those comments. Unit VI provides a brief discussion of the procedures which will be followed in implementing the regulatory actions which EPA is announcing in this notice.

I. Introduction

A. Notice of Special Review

Notice of the initiation of the Special Review (formerly called the Rebuttable Presumption Against Registration (RPAR) process) was published in the Federal Register of March 21, 1984 (49 FR 10569). That notice was based on the concern that dicofol is contaminated with DDT, DDE, and/or closely related compounds (collectively referred to as DDTr) that can cause significant adverse effects on nontarget wildlife. EPA had concluded that pesticide products containing dicofol met one of the risk criteria for intensive review of the risks and benefits to determine whether continued registration would cause unreasonable adverse effects on the environment. Accordingly, a Special Review was initiated for all registered pesticide products containing dicofol. The notice also noted that dicofol had induced liver tumors in a National Cancer Institute (NCI) bioassay in mice, but that EPA had not been able to validate the study at that time.

B. Preliminary Notices of Intent to Cancel

After reviewing comments received on the March 21, 1984 notice, EPA issued a preliminary notice of intent to cancel registrations of pesticide products containing dicofol which was published in the Federal Register of October 10, 1984 (49 FR 39820). In that notice, EPA proposed cancellation of all uses of dicofol based on the ecological risks posed by the DDTr contaminants in dicofol. EPA stated that cancellation was consistent with the recommendation contained in a Biological Opinion issued by the Office of Endangered Species which concluded that continued use of dicofol was likely to jeopardize the continued existence of the endangered peregrine falcon. EPA also expressed its concern that a study from the National Cancer Institute (NCI) suggested that dicofol produces tumors in test animals. However, EPA did not evaluate the oncogenic risk to humans because the NCI bioassay on dicofol still had not been validated.

In response to this notice, registrants of dicofol products informed EPA that they would be able to manufacture products containing substantially lower levels of DDTr. They indicated that approximately 2 years after EPA's final decision in the Special Review they could produce commercial quantities of technical dicofol that contained 0.1 percent or less DDTr contamination. They further indicated that they were currently producing, or would shortly be able to produce, technical dicofol with DDTr contamination levels substantially below those reported in their Confidential Statements of Formula on file with EPA.

EPA reviewed the registrants' proposal to lower the DDTr contamination of technical dicofol and, while it did not conclude that the lower levels of DDTr were free from risk, it concluded that such reductions would qualitatively reduce risks of adverse effects to nontarget organisms to a level where the benefits would exceed the risks.

The Scientific Advisory Panel (Panel) reviewed EPA's earlier notice of preliminary determination, the supporting Position Document 2/3, and the registrants' proposal to reduce the level of DDTr contaminants. The Panel concurred with EPA's conclusion that the risks would be less from the 0.1 percent DDTr contamination level than from the current DDTr levels in dicofol products.

In addition, after the October 10, 1984 notice, EPA received information regarding the validity of the NCI oncogenicity study. EPA originally considered the NCI study to be invalid due to reported decomposition of the test material during the test period. However, NCI informed EPA that subsequent chemical analysis of the archived test material showed that it was representative of technical dicofol, and that there was no evidence of decomposition. Based on this information, EPA concluded that the NCI bioassay was valid.

On August 15, 1985, EPA issued a notice that revised and expanded the October 10, 1984 notice and presented EPA's revised assessment of the risks, including for the first time a discussion of the possible oncogenic risk to humans, and benefits of using dicofol (50 FR 33008). Additionally, this notice set forth a new set of proposed regulatory actions. EPA concluded that implementation of the registrants' proposal to lower the DDTr contamination of technical dicofol would reduce the risks of adverse effects to nontarget organisms to a level where the benefits would exceed the risks.

The Panel reviewed that notice and concluded that the evidence that dicofol is a potential human carcinogen was weak and that a quantitative risk assessment could not be justified. The full text of the Panel's comments and EPA's response to those comments are found in Unit V.

C. Consultation with the Office of Endangered Species

As required by regulation, EPA initiated consultation with the Office of Endangered Species (OES) in March 1984, concerning the effects of dicofol on endangered species. OES responded in August 1984, that the use of dicofol is likely to jeopardize the continued existence of the two subspecies of peregrine falcon.

When EPA proposed to allow registrations of dicofol products to continue, provided that the level of DDTr contamination was significantly reduced, it reinitiated consultation with OES concerning the effects of this proposal on the endangered peregrine falcon. OES responded in November 1985, stating that use of dicofol contaminated with 0.1 percent or less DDTr would not be likely to jeopardize the endangered peregrine falcon, but that, based on available information, use of dicofol products with higher levels of DDTr still appeared likely to jeopardize the continued existence of the peregrine. Accordingly, OES recommended that EPA immediately prohibit further use of dicofol products, confiscate all existing stocks of dicofol products, and prohibit manufacture of dicofol containing more than 0.1 percent DDTr.

In December 1985, EPA requested OES to reconsider the November 1985 Biological Opinion in light of information concerning the amount of DDTr added to the environment from the use of dicofol during the period before the registrants were able to commence production of dicofol containing 0.1 percent or less DDTr.

In March 1986, OES issued a revised Biological Opinion which, consistent with earlier opinions, found that dicofol contaminated with DDTr at levels greater than 0.1 percent jeopardized the continued existence of the peregrine falcon, but that use of technical dicofol with levels of DDTr at 0.1 percent or less would not jeopardize the peregrine. OES further stated that reasonable and prudent alternatives existed to permit the use of dicofol products that would not jeopardize the peregrine. In all parts of the United States except California, OES indicated that jeopardy to the peregrine could be avoided by reducing the level of DDTr contamination in technical dicofol to 0.1 percent or less no later than December 31, 1986, after which only dicofol products containing 0.1 percent or less DDTr could be sold.

OES concluded that the situation in California warranted a different course of action. OES listed two reasonable and prudent alternatives: (1) the use and sale of all dicofol products containing greater than 0.1 percent DDTr should be banned immediately, or (2) to compensate for the negative effects of the use of dicofol during the period before all products containing more than 0.1 percent DDTr are prohibited in channels of trade, dicofol manufacturers should be required to fund a portion of the nest manipulation work of the Santa Cruz Predatory Bird Research Group (SCPBRG). The next manipulation work is a high priority of the U.S. Fish and Wildlife Service Recovery Plan for the Pacific States Population of the Peregrine Falcon, and scientific authorities agree that this work is vital to the continued existence of this population. Peregrine falcons in central coastal California experience complete reproductive failure because their eggs break before hatching due to thinned eggshells caused by DDE. To aid the recovery of the Pacific States Population, SCPBRG removes eggs laid in the wild, artificially incubates and hatches them, and releases the hatchlings back into nests of wild peregrines. The nest manipulation work of SCPBRG has been highly successful in supplementing population size but has not been operating at full capacity due to limited funding. Funds paid by dicofol manufacturers will be used to hatch artificially eggs from nests located in areas of California subjected to DDE residues from dicofol. Program personnel indicate that $25,000 for 1986 and $75,000 for each of the following 4 years would enable SCPBRG to manipulate enough nests to largely offset the reproductive failure in peregrines that is due to DDE. The need for funding for 5 years is not based on time to absolutely remove DDE residues in California, but upon estimates of time required to build up breeding numbers such that enough wild peregrines are reproducing at a level sufficient to sustain the Pacific population naturally. OES also indicated that the sale of dicofol products containing more than 0.1 percent DDTr contamination should be prohibited in California after December 31, 1986.

In addition to the threat to the population of peregrines in California, OES expressed concern for the peregrine falcon populations in New Mexico and Texas, the brown pelican, bald eagle, Everglade kite, wood stork, and Arctic peregrine falcon. While OES did not conclude that the survival of these other endangered species and populations is threatened by use of dicofol with greater than 0.1 percent DDTr contamination, OES did request an expedited phase-out because the rate of recovery for these species may be affected. The finding of no jeopardy but that use of dicofol with greater than 0.1 percent DDTr contamination may affect the recovery rate is partially based upon the generally improved reproductive success exhibited by these species and by the consideration of the amounts of DDTr that would be added to these species' environments during an expedited phase-out. Accordingly, OES recommended that EPA schedule the phase-out as expeditiously as possible to minimize the hazards to these other endangered species.

Following issuance of the March 1986 Biological Opinion, on March 28, 1986, EPA met with representatives of Rohm and Haas Company and Makhteshim-Agan, Inc., the two registrants currently producing technical or manufacturing-use dicofol products. Representatives from the National Audubon Society, National Wildlife Federation, and Natural Resources Defense Council also attended the meeting. The representatives of the producing companies agreed to provide funds for the nest manipulation program as described in the OES opinion.

Subsequent to the March 28, 1986 meeting, EPA received letters from the three environmental organizations present at the meeting. The letters all expressed opposition to, in essence, EPA's allowing a "penalty" to be paid by dicofol manufacturers in return for a "permit" to continue environmental contamination. The letters noted that endangered species other than the peregrine falcon will suffer from the use of dicofol and gain no benefit from funds paid to aid a population of a single endangered species. The environmental

groups opposed the continued use of dicofol containing any amount of DDTr, and noted that dicofol itself may pose environmental risk.

Neither EPA nor OES views the mitigation of jeopardy by payment to SCPBRG as a "permit" to contaminate the environment, but rather as an efficacious and responsible course to aid the peregrine falcon in California and hasten the removal from the environment of residues of DDTr from dicofol containing greater than 0.1 percent DDTr. With regard to other endangered species, EPA accepts OES's opinion that the expedited phase-out will not threaten the survival of the other species.

EPA makes no conclusion that dicofol containing 0.1 percent DDTr contamination is free from risk, but only that the environmental risk from the reduction to 0.1 percent DDTr or less by December 31, 1988, is offset by the benefits to the general population. Further, EPA shares the concerns that dicofol itself may pose an environmental hazard and is requiring that additional data on this concern be submitted on an expedited basis. However, EPA believes that the data available at this time on dicofol itself are inconclusive.

D. Special Review Docket and Public Comments

In addition to the comments from OES, USDA, and the Panel, public comments were also submitted on the August 1986 preliminary notice of intent to cancel and were carefully considered by EPA in the development of this final determination, and certain changes were made in this decision based on the comments. The comments received in response to the Position Document 2/3 and changes in the final decision are discussed in detail in Unit V.

Further, on several occasions EPA met with or corresponded with various interested parties. Summaries of these meetings and copies of this correspondence are contained in a docket maintained for this Special Review, as provided in EPA's Special Review regulations published in the Federal Register of November 27, 1985 (50 FR 49003).

The docket is available for public inspection from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays, in: Rm. 236, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

It must be noted that portions of the docket are considered Confidential Business Information and are not available for public inspection.

II. Legal Background

In order to obtain a registration for a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (FIFRA), an applicant for registration must demonstrate that the pesticide satisfies the statutory standard for registration. That standard requires, among other things, that the pesticide perform its intended function without causing "unreasonable adverse effects on the environment," under FIFRA sec. 3(c)(5). The term "unreasonable adverse effects on the environment" is defined under FIFRA sec. 2(bb) as "any unreasonable risk to man or the environment, taking into account the economic, social, and environmental costs and benefits of the use of any pesticide." This standard requires a finding that the benefits of the use of the pesticide exceed the risks of use, when the pesticide is used in compliance with the terms and conditions of registration or in accordance with commonly recognized practice.

The burden of proving that a pesticide satisfies the standard for registration rests on the proponents of registration and continues as long as the registration remains in effect. Under section 6 of FIFRA, the Administrator may cancel the registration of a pesticide or require modification of the terms and conditions of registration whenever it is determined that the pesticide appears to cause unreasonable adverse effects on the environment.

In determining whether the risks of a registered pesticide outweigh its benefits, EPA considers both possible changes to the terms and conditions of registration which can reduce risks as well as the impacts of such modifications on the benefits of use. If EPA determines that such changes reduce risks to the level where the benefits outweigh the risks, it may require that they be made.

Alternatively, EPA may determine that no change in the terms and conditions of a registration will adequately assure that use of the pesticide will not pose unreasonable adverse effects. In that event, the Administrator may issue a notice of intent to cancel the registration or to hold a hearing to determine whether it should be cancelled under FIFRA sec. 6(b). In determining whether to issue such a notice, the Administrator must take into account the impact of the action on production and prices of agricultural commodities, retail food prices, and otherwise on the agricultural economy. At least 60 days before formally issuing such a notice, he must inform the Secretary of Agriculture in writing of the substance of the proposed actions and supply the Secretary with an analysis of the expected impact on the agricultural economy. At the same time, under FIFRA sec. 25(d), the Administrator is required to submit the proposal to the Panel for comment as to the impact on health and the environment of the action proposed in the cancellation notice. EPA is also required by law, where appropriate, to consult with the U.S. Department of the Interior's Office of Endangered Species to see if the proposed action may affect an endangered species.

EPA also follows a practice of informing the public of its proposals to issue cancellation notices so that registrants and other interested persons can also comment or provide relevant information before any final Notice of Intent to Cancel is issued. Registrants and other interested persons are invited to review the data upon which the proposal is based and to submit data and information to address whether EPA's initial determination of risk was in error. In addition to evidence relating to risk, comments may include evidence as to whether any economic, social and environmental benefits of use of the pesticide outweigh the risks of use.

If, after reviewing the comments received, EPA decides to issue a Notice of Intent to Cancel dicofol products, any adversely affected person may request a hearing to challenge the action. In the hearing, any party opposing cancellation would have an opportunity to present data, witness testimony, and other evidence to show that the registrations of the pesticide should be permitted to continue. Other interested parties could intervene to present evidence in favor of cancellation. At the end of the hearing EPA would decide on the basis of the evidence presented whether or not to cancel or restrict the registration of pesticide products. If no hearing is requested, each registration would be cancelled by operation of law 30 days after receipt by the registrant or publication in the Federal Register of the final notice, which ever occurs later.

III. Summary of Risk and Benefit Determinations

A. Risks of Adverse Effects on Wildlife

EPA's principal concern with the continued use of dicofol as currently manufactured is that nontarget wildlife, particularly endangered species, may be adversely affected by the DDTr in dicofol products, and that dicofol itself may affect avian reproduction.

1. *Composition of dicofol products.* All dicofol products contain as impurities a

group of chemically similar compounds including the o,p' and p,p' isomers of DDT, DDE, DDD, and of a chemcial referred to as extra-chlorine DDT (C1–DDT). In C1–DDT, a chlorine atom substitutes for the hydrogen atom on the ethane moiety of DDT or the hydroxy group on the ethane moiety of dicofol. These DDT-related substances are collectively referred to as DDTr. The total amount of DDTr in different producers' dicofol products varies and the proportions of the different impurities comprising the DDTr portion also vary. Because the specific amounts and proportions of the DDTr compounds in the producers' products are considered trade secret or confidential business information, they are not being presented here. In the analyses used as the basis of the October 1984 proposed cancellation notice, EPA assumed that DDTr impurities constituted 10 percent of technical grade dicofol, which was a reasonable approximation of the amount of DDTr found in their registered technical dicofol products at that time. Subsequently, some dicofol registrations have been amended to indicate that DDTr constitutes no more than 2.5 percent of the technical dicofol in the product.

2. *Avian toxicity of DDTr.* The conclusion that dietary exposures to DDTr at levels below 1 part per million (ppm) would have significant adverse effects on avian reproduction is supported by a substantial body of laboratory and field data. Although DDE interferes with many aspects of avian reproduction, the best characterized effect is eggshell thinning which causes the eggs to break prematurely, interferes with gaseous exchange, and in other ways reduces the number of chicks being hatched. While field monitoring studies lack controlled or precisely known exposure information, they provide important indications of the dietary concentrations of DDE that are toxic to birds. Bald eagles, for instance, in Maine during the 1960s and 1970s experienced eggshell thinning and significantly impaired reproduction. During this same time period, DDE residues in eels and fish, which comprise 90 percent of the bald eagle diet in Maine, were below 0.3 ppm. Other data suggest that eastern brown pelicans may be producing thinner eggshells from feeding on food possibly containing as little as 0.1 ppm DDE. In Australia, monitoring of peregrine falcons found an average of 0.11 ppm DDE in the prey species, and eggshells were 20.4 percent thinner than those from the years prior to use of DDT. Other information on California brown pelicans supports similar inferences.

Laboratory studies have demonstrated that dietary exposure of birds to DDE at low levels, often in the 0.6 ppm to 3.0 ppm range, will cause significant thinning of eggshells. Effects have been experimentally demonstrated in a wide variety of species: Mallard, black duck, ring dove, American kestrel, barn owl, and screech owl.

Taken collectively, EPA finds that this body of information supports a conclusion that dietary exposure to DDE at levels lower than 1.0 ppm will cause significant adverse effects on reproduction in some avian species. Moreover, there is considerable scientific uncertainty concerning "no-effect" levels and the continuing reproductive problems in some wild populations as a result of exposure to DDTr. A "no-effect" level for eggshell thinning has not yet been established.

3. *Fish toxicity of DDTr.* Exposure of fish to DDT or DDE-contaminated food or water can interfere with fish reproduction. Studies have shown a correlation between the reproductive failure of sea trout and DDT residues in menhaden, a fish species that is a major source of food for sea trout. Flounder eggs in seawater containing 2 parts per billion (ppb) DDT showed abnormal development, and 39 percent of the exposed larvae had vertebral deformities at hatching.

4. *Environmental levels of DDTr.* Nationwide, levels of DDT and related compounds have generally declined since the 1972 cancellation of pesticide registrations of DDT products. The most recent monitoring data suggest, however, that DDE residues in freshwater fish, currently about 0.4 ppm, may have stabilized or are declining more slowly. A similar trend may be emerging for DDE residues in starlings, which presently average about 0.15 ppm. Likewise, although DDE residues in the wings of mallards and black ducks have declined since 1969, none of those decreases after 1976 has been statistically significant. Furthermore, the residues of DDE in ducks from the Pacific Flyway States (California, Colorado, Oregon, Arizona, and New Mexico) actually increased.

In addition to examining national trends, EPA analyzed monitoring data from four States in which large amounts of dicofol are used: California, Arizona, Texas, and Florida. More than 70 percent of all dicofol used is applied in these States. The use of dicofol is further concentrated in certain regions of these States. In these regions, levels of DDE are generally higher than in the rest of the country and these residues may exceed levels known to cause adverse effects on avian and fish reproduction.

5. *Dicofol's contribution to ambient DDTr residues.* Using a variety of approaches, EPA has determined that use of dicofol products contaminated with DDTr at levels approximately equal to a tenth of the active ingredient content would contribute significantly to the overall burden of DDT and related compounds in the environment.

One approach calculated the amount of DDTr added to the environment based on the total amount of dicofol applied. Approximately 1 million pounds of dicofol active ingredient are applied annually in California, and assuming 10 percent contamination with DDTr, this is equivalent to 100,000 pounds or 50 tons of DDTr yearly. Making the same assumption, the estimated annual contributions of DDTr for Arizona, Texas, and Florida are 12,600 pounds, 15,400 pounds, and 85,700 pounds, respectively.

EPA recognizes that much of the DDE detected in the environment in recent years is the result of the gradual dissipation of DDT pesticides applied prior to their cancellation in 1972. To evaluate the relative contributions of pre-1972 use of DDT and past and current use of dicofol, EPA prepared a mass-balance analysis for Kings County in the San Joaquin Valley of California. Assuming that dicofol use will not increase and other assumptions detailed in PD 2/3, the analysis demonstrated that, by 1984, a reasonable estimate of the environmental loading of DDTr from pre-1972 use of DDT was about 850,000 pounds in comparison to 200,000 pounds attributed to the use of dicofol. By the year 2000, EPA's analysis predicts that total environmental loading of DDTr would be about 450,000 pounds with continued use of dicofol with contamination of 10 percent DDTr, versus only 220,000 pounds if the use of dicofol ceased in 1984. In short, if EPA were to permit the continued use of dicofol at 1984 contamination levels, the residues of DDTr in the environment in the year 2000 could be almost twice as high as if dicofol use were prohibited.

EPA has also used other models to estimate the ambient environmental concentrations of DDTr that would result solely from use of dicofol assuming an average of 10 percent DDTr in the technical dicofol. EPA used a mathematical model to estimate the concentration of DDTr from dicofol use in the water of the Arroyo Colorado River in southern Texas. This model predicts that residues in the river system could stabilize eventually (reach

equilibrium) at approximately 9 parts per trillion (ppt). This concentration in water would result in DDTr residues of about 9 ppm in fish, a level harmful both to the fish and to fish-eating birds.

In addition, based on physical and chemical principles, EPA estimated that use of dicofol on cotton and other crops in Kings County, California, might result in food chain contamination at levels that would be likely to affect avian species adversely. Specifically, EPA predicted that migrating waterfowl could feed on chironomid midge larvae contaminated with as much as 1.4 ppm DDTr. Neither model assumed any other source of DDTr; adding in background levels of DDTr from pre-1972 DDT use would increase the amount of DDTr expected in the food chain.

6. *Risks of dicofol and its metabolites.* In addition to the considerable information on the risks to the environment posed by the DDTr contaminants in dicofol, a small body of data suggests that dicofol, itself, may adversely affect avian reproduction. Although the mechanism is not clear, it appears either that dicofol may be metabolized by some avian species to DDE or that dicofol, itself, may cause eggshell thinning. If either mechanism exists, then environmental residues of dicofol may pose a risk to nontarget wildlife, in addition to the risk attributable to the DDTr contamination of dicofol products.

The available data on the metabolism of dicofol do not definitively resolve the issue of whether dicofol residues are converted to DDE in animals. Each of the studies supporting such a conclusion is also susceptible to other interpretations. For example, in studies performed by different laboratories, dicofol with a known level of DDT contamination was fed to bobwhite quail and mallard ducks. For both species, test animals had levels of DDE residues higher than could be explained by the levels of DDE contaminants present in the dicofol. The researchers speculated that some of the dicofol was converted to DDE by the test birds. One dicofol registrant has suggested, however, that the elevated levels of DDE resulted not from the metabolism of dicofol by the test animals, but rather from the conversion, during the chemical analysis of the test animals' tissues, of residues of C1–DDT to DDE. No experimental data are available to prove or disprove the registrant's hypothesis. In another study, rats were intubated with a corn oil solution reportedly containing "pure" dicofol. DDE was subsequently found in all tissues except the blood and brain. Because the purity of the dicofol was not reported and no samples of the test material are now available for analysis, it is now impossible to determine whether the DDE residues came from DDTr contamination or the "pure" dicofol.

On the other hand, a preliminary report on dicofol metabolism in chickens shows no increase in levels of DDE above what would be expected from the presence of DDTr in the test material. Based on the preliminary report, EPA has many questions about the methodology and results of this study. EPA also questions whether a metabolism study in chickens is useful in assessing the likely metabolic fate of dicofol in other avian species, since gallinaceous birds (e.g., chickens) are known to be relatively insensitive to the effects of DDT and DDE compared to nongallinaceous birds (e.g., peregrine falcons).

The concern that dicofol itself thins eggshells is based upon the structural similarity of the dicofol molecule to DDE and upon information from two studies currently underway. Because the studies have not been completed and their methodology and conclusions have not been subjected to external peer review, EPA believes that it would be premature to rely heavily on these studies as the basis for regulatory action.

The difficulty of assessing the environmental risks of dicofol, apart from its DDTr contaminants, is made even more difficult because of the relatively small amount of information available on the residue levels of dicofol in the environment. EPA will require avian reproduction and metabolism studies, conducted with sensitive species, to address the issue of the effects of dicofol and its metabolites on avian reproduction. Additionally, EPA will require widespread environmental residue monitoring to determine the exposure levels of dicofol and its metabolites. While EPA is seeking more information on the extent of this risk, the possibility that dicofol may be metabolized to DDE in animal species or that dicofol thins eggshells remain serious concerns.

7. *Distribution of sensitive species in areas with high levels of use of dicofol.* As the last element of its analysis of the environmental risks of using dicofol, EPA investigated whether species sensitive to the adverse effects of dicofol were found in areas where use of dicofol has been concentrated. This investigation revealed that one or more highly sensitive species is present in each of the major use areas for dicofol, and that several are officially designated as endangered species by the Federal Government. In particular, the March 1986 OES Biological Opinion discussed several populations of endangered species that may be affected adversely by continued use of dicofol.

Of paramount concern was the endangered peregrine falcon in California (see Unit I above), but OES also stated that use of dicofol with levels of DDTr in excess of 0.1 percent raised concerns about peregrines in the Guadalupe Mountains of southeastern New Mexico because this population was experiencing reproductive failure and could be exposed to DDTr by feeding on prey species that migrate though areas of heavy dicofol use. OES also mised concern about the impact of heavy dicofol use in south Texas on brown pelicans in the Laguna Madre. OES noted that the brown pelicans, bald eagles, Everglade kites, and wood storks could be adversely affected by dicofol use in Florida. Finally, Arctic peregrine falcons could be exposed to contaminated prey while migrating through California, Florida, and the Texas Gulf Coast.

8. *Risk conclusions.* DOT and DDE are highly persistent, bioaccumulative compounds which are toxic to birds and fish. Avian species have been adversely affected by dietary exposure to DDE at levels below 1.0 ppm. Fish have also been adversely affected at exposure levels as low as 2 ppb DDT. Because of the chemical similarities between DDT and DDE and the other constituents of DDTr, EPA believes that there is a reasonable basis for assuming that these other DDTr substances have similar properties.

Further, EPA has determined that dicofol use is concentrated in areas where levels of DDE (from all sources) are presently high enough to impair both avian and fish reproduction and that these areas are inhabited by a number of sensitive, endangered species whose continued existence could be adversely affected by exposure to current levels of DDE. EPA also believes that DDTr contamination of current dicofol products is sufficiently high to make significant contributions to the overall levels of DDE and DDT in the above major use areas. This contribution would likely result in a slowing of the decline of DDTr residues in areas of dicofol use and would likely result in a stabilization of DDTr residues at levels which would continue to cause adverse effects in wildlife. Although some data suggest dicofol itself may thin eggshells and/or may be converted to DDE in animals and thus add to the risks associated with DDTr contaminants,

EPA lacks sufficient information to evaluate this possible risk.

Consequently, EPA concludes that the continued use of dicofol as currently formulated would adversely affect nontarget wildlife. This conclusion is consistent with Biological Opinion recently issued by OES that continued use of dicofol products at current levels of DDTr contamination is likely to jeopardize the continued existence of the endangered peregrine falcon and may adversely affect other endangered species (see Unit I above).

9. *Additional data requirements.* As discussed previously, the structural similarity of dicofol to DDT, the results of several wildlife studies, and monitoring data from areas of high dicofol use suggest the possibility of metabolic conversion of dicofol to DDTr or DDE. EPA is further concerned that dicofol may directly impair wildlife reproduction. These possibilities cannot be evaluated until data are available on the metabolism and effects of dicofol *in vivo.*

Although the dicofol registration standard required reproduction studies with bobwhite quail and mallard ducks, life-cycle studies of warm and cold water fish, and aquatic organism accumulation tests, additional data are needed. The studies required by the Registration Standard provide much useful data concerning the effects of dicofol, but the tests are not sufficient to address potential metabolic conversion of dicofol to DDTr or DDE or direct effects of dicofol itself. Expansion of the fish and aquatic accumulation studies to include residue analysis will partially resolve the data gaps. In the case of avian testing, however, EPA has concerns for the special sensitivity and vulnerability of raptors and other predatory birds. Therefore, EPA is requiring a reproduction and *in vivo* metabolism/residue test employing a minimum of two representative carnivorous and/or insectivorous bird species. The two test species must include one Passeriformes species (i.e., shrike or blue jay), and one species from either the Falconiformes or Strigiformes orders (i.e., hawks, falcons (e.g., kestrels), vultures, and owls).

These new tests replace the reproduction studies on the bob white quail and mallard duck required in the Registration Standard. The new tests are required on an expedited schedule and, when received by EPA, will be used to determine if dicofol itself, or dicofol with 0.1 percent DDTr contamination, poses an environmental risk. EPA will conduct a new hazard assessment employing these data, and will determine if further regulatory action is needed to protect endangered species and other fish and wildlife species.

B. Risk of Oncogenic Effects in Humans

1. *Introduction.* An oncogenic risk assessment generally consists of a qualitative hazard assessment, a dose-response assessment, an exposure assessment, and an overall characterization of the risk. Specific guidance for conducting risk assessments for cancer is found in EPA's "Proposed Guidelines for Carcinogen Risk Assessment," published in the **Federal Register** of November 23, 1984 (49 FR 46294).

For oncogenicity, the hazard assessment includes an examination of the available scientific data (e.g., long-term animal bioassays, short-term mutagenicity studies and any human data) to evaluate the weight of the evidence regarding the chemical's human oncogenic potential. The dose-response assessment includes mathematical modeling of experimental data to estimate the chemical's potency for inducing an oncogenic response, assuming that the chemical is, in fact, a human oncogen. The exposure assessment estimates the extent to which human populations are exposed to the chemical. In the case of dicofol, this exposure is to the general public through dietary intake, to applicators during mixing and application of the pesticide, and to fieldworkers working in treated areas. Finally, in the risk characterization step, the exposure and dose-response assessments are generally combined to provide some quantitative estimate of the potential oncogenic risk to humans. This quantitative estimate is tempered, however, by the overall weight-of-the-evidence judgment on whether the chemical is likely to be a human oncogen. In cases where the qualitative evidence is not sufficient to support a quantitative oncogenic risk to humans, EPA must rely on its qualitative risk determination, including consideration of the uncertainties involved.

2. *Qualitative hazard assessment.* In this section, the results of long-term animal studies on dicofol are discussed, followed by a presentation and evaluation of the supporting data relating to the carcinogenicity of the compound. The section closes with an integrated discussion, leading to a weight-of-the-evidence conclusion on whether dicofol may be a human carcinogen.

a. *Long-term animal studies of dicofol.* In its January 1985 evaluation of the carcinogenicity of dicofol, DDT, DDE, and DDD, EPA reviewed the results of a 1978 NCI bioassay in which male B6C3F1 mice exposed to dicofol at two dose levels (284 ppm and 528 ppm in the diet) were reported to have non-metastasizing hepatocellular carcinomas at elevated levels in both dose levels when compared to controls. There were no other statistically significant increases in tumors reported in either sex of mice. A concurrent study did not show any statistically significant increase in tumors in either sex of Osborne-Mendel rats. EPA has concluded that the NCI mouse study is valid.

b. *Supporting data sources.* Other types of information which may be helpful in evaluating the carcinogenicity of dicofol are somewhat limited. There are no epidemiological studies which can be used to assess the direct response of humans to the chemical.

EPA's "Guidance Document for the Reregistration of Pesticide Products Containing Dicofol" indicated that EPA had no information on the mutagenicity of dicofol and directed that the full battery of tests be submitted by December 1986. EPA's review, therefore, did not include mutagenicity studies on dicofol, per se.

Dicofol is structurally similar to other DDT-related chemicals, for example, DDE, a carcinogenic metabolite of DDT. It is possible that dicofol may be metabolized or interconverted in animals to DDT metabolites, such as DDE (see Unit III.A.6). In order to assess fully the potential of dicofol to be metabolized or interconverted to oncogenic DDT metabolites, further study is required. Results from metabolism studies in rats, which were required as part of the reregistration process and are due in December 1986, and in avian species, which will be required through a Data Call-In notice, may shed additional light on this issue. Until additional studies are submitted and validated, the possible metabolic link between dicofol and DDT-related compounds remains tentative.

It is also possible that the mechanism of toxicity could be related to the physical structure of the compounds and not to a particular, common metabolite. EPA's report noted the structural similarity between dicofol, DDT, DDE and DDD. Based on this structural relationship, a determination that DDT is a "probable human carcinogen" (EPA's category B2), and the NCI test results for dicofol, EPA concluded that the weight-of-evidence also argued for a B2 classification for dicofol.

Subsequently, EPA received comments and supplementary information from a registrant, the Rohm and Haas Company, concerning the

carcinogenicity of dicofol, DDT, and DDE. These comments asserted that short-term and chronic data on dicofol do not indicate that the compound is carcinogenic. Specifically, Rohm and Haas argued that the observed mouse liver tumors are not adequate evidence for carcinogenicity and that the DDT carcinogenicity data should not be used to characterize the oncogenic potential of dicofol.

In order to resolve some of the issues raised about the dicofol long-term study, EPA requested a reevaluation of the pathology slides by scientific personnel at the National Toxicology Program. These results, together with the original readings, are shown in the following Table 1:

TABLE 1—DICOFOL MALE MOUSE LIVER TISSUE RESULTS

Tumor type	Control	Low	High
Hepatocellular carcinomas:			
1985 NTP Reviews	2/18 (11%)	12/48 (25%)	9/47 (19%)
1978 NCI Review	3/18 (17%)	22/80 (44%)	35/47 (74%)
Hepatocellular adenomas:			
1985 NTP Reviews	0/18 (0%)	13/48 (27%)	23/47 (49%)
1978 NCI Review	0/18 (0%)	1/80 (2%)	1/47 (2%)
Hepatocellular carcinomas or hepatocellular adenomas:			
1985 NTP Reviews	2/18 (11%)	25/48 (52%)	32/47 (68%)
1978 NCI Review	3/18 (17%)	23/80 (46%)	36/47 (77%)

While the vast majority of tumors in the original study were classified as carcinomas, the more recent slide evaluation reports a more significant proportion of benign tumors (adenomas). This difference may reflect changes which have evolved during the intervening years in conventions in the pathology community for classifying tumors. The combined incidence of benign and malignant tumors shows little change.

The EPA Proposed Guidelines for Carcinogenic Risk Assessment (49 FR 46294) state that "there are widely diverging scientific views" about the significance of certain mouse liver tumors for assessing risk to humans, and give specific guidance for the assessment of such tumors. The Guidelines take the position that the mouse-liver-only tumor response, when other conditions for a classification of "sufficient" evidence in animal studies are not met, should be considered as "sufficient" evidence of carcinogenicity with the understanding that this classification could be changed to "limited" if warranted when a number of factors such as the following are observed:

(1) The occurrence of tumors only in the highest dose group and/or only at the end of the study.

(2) No substantial dose-related increase in the proportion of tumors that are malignant.

(3) The occurrence of tumors that are predominately benign, showing no evidence of metastasis or invasion.

(4) No dose-related shortening of the time to the appearance of tumors.

(5) Negative or inconclusive results from a spectrum of short-term tests for mutagenic activity.

(6) The occurrence of excess tumors only in a single sex.

(7) Other data.

In the following paragraphs, each of these factors is discussed as it relates to the available information on dicofol.

(1) *The occurrence of tumors only in the highest dose group and/or only at the end of the study.* The data in Table 1 indicate that tumors were observed in both dicofol dose groups. Statistical analysis of the data in Table 1 shows that, for the combined tumors (adenomas and carcinomas), statistically significant increases were observed at both the low ($p=0.0035$) and the high dose ($p<0.001$). Therefore, on this basis, there is no reason to change the classification from "sufficient."

This criterion also speaks of the time in the study at which the tumors occurred. In the case of dicofol, the design of the experiment did not call for interim sacrifice; therefore, definitive evaluation of time-to-tumor-occurrence cannot be made. However, it can be noted that the mortality of the animals during the study was not remarkable. This at least suggests that the liver tumors were generally not life-shortening and possibly did not occur until the end of the study.

(2) *No substantial dose-related increase in the proportion of tumors that are malignant.* Examination of the 1985 NTP slide diagnoses (Table 1), reveals that there is no statistically significant dose-response relationship for the malignant tumors (carcinomas). Therefore, this would argue for reclassifying the dicofol data as "limited."

(3) *Then occurrence of tumors that are predominately benign, showing no evidence of metastasis or invasion.* The data in Table 1 for the 1985 NTP review indicate that the ratio of percentage adenomas to percentage carcinomas is 0, 1.0, and 2.6 for the control, low dose and high dose, respectively. This observation, which is consistent with the lack of a dose-related increase in malignant tumors noted in (2) above, supports a conclusion that benign tumors are the ones which are predominately related to the administered chemical. Further, the carcinomas in this case show no evidence of metastasis. Therefore, this information is supportive of a classification of "limited" for dicofol.

(4) *No dose-related shortening of the time to the appearance of tumors.* As indicated in (1) above, the design of the experiment was such that this information could not be obtained.

(5) *Negative or inconclusive results from a spectrum of short-term tests for mutagenic activity.* As noted above, EPA was unaware of data on the mutagenicity of dicofol and required the registrants to submit such data. However, in its response to the Special Review, Rohm and Haas indicated the existence of numerous studies. Reviews by their pathology panel led to the conclusion that dicofol is "clearly not a mutagen and appears to have little, if any, clastogenic potential." While EPA has not reviewed these data, on the basis of this information and a 1982 International Agency for Research on Cancer (IARC) evaluation of the mutagenicity of dicofol, there may be some support for reclassifying the dicofol data as "limited."

(6) *The occurrence of excess tumors only in a single sex.* This is the case for the dicofol mouse study. Therefore, this supports a "limited" classification for dicofol.

(7) *Other data.* The male mouse liver tumor incidence is not corroborated by a positive response in either sex of a comparably conducted Osborne-Mendel rat study. Therefore, this does not support the higher classification.

In addition, in the mouse study there was no other apparent response beyond that seen in the male mouse liver, a response whose relevance to humans has been questioned. This low response, without corroboration in other target organs, would tend toward reclassifying to "limited."

c. *Weight of the evidence classification.* Taken as a whole, this analysis supports the conclusion that

the evidence for the oncogenicity of dicofol should be reclassified as "limited" (as opposed to "sufficient") from studies in experimental animals. The only factor weighing in favor in maintaining the "sufficient" classification, the presence of tumors at two dose levels, is outweighed by the other factors.

In reaching a final hazard assessment position, consideration was also given to: (1) The plausible, but unverified, structure-activity relationship with the DDT series; (2) the possible connection between dicofol and the DDT related compounds via metabolism; and (3) the lack of human studies. Based on all of these considerations, EPA concludes that, at this time, there is limited qualitative evidence to support a conclusion that dicofol may be a human carcinogen. According to EPA's proposed Guidelines, dicofol would be classified in Group C: "This category is used for agents with limted evidence of carcinogenicity in animals in the absence of human data." EPA does recognize that there is some evidence which might suggest a different classification and has requested additional information through the Registration Standard and a subsequent Data Call-In notice to resolve the remaining issues.

3. *Dose-response assessment.* The second step in the risk assessment process calls for generation of a dose-response estimate. The EPA Proposed Guidelines discuss approaches to the mathematical extrapolation procedures used in this process. The Proposed Guidelines were followed by EPA in the generation of its January 1985 report.

However, as a result of the reassessment of dicofol discussed above which has transpired since the January report, EPA has concluded that the current dicofol data base provides limited evidence in support of the conclusion that dicofol is a potential human carcinogen. The confidence in the quantitative aspect of the risk estimate is limited by the nature of the qualitative hazard assessment on which it is based. Therefore, EPA has concluded that, in this instance, no quantitative risk assessment should be used for regulatory purposes for dicofol.

4. *Risk characterization.* The data base for dicofol consists primarily of two long-term animal studies (rat and mouse) in which the only statistically significant increase in tumors was observed in the male mouse liver. While the incidence of combined adenomas and carcinomas of this response was statistically significant at both the low and high dose, the malignant tumors did not appear in a dose-related manner, nor did they appear to be metastatic. The benign, rather than the malignant, tumors responded proportionately as the dose increased. Coupling these observations with a lack of corroborating evidence within the study (i.e., responses in other tissues and sex), from studies in another species, and from mutagenicity, metabolism and human studies, EPA finds that, at this time, no reliance can be placed on any quantitative risk estimates for dicofol.

Notwithstanding that there is only limited evidence at this time to support a conclusion that dicofol is a potential human carcinogen, it should not be overlooked that dicofol does cause tumors in the livers of male mice. While the significance of this response, particularly in light of the mitigating factors discussed above, is difficult to assess, it is of concern to EPA. The data clearly indicate that dicofol can interact in vivo to generate an oncogenic response, albeit one whose relevance to humans is also difficult to assess. Additional data are being collected through the Registration Standard and a subsequent Data Call-In notice which are expected to shed more light on the matter.

EPA's position on the potential oncogenic risks from dicofol is consistent with the conclusions of the Panel that the evidence that dicofol is a potential human carcinogen is weak and that a quantitative risk assessment is not justified.

C. Benefit Determinations

Available data indicate that approximately 60 percent of dicofol usage is on cotton and citrus, 10 percent on apples, and 10 percent on a combination of ornamentals and turf (commercial) plus home garden sites. The remaining 20 percent is used on a wide variety of sites including fruits, vegetables, and field crops. Dicofol, unlike most of the viable alternatives, is a selective miticide, not a broad spectrum pesticide (insecticide/miticide). Consequently, because it does not affect beneficial insects such as pollinators and most parasites and predators, its use is recommended in many integrated pest management (IPM) programs. In addition, dicofol is effective against more types of mite species than most other miticides and has both contact and residual activity. Further, dicofol has fewer phytotoxicity problems than other miticides.

EPA has evaluated the pesticidal properties of dicofol and, where data permitted, has compared its effectiveness to that of other pesticides registered for the control of mites on the same sites. In evaluating the suitability of using alternatives to dicofol, EPA considered a number of factors such as: The pre-harvest interval; the pre- or post-harvest restrictions; the number, timing, and frequency of permitted applications; reentry interval; required safety equipment or restricted applicator use; and the pests controlled on particular sites. Other important factors that were considered (compared) in determining whether a pesticide is an acceptable alternative to dicofol included: Production cost; comparative efficacy (degree of control and yield); compatability in mixtures with other pesticides; phytotoxicity; effect on nontarget organisms; impact on IPM programs; local resistance limitations; and variations of efficacy at different temperatures.

To assess alternatives to dicofol, each use site was evaluated separately because there may be an alternative to the use of dicofol on one crop in a group of related crops (e.g., citrus) but there may be no alternative to dicofol for other crops in the group (e.g., oranges versus kumquats). In other situations, alternatives are available but their use will involve an unknown economic cost because of localized resistance, lower efficacy, or the need to modify the applications. For a number of these sites, the available alternatives are currently being rotated with dicofol as needed or on a yearly or within season basis to slow the development of resistance among them.

EPA has estimated the economic impact of cancelling dicofol registrations on cotton, citrus, apples and other minor uses. These impacts are summarized below.

1. *Cotton.* The greatest portion of the economic impact resulting from the cancellation of all dicofol registrations would be felt by cotton producers in the San Joaquin Valley of California and to a lesser degree in Arizona. Unlike most other cotton-producing areas of the United States, the San Joaquin Valley frequently encounters severe, early-season spider mite infestations. Available information indicates that, unless dicofol is used, these infestations cannot be controlled effectively without either imposing significant financial loss on growers and/or increasing the development of pest resistance to propargite, the only selective miticide alternative to dicofol. This would occur because all of the selective pressure for resistance would be from the continuous use of propargite. Propargite is phytotoxic to young cotton plants; therefore, it is estimated that growers would lose 3 to 5 percent in yield because it cannot be used early enough

BEST COPY AVAILABLE

in the season. Another registered material, sulfur, is ineffective under climatic conditions existing early in the growing season for cotton in the San Joaquin Valley. The unavailability of dicofol for early-season infestations would result in yield losses and increased control costs, which taken together, would increase the average variable cost of production (per pound of seed cotton) by 5 to 7 percent. For all San Joaquin Valley cotton producers who are current users of dicofol, the total impact would range from $11.2 to $17.7 million annually.

Cancellation of the use of dicofol on cotton would have considerably smaller impacts in areas outside the San Joaquin Valley. In Arizona, cotton producers now using dicofol could switch to propargite at an additional cost estimated to be approximately $3.62 per acre-treatment, or approximately $200,000 in the aggregate (a 1 percent increase in variable production costs). Use of other broad spectrum pesticides at no incremental costs is also possible where IPM systems are not currently established. In the Southeast United States and the Mississippi Delta, dicofol users could switch to monocrotophos or other possible alternatives at no incremental costs, unless they have a pest management program that would require propargite or sulfur as an alternative.

2. *Citrus (grapefruit, lemons, oranges).* The economic impacts of cancelling the use of dicofol on citrus (primarily grapefruit, lemons, and oranges) are estimated to be between $3.1 and $10.4 million annually due to the higher cost of using alternatives. This is a 1 to 2 percent increase in the variable costs of production. Based on current information, EPA does not expect significant impacts on yield or quality when alternatives are used. The available alternatives vary by region due to labeling limitations, differences in mite species, mite resistance, and climatic conditions. The alternatives include chlorobenzilate plus oil, oxythioquinox, propargite, cyhexatin, fenbutatin-oxide, and ethion plus oil.

3. *Apples.* EPA estimates that apple growers, primarily in the Northeast and Northcentral regions, would incur annual, incremental treatment costs ranging from $4.1 to $8.4 million. This is a 2 to 3 percent increase in the variable costs of production (e.g., more costly alternatives). This estimate reflects a substantial increase in EPA's estimate of dicofol usage in comparison with that made in the PD 2/3 and is based on more complete data submitted in public comments and collated by EPA since the PD 2/3. Dicofol fits into established IPM programs on apples, which are aimed primarily at spider mite control. Moreover, the dicofol usage on apples is increasing concurrently with reports of mite resistance to alternatives.

As in the case for citrus, the alternatives identified are currently used in rotation with dicofol; therefore, it is anticipated that their increased usage would further hasten development of mite resistance to them.

4. *Other minor uses.* EPA has concluded that there are no suitable alternative pesticides or nonchemical controls to replace dicofol registered on the following sites and site groupings: Some ornamentals and turf (commerical), home gardens (some ornamentals, a number of food crops), cucurbits (cucumbers, melons, pumpkin and squash), peppers, Bermudagrass (seed crop), cyclamen mite on strawberries, areas east of the Rockies for dry beans, and spider mites on tomatoes.

The use sites for which alternatives have been identified and costs estimated include: Stone fruits (apricots, cherries, peaches/nectarines, plums/prunes); caneberries (blackberries, dewberries and raspberries); figs; alfalfa (seed crop); sugarbeets (seed crop); red clover (seed crop); pears; peanuts; grapes; pecans; mints (peppermint and spearmint); hops; eggplant; strawberries; tomatoes; dry beans west of the Rockies; and field corn (California only). In general, pest scouting and monitoring are an important IPM component utilized in pest control on these and the principal sites discussed earlier.

Although the additional costs involved are low, on dry beans (California), field corn (California), melons, cherries, alfalfa (seed crop), Bermudagrass (seed crop), and mints and hops, the percentage of acreage treated with dicofol represents a significant portion of the acrage grown. The same appears to be true of ornamentals and turf (commerical) and the homegarden sites, but precise, reliable data are lacking.

The total cost of cancelling dicofol for all minor sites is estimated as approximately $2.2 to $4.3 million.

5. *Mite resistance to pesticides.* EPA recognizes that for some uses of dicofol there are benefits which are not readily demonstrable or quantifiable in monetary terms but which, nonetheless, may be important. One of these benefits relates to the impact of dicofol's cancellation on mite resistance. It is well established that intensive use of a pesticide creates selective pressures that may lead to pest populations resistant to that pesticide. This is more likely to be true of mite and insect species that produce many generations annually. Data show that mite species in some areas and crops are resistant to various registered miticides, including dicofol. The number of selective miticides is limited, and if that number is reduced, pest resistance may intensify or appear more rapidly than it would otherwise. This is the case with dicofol, which is the last chlorinated hydrocarbon miticide. EPA expects this phenomenon to be more significant in crops where mite infestations recur annually (e.g., some cotton, citrus, and apple acreage) than in crops where the level of mite infestations (i.e., economic vs. noneconomic) fluctuate widely from year to year. Where alternatives are available, the most common method of reducing the development of resistance appears to be rotating mite pesticides. This frequently is combined with monitoring mite populations and timing pesticide applications to reduce the number of treatments per season.

6. *Summary.* The immediate quantifiable impacts from cancellation of dicofol products would range from about $21 to $30 million per year, with the bulk of such impacts (approximately 90 percent of the total) accruing to producers of cotton in the San Joaquin Valley, citrus (mainly in Florida), and apples (mainly in the Northeast and Northcentral States) who are among the major current users of dicofol. Established IPM programs are a part of the overall determinations for pest management particularly for apples and San Joaquin Valley cotton. Given the competitive nature of agriculture and that in most cases only a small percentage of the crops would be affected, it is unlikely that the affected growers would be in a position to pass these incremental costs on to consumers since their commodities would be unable to compete with lower priced commodities sold by unaffected producers.

It must be recognized, however, that the range of $21 to $30 million represents a partial estimate of the total impact from cancellation. EPA was unable to quantify monetary benefits from dicofol use on a number of sites. In view of the usage on these sites, and given the lack of selective miticide alternatives for some crops, the impact from cancellation is likely to be significant for the affected producers of those crops. Therefore, should all of the potential developments actually come to pass (e.g., resistance, phytotoxicity from alternatives, etc.), the total impact from

BEST COPY AVAILABLE

cancellation would exceed the $21 to $39 million range.

IV. Initiation of Regulatory Actions

A. Introduction

This unit has several sections. The first, this Introduction, discusses EPA's reasons for concluding that dicofol products, as currently registered, should be cancelled unless certain modifications are made in the terms and conditions of registration. This Introduction also contains definitions of a number of terms used in the rest of this unit. The second section of this unit specifies the modifications in the terms and conditions of registration for federally registered pesticide products that are required for the products to remain registered. Section C explains how these requirements apply to intrastate pesticide products. Section D completes this unit and establishes provisions concerning the sale, distribution, and use of existing stocks.

1. *Statutory determinations.* Based upon the determinations summarized in Unit III, EPA has concluded that the use of currently registered pesticide products containing dicofol causes unreasonable adverse effects on the environment. A number of factors lead EPA to conclude that the risks of using dicofol outweigh its benefits, and, therefore, that cancellation is appropriate unless modifications are made to the product registrations. Most important is the evidence that dicofol contaminated with an average of 10 percent DDTr causes significant adverse effects on the environment by harming both fish and avian species, including endangered species. EPA realizes that some dicofol products now have no more than 2.5 percent DDTr in the active ingredient. EPA believes that these products also make a significant contribution of DDTr to the environment, and that the environmental risks, while somewhat lower, are qualitatively comparable to the risk from using more highly contaminated dicofol. Both the OES and the Panel agreed with EPA that it should cancel the registration of dicofol products because of the magnitude of these environmental risks. In addition to the risks to the environment, dicofol may pose a carcinogenic risk to humans. Although the evidence of carcinogenicity is weak, this risk cannot be ignored.

The fact that the estimated benefits of using dicofol, while approaching $40 million a year, are confined to certain geographical areas and crops, was also an important factor in EPA's decision. EPA recognizes that cancellation would have sizeable impacts on cotton growers in California and citrus growers in Florida, and to a lesser extent on apple growers in some Northern States, but these impacts should not significantly affect consumer prices or the national supply of these commodities. Dicofol applied to cotton and citrus accounts for the largest proportion of its use; the other sites to which dicofol is applied are generally considered minor uses. Thus, the impact of cancellation of uses, other than possibly cotton, would not be significant for the national agricultural economy, although some local impacts could be severe.

EPA has also concluded that dicofol products can meet the statutory standard for continued registration under FIFRA if certain modifications of the terms and conditions of registration are made by the registrants. (EPA's conclusion that the benefits of using dicofol would outweigh risks if certain changes are made, takes into account that the adverse effects on the peregrine falcons resulting from continued use of dicofol in California will be significantly mitigated by the nest manipulation project partly funded by the major producers of dicofol.) EPA has concluded that two kinds of modifications are necessary. First, registrants must reduce the level of DDTr contamination in dicofol products. EPA believes the registrants' proposed reductions, initially to less than 2.5 percent DDTr and within 2 years to 0.1 percent DDTr or less, should substantially reduce the environmental risks of using dicofol. EPA desires that the production, sale, and use of dicofol with these lower levels of DDTr contamination begin as quickly as feasible. Accordingly, EPA has established a schedule by which registrants must produce dicofol products with specified limits for DDTr contamination.

The second condition under which EPA will permit continued registration of dicofol products is the addition to the product label of a requirement that mixers, loaders, and applicators are to wear gloves while handling dicofol. The reasons for these two conditions are discussed below.

The registrants' proposed reduction in the level of DDTr contaminants in their technical products would significantly lower the amount of DDTr released into the environment as the result of using dicofol. Assuming that use of dicofol products does not increase significantly in the future, use of products contaminated with DDTr at 0.1 percent or less, the level which registrants indicate they can begin producing by late 1987, would result in the introduction into the environment of approximately 20 to 50 times less DDTr than results from use of currently registered dicofol products. At this proposed level of DDTr contamination, using the mass balance analytical techniques described by EPA in PD 2/3, by the year 2000, the new contribution of DDTr to the environment from the new product would be 1 percent of that attributable to use of DDT prior to its cancellation in 1972 and the old, more highly contaminated dicofol products. While this incremental contribution would not be free from risks, it would represent a substantial reduction in the level of risk to the environment. EPA agrees with OES that the expeditious phase-out of dicofol products containing more than 0.1 percent DDTr would be adequate to prevent jeopardy to the endangered peregrine falcon in California in view of other efforts being made to support recovery of this species. The reduction in DDTr contamination level should not noticeably alter either the price or effectiveness of dicofol products. Thus, the required reduction in DDTr will not affect the benefits of dicofol.

This notice establishes a schedule for reducing the level of DDTr contamination in dicofol products. Because the major producers of technical dicofol have informed EPA that they are already capable of or are making the active ingredient with less than 2.5 percent DDTr contaminants, EPA is requiring an immediate amendment to dicofol registrations to certify an upper limit on DDTr contaminants equivalent to 2.5 percent (or less) of the technical grade material. Registrants have indicated that production of dicofol with 0.1 percent or less DDTr requires construction of new manufacturing facilities, and that the facilities would not be operational until late fall of 1987. Moreover, the initial production from the new facilities may be inadequate to meet demand for dicofol products during the 1986 growing season. Accordingly, EPA is allowing registrants to sell and distribute stocks of dicofol containing between 2.5 percent and 0.1 percent DDTr until December 31, 1986. These additional quantities of dicofol products should help meet the demand for use of dicofol products. At the same time, these unavoidable additions to the existing environmental residues of DDTr will be relatively limited.

This schedule is consistent with the timeframes recommended by OES in its March 1986 Biological Opinion on dicofol. After concluding that the

continued use of dicofol would jeopardize the continued existence of the endangered peregrine falcon, OES listed, as part of one reasonable and prudent alternative, the phase-out of dicofol products contaminated with more than 0.1 percent DDTr. OES indicated that in California the sale of dicofol products containing more than 0.1 percent DDTr should stop by December 31, 1988.

In addition, although EPA has concluded that the evidence that dicofol is a potential human carcinogen is weak, EPA finds it prudent to require the use of chemical resistant gloves while handling products containing dicofol. The chances for human contact with the pesticide are greatest during the mixing, loading and application processes, and use of chemical resistant gloves should diminish skin contact with dicofol and reduce whatever risks to humans may result from such exposure. Such a requirement would have virtually no impact on the benefits of using dicofol.

In summation, based on available information, EPA finds that the risks posed by the use of dicofol would be outweighed by the benefits if certain modifications are made to the registration of dicofol products. Accordingly, EPA is issuing a "conditional" cancellation notice. In other words, registrations will be allowed to continue provided that the registrants amend their registrations to make the required modifications as described in Unit IV.B below.

EPA notes that its evaluation of the risks and benefits of using dicofol is based on available data and that if EPA receives additional information which changes its conclusions concerning risks or benefits, it might initiate different regulatory actions. EPA is particularly concerned that dicofol, independent of the effect of its DDTr contaminants, may pose a risk to the environment. If this concern is confirmed or if new data strengthen the evidence of the carcinogenicity of dicofol, EPA will consider further regulatory action.

2. *Definitions.* The following terms are defined for the purposes of this unit.

a. The term "existing stocks" refers to any quantity of dicofol products which is in the United States on the date of the publication of this notice and which is formulated as either an end-use product or manufacturing-use product.

b. The term "basic manufacturer" refers to any registrant who sells or distributes a manufacturing-use product containing technical dicofol or an end-use product containing technical dicofol produced from an unpurchased and/or unregistered source (integrated formulation system).

c. The term "formulator" refers to any registrant (or supplemental distributor registrant) who is not a basic manufacturer and who sells or distributes an end-use product containing dicofol.

d. The term "sale or distribution" and grammatical variants such as "sell or distribute" refer to the distribution, sale, offering for sale, holding for sale, shipping, delivering for shipment, or receiving and (having so received) delivering or offering to deliver a pesticide product.

e. The term "released for sale or distribution" refers to any quantity of a pesticide product that has left the physical custody of the registrant.

f. The term "products containing more than 2.5 percent DDTr" refers to manufacturing-use products and/or end-use products that contain DDTr contaminants at a level greater than 2.5 percent of the amount of technical grade dicofol in the product.

g. The term "products containing between 2.5 percent and 0.1 percent DDTr" refers to the manufacturing-use products and/or end-use products that contain DDTr contaminants at any level equal to or less than 2.5 percent and more than 0.1 percent of the amount of technical grade dicofol in the product.

h. The term "products containing less than 0.1 percent DDTr" refers to manufacturing-use and/or end-use products that contain DDTr contaminants at any level equal to or less than 0.1 percent of the amount of technical grade dicofol in the product.

B. Requirements for Complying with This Notice—Federally Registered Products

The registrant of a product containing dicofol must submit an application for amended registration, as specified below, within 30 days of publication in the **Federal Register** or receipt by the registrant of this notice, whichever is later, in order to be allowed to continue to sell and distribute the product. Refer to Unit VI.A of this notice for directions on how to submit an application for amended registration. This unit sets out substantive requirements for the application for amended registration.

1. *New Confidential Statement of Formula.* Registrants of dicofol products must apply to amend their registrations to reflect the composition of their products on a new Confidential Statement of Formula. For each manufacturing-use product and each end-use product, the registrant must also establish an upper certified limit for DDTr equal to or less than 2.5 percent of the amount of technical grade dicofol in the product. The Confidential Statement of Formula must be accompanied by information showing that the registrant can produce his product with no more DDTr than the amount certified as the upper limit.

If the application is otherwise acceptable, the amendment will be approved conditionally. The amended registration will be conditioned on submission and approval before March 30, 1988, of an application for amended registration which revises the composition of the product to establish a new upper certified limit for DDTr equal to or less than 0.1 percent of the amount of technical grade dicofol in the product. As before, the application must be accompanied by information showing that the registrant can produce his product with no more DDTr than the amount certified as the upper limit.

The registrants have indicated their intention to reduce the level of DDTr contamination to 0.1 percent according to the schedule specified in this notice. EPA intends to monitor the registrants' progress closely to assure that this schedule is met and, if circumstances warrant, to take appropriate regulatory action under FIFRA.

2. *Revised labeling.* Registrants of dicofol products who apply for amended registration to certify an upper limit for DDTr between 2.5 percent and 0.1 percent of the technical dicofol must also apply to revise their labeling to including the following statements.

a. On the top of the front panel add the statement: Not to be sold, offered for sale, held for sale, shipped, delivered for shipment, offered for delivery, or received after December 31, 1988. Not to be used after March 31, 1989. Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, of the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

b. In the beginning of the directions for use add: Skin contact with this pesticide may be hazardous; wear chemical resistant gloves when mixing, loading, or applying this product.

Registrants of dicofol products who apply for amended registration of their products to certify an upper limit for DDTr equal to or less than 0.1 percent of the technical dicofol in the product must delete the statement in item a above.

The registrations of all dicofol products containing greater than 0.1 percent DDTr are cancelled on December 31, 1988. Selling, offering for sale, holding for sale, shipping, delivering for shipment, offering for delivery, or receiving of these products

after December 31, 1988 is a violation of this cancellation order.

C. Requirements for Complying with this Notice—Intrastate Products

The producer of an intrastate product is required to submit an acceptable application for Federal registration, or acceptably amend a pending application, within 30 days of receipt by the producer of this notice. (An intrastate product is a pesticide product that was initially registered by a State prior to 1972, that is distributed and sold solely within a single State, and that is in compliance with the requirements of 40 CFR 162.17.) To be acceptable, the application must comply with all of the requirements imposed on Federal registrations by Unit IV.B of this notice. Other requirements for an acceptable application are described in the Registration Standard for dicofol and pertinent EPA regulations in 40 CFR Part 162. Refer to Unit VI.B for directions on how to apply for Federal registration of an intrastate product.

D. Existing Stocks

The following paragraphs describe the conditions under which registrants and others may sell, distribute, and use existing stocks of dicofol products. The conditions depend on the level of DDTr contamination, the kind of product, and whether the registrant has released the products for sale or distribution. Existing stocks may not be sold, distributed, or used except as provided below.

1. *Existing stocks of dicofol already released by the registrant.* Any person, other than a basic manufacturer or formulator, may sell or distribute, or use in accordance with label instructions, any quantity of existing stocks of end-use products containing more than 0.1 percent DDTr until depletion, provided that such products were released for sale or distribution by the registrant before the date of publication of this notice.

2. *Existing stocks of products containing more than 2.5 percent DDTr not released for sale or distribution by the date of publication of this notice.* Any registrant may sell or distribute any quantity of existing stocks of dicofol products containing more than 2.5 percent DDTr provided that such stocks were released for sale or distribution by the registrant before June 30, 1986. Stocks released for sale or distribution after June 30, 1986 may be sold or distributed provided that the labeling includes the following statements:

On top of the front panel:

Not to be sold, offered for sale, held for sale, shipped, offered for delivery, delivered for shipment, or received and (having so received) delivered or offered for delivery after October 31, 1986.

Not to be used after June 30, 1987.

Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, of the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

In the direction for use section:

Skin contact with this pesticide may be hazardous; wear chemical resistant gloves when mixing, loading or applying this product.

The statement required on the front panel may be added by applying a sticker to the product container. The statements required in the use directions may be added in the form of supplemental labeling accompanying the product.

3. *Existing stocks of manufacturing-use and end-use products containing between 2.5 percent and 0.1 percent DDTr not released for sale or distribution by the date of publication of this notice.* Any registrant may sell or distribute any quantity of existing stocks of manufacturing-use or end-use products containing dicofol with between 2.5 percent and 0.1 percent DDTr provided that such stocks were released for sale or distribution by the registrant before August 27, 1986. Stocks released for sale or distribution after August 27, 1986 may be sold or distributed provided that two conditions are met: (1) Within 30 days of publication or receipt by the registrant of this notice, the registrant must submit a completed application for amended registration and submit five copies of draft labeling, amended to include the following statements:

On the top of the front panel add:

Not to be sold, offered for sale, held for sale, shipped, delivered for shipment, offered for delivery, or received after December 31, 1988. Not for use after March 31, 1989.

Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, of the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

In the beginning of the directions for use add:

Skin contact with this pesticide may be hazardous; wear chemical resistant gloves when mixing, loading or applying this product.

and (2) such existing stocks of dicofol products must bear the amended labeling when released for sale or distribution.

V. Comments of the Secretary of the United States Department of Agriculture, the Scientific Advisory Panel, and Other Public Comments

A. USDA's Response to the October 10, 1984 Federal Register Notice

The United States Department of Agriculture (USDA) responded to the October 10, 1984 **Federal Register** notice as well as the Position Document 2/3. Their comments are printed in full below:

Honorable Steven Schatzow,
Administrator [sic], U.S. Environmental Protection Agency,
Washington, D.C. 20460

Dear Mr. Schatzow: This is the United States Department of Agriculture's (USDA) response to the U.S. Environmental Protection Agency's (EPA) Preliminary Notice of Determination Concluding the Special Review of Pesticide Products Containing Dicofol.

State extension and research personnel responsible for pest control technology and recommendations were contacted by USDA concerning the agricultural needs for dicofol. These experts expressed the view that dicofol is an effective miticide, is economical, has been extensively used for many years and has not been a serious object of mite resistance. The USDA concurs with their assessment and believes that the following comments should be considered by the ageny in developing the final regulatory decisions.

1. EPA proposes a standard for cancellation with differs from that in FIFRA. FIFRA sec. 6 provides for notice of intent to cancel a registration "[i]f it appears to the Administrator that a pesticide . . . generally causes unreasonable adverse effects on the environment. . . ." PD 2/3 changes the meaning require only that "the pesticide appears to cause unreasonable adverse effects on the environment."

2. EPA fails to explain exactly how the risks of using dicofol were weighed against its benefits, which are acknowleged. In several places the document concludes arbitrarily that "these risks outweigh the benefits," or similar language. However, nowhere is any objective methodology for weighing risks against benefits explained. In the absence of such methodology, which could be used by any neutral observer to reach an independent conclusion when supplied with the facts, we can only judge that EPA's conclusion is predetermined. That is, EPA appears to conclude that any risk is unacceptable, no matter what the benefits of continued use might be. Also, the concept of weighing risks of reduced levels of DDTr in dicofol does not have a chance of objective evaluation because there is no definition of what those levels might be.

3. USDA believes that EPA, when studying the idealized model representing

environmental loads resulting from applications with dicofol, has not given sufficient consideration to undefined or unidentified sources of DDTr. Nor has EPA adequately considered variable and transitory loads contributed by background environmental residues. EPA points out in the document that background levels are transitory. USDA believes however, that evaluation of residues in wildlife specimens as representative of dicofol use loads may well be in error. This would be especially true for the analysis of migratory wildlife that could easily range into other geographic areas, perhaps including those where DDTr occurrence is acceptable, for example, Mexico.

4. Much of the evidence cited in the text of EPA's PD 2/3 is the result of earlier wildlife studies dealing directly with DDT as well as DDTr. Some of the evidence is the result of direct feeding studies which although relevant in the broader sense may not accurately describe the present situation. Additionally, the narrative of the PD 2/3 often refers to both DDT and the DDT homologs in a manner that suggests that all are implicated in this special review. However, EPA identifies the eight DDT homologs as the subject of regulatory concern. A valid question might be whether DDT-induced biological responses would accurately typify the same metabolic reactions with the same magnitude as those induced by DDT homologs. It would be interesting as well to determine whether U.S. Fish and Wildlife scientists who have monitored wildlife residues concur with EPA's assessment of dicofol as an indisputable source of the DDTr residues that have been identified in wildlife.

5. In the draft PD 2/3, EPA discusses possible oncogenicity resulting from exposure to dicofol formulations and states that evidence in support of that allegation may be presented in the forthcoming PD 4 final decision, if corroborating information can be obtained. USDA views this action as an unusual means of attaining a rational and judgmental conclusion insofar as the PD 4 is expected to present a regulatory decision, and would not allow adequate opportunity for comment.

6. The Department and State scientists question that there are satisfactory alternatives for nearly all uses of dicofol. The USDA report of "Dicofol Uses and Efficacy in Agriculture" shows that of 47 individual commodities or groups of commodities, only six were inconclusive about adverse effects that result from the loss of dicofol through regulatory action. These commodities were hops, mint, peas, onions, sugarbeets, and red clover seed. A seventh commodity group, ornamentals, reflected some lack of concern about the possible loss of dicofol, but that concern varied widely and inconsistently across geographical areas and plant varieties. The more important and major agricultural crops were presented as having significant dependence on dicofol.

7. Although EPA has assumed that regulatory removal of dicofol will have no adverse effect upon minor crops, USDA data indicated that the control of mites on certain crops would be difficult or impossible without dicofol. These were stated to be artichokes in California, Easter lily bulbs in Montana, figs in South Carolina, grapes in Michigan and California, ornamentals in Maine and New Jersey, beans in several states, homeowner uses in several states (house plants), lawns in Alabama, pecans in South Carolina, peppers in California, home grown plums in Illinois, and vegetables in several states. These examples do not include many instances where state specialists indicated that while registered alternatives might exist, they are not suitable due to various biological and/or economic reasons.

8. EPA expressed the view that overall, the removal of dicofol from the market and substitution with alternative miticides would result in no yield loss. USDA understands that the comments are intended to convey the idea that the same weight or volume of crop production would be achieved. Assuming this to be true in certain instances, USDA feels that yield is a single parameter in agricultural production that is meaningful only in the instance that time, energy, and costs of materials and equipment remain constant. USDA has shown in its report, that without dicofol one or more of those factors will necessarily increase. Thus, obtaining identical or similar yields with alternative miticides could have undesirable pest control and production consequences. In addition, State specialists have reported that some crops would be impossible to grow in certain production regions without the continued availability of dicofol.

9. EPA has described a potential initial economic impact of between 9.6 to 31.9 million dollars to cotton growers with the removal of dicofol, and projected a greater long term impact of 11.0 to 37.1 million dollars. The draft PD 2/3 indicates that this will primarily result in economic hardship to cotton growers in the San Joaquin Valley of California, many of whom would elect to grow less profitable crops. It was stated that the current national base acreage (in excess of 15 million acres) would enable U.S. cotton growers to fill the supply gap. USDA does not agree with this economic appraisal because of the following reasons.

(a) Even a 20 percent production loss as stated by EPA would be difficult to rationalize on grounds of production efficiency when it is considered that few geographic areas can compete on a per acreage production cost basis with the San Joaquin Valley. In the Valley, per acre yields of cotton are substantially higher than in any other State, except Arizona.

(b) EPA's Benefit Summary of PD 2/3 projected a reduction in budgetary outlay by the Federal Government to the San Joaquin Valley growers based on a 4.4 to 7.3 million dollar projected cotton production loss. However, this loss value is certainly too low. If cotton production were to be sharply reduced, USDA believes that an attempt also should be made to add in the costs to the growers and to the local agricultural community that would be incurred through the necessary disposal of machinery, equipment, and facilities now used for cotton, and the acquisition of other equipment needed for the production of replacement crops.

(c) The unique agricultural environment of arid California is such that growers of less profitable crops than cotton will themselves be subject to additional economic stress. Obviously additional acreages of the San Joaquin Valley competing in their specific crop market could result in severe economic consequences due to price competition and the availability of adequate markets. Secondly, as the USDA assessment report has shown, there will be serious economic impacts on other crops due to increased production costs in the event that dicofol uses are cancelled.

10. EPA indicates that economic impacts to citrus growers are expected to initially range from 3.5 to 4.0 million dollars. Additionally, it is stated that 73 percent of dicofol use on citrus is applied in Florida. EPA concluded that the resultant increases in production costs in Florida would not be excessive and that it would be expected that those costs would be passed on to the public. USDA is concerned that the Florida citrus industry has been affected very badly in recent years, first by successive killing frosts that have destroyed major portions of the producing groves as far north as the St. John River citrus region and southward to the middle of the state. There is also a current crisis among some of the larger citrus nurseries in Florida resulting from the citrus canker. Taken together, the present prospect for the Florida citrus industry is one of risk and hardship. Alternative miticides might introduce biological problems as well as economic hardship as described in the USDA assessment report. It is extremely important for Florida citrus growers to be able to avail themselves of all available tools during the lengthy rebuilding, nonproductive years required for new orchard establishment.

USDA believes that the information and the data provided by State and Federal scientists has established the critical need to retain dicofol uses for the agricultural community. We further believe that sufficiently low levels of DDTr in the product can be achieved and EPA is encouraged to work closely with the basic producers toward this end.

We are forwarding with this letter an updated copy of our report and copies of the information we received from the field. We are also providing copies of this material to the Rohm and Haas Company at their request.

USDA believes that the need and use of dicofol is important in pest control technology and recommends its continued registration. The Department appreciates the opportunity to have cooperated in this important agricultural decision.

Sincerely,

Charles L. Smith,

Coordinator, Pesticides and Pesticide Assessment.

Dated: December 11, 1985.

B. USDA's Response to the August 15, 1985 Federal Register Notice

The USDA responded to the August 15, 1985 amended Federal Register

notice. Their comments are printed in full below.

Mr. Steven Schatzow,
Director, Office of Pesticide Programs, U.S. Environmental Protection Agency, Washington, DC 20460.

Dear Mr. Schatzow: This is in response to your letter of August 12 forwarding a revised PD 2/3 for the pesticide chemical dicofol. EPA is to be commended for its rational approach in this document.

We also appreciate your acceptance of many of the comments we gave you in December 1984. We anticipate that those comments will be published in the next Federal Register notice.

Sincerely,

Charles L. Smith,
Coordinator, Pesticide and Pesticide Assessment.

Dated: September 13, 1985.

C. EPA's Response to the Comments of the Secretary of the United States Department of Agriculture

EPA appreciates the cooperation of the USDA in providing comments on the proposed regulatory decision concerning dicofol. Following is a point-by-point response to USDA's December 11, 1984 comments. No response to the September 13, 1985 comments is considered necessary.

1. EPA believes that the standard applied in deciding whether to propose cancellation of the registrations of dicofol products, both in the PD 2/3 and in this final Notice of Intent to Cancel, is the standard prescribed by FIFRA sec. 6. FIFRA sec. 6(b) provides that, "If it appears to the Administrator that a pesticide or its labeling or other material required to be submitted does not comply with the provisions of this Act or when used in accordance with widespread and generally recognized practice, generally causes unreasonable adverse effects on the environment, . . ." the Administrator may issue a Notice of Intent to Cancel the registrations of the pesticide. Because of the definition of the term "unreasonable adverse effects," this standard directs EPA to balance the risks against the benefits of using a pesticide and, if risks generally outweigh the benefits, EPA may propose cancellation. As explained in Units II and IV, this is the analysis used by EPA.

2. EPA is unaware of any objective methodology for weighing risks against benefits that adequately takes into account all relevant factors. Therefore, EPA necessarily makes a policy judgment. Such decisions, however, are hardly arbitrary and predetermined, as evidenced by the regulatory changes that often take place from the PD 2/3 to the PD 4 stage of a Special Review. EPA disagrees with USDA's assertion that the weighing of risks of reduced levels of DDTr in dicofol does not have a chance of objective evaluation because there is no definition of what those levels might be. The levels of DDTr were estimated, the corresponding effect on exposure was evaluated, and a determination was made on whether the risks to the environment posed by such effects outweighed the benefits of use. Unit IV of this notice contains a more extensive discussion of EPA's analysis than appeared in PD 2/3.

3. The model used to predict residues of DDTr in the environment resulting from use of dicofol incorporated realistic assumptions into its calculations. The model assumed a zero background level of DDTr. To the extent that there would be background levels, they would only increase the exposure and hence the risk to wildlife. While it is true that migratory wildlife could be exposed to DDTr in other geographic areas where the use of DDT may be legal, EPA's models and calculations do not include such routes of exposure. Thus, the models did not intentionally overestimate exposure to DDTr from dicofol use as USDA implies.

4. Although USDA states that the use of laboratory studies to evaluate the effects of DDT on avian reproduction "may not accurately describe the present situation," USDA gives no reasons for this conclusion. EPA believes that laboratory studies of the toxicity of DDT to wild birds represent the best way of evaluating what levels of DDT will cause adverse effects on avian species. In evaluating the risks of DDTr, EPA examined the results of studies using both DDT and DDE, including the p,p' and o,p' isomers of each chemical. The data base on these four substances was extrapolated to the other components of DDTr, because the homologs have not been studied extensively and because these homologs may convert to DDE. Finally, EPA has never asserted that dicofol is an indisputable or sole source of DDTr residues found in wildlife.

5. USDA's concern that it may not have adequate opportunity to comment on the possible oncogenicity of dicofol before EPA issues its PD 4 final decision is now moot. EPA asked for comment from USDA on the revised PD 2/3 which extensively discussed the oncogenicity of dicofol. USDA had no comment.

6. The issue of availability of economically feasible alternatives has been addressed at length in the revised benefit analysis in Unit III.C of this notice. Specifically, the analysis points out that with the cancellation of dicofol there would be no selective alternative miticide available for use on cucurbits, Bermudagrass (as a seed crop), peppers, dry beans east of the Rockies, spider mite control on tomatoes, a number of ornamentals, and many homeowner crop and ornamental sites. A number of other sites have only a single selective miticide alternative. In general, there is no question that benefits are derived from the use of dicofol in the production of a number of crops. Indeed, the objective of the benefits analysis was to measure the magnitude of such benefits. In the revised benefits analysis, the aggregate impact of cancellation of the uses of dicofol was estimated, at a minimum, to range from roughly $20 to $40 million per year (measured as increased production costs to agricultural producers).

7. As stated above, the revised benefits analysis addresses the impacts of cancelling dicofol use on minor crops. While it is true that for minor sites there would not be a large economic impact when compared to agricultural income as a whole, EPA nevertheless recognizes that there will be significant impacts on some individuals and growers. It should be noted, however, that dicofol is not registered for artichokes as stated by USDA.

8. For those crops which EPA evaluated for alternative miticides, none appeared to have significant yield losses, with the exception of cotton in the San Joaquin Valley. In the latter case, in most years, alternatives would have to be applied too late in the season to prevent a percentage of the early-season spider mite damage. EPA did not evaluate other crop and ornamental sites in enough detail to quantify the impact of cancelling the use of dicofol. EPA recognizes, however, that the lack of dicofol would cause significant losses on certain crops and ornamentals, nationally or in areas where resistance or other local factors limit or restrict alternatives. On a number of sites where integrated pest management practices are used, few if any selective alternative miticides are available.

9. USDA disagrees with EPA's evaluation of the impacts of dicofol on cotton growers in California. This disagreement is based in part on a misunderstanding of EPA's benefits analysis. Contrary to USDA's comment, at no time did EPA project a 20 percent loss in production in the San Joaquin Valley as a result of cancelling dicofol. It must be kept in mind that the objective of a benefits analysis is to measure the economic impact resulting from the cancellation of a pesticide not only on production, but also on the agricultural economy in general,

consumers, and the overall society. The estimation of such impacts does not suggest that the end result will be optimal from the cotton producer's perspective. Given accurate information on both the risks and benefits of dicofol, one can hopefully make a risk/benefit decision which is optimal from society's viewpoint.

The revised cotton analysis concluded that few if any producers would be forced out of cotton production in the San Joaquin Valley. This revised estimate reflects the use of more detailed estimates of cotton production costs which show that, given expected cotton yields and prices (based on long term averages), San Joaquin Valley growers would sustain reduced profits, but would not be forced out of the cotton business.

10. USDA's concerns over the impact of dicofol's cancellation on citrus are valid and the benefits analysis has been revised accordingly.

D. Comments of the Scientific Advisory Panel

EPA transmitted the PD 2/3 to the Scientific Advisory Panel (Panel) for review. At that time, the Panel was asked to comment on the environmental concerns. On April 17, 1985 the Panel responded to EPA. EPA then sent to the Panel an amended notice in draft form concerning EPA's concerns with the oncogenicity of dicofol. On July 8, 1985, they responded to EPA. Because FIFRA requires that the Panel's comments be printed, comments from both meetings are reproduced in their entirety.

1. *Comments following the April 1985 meeting:* Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), Scientific Advisory Panel.

Review of a Set of Scientific Issues Being Considered by EPA in Connection with the Special Review on Dicofol.

The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel (SAP) has completed review of a number of scientific issues associated with the Special Review of the pesticide dicofol. The review was conducted in an open meeting held in Arlington, Virginia, on April 17, 1985. All Panel members except Dr. Richard Griesemer and Dr. Rosmarie von Rumker were present for the review.

Public notice of the meeting was published in the Federal Register on Friday, March 29, 1985.

In consideration of all matters brought out during the meeting and careful review of the scientific issues in connection with the review of dicofol, the Panel unanimously submits the following report:

Report of SAP Recommendations

The Scientific Advisory Panel has reviewed the dicofol Position Document 2/3 and other materials prepared by EPA, as well as materials provided by the principal registrant, Rohm and Haas Company. On the basis of this review, and the testimony presented at the April 17 meeting, the SAP would like to make the following statements:

Clearly, there are many unresolved differences between the Agency position and that of the principal registrant, differences which, in many cases, cannot be easily resolved. Given the current high DDTr levels in the compound, the recommendation in the PD 2/3 document that dicofol registrations be cancelled might well be justified on environmental grounds, despite the fact that all factors going into the proposed decision are not necessarily well founded. However, if the proposed reduction of DDTr contamination levels to 0.1 percent is implemented, then dicofol use does not appear to the Panel to represent a threat to the environment, including endangered species.

The proposed contamination reduction program, from the present level of 5.75 percent down to 2.5 percent shortly, with 0.1 percent to be reached by the Spring of 1987, is adequate and appropriate, and the Panel recommends that the Agency use this as guidance in its regulatory activities relating to dicofol.

The Panel also urges that metabolism and field studies currently underway be carried to completion at an early date.

Finally, the SAP urges that all affected parties, including EPA, the registrants, and appropriate State officials, work together to ensure that an adequate monitoring system is put in place in order that future levels and trends of DDTr in the environment may be accurately known.

For the Chairman:

Certified as an accurate report of the findings:

Philip H. Gray, Jr.,

Executive Secretary, FIFRA Scientific Advisory Panel.

Dated: April 17, 1985.

2. *COMMENTS FROM THE JULY 1985 MEETING,* Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel.

Review of the Oncogenicity Issue Being Considered by EPA in Connection with the Special Review on Dicofol.

The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel (SAP) has completed review of the issue of oncogenicity being considered by the Agency in connection with the Special Review of the pesticide dicofol. The review was conducted in an open meeting held in Alexandria, Virginia, on July 7, 1985. All Panel members were present for the review except for Dr. Rosmarie von Rumker. Public notice of the meeting was published in the Federal Register on June 21, 1985. In consideration of all matters brought out during the meeting and careful review of the scientific issues in connection with the review of dicofol, the Panel unanimously submits the following report:

Report of SAP Recommendations

The Scientific Advisory Panel has reviewed the dicofol Position Document 2/3 and other materials prepared by EPA, as well as materials provided by the principal registrant, Rohm and Haas Company. In response to the four scientific questions posed to the SAP by the Agency, each question is listed below, together with the Panel's response:

Question

1. Examining the carcinogenicity data base of dicofol alone (i.e., the NCI study, the Maronpot re-reading of the slides, the short term results, etc.) and independent of consideration of structurally related compounds, how strong is the weight-of-evidence case that dicofol is a potential human carcinogen?

Response

The SAP believes that the evidence that dicofol is a potential human carcinogen is weak.

Question

2. Given what we know about the metabolism of dicofol and related compounds (e.g., DDT and DDE), to what degree should the Agency incorporate consideration of DDT and DDE data in reaching a weight of the evidence on the potential human carcinogenicity of dicofol?

Response

Consideration of structural relationships between different compounds can be a powerful tool for determining priorities for testing, but should not be used as a basis for regulatory action. Based on existing data, there is no evidence that dicofol is metabolized to DDT, DDE, or their metabolites. Therefore, EPA should not incorporate considerations of DDT and DDE data in reaching a weight-of-evidence judgment on the potential human carcinogenicity of dicofol.

Question

3. The Science Advisory Board has noted that on the spectrum of weight of the evidence for potential human carcinogenicity a point is reached at which use of the data for a quantitative risk assessment can no longer be justified. From this perspective, is a quantitative risk assessment for dicofol justified?

Response

The Panel believes that a quantitative risk assessment for dicofol as a carcinogen cannot be justified. The SAP further suggests that such a risk assessment be omitted from dicofol documents until there are sufficient data to justify such an assessment.

Question

4. Are the methods used for estimating human exposure to dicofol appropriate for the problems at hand? How should the results of those procedures be characterized: e.g. gross overstatements, gross understatements, or reasonable estimates?

Response

In the absence of sufficient information, the Panel is unable to characterize the dietary and applicator exposure estimates. The SAP

does believe however, that more realistic dietary exposure could be derived utilizing the new Tolerance Assessment System.

For the Chairman:

Certified as an accurate report of Findings:

Philip H. Gray, Jr.,

Executive Secretary, FIFRA Scientific Advisory Panel.

Date: July 29, 1986.

E. EPA Response to Comments of the Panel

The Panel commented concerning the registrants' proposal to lower the DDTr contamination level to 0.1 percent and the resulting enivronmental impacts. EPA generally agrees with this comment that this lower DDTr contamination level will not cause unreasonable adverse effects on most non-target species. EPA, however, agrees with the OES Biological Opinion concerning the impact of the continued use of dicofol on endangered species.

EPA agrees with the Panel concerning the need for metabolism and field studies to be completed at an early date. Poultry and rat metabolism studies are nearing completion and will be finalized by December 1986. Additionally, EPA will require reproduction and metabolism tests in sensitive avian species.

In regard to the Panel's comments urging that EPA, the registrants, and State officials work together to establish systems for the monitoring of DDTr levels in the environment, EPA is receiving and examining data that are collected through monitoring programs established by Federal and State agencies. For example, California, where use of dicofol accounts for as much as one-half of the dicofol applied in the U.S., monitors annually for DDTr compounds in their inland waterways, and the U.S. Fish and Wildlife Service conducts a national monitoring program every 2 to 3 years for DDT and other organochlorine compounds in birds and fish. Also, EPA has a compliance monitoring scheme to ensure that registrants comply with the requirements for particular levels of DDTr in their dicofol products. Finally, EPA will require the registrants to conduct long-term environmental residue monitoring for dicofol.

EPA agrees with the Panel's conclusion that the evidence for the carcinogenicity of dicofol is weak. Although EPA believes that the structural similarity between dicofol and DDT, DDE, and related chemicals is a pertinent consideration, it does not change this overall conclusion concerning the weight of the evidence.

EPA also agrees with the Panel regarding the inappropriateness of conducting a quantitative risk assessment in this case and therefore the quantitative risk assessment has been omitted in favor of the qualitative one previously discussed.

F. Public Comments Received in Response to the Amended Notice

Comments were received from four respondents concerning the substance of EPA's proposed decision to continue the registration of dicofol registrations. Of these four comments, two were from the National Audubon Society and one from the National Resources Defense Council (NRDC) objecting to the proposed decision, and one from the USDA and Ohio Department of Natural Resources supporting the proposed decision. The substantive comments address four main issues: DDT and DDE contamination of the environment; monitoring of both registrants producing dicofol and the users of the end-use formulations; the classification of dicofol as a category C carcinogen; and the role of dicofol in integrated pest management in cotton.

1. *DDT and DDE contamination of the environment.* Both Audubon and NRDC argued that EPA had given inadequate weight to the facts that dicofol is contaminated with DDTr leading to further unacceptable DDTr contamination of the environment, that dicofol may possibly be metabolized or interconverted to DDE in the physical environment, that dicofol might metabolize to DDE in organisms, and that dicofol, itself, may possibly cause adverse environmental effects due to its close structural similarity to DDT.

EPA responds that in its modeling it used an average contamination level of 10 percent DDTr to determine whether there would be adverse effects to the environment. If the newly required dicofol products containing only 0.1 percent DDTr were used, this hundredfold reduction would not be expected to add appreciable amounts of DDTr to the environment and would not be likely to cause adverse effects to the environment.

EPA shares Audubon's and NRDC's concern about the possibility that dicofol might metabolize or interconvert to DDE in the environment. The available data on the metabolism of dicofol do not definitively resolve the issue of whether dicofol residues are converted to DDE in animals. EPA has a number of studies which support the conclusion that dicofol does convert to DDE, although such studies are also susceptible to other interpretations. On the other hand, there are metabolism studies which fail to indicate that dicofol is metabolized to DDE but none of these studies proves unequivocally that such conversion does not occur (see Unit III.A.6 above).

EPA has required the registrants to develop data on the environmental fate of dicofol as well as on metabolism of dicofol in other avian species. If, after such data are submitted and evaluated by EPA, dicofol is shown to convert as speculated, EPA will then reconsider its current position that dicofol with reduced levels of DDTr does not cause unreasonable adverse effects on the environment.

NRDC also commented on a report recently released by the California Department of Food and Agriculture (CDFA), entitled "Agricultural Sources of DDT Residues in California's Environment," which concluded that the source of DDTr residues in California is the previous legal use of DDT products. NRDC argues that the contribution of dicofol is not adequately assessed in this report. Additionally, the possibility of chlorinated DDT conversion to DDE in the environment should be included in a thorough assessment.

EPA has also received this report from CDFA. The report provides evidence that DDTr residues are still occurring throughout California's environment, but states that, "Contamination of other pesticides (dicofol) by DDT cannot account for the residues. . . . [O]n analysis of historical and empirical evidence, CDFA concluded that residues from legal applications of DDT, before its use was banned, appear to be the source of this contamination." In EPA's own analysis, assuming that the rate of dicofol usage remains approximately the same, it is projected that by the year 2000 the DDTr concentration within Kings County California (a county receiving some of the highest current annual loadings of dicofol) will be only about 1 percent higher than it would be if all dicofol (with 0.1 percent DDTr contamination) use had ceased in 1985. This projection assumed no environmental loading of DDTr due to environmental conversion of dicofol to DDE. If EPA's reviews of the required environmental fate studies shows that dicofol metabolizes or converts to DDE or any other DDE precursor, a new exposure assessment will be made.

Concerning the NRDC comment that CDFA does not estimate whether or not DDTr residues are higher where dicofol has been used, there have been attempts by California and Florida to measure the increase in environmental DDTr residues resulting from normal application of dicofol products. Neither

study identified a significant increase in DDTr residues. A residue increase is certainly possible, but an environmental monitoring study would have to be unusually sensitive in order to detect it. EPA will require the registrants to conduct studies to monitor the contribution of dicofol to environmental loads of DDTr.

2. *Monitoring.* EPA agrees with Audubon that dicofol monitoring is necessary. EPA will monitor the production of dicofol as Audubon proposes. The U.S. Department of the Interior is already extensively monitoring for DDT in wildlife and has been providing that information to EPA. EPA agrees with Audubon that monitoring of organisms in the place of application of dicofol is also needed to help determine if residues of DDTr are persisting or decreasing. As noted above, EPA will require such monitoring.

3. *Oncogenicity of dicofol.* NRDC objects to EPA's reliance on its "Proposed Guidelines for Carcinogenic Risk Assessment" published in the Federal Register of November 23, 1984 (49 FR 46294) for the reclassification of dicofol as a category C carcinogen. NRDC notes that the Science Advisory Board (SAB) recommended the deletion of certain criteria used for reclassifying the oncogenic response of a substance from sufficient to limited and NRDC argues that if those criteria were not considered in evaluating the data on dicofol, the evidence might be considered sufficient to support a quantitative risk assessment. The SAB recommended deleting the criteria of the occurrence of excess tumors in a single sex and the occurrence of metastases or invasion. EPA has considered this recommendation and the final draft of the guidelines will reflect the deletion of the evidence of metastases criterion. The criterion concerning the occurrence of excess tumors in a single sex was retained. Even with this revision, EPA's classification of dicofol would remain the same.

EPA. has also requested additional data to help augment the basis for its reclassification. EPA required the registrants to submit mutagenicity data on dicofol.

4. *Role of dicofol in integrated pest management.* NRDC makes a number of comments concerning the use of dicofol in integrated pest management (IPM) programs. Relying on the arguments of Dr. Ted Wilson of the Entomology Department of the University of California at Davis, an expert in IPM on cotton, NRDC contends that it is an overstatement to claim that dicofol has no effect on natural predators. NRDC also quotes comments submitted to EPA by Dr. Wilson stating that, "there should be stringent restrictions on the continued use of dicofol—even with the lowered DDTr concentrations." NRDC also notes that in these comments Dr. Wilson recommended a reduced spraying schedule for dicofol.

EPA contacted Dr. Wilson about his recommendations and in general, Dr. Wilson feels that his comments were taken out of context by NRDC. Dr. Wilson indicated that dicofol will affect some predatory species, but both sulfur and propargite (possible alternatives to dicofol on cotton) would negatively impact predator populations more severely than dicofol. Specifically, Dr. Wilson indicated that one application of dicofol will reduce predatory thrips nymphs about 18 percent and have little or no effect on predatory bug populations. Predatory mites, which are generally only of significance in early spring, would also be reduced in numbers by dicofol used during that period.

Dr. Wilson also states that he did not mean to suggest that "stringent restrictions . . . on the continued use of dicofol—even with lowered DDTr concentations" were necessary or appropriate. Finally, Dr. Wilson indicated that no more than one application of dicofol is necessary on cotton in most instances, but this view is in agreement with current use practices and recommendations.

When Dr. Wilson's comments are put into context, they do not conflict with IPM decisions and goals analyzed and used in EPA's Special Review documents.

VI. Procedural Matters

This notice announces EPA's intent to cancel the registrations of products containing dicofol unless the terms and conditions of registration are modified. This unit of the notice explains how current registrants may apply to amend their registrations to comply with the terms and conditions set forth in Unit IV.

Under sections 6(b) and 3(c)(6) of FIFRA, applicants, registrants, and certain other adversely affected persons are also entitled to respond to this notice by requesting a hearing on the actions that EPA is initiating. Unless a hearing is properly requested with regard to a particular registration or application, this action will become final by operation of law.

This unit of the notice explains how such persons may request a hearing on EPA's final cancellation and denial notice (and the consequences of requesting a hearing and failing to request a hearing in accordance with those procedures).

A. Procedure for Amending the Terms and Conditions of Registration to Avoid Cancellation or Denial of Application

Registrants affected by the cancellation actions set forth in this notice may avoid cancellation by filing an application for an amended registration which contains the label modifications detailed in Unit IV of this notice. This applicaion must be filed within 30 days of receipt of this notice, or within 30 days from the publication of this notice, whichever occurs later. Applicants for a registration subject to this notice must file an amended application for registration within the applicable 30-day period to avoid denial of their pending application.

Applications must be submitted to: By mail: Lawrence J. Schnaubelt, Product Manager 12, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460, (703–557–2386).

B. Intrastate Pesticide Products

This unit of the notice explains the procedures that must be followed to file an application, or amend a pending application, for Federal registration of an intrastate product. (On December 30, 1985, EPA sent all intrastate producers a letter requiring them to submit an application for Federal registraton by June 30, 1986.) It also explains the consequences of a failure to file a proper application in a timely manner.

1. *Procedure for filing for Federal registration of an intrastate product.* EPA will allow producers of intrastate products containing dicofol to distribute, sell, offer for sale, hold for sale, ship, deliver for shipment, or receive and (having so received) deliver or offer to deliver their products if they file a timely, proper application for Federal registration or amended application for registration. In either case, the application must conform to the requirements in Unit IV.B. of this notice. This application must be filed within 30 days of receipt of this notice, or within 30 days of publication of this notice, whichever occurs later.

Applicaitons must be submitted to: Stuart C. MacArthur, Registration Support and Emergency Response, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460, (703–557–2227).

Intrastate products released for shipment by the producer after June 30, 1986, must comply with the requirements

in Unit IV. This date is consistent with the deadlines established by the December 30, 1985, letter to intrastate producers requiring submission of applications for Federal registration. Compliance with these requirements does not eliminate the requirement to maintain any other restrictions on the purchase, possession, supervision, use, or disposal on the current label of the product.

2. *Consequence of filing or failing to file a proper, timely application.* Producers of intrastate products are required to submit applications for Federal registration when so instructed by EPA (40 CFR 162.17). As long as a producer submits a timely application, he may continue to distribute, sell, offer for sale, hold for sale, ship, deliver for shipment, or receive and (having so received) deliver or offer to deliver his products in intrastate commerce. If a producer fails to submit a timely application or amended application, EPA may take appropriate enforcement action against the producer for selling and distributing an unregistered pesticide under FIFRA sec. 12(a)(1)(A).

If the application submitted for Federal registration of an intrastate product containing dicofol does not comply with the provisions of this notice, EPA may deny the application. If EPA finally denies an application for Federal registration of an intrastate product, an distribution, sale, offering for sale, holding for sale, shipping, delivering for shipment, or receiving and (having so received) delivering or offering to deliver that product would be a violation of FIFRA and subject to possible enforcement actions.

C. Procedures for Requesting a Hearing

To contest the cancellation action set forth in this notice, Federal registrants may request a hearing within 30 days of receipt of this notice, or within 30 days from publication of this notice, whichever occurs later. Any other person adversely affected by the action described in this notice, may request a hearing within 30 days of publication of this notice in the Federal Register.

A registrant or other adversely affected party who requests a hearing must file the request in accordance with the procedures established by FIFRA and EPA's Rules of Practice Governing Hearings under 40 CFR Part 164. These procedures require, among other things, that all requests must identify the specific pesticide product(s) and the specific use(s) for which a hearing is requested, and that all requests must be received by the Hearing Clerk within the applicable 30-day period. Failure to comply with these requirements will result in denial of the request for a hearing. Requests for a hearing should also be accompanied by objections that are specific for each use of each pesticide product for which a hearing is requested.

Requests for a hearing must be submitted to: Hearing Clerk (A–101), Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

1. *Consequences of filing a timely and effective hearing request.* If a hearing on the action initiated by this notice is requested in a timely and effective manner, the hearing will be governed by EPA's Rules of Practice for hearings under FIFRA sec. 6 (40 CFR Part 164), as modified below. The hearing will be limited to the specific uses and specific product registrations for which the hearing is requested.

If the event of a hearing, the specific use or uses of the specific registered product which is the subject of the hearing will not be cancelled except pursuant to an order of the Administrator at the conclusion of the hearing.

2. *Consequences of failure to file in a timely and effective manner.* If a hearing concerning the registration of a specific pesticide product subject to this notice is not requested by the end of the applicable 30-day period, registration of that product will be cancelled, unless the registrant files a request for an amended registrations within the statutory period provided herein (see Unit VI.A).

If the registration of a product covered by this notice is cancelled by operation of law, the sale, distribution, use, and disposal of existing stocks is governed by the provisions of Unit IV.D of this notice.

D. Separation of Functions

EPA's Rules of Practice forbid anyone who may take part in deciding this case, at any stage of the proceeding, from discussing the merits of the proceeding *ex parte* with any party or with any person who has been connected with the preparation of presentation of the proceeding as an advocate or in any investigative or expert, capacity, or with any of their representatives (40 CFR 164.7).

Accordingly, the following EPA offices, and the staffs thereof, are designated as the judicial staff to perform the judicial function of EPA in any administrative hearing on this Notice of Intent to Cancel: the office of the Administrative Law Judge, the office of the Judicial Officer, the Administrator, the Deputy Administrator, and the members of the staff in the immediate office of the Administrator and Deputy Administrator. None of the persons designated as the judicial staff may have any *ex parte* communication with the trial staff or any other interested person not employed by EPA on the merits of any of the issues involved in this proceeding, without fully complying with the applicable regulations.

Dated: May 22, 1986.

John A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

LIST OF PUBLIC LAWS

Last List May 27, 1986

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

H.J. Res. 234/Pub. L. 99-317

Designating the week of May 18, 1986, through May 24, 1986, as "National Food Bank Week." (May 23, 1986; 100 Stat. 472; 2 pages) Price: $1.00

S. 8/Pub. L. 99-318

To grant a Federal charter to the Vietnam Veterans of America, Inc. (May 23, 1986; 100 Stat. 474; 4 pages) Price: $1.00

S. 874/Pub. L. 99-319

Protection and Advocacy for Mentally Ill Individuals Act of 1986. (May 23, 1986; 100 Stat. 478; 13 pages) Price: $1.00

S. 2229/Pub. L. 99-320

To make technical corrections in the higher education title of the Consolidated Omnibus Budget Reconciliation Act of 1985. (May 23, 1986; 100 Stat. 491; 1 page) Price: $1.00

S.J. Res. 246/Pub. L. 99-321

To designate May 25, 1986 as "Hands Across America Day", for the purpose of helping people to help themselves, and commending United Support of Artists for Africa and all participants for their efforts toward combating domestic hunger with a four thousand mile human chain from coast to coast. (May 23, 1986; 100 Stat. 492; 2 pages)

S. 2416/Pub. L. 99-322

To revise further the limitation applicable to chapter 37 of title 38, United States Code, for fiscal year 1986, for the purpose of implementing any order issued by the President for such fiscal year under any law providing for the sequestration of new loan guarantee commitments, and for other purposes. (May 23, 1986; 100 Stat. 494; 1 page) Price: $1.00

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

SEATTLE, WA

WHEN: July 22; at 1:30 pm.

WHERE: North Auditorium,
Fourth Floor, Federal Building,
915 2nd Avenue, Seattle, WA.

RESERVATIONS: Call the Portland Federal Information Center on the following local numbers:

Seattle	206-442-0570
Tacoma	206-383-5230
Portland	503-221-2222

SAN FRANCISCO, CA

WHEN: July 24; at 1:30 pm.

WHERE: Room 2007, Federal Building,
450 Golden Gate Avenue,
San Francisco, CA.

RESERVATIONS: Call the San Francisco Federal Information Center, 415-556-6600

Title 3—

The President

Proclamation 5494 of May 25, 1986

Critical Care Week, 1986

By the President of the United States of America

A Proclamation

Critical care medicine is a newly defined term that describes a category of medical treatments for patients who are in life-threatening situations and require immediate care. Coronary, respiratory, neonatal, trauma, and intensive care units are elements of critical care medicine. Patients may need such critical care after auto or boat accidents, heart attack, stroke, industrial injuries, or as a result of premature birth.

Critical care units, where they are available, often serve as many as 15 percent of a hospital's in-patients. Approximately 4,300 critical care units have already been established in the United States.

Public awareness of the special medical needs of the critically ill is important if America is to maintain its preeminence in the development and spread of medical advances in the area of critical care. Patients such as trauma and burn victims, AIDS victims, and postoperative patients with complications need critical care units within hospitals, and America needs the progress in treatment strategies these units and the professionals who staff them accomplish. The Society of Critical Care Medicine and its members throughout the United States are dedicated to improving the care of critically ill patients through research and education.

In order to increase public awareness of the importance of critical care medicine, the Congress, by House Joint Resolution 526, has designated the week beginning May 25 through May 31, 1986, as "Critical Care Week" and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning May 25 through May 31, 1986, as Critical Care Week. I call upon the people of the United States to observe this event with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 25th day of May, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Ronald Reagan

Presidential Documents

Proclamation 5495 of May 28, 1986

National Child Safety Month, 1986

By the President of the United States of America

A Proclamation

The future of our Nation is in the hands of our children. The effects of the loving support, the nurturing, and the instruction we give them now will be felt and magnified a thousandfold in the generations to come.

Sadly, not all of our children live in a warm, loving family environment. In every part of America there are children who are abused, exploited, or abandoned, or who run away from an intolerable home situation to endure worse depravity on the streets of our cities. Unfortunately, this mistreatment may also be a legacy passed on to future generations.

I believe that the American people can accomplish miracles when they are aware of the gravity of a situation. Fortunately, evidence that this awareness is growing is available in community after community across the country, as well as in the increasing involvement of voluntary associations and the private sector in developing programs to protect our children. We are recognizing anew our responsibility as neighbors and friends to extend a helping hand to families and children in trouble. We are examining once again the root causes of the various stresses that families face today, and we are acquiring a stronger sense of society's task to shield families, and especially children, from influences that undermine their sense of harmony, security, and well-being. We have begun to see more clearly than ever the importance of values to happiness and stability in the home. These are the best preventives at our disposal.

Where problems in the family have exhausted its resources to cope, much can be done now in the way of treatment and counseling. Communities can contribute by working together to provide safe shelters for runaways and to find adoptive parents for children in need of a loving home.

The Congress, by Senate Joint Resolution 293, has designated the month of May 1986 as "Child Safety Month" and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of May 1986 as Child Safety Month. I urge all Americans and governmental and private entities to observe this month with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of May, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Letter of May 28, 1986

Letter to the Honorable John S. Herrington, Secretary of Energy

Dear Mr. Secretary:

You are hereby authorized to perform the notification function vested in the President pursuant to Section 112(c)(1) of the Nuclear Waste Policy Act of 1982, 42 U.S.C. § 10132(c)(1).

This document shall be published in the **Federal Register.**

Sincerely,

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 51, No. 104
Friday, May 30, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 905

Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida; Amendment of Grade and Size Requirements for Certain Grapefruit and Oranges

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule relaxes the minimum external grade requirements for shipments of domestic, export, and imported seedless grapefruit from Improved No. 2 to U.S. No. 2 Russet and the minimum size requirements for interstate shipments of Temple oranges from size 125 (2⁹⁄₁₆ inches) to size 163 (2⁵⁄₁₆ inches). The relaxations for seedless grapefruit and Temple oranges are effective from May 19, 1986, through August 17, 1986. This rule also relaxes the minimum external grade requirements for interstate shipments of Valencia oranges from U.S. No. 1 to U.S. No. 2 Russet. The relaxation for Valencia oranges is effective from June 16, 1986, through September 28, 1986. These relaxations in the grade and size requirements for Florida Citrus recognize the grade and size composition of the remaining available citrus crop and the current and prospective demand conditions for this fruit.

EFFECTIVE DATE: Seedless grapefruit and Temple oranges for the period May 19, 1986 to August 17, 1986; Valencia oranges for the period June 16, 1986 to September 28, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC 20250; telephone: (202) 447-5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1521-1 and Executive Order 12291 and has been designated as a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities for their own behalf. Thus, both statutes have small entity orientation and compatibility.

It is estimated that about 95 handlers of Florida citrus are currently subject to regulation under the marketing order for Florida oranges, grapefruit, tangerines, and tangelos and that approximately 26 importers of grapefruit will be subject to this action under the grapefruit import regulation during the course of the current season and that the great majority of these groups may be classified as small entities. While regulations issued under this order and corresponding import requirements impose some costs on affected handlers and importers and the number of such persons may be substantial, the added burden on small entities because of this relaxation, if present at all, is not significant.

This rule is issued under the marketing agreement and Order No. 905 (7 CFR Part 905), both as amended, regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). These actions were recommended unanimously by the Citrus Administrative Committee at its May 13, 1986, meeting. The committee works with USDA in administering the marketing agreement and order program.

Florida Citrus Regulation 6 was issued on a continuing basis subject to modification, suspension, or termination upon recommendation by the committee and approval by the Secretary. The committee meets prior to and during each season to consider recommendations for modifications, suspension, or termination of the regulatory requirements for Florida oranges, grapefruit, tangerines, and tangelos. Prior to making any such recommendations, the committee submits to the Secretary a marketing policy for the season including an analysis of supply and demand factors having a bearing on the marketing of the crop. Committee meetings are open to the public and interested persons may express their views at these meetings. The Department reviews committee recommendations and information submitted by the committee and other available information, and determines whether modifications, suspension, or termination of the regulatory requirements would tend to effectuate the declared policy of the Act.

The minimum grade and size requirements, specified herein, reflect the committee's and the Department's appraisal of the need to relax the grade requirements applicable to domestic, export, and import shipments of seedless grapefruit and domestic and export shipments of Valencia oranges and the minimum size requirements for domestic shipments of Temple oranges. This rule recognizes current and prospective supply and demand for such fruit and is necessary to permit handlers to ship the remaining supply of marketable fruit to meet market needs. The Florida citrus shipping season is coming to a close and no problems with fruit quality, maturity, and size are expected in the marketplace because of the relaxations.

This rule temporarily lowers the minimum external grade requirement for domestic, export, and import shipments of seedless grapefruit from Improved No. 2 to U.S. No. 2 Russet while the minimum internal requirement remains U.S. No. 1 and the minimum size requirements for domestic shipments of Temple oranges from size 125 (2⁹⁄₁₆) to size 163 (2⁵⁄₁₆) during the period from May 19, 1986, through August 17, 1986. This amendment also lowers the minimum external grade requirements for domestic and export shipments of

Valencia oranges from U.S. No. 1 to U.S. No. 2 Russet while the minimum internal grade requirement will remain U.S. No. 1 during the period from June 16, 1986, through September 28, 1986. These relaxations in minimum grade and size requirements for such citrus recognize the grade and size composition of the available citrus supply, and current and prospective demand conditions for this citrus.

Under section 8e of the act (7 U.S.C. 608e–1), whenever specified commodities, including grapefruit, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically produced commodity. Thus, the grade requirement for imported seedless grapefruit (7 CFR 944.106) also must be relaxed to conform to the grade requirement for domestic shipments of Florida seedless grapefruit during the period specified. Under the terms of the import regulation prescribed in § 944.106(a) the grade requirement for imported seedless grapefruit automatically changes to conform to the relaxed grade requirement for domestic shipments of seedless grapefruit.

Based upon the recommendation and information submitted by the committee, and upon other available information, it is hereby found that regulation of domestic, export, and imported seedless grapefruit, domestic and export Valencia oranges, and domestic Temple oranges, as hereinafter provided, will tend to effectuate the declared policy of the Act.

It is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which these relaxations are based and the effective date necessary to effectuate the declared purposes of the Act. This rule relieves restrictions on shipments of Florida citrus and must be taken promptly to enable handlers to take advantage of the relaxed requirements. Also, handlers are aware of the relaxations and the effective dates and require no additional time to comply therewith.

7 CFR Part 908

[Valencia Orange Regulation 364, Amdt. 1]

Valencia Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This Amendment of Regulation 364 increases the quantity of fresh California-Arizona Valencia oranges that may be shipped to market during the period May 23–29, 1986. The amendment is needed to provide for orderly marketing of fresh Valencia oranges for the period specified due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: Regulation 364, Amendment 1 (§ 908.664) is effective for the period May 23–29, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC 20250, telephone: 202/447–5697.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act

and rules issued thereunder are unique in that they are brought about through group action of essentially small entities for their own benefit. Thus, both statutes have small entity orientation and compatibility.

It is estimated that approximately 123 handlers of Valencia oranges are subject to regulation under the marketing order and that the great majority of these handlers may be classified as small entities. While regulations issued may impose some costs on affected handlers and the number of such firms may be substantial, the added burden on small entities, if present at all, is not significant.

This amendment is issued under Marketing Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The actions are based upon the recommendation and information submitted by the Valencia Orange Administrative Committee (VOAC) and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This amendment is consistent with the marketing policy for 1985–86. The committee members were contacted by telephone on May 23, 1986, to consider the current and prospective conditions of supply and demand and recommended an increase in the quantity of Valencia oranges deemed advisable to be handled during the specified week. The committee reports that the demand for Valencia oranges is improving.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because there is insufficient time between the date when information upon which this regulation is based became available and the effective date necessary to effectuate the declared policy of the act. To effectuate the declared policy of the act, it is necessary to make the regulatory provisions effective as specified, and handlers have been notified of the amendment and the effective date.

Agricultural Marketing Service, Marketing Agreements and Orders, California, Arizona, Oranges, Valencias.

1. The authority citation for 7 CFR Part 908 continues to read:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 908.884 is revised to read as follows:

§ 908.884 Valencia Orange Regulation 364.

The quantities of Valencia oranges grown in California and Arizona which may be handled during the period May 23, 1986, through May 29, 1986, are established as follows:

(a) District 1: 480,000 cartons;
(b) District 2: 520,000 cartons;
(c) District 3: Unlimited cartons.

Dated: May 23, 1986.

BILLING CODE 3410-02-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 2

Criteria for Reopening Records in Formal Licensing Proceedings

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission is amending its regulations to codify and refine NRC case law criteria for reopening a closed evidentiary record in a formal licensing proceeding. Codification of these criteria will ensure that no uncertainty exists about what Commission regulations require for a motion to reopen a record. This amendment will facilitate proper and timely consideration of motions to reopen by the adjudicatory boards while maintaining fairness to all parties to a proceeding.

EFFECTIVE DATE: June 30, 1986.

FOR FURTHER INFORMATION CONTACT: Carole F. Kagan, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: (202) 634–1493.

SUPPLEMENTARY INFORMATION:

I. Background

On December 27, 1984, the Commission published in the Federal Register (49 FR 50189) a notice of proposed rulemaking which would codify and refine established NRC case law decision criteria under which the evidentiary record in a close formal license proceeding conducted in conformance with Subpart G of 10 CFR Part 2 may be reopened to admit new evidence. As detailed in the notice of proposed rulemaking, the Commission believes that, while the existing decision criteria have proved to be generally adequate, there is a need for further specification of the manner and degree of documentation required to support a motion to reopen a record. Some motions filed before an Atomic Safety and Licensing Board or Appeal Board were accompanied by voluminous, unorganized or poorly organized materials, with little evidence of any systematic effort by the movant to delete irrelevant or immaterial information. The task of sorting out the relevant evidence fell to the Boards. Not only does this situation result in delay in considering the merits of the motion, but it also carries the risk that some piece of evidence that the proponents consider especially crucial to their allegations might be overlooked.

To ensure timely and proper consideration of motions to reopen, the Commission is requiring that motions to reopen be accompanied by affidavits setting forth with particularity the bases for the movant's claim. It is required that each issue be identified separately. Allegations stemming from information provided by anonymous informants will be acceptable only if the informant is identified to the presiding officer and a request for an appropriate protective order is filed.

Thirteen comments were received on the proposed rulemaking. Nine of those comments came from electric utilities, their representatives, contractors and suppliers. Of these, four generally supported the rule and five did not because, in their view, it failed to impose a sufficient burden on proponents of motions to reopen. Two comments were received from environmental public interest groups which opposed portions of the rule as imposing too great a burden on proponents. The remaining two comments came from private citizens. One supported the proposed rule; the other was found to relate to a different proceeding and was rerouted to the proper docket.

II. Analysis of Public Comment

Comment: One commenter felt that the new rule should be labeled under 10 CFR 2.757, (Authority of a Presiding Officer to Regulate Procedures in a Hearing) rather than § 2.743a (Evidence).

Response: The Commission has decided that the rule should more accurately be renumbered as § 2.734. The sections numbered under § 2.730 set forth rules regarding motions. The standards for a motion to reopen a

record should therefore be set forth under this part. All further reference to this rule will be to § 2.734.

Comment: The Commission should further define the requirement in § 2.734(a)(1) which requires that a motion be "timely."

One commenter suggested that the timeliness standard should be changed to conform to that used in federal practice and stated in 6A J. Moore, *Moore's Federal Practice*, ¶¶ 59.04[13], 59.08[3] (2d ed. 1976). The commenter suggests that § 2.734(a)(1) read as follows:

> The motion must be based upon evidence discovered since the record was closed that could not, with reasonable diligence, have been discovered by the moving party before the record was closed.

Another commenter recommended a 30-day cutoff for timeliness "like those found in 10 CFR 2.700, 02 and 71" for appeals.

Response: The Commission believes that there is no need to further define what is meant by "timely." There appears to be no confusion as to what the term means. It has been amply defined both in federal practice (as in the definition suggested by the commenter) and in NRC case law. *See, e.g., Vermont Yankee Nuclear Power Corporation* (Vermont Yankee Nuclear Generating Station), ALAB–138, 6 AEC 520, 523 (1973) (whether the issues sought to be presented could have been raised at an earlier stage). The Commission also sees no reason to impose an arbitrary cutoff point.

Comment: Several comments were received which questioned the advisability of including the portion of § 2.734(a)(1) which provides an exception to the timeliness requirement for "exceptionally grave issues." One commenter stated that this exception was not in accord with NRC case law; another said that it was in accord with NRC case law, but should be eliminated.

Response: The exception to the timeliness requirement for "exceptionally grave issues" is founded in NRC case law. *Vermont Yankee Nuclear Power Corporation* (Vermont Yankee Nuclear Power Station), ALAB–124, 6 AEC 358, 365 n.10 (1973) (". . . a newly discovered but insignificant matter might not justify a reopening. The converse is not necessarily true, however, for if the problem raised presents a sufficiently grave threat to public safety, a board should reopen the record to consider it even if it is not newly discovered and could have been raised in timely fashion.")

No pressing reason, other than the avoidance of delay, has been advanced for eliminating that exception. The Commission believes that the public interest is better served if this narrow exception is retained. It must be understood that the Commission anticipates that this exception will be granted rarely and only in truly extraordinary circumstances.

Comment: One commenter has suggested that § 2.734(a)(1) be amended to add language to the effect that the "exceptionally grave issue" exception to the timeliness requirement should only be allowed "provided all other requirements of this section have been met."

Response: The Commission believes that this wording is unnecessary, because that requirement is already contained in the rule. The requirement of timeliness in only one of the requirements of § 2.734, and the exception for "exceptionally grave issues" goes only to fulfilling that requirement. It does not exempt the movant from any other requirement of that section.

Comment: One commenter suggested that the standard contained in proposed § 2.734(a)(3), which requires that a different result might be or might have been reached had the newly proffered evidence been considered initially, should further require that the new result be *materially* different.

Response; The Commission, while believing it to be implicitly understood that a closed record should not be reopened to consider peripheral issues, is adopting this suggestion. This change does not alter current requirements, but merely states explicitly a requirement that has always been understood to exist.

Comment: There were several comments on the criterion set forth in proposed § 2.734(a)(3), which requires that a motion to reopen demonstrates that a different result "*might be* or might have been reached had the newly proffered evidence been considered initially" (emphasis added). The commenters questioned whether the inclusion of this wording meant that the "different result" criterion would apply to the time period between the closing of the record and issuance of the Initial Decision.

Response: The words "might be" were added to address the situation where a motion to reopen is filed after the record is closed but before an Initial Decision is issued. As one commenter has intimated, this change was added to clarify a situation in which some licensing boards have assumed that the "different result" criterion is only applicable after the issuance of the Initial Decision. *See, e.g., Consumers Power Company* (Midland Plant, Units 1 and 2), LBP–83–50; 18 NRC 242, 248 (1983). However, as that commenter pointed out, a licensing board should be able to determine whether the information supplied by a movant could affect its decision even before that decision is reached. The final rule has been modified slightly to clarify this point.

Comment: Some commenters noted a discrepancy between the standard of proposed § 2.734(a)(3), which required that the motion demonstrate that a different result "might be or might have been reached had the newly proffered evidence been considered initially," (incorporating the "might have been reached" standard of *Pacific Gas and Electric Company* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB–598, 11 NRC 876, 879 (1980)) and the "would have been reached" standard found in other NRC case law and cited by the D.C. Circuit in *San Luis Obispo Mothers for Peace* v. *NRC*, 751 F.2d 1287, 1316 (D.C. Cir. 1984). The commenters argued that the "might have been reached" standards is vague and that the D.C. Circuit has endorsed the more stringent standard.

Response: Some conclusion may have been created by the NRC case law in this area. The Commission has, at various times, endorsed both standards without differentiating between them. In *Metropolitan Edison Company* (Three Mile Island Nuclear Station, Unit 1), CLI–84–18, 20 NRC 808, 809 (1984), the Commission stated that, in making its determination whether new information requires reopening of the record, it would use "the traditional standards for reopening," citing as an example ALAB–598, which was cited in the proposed rule as using the "might have been reached" standard. In using this standard, however, ALAB–598 cites to *Kansas Gas and Electric Company* (Wolf Creek Station, Unit 1), ALAB–462, 7 NRC 320, 338 (1978). This case, which was the case cited by the D.C. Circuit in *San Luis Obispo Mothers for Peace* v. *NRC*, 751 F.2d at 1318, uses the "would have been reached" standard. To further complicate matters, the Commission used the "would have been reached" standard in *Pacific Gas and Electric Company* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI–81–5, 13 NRC 361, 365 (1981).

The "different result" criterion was first imposed in *Northern Indiana Public Service Company* (Bailly Generating Station, Unit 1), ALAB–227, 8 AEC 416, 418 (1974). This decision used the "would have been reached" standard. It is this case which was cited by both the

D.C. Circuit and the Appeal Board in ALAB–500 (which cited it as using the "might have been reached" standard).

The actual inquiry to be performed falls between the two standards. The "would" standard may be read to imply that an ultimate conclusion must be reached before all evidence is considered. The "might" standard implies that reopening could be ordered even where a board is uncertain whether or not the new evidence is important. The inquiry should be, and has been, the *likelihood* that a different result will be reached if the information is considered. *See, e.g., Union Electric Company* (Callaway Plant, Unit 1), ALAB–750, 18 NRC 1205, 1209 (1983). Accordingly, the Commission is modifying the standard of § 2.734(a)(3) to require that a materially different result would be or would have been *likely* had the newly proffered evidence been considered initially.

Comment: Several commenters addressed the proposed standard of § 2.734(b), which required that motions to reopen be accompanied by affidavits setting forth the factual and/or technical bases for the claim that the reopening criteria have been satisfied. The comments reflect confusion about the standard to be applied to judge the competence of affiants. As one commenter noted, NRC case law sets forth a standard for the competence of affiants in motions to reopen. Affidavits "must be given by competent individuals with knowledge of the facts or experts in the disciplines appropriate to the issues raised." *Pacific Gas and Electric Company* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB–775, 19 NRC 1361, 1367 n.18 (1984). However, the commenter believed that affidavits based on "information and belief," rather than personal knowledge, should be unacceptable under this standard. Another commenter took a similar tack, saying that affidavits of lawyers repeating allegations of undisclosed principals should not be sufficient. A third commenter suggested that evidence contained in affidavits should be required to meet the Commission's evidentiary standards as set forth in 10 CFR 2.743(c).

Response: The present rule is not, except where noted, intended to wipe out NRC case law concerning motions to reopen. Thus, the criteria for affidavits in motions to reopen set forth in *Diablo Canyon* continue in effect whether specifically adopted in this rule or not. Nevertheless, to avoid confusion, the Commission is specifically adopting the NRC case law requirement that affidavits be given by competent individuals with knowledge of the facts or experts in the disciplines appropriate to the issues raised. The Commission is also modifying the proposed rule to reflect that evidence contained in affidavits must meet the requirements of 10 CFR 2.743(c).

Comment: One commenter believed that a movant should be required under § 2.734(b) to specify each issue it wishes to litigate, not each allegation.

Response: This requirement was already incorporated into proposed § 2.734(b), which provided in pertinent part that "where multiple allegations are involved, the movant must identify with particularity each *issue* it seeks to litigate. . . ." (emphasis added). The real point of this comment seems to be the commenter's assertion that use of the term "allegations" in the remainder of this section could be read to imply that allegations without factual or technical bases could be put forth to satisfy this criterion. It is the Commission's intention that the requirement of a showing of the factual and/or technical bases for each issue be addressed separately. So that there will be no confusion on this matter, the Commission has changed the final rule to reflect that not only allegations, but the factual and/or technical bases for them must be separately stated for each issue.

Comment: Several commenters took issue with proposed § 2.734(c), which required that the identity of a confidential informant be revealed to the presiding officer and that a protective order be requested. The commenters argued that the requirement to identify informants to the presiding officer would have a chilling effect on individuals who might wish to come forward with information and that effective discovery would be precluded if the identities of informants were not known.

Response: These competing interests are precisely the considerations the Commission balanced in formulating the proposed rule. The Commission agrees that forced public disclosure of confidential informants could prevent persons from coming forward with information that would have an impact on the public health and safety. It is also aware that the credentials of allegers should be subject to some scrutiny to allow the presiding officer to assess the proper weight to be given to the alleger's testimony. The D.C. Circuit has upheld a Licensing Board's refusal to consider anonymous affidavits because "the competence of unidentified individuals is impossible to determine." *San Luis Obispo Mothers for Peace* v. *NRC*, 751 F.2d 1321, n.203. The Court emphasized availability of protective orders for such situations. *Id.* For these reasons, the Commission has decided to retain this portion of the rule as originally proposed. Anonymous allegations are not favored, but will be allowed if the alleger is identified to the presiding officer. The presiding officer may then handle requests for disclosure.

Comment: One commenter questioned the need for a "formal" protective order, believing that the presiding officer could simply grant confidentiality.

Response: A protective order is the means by which confidentiality is assured by law, and the Commission believes that this "formality" is necessary to grant the full measure of legal assurance to those whose identities it agrees to protect.

Comment: One commenter thought that proposed § 2.734(d), which required that the criteria set forth in § 2.714(a)(1) for non-timely filings be applied to motions to reopen, should apply with respect to proposed new contentions.

Response: This has always been a Commission requirement. *See, e.g., Pacific Gas and Electric Company* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI–82–39, 16 NRC 1712, 1714–15 (1982). To clarify this existing Commission requirement, in the final version of § 2.734(d) the word "amended" has been changed to the word "nontimely."

Comment: One commenter suggested that the imposition of the requirement to fulfill the criteria of 10 CFR 2.714(a)(1) (i-v) when movants seek to reopen a record to introduce new issues is of little practical use. The commenter claimed that the criteria were redundant of the criteria used for any motion to reopen.

Response: The criteria of 10 CFR 2.714(a)(1) (i-v) are:

(i) Good cause, if any, for failure to file on time.

(ii) The availability of other means whereby the petitioner's interest will be protected.

(iii) The extent to which the petitioner's participation may reasonably be expected to assist in developing a sound record.

(iv) The extent to which the petitioner's interest will be represented by existing parties.

(v) The extent to which the petitioner's participation will broaden the issues or delay the proceeding.

The Commission disagrees with the commenter's analysis. These criteria, which apply where new issues are sought to be admitted, are not so redundant of the criteria for reopening

that they are of no additional use. Licensing boards have applied these criteria along with the reopening criteria in the context of motions to reopen records to admit new contentions. *See, e.g., Arizona Public Service Company* (Palo Verde Nuclear Generating Station, Units 1 and 2), LBP–82–117B, 16 NRC 2024 (1982). This requirement has also been imposed by the Commission. *See, e.g., Pacific Gas and Electric Company* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI–81–5, 13 NRC 361, 364 (1981).

While the first of the five criteria, a showing of good cause for failure to file on time, overlaps the timeliness requirement already present, the overall criteria have greater relevance in the reopening context than is ascribed to them by the commenter. The second criterion is not necessarily satisfied, as the commenter suggests, by the availability of a petition under 10 CFR 2.206, because the availability of the § 2.206 procedure is not to be equated with the ability to litigate issues in an adjudicatory setting and a right to appeal. *Washington Public Power Supply System* (WPPSS Nuclear Project No. 3), 18 NRC 1167, 1175–76 (1983). The § 2.206 procedure relates more properly to the initiation of new proceedings than to reopening one which is pending. The commenter does not dispute the relevance of the third and fifth criteria. The fourth criterion, which the commenter suggests has no meaning in a closed proceeding, would be relevant at least where the petitioner's interests were represented by existing parties who had raised or are raising similar issues.

For the above reasons, the Commission is retaining the requirement that a contention filed in the context of a motion to reopen meet the standards of 10 CFR 2.714 (a)(1) (i–v).

Comment: Two commenters alluded to the possibility of using the remedy of requesting a proceeding pursuant to 10 CFR 2.206, which allows any person to request the NRC staff to modify, suspend or revoke a license or take other proper action, rather than allowing motions to reopen. One commenter argued that "the NRC does not require a hearing to effectively address significant safety or environmental issues." Thus, according to the commenters, staff resolution of issues is an adequate remedy for contentions filed after a record has been closed but before a license is issued.

Response: A petition filed under 10 CFR 2.206 stems from a different concept that does a motion to reopen. The former is addressed in an informal proceeding and generally goes to the need for the institution of a separate formal matter. A motion to reopen goes to the need for further hearings in a formal matter which is pending before the Commission. Therefore, a motion to reopen is necessarily analogous to a petition under 10 CFR 2.206. Moreover, a rule whereby the Commission could refuse to entertain *any* motions to reopen is not considered by the Commission to be fairly within the scope of this rulemaking, which presumed that motions to reopen would be granted in at least some circumstances, and sought to refine and codify law on when such motions should be granted.

For this reason, the commenter's suggestion will not be considered further in this rulemaking. In any event, the commenter cited no law to support the proposition that an agency may refuse to entertain *any* motions to reopen, and the Commission would need more support for the suggestion before it could be pursued further.

Comment: The same commenter suggested that the proponent of a motion to reopen should be required to make a showing like that required under 10 CFR 2.788 for a motion to stay the effectiveness of a licensing board decision.

Response: The criteria for a stay motion were developed to address an entirely different situation from those for a motion to reopen. The former involve withholding a license where a facility has been found ready to be licensed, while the latter go to the need for further hearings whether or not the license should be withheld.

Comment: Several commenters suggested that the Commission emphasize that a motion to reopen is an "extraordinary action," and that a heavy burden is put on proponents.

Response: In light of the requirements imposed, the Commission believes this fact to be self-evident. The Commission has often emphasized the heavy burden involved. *See, e.g., Kansas Gas and Electric Company* (Wolf Creek Generating Station, Unit No. 1), ALAB–462, 7 NRC 320, 338 (1978), and the D.C. Circuit has characterized those requirements as "high" and "stringent" in *San Luis Obispo Mothers for Peace* v. *NRC*, 751 F.2d at 1316. Reopening will only be allowed where the proponent presents material, probative evidence which either could not have been discovered before or could have been discovered but is so grave that, in the judgment of the presiding officer, it must be considered anyway. No change in the requirements is necessary to emphasize this fact.

Comment: One commenter questioned whether the newly-codified criteria would apply in situations where a record is closed as to certain contentions, but open as to others, and a movant seeks to reopen the record with respect to a contention for which all the evidence has been heard.

Response: The criteria are intended to apply when a record is closed with respect to a particular contention. The motion should be filed with the body having jurisdiction under NRC case law.

Comment: One commenter suggested that a motion to reopen be styled as a "petition," rather than a motion, in order to emphasize the heavy burden imposed and to denote a closed proceeding.

Response: In NRC practice, as in federal practice, a motion to reopen has always been characterized as a motion. The Commission believes this to be the proper terminology until the initial decision is issued. This in no way changes or lessens the burden placed on proponents.

Comments: One commenter has suggested that a distinction be made between an intervenor's motion to reopen and an applicant's attempt to supplement the record.

Response: At least one licensing board has intimated that such a distinction should be made. *Texas Utilities Electric Company, et al.* (Comanche Peak Steam Electric Station, Units 1 and 2), LBP–84–10, 19 NRC 509, 530 (1984) (". . . it does not seem . . . logical or proper to close down a multi-billion dollar nuclear plant because of a deficiency of proof."). The Commission, however, is unpersuaded. Principles of finality should attach equally to applicants and to intervenors. There is no reason not to subject all movants to the requirements of timeliness, materiality and effect on the decision. If a deficiency of proof is serious enough to threaten the operation of a facility, and the applicant possesses sufficient information to overcome that deficiency, surely these requirements will be satisfied.

Comment: One commenter felt that the standards of § 2.734 should only apply to a motion to offer additional evidence on an issue already considered. A motion to offer additional contentions should not be construed as a motion to reopen, in the commenter's view, but should only have to fulfill the criteria of 10 CFR 2.714(a)(1) for late-filed contentions.

Response: The Commission disagrees. A motion to reopen must be filed whenever a proponent seeks to add new information to a closed record, whether the information concerns a new

contention or one which has already been heard.

Comment: Another commenter argued that it is improper for the NRC to close a record to avoid licensing delays caused by last minute allegations, and that delay in licensing is actually proper whenever there are unresolved safety questions.

Response: It goes without saying that the Commission agrees with the commenter that a nuclear facility must meet all safety standards before a license can be granted. The purpose of this rule is not to foreclose the raising of important safety issues, but to ensure that, once a record has been closed and all timely-raised issues have been resolved, finality will attach to the hearing process. Otherwise, it is doubtful whether a proceeding could ever be completed. As the Third Circuit said in upholding a Commission decision not to reopen the record on certain issues involving restart of the Three Mile Island, Unit 1 reactor, "at some point . . . proceedings must terminate in outcomes." *In re Three Mile Island Alert, Inc.* v. *NRC*, 771 F. 2d 720, 740 (D.C. Cir. 1985).

It is for this reason as well as others that the Commission has felt it necessary to establish by rule the standards to be applied to motions to reopen. The Supreme Court has repeatedly said that reopening should not be automatic and is necessarily within the discretion of the agency:

> Administrative consideration of evidence always creates a gap between the time the record is closed and the time the administrative decision is promulgated. This is especially true if the issues are difficult, the evidence intricate, and the consideration of the case deliberate and careful. If upon the coming down of the order litigants might demand rehearings as a matter of law because some new circumstance has arisen, some new trend has been observed; or some new fact discovered, there would be little hope that the administrative process could ever be consummated in an order that would not be subject to reopening. It has been almost a rule of necessity that rehearings were not matters of right, but were pleas to discretion.

ICC v. *Jersey City*, 322 U.S. 503, 514–515 (1944); *accord, Bowman Transportation* v. *Arkansas-Best Freight*, 419 U.S. 281, 294–295 (1974).

Paperwork Reduction Act Statement

The collection of information this proposed rule contains is exempt from the requirements of the Paperwork Reduction Act of 1980, 44 U.S.C. 3518(c)(1)(B).

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act of 1980 (5 U.S.C. 605(b)), and NRC size standards published on December 9, 1985 (50 FR 50241), the Commission certifies that this rule will not have a significant economic impact on a substantial number of small entities. The final rule imposes the additional requirement that a movant, to reopen a closed evidentiary record, file affidavits setting forth the movant's claim before the record will be reopened. Significant additional resources are not required by the rule.

List of Subjects in 10 CFR Part 2

Administrative practice and procedure, Antitrust, Byproduct material, Classified information, Environmental protection, Nuclear materials, Nuclear power plants and reactors, Penalty, Sex discrimination, Source material, Special nuclear material, Waste treatment and disposal.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and section 553 of Title 5 of the United States Code, the NRC is adopting the following amendments to 10 CFR Parts 2 and 50.

PART 2—RULES OF PRACTICE FOR DOMESTIC LICENSING PROCEEDINGS

1. The authority citation for Part 2 continues to read as follows:

Authority: Secs. 161, 181, 68 Stat. 948, 953, as amended (42 U.S.C. 2201, 2231); sec. 191, as amended, Pub. L. 87–615, 76 Stat. 409 (42 U.S.C. 2241); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841); 5 U.S.C. 552.

Section 2.101 also issued under secs. 53, 62, 63, 81, 103, 104, 105, 68 Stat. 930, 932, 933, 935, 936, 937, 938, as amended (42 U.S.C. 2073, 2092, 2093, 2111, 2133, 2134, 2135); sec. 102, Pub. L. 91–190, 83 Stat. 853, as amended (42 U.S.C. 4332); sec. 301, 88 Stat. 1248 (42 U.S.C. 5871). Sections 2.102, 2.103, 2.104, 2.105, 2.721 also issued under secs. 102, 103, 104, 105, 183, 189, 68 Stat. 936, 937, 938, 954, 955, as amended (42 U.S.C. 2132, 2133, 2134, 2135, 2233, 2239). Section 2.105 also issued under Pub. L. 97–415, 96 Stat. 2073 (42 U.S.C. 2239). Sections 2.200–2.206 also issued under secs. 186, 234, 68 Stat. 955, 83 Stat. 444, as amended (42 U.S.C. 2236, 2282); sec. 206, 88 Stat. 1246 (42 U.S.C. 5846). Sections 2.300–2.309 also issued under Pub. L. 97–415, 96 Stat. 2071 (42 U.S.C. 2133). Sections 2.600–2.606 also issued under sec. 102, Pub. L. 91–190, 83 Stat. 853, as amended (42 U.S.C. 4332). Sections 2.700a, 2.719 also issued under 5 U.S.C. 554. Sections 2.754, 2.760, 2.770 also issued under 5 U.S.C. 557. Section 2.790 also issued under sec. 103, 68 Stat. 936, as amended (42 U.S.C. 2133) and 5 U.S.C. 552. Sections 2.800 and 2.808 also issued under 5 U.S.C. 553. Section 2.809 also issued under 5 U.S.C. 553 and sec. 29 Pub. L. 85–256, 71 Stat. 579, as amended (42 U.S.C. 2039). Subpart K also issued under sec. 189, 68 Stat. 955 (42 U.S.C. 2239); sec. 134, Pub. L. 97–425, 96 Stat. 2230 (42 U.S.C. 10154). Appendix A also issued under sec. 6, Pub. L. 91–560, 84 Stat. 1437 (42 U.S.C. 2135).

2. A new § 2.734 is added to read as follows:

§ 2.734 Motions to Reopen.

(a) A motion to reopen a closed record to consider additional evidence will not be granted unless the following criteria are satisfied:

(1) The motion must be timely, except that an exceptionally grave issue may be considered in the discretion of the presiding officer even if untimely presented.

(2) The motion must address a significant safety or environmental issue.

(3) The motion must demonstrate that a materially different result would be or would have been likely had the newly proffered evidence been considered initially.

(b) The motion must be accompanied by one or more affidavits which set forth the factual and/or technical bases for the movant's claim that the criteria of paragraph (a) of this section have been satisfied. Affidavits must be given by competent individuals with knowledge of the facts alleged, or by experts in the disciplines appropriate to the issues raised. Evidence contained in affidavits must meet the admissibility standards set forth in § 2.743(c). Each of the criteria must be separately addressed, with a specific explanation of why it has been met. Where multiple allegations are involved, the movant must identify with particularly each issue it seeks to litigate and specify the factual and/or technical bases which it believes support the claim that this issue meets the criteria in paragraph (a) of this section.

(c) A motion predicated in whole or in part on the allegations of a confidential informant must identify to the presiding officer the source of the allegations and must request the issuance of an appropriate protective order.

(d) A motion to reopen which relates to a contention not previously in controversy among the parties must also satisfy the requirements for nontimely contentions in § 2.714(a)(1)(i–v).

Dated at Washington, DC this 27th day of May 1986.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 21

[Docket No. NM-19; Special Conditions No. 25-ANM-6]

Special Conditions; British Aerospace Model 748 ATP Series Airplane

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions.

SUMMARY: These special conditions are issued pursuant to §§ 21.16 and 21.17 of the Federal Aviation Regulations (FAR) to British Aerospace, Cheshire England, for a type certificate for the 748 ATP series airplane. The 748 ATP airplane will have novel or unusual design features associated with an automatic takeoff power control system (ATPCS) for which the applicable airworthiness regulations do not contain adequate or appropriate safety standards. The ATPCS will allow the airplane to takeoff with less than maximum takeoff thrust approved for the airplane; and, if an engine fails, the system will automatically provide maximum takeoff thrust on the operating engine. These special conditions contain safety standards which the Administrator finds necessary to establish a level of safety equivalent to the provided by the regulations applicable to the 748 ATP series airplane because of the novel or unusual features.

EFFECTIVE DATE: June 30, 1986.

FOR FURTHER INFORMATION CONTACT: James Walker, Policy and Procedures Branch, Transport Standards Staff, ANM-110 FAA Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168; Telephone (206) 431-2116.

SUPPLEMENTARY INFORMATION:

Background

On March 20, 1982, British Aerospace, Chester Road, Woodford, Bramhall, Stockport, Cheshire SK7 1QR, England, applied for a United States Import Type Certificate for its BAe 748 ATP airplane.

The BAe 748 ATP is a low wing, twin-engine, pressurized transport category airplane having a maximum takeoff weight of 49,500 pounds. The airplane is equipped with two Pratt and Whitney PW-124 turbopropeller engines, each producing 2,400 shaft horsepower. The airplane has a maximum seating capacity for 72 persons, plus the crew, and a maximum permissible altitude of 25,000 feet.

The type design of the 748 ATP series airplane with the automatic system installed contains a number of novel or unusual design features for which the applicable airworthiness requirements do not contain adequate or appropriate safety standards. Special conditions are necessary to provide a level of safety equal to that generally intended by the established certification basis and to support a finding by the Administrator that no feature or characteristic of the airplane with the automatic system installed makes it unsafe for the category in which certification is requested. These special conditions specify limits on the maximum power increments which may be applied to the operating engines by the ATPCS, prescribe system reliability and states monitoring requirements, require provisions for manual selection of the maximum takeoff power approved for the airplane under existing conditions, prohibit approval of the system if the automatic or manual application of approved maximum takeoff power would result in an engine operating limit being exceeded, and require the installation of an independent engine failure warning system if the inherent characteristics of the airplane do not provide clear warning to the crew.

The design covered under the type certificate is the installation of an ATPCS. Automatic takeoff power control system special conditions issued to date for other airplanes require the ATPCS be designed to permit manual decrease or increase in power up to the maximum takeoff power approved for the airplane under existing conditions through the use of power levers. The ATPCS system installed on the engines of the 748 ATP airplane contains an electronic fuel controller (EFC), which provides an automatic fixed speed increment increase in the event of an engine failure during takeoff. In the even of an engine failure, a signal from the ATPCS is transmitted to the EFC which up-trims the operating engine to the approved takeoff power. In the event of an ATPCS failure concurrent with engine failure, the crew would be required to advance the power lever to obtain the maximum power.

Discussion of Comments

Notice of proposed special conditions No. SC-85-3-NM for the 748 ATP series airplane was published in the Federal Register on December 19, 1985 (50 FR 51704).

Two parties submitted comments. One was the applicant who noted that the airplane passenger capacity was incorrectly stated, that the maximum approval altitude was incorrectly stated, and that the ATPCS operating characteristics were in error. The correct passenger capacity, the altitude and the ATPCS operation have been incorporated in the final special conditions.

There were also misspelled words in paragraphs D2 and E2 (b) of the notice, as well as an omission of the word "power" in paragraph D2 after the word "or." The word "lever" should replace "level" in paragraphs D2 and E2(b), and in paragraph E2(b) the word "decrease" was spelled "decerese." These editorial corrections have been made in the final special conditions.

There was an omission in the illustration on page 51706 of the notice. The engine and ATPCS failure point was omitted, the flight path of the ATPCS and engine failure configuration from the failure point to the 400 feet intersection point with the actual flight path, was missing. The labeling of the altitude at the intersection of the two paths, (i.e., 400 feet) the actual flight path and the ATPCS and engine failed flight path was missing. These omissions were corrected in the final special conditions.

The second commenter was Aerospace Industries Association of America (AIA) and the following is a discussion of their comments:

Aerospace Industries Association of America does not agree that the BAe 748 ATP should not have the option to provide an ATPCS with reduced reliability if a specific level of minimum performance is available. They state there is no justification provided by the FAA for this statement. Also in AIA's opinion, the FAA is formulating arbitrary rules, more stringent than in the past, in the form of a special condition. They state that previous airplanes with ATPCS installed have been certified with a system that does not require performance limits to comply with the current requirements of § 25.1309(b)(2) without compromising safety. They present a position and justification for the above comments in their response to NPRM 84-4, Standards for Approval of an Automatic Takeoff Thrust Control System.

The FAA does not agree that these special conditions are arbitrary as applied to the BAe 748 ATP airplane. The BAe 748, on the basis of its certification rules, is required to comply with § 25.1309, as amended by Amendment 25-23. Therefore, the option to use the alternate lowered ATPCS system reliability and performance criteria was not presented. The applicants, whose airplane certification basis did not require compliance with § 25.1309, Amendment 25-23, were allowed the choice of either of the

BEST COPY AVAILABLE

performance and ATPCS reliability criteria options. However, no applicants selected the lower system reliability and performance option for their airplanes, which include the Boeing 727, 737 and Douglas DC–9 models. All have demonstrated to the improbable level for their automatic systems reliabilities. The current § 25.1309 requires a higher level of airplane system reliability than that in the older version of § 25.1309; therefore, the option to provide an ATPCS with a lower level of reliability than that required by the applicable rules is not acceptable. The first airplane to be assessed on this basis was the CASA C212 (46 FR 16270; March 12, 1981).

Aerospace Industries Association of America further suggested a change in the BAe 748 ATP proposed special conditions to permit use of the ATPCS for other operations besides takeoff and suggested corresponding changes in the proposed requirements to reflect this expansion of its utility and recommended additional revisions to the proposed requirements which AIA classified as arbitrary, inappropriate, and overlapping requirements.

The FAA does not concur with the recommendation to expand the scope of the BAe 748 ATP proposed special conditions beyond takeoff operations for several reasons. Since the use of an ATPCS increases the reliability of the engines thereby enhancing airworthiness, the FAA developed these special rules to maintain the same level of safety currently inherent in the applicable regulations. To do this, several factors and requirements were imposed to assure the same takeoff safety. The major factors are the specification of an acceptable probability of failure for the system, as well as a combined engine and system failure probability during a critical (takeoff) time interval, system availability information for the pilot, and a pilot override control feature. The FAA considers the takeoff the most cost beneficial and does not agree that the commenter's proposed change to allow use of the ATPCS in combination with a "reduced thrust" operation or for go-around maneuvers provides an equivalent level of safety in light of the added workload complexity that would be required. The use of the system for go-around is a less well defined operation than takeoff because of the varied circumstances associated with the approach and landing power levels and the pilot would be required to use different procedures for a number of different situations.

Type Certification Basis

The type certification basis for the British Aerospace 748 ATP series airplane with the ATPCS installed, to be incorporated in the type certificate, is Part 25 of the FAR, including Amendements 25–1 through 25–54; Part 36 of the FAR, including Amendments 36–1 through current amendment; § 21.29 of the FAR; SFAR 27, dated December 12, 1973, including Amendments 27–1 through current amendment; and the special conditions for an ATPCS contained herein.

The applicable airworthiness standards for import products are those regulations designated in accordance with § 21.29 and are known as the "type certification basis" for the airplane design. Special conditions may be issued and amended, as necessary, as a part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.17(a)(1) do not contain adequate or appropriate safety standards because of novel or unusual design features of the airplane. Special conditions, as appropriate, are now issued after public notice in accordance with §§ 11.28 and 11.29(b), efffective October 14, 1980, and become part of the type certification basis in accordance with § 21.17(a)(2).

Conclusion

This action affects only unusual or novel design features on one model series of airplanes. It not a rule of general applicability and affects only the manufacturer who applied to the FAA for approval of these features on the airplane.

List of Subjects in 14 CFR Part 21

Air transportation, Aircraft, Aviation safety.

1. The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 1344, 1348(c), 1352, 1354(a), 1355, 1421 through 1431, 1502, 1651(b)(2), 42 U.S.C 1857f–10, 4321 et seq.; E.O. 11514; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983).

The Special Conditions

Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued to British Aerospace for the 748 ATP series airplane equipped with an automatic takeoff power control system (ATPCS):

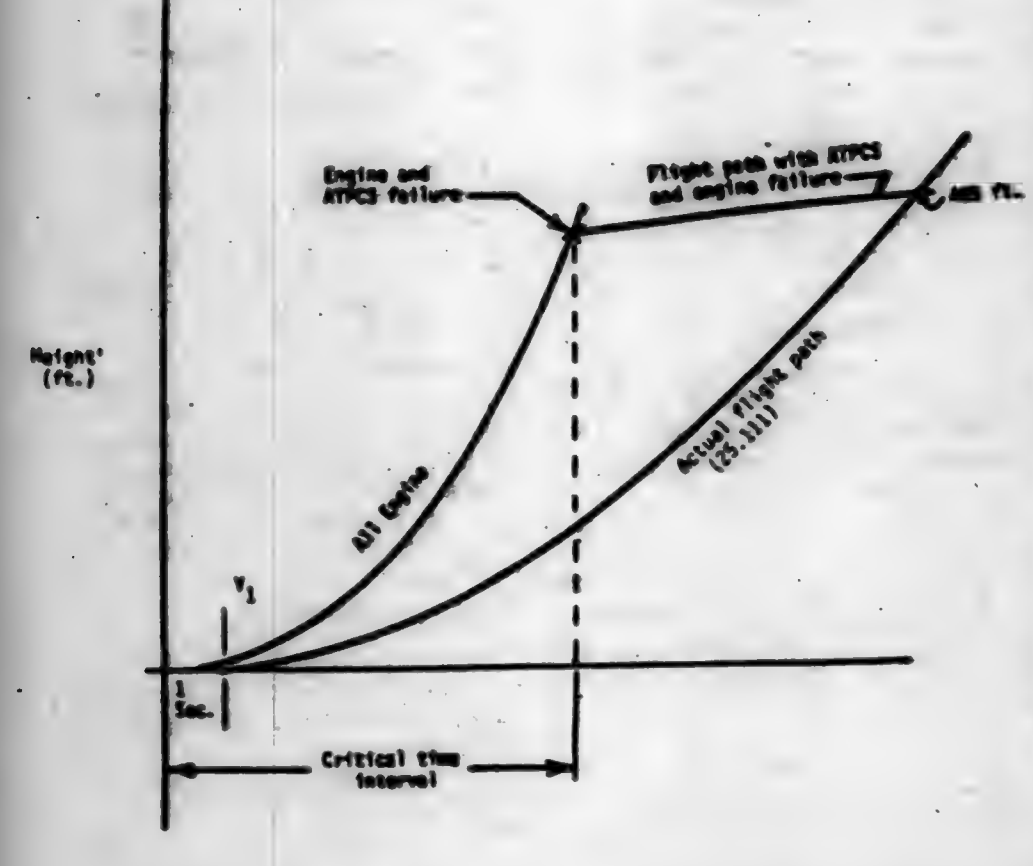
PART 21—[AMENDED]

A. *General.* With the ATPCS and associated systems functioning normally as designed, all applicable requirements of Part 25, except as provided in these special conditions, must be met without requiring any action by the crew to increase power.

B. *Definitions.* 1. *Automatic Takeoff Power Control System (ATPCS).* An ATPCS is defined as the entire automatic system used on takeoff, including all devices, both mechanical and electrical, that sense engine failure, transmit signals, actuate fuel controls or power levers on operating engines to achieve scheduled power increase, and furnish cockpit information on system operation.

2. *Critical Time Interval.* When conducting an ATPCS takeoff, the critical time interval is between V_1 minus 1 second and a point on the minimum performance, all-engine flight path where, assuming a simultaneous engine and ATPCS failure, the resulting minimum flight path thereafter intersects the Part 25 required gross flight path at not less than 400 feet from the takeoff surface.

This definition is shown in the following graph.



3. *Takeoff Power.* Notwithstanding the definition of "takeoff power" in Part 1 of the FAR, "takeoff power" means the horsepower obtained from each initial power setting approved for takeoff under these special conditions.

C. *Performance Requirements.* The applicant must comply with the following performance and reliability requirements.

1. An ATPCS system failure during the critical time interval must be shown to be improbable.

2. The concurrent existence of an ATPCS failure and an engine failure during the critical time interval must be shown to be extremely improbable.

3. All applicable performance requirements of Part 25 must be met with an engine failure occurring at the most critical point during takeoff with the ATPCS system functioning.

D. *Power Setting.* The initial takeoff power set on each engine at the beginning of the takeoff roll may not be less than:

1. Ninety percent (90%) of the power level set by the ATPCS (the maximum takeoff power approved for the airplane under existing conditions);

2. That required to permit normal operation of all safety related systems and equipment dependent upon engine power or power lever position; or

3. That shown to be free of hazardous engine response characteristics when power is advanced from the initial takeoff power level to the maximum approved takeoff power.

E. *Powerplant Controls.* 1. In addition to the requirements of § 25.1141, no single failure or malfunction, or probable combination thereof, of the ATPCS system, including associated systems, may cause the failure of any powerplant function necessary for safety.

2. The ATPCS must be designed to:

a. Apply power on the operating engine, following an engine failure during takeoff, to achieve the selected takeoff power without exceeding engine operating limits;

b. Permit manual decrease or increase in power up to the maximum takeoff power approved for the airplane under existing conditions through the use of the power lever. For aircraft equipped with limiters that automatically prevent engine operating limits from being exceeded under existing conditions, other means may be used to increase the maximum level of power controlled by the power levers in the event of an ATPCS failure, provided the means:

(1) Is located on or forward of the power levers;

(2) Is easily identified and operated under all operating conditions by a single action of either pilot with the hand that is normally used to actuate the power levers; and

(3) Meets the requirements of § 25.777, paragraphs (a), (b), and (c);

c. Provide a means to verify to the flightcrew prior to takeoff that the ATPCS is in a condition to operate; and

d. Provide a means for the flightcrew to deactivate the automatic function. This means must be designed to prevent inadvertent deactivation

F. *Powerplant Instruments.* In addition to the requirements of § 25.1305:

1. A means must be provided to indicate when the ATPCS is in the armed or ready condition; and

2. If the inherent flight characteristics of the airplane do not provide adequate warning that an engine has failed, a warning system that is independent of the ATPCS must be provided to give the pilot a clear warning of any engine failure during takeoff.

Issued in Seattle, Washington, on May 19, 1986.

Wayne J. Barlow,

Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 385

[Docket No. 60463-6063]

Soviet Oil and Gas; Technical Data License Applications

AGENCY: Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Departments of Commerce and State have agreed to an adjustment in the existing licensing policies for exports of oil and gas exploration and production data to the Union of Soviet Socialist Republics. Current policy to deny export license applications for oil and gas exploration and production-related technical data is being changed to reflect consideration of such applications on a case-by-case basis. This implements a revision in foreign policy export controls that was contained in the Secretary's Annual Report to Congress on Foreign Policy

Controls of January 17, 1986. Accordingly, the Export Administration Regulations (15 CFR Parts 368–399) are being amended to reflect the new policy.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Robert Spruell, Country Policy, Strategic Planning and Policy Division, Export Administration, Department of Commerce, Washington, DC 20230 (Telephone (202) 377–3285).

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

1. Because this rule concerns a foreign affairs function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has to be or will be prepared.

2. Section 13(a) of the Export Administration Act of 1979, as amended (50 U.S.C. App. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), including those requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign affairs function of the United States. Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule. Accordingly, it is being issued in final form. However, as with other Department of Commerce rules, comments from the public are always welcome. Written comments (six copies) should be submitted to: Betty Ferrell, Regulations Branch, Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, DC 20044.

3. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

4. This rule mentions a collection of information subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). Applicants for the validated export license required by this rule must complete and submit Form ITA–622P. This collection of information has been approved by the Office of Management and Budget under control number 0625–0001.

Communist countries, Exports, Union of Soviet Socialist Republics.

PART 385—[AMENDED]

Accordingly, Part 385 of the Export Administration Regulations (15 CFR Parts 368–399) is amended as follows:

1. The authority citation for 15 CFR Part 385 continues to read as follows:

Authority: Pub. L. 96–72, 93 Stat. 503, 50 U.S.C. App. 2401 *et seq.*, as amended by Pub. L. 97–145 of December 29, 1981, and by Pub. L. 99–64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757), July 16, 1985); Pub. L. 95–223, 50 U.S.C. 1701 *et seq.*; E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985).

2. Section 385.2 is amended by revising the last sentence in paragraph (c) to read as follows:

§ 385.2 Country Group Q, W, and Y: U.S.S.R., other Warsaw Pact Countries, Albania, Mongolian People's Republic, and Laos.

* * * * *

(c) * * * License applications for technical data for oil and gas exploration and production will be reviewed on a case-by-case basis.

* * * * *

Dated: May 27, 1986.

Walter J. Olsen,

Deputy Assistant Secretary for Export Administration.

BILLING CODE 3510-DT-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 73

[Docket No. 83C–0051]

Listing of Color Additive for Coloring Contact Lenses; Confirmation of Effective Date

AGENCY: Food and Drug Administration.

ACTION: Final rule; confirmation of effective date.

SUMMARY: The Food and Drug Administration (FDA) is confirming the effective date of May 6, 1986, for the final rule that amended the color additive regulations to provide for the safe use of an orange dye, 6-ethoxy-2-(6-ethoxy-3-oxobenzo[*b*]thien-2-(3*H*)-ylidene)benzo[*b*]thiophen-3(2*H*)-one, for coloring contact lenses. This action responds to a petition filed by Custom Tint Laboratories, Inc.

DATE: Effective date confirmed: May 6, 1986.

FOR FURTHER INFORMATION CONTACT: Rudolph Harris, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a final rule published in the Federal Register of April 3, 1986 (51 FR 11435), FDA amended the color additive regulations to provide for the safe use of an orange dye for coloring contact lenses.

In the final rule, FDA gave interested parties until May 5, 1986, to file objections. The agency received no objections or requests for a hearing on the final rule. Therefore, FDA has concluded that the final rule published in the Federal Register of April 3, 1986, for the safe use of an orange dye, 6-ethoxy-2-(6-ethoxy-3-oxobenzo[*b*]thien-2(3*H*)-ylidene]benzo[*b*]thiophen-3(2*H*)-one for coloring contact lenses should be confirmed.

List of Subjects in 21 CFR Part 73

Color additives, Cosmetics, Drugs, Medical devices.

PART 73—LISTING OF COLOR ADDITIVES EXEMPT FROM CERTIFICATION

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 701, 706, 52 Stat. 1055–1056 as amended, 74 Stat. 399–407 as amended (21 U.S.C. 371, 376)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), notice is given that no objections or requests for a hearing were filed in response to the April 3, 1986, final rule. Accordingly, the amendments promulgated thereby became effective May 6, 1986.

Dated: May 23, 1986.

John M. Taylor,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

---

21 CFR Parts 172 and 178

[Docket No. 85F–0430]

Food Additives; Petroleum Wax

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the

food additive regulations to provide for the safe use of polyalkyl (C_{16}–C_{22}) acrylate polymer as a processing aid in the manufacture of petroleum wax used in food and in nonfood articles in contact with food. This action responds to a petition filed by Shell Oil Co.

DATES: Effective May 30, 1986; objections by June 30, 1986. The Director of the Office of the Federal Register approves the incorporation by reference of certain publications in 21 CFR 172.886 effective May 30, 1986.

ADDRESS: Written objections may be sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lester Borodinsky, Center for Food Safety and Applied Nutrition (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–426–8950.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of October 8, 1985 (50 FR 41028), FDA announced that a petition (FAP 5A3885) has been filed by Shell Oil Co., Suite 200, 1025 Connecticut Ave. NW., Washington, DC 20036, proposing that the food additive regulations be amended to provide for the safe use of polyalkyl (C_{16}–C_{22}) acrylate polymer as a processing aid in the manufacture of petroleum wax used in food and in nonfood articles in contact with food. This processing aid is currently regulated under § 172.886(c)(2) for use in the manufacture of petroleum wax used in chewing gum base only.

FDA has evaluated data in the petition and other relevant material. The agency concludes that the proposed uses of the food additive are safe, and that the regulations should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. FDA's regulations implementing the National Environmental Policy Act (21 CFR Part 25) have been replaced by a rule published in the Federal Register of April 26, 1985 (50 FR 16636, effective July 25, 1985). Under the new rule, an action of this type would require an environmental assessment under 21 CFR 25.31a(a).

Any person who will be adversely affected by this regulation may at any time on or before June 30, 1986 file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects

21 CFR Part 172

Food additives, Incorporation by reference.

21 CFR Part 178

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, Parts 172 and 178 are amended as follows:

PART 172—FOOD ADDITIVES PERMITTED FOR DIRECT ADDITION TO FOOD FOR HUMAN CONSUMPTION

1. The authority citation for 21 CFR Part 172 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. In § 172.886 by revising paragraph (c)(2) to read as follows:

§ 172.886 Petroleum wax.

* * * * *

(c) * * *

(2) Poly(alkylacrylate) (CAS Reg. No. 27029–67–8), made from long chain (C_{16}–C_{22}) alcohols and acrylic acid, having: (i) A number average molecular weight between 40,000 and 100,000; (ii) a weight average molecular weight (MW_w) to number average molecular weight (MW_n) ratio (MW_w/MW_n) of not less than 3; and (iii) unreacted alkylacrylate monomer content not in excess of 14 percent, as determined by a method entitled, "Method for Determining Weight-Average and Number-Average Molecular Weight and for Determining Alkylacrylate Monomer Content of Poly(alkylacrylate) used as Processing Aid in Manufacture of Petroleum Wax," which is incorporated by reference (copies are available from the Division of Food and Color Additives, Center for Food Safety and Applied Nutrition (HFF–330), 200 C St. SW., Washington, DC 20204, or available for inspection at the Office of the Federal Register, 1100 L St. NW., Washington, DC 20408). Petroleum wax shall contain not more than 1,050 parts per million of poly(alkylacrylate) residues as determined by a method entitled, "Method for Determining Residual Level of Poly(alkylacrylate) in Petroleum Wax," which is incorporated by reference. Copies are available from the address cited in this paragraph (c)(2).

* * * * *

PART 178—INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS

3. The authority citation for 21 CFR Part 178 is revised to read as follows and the authority citations following the sections in Part 178 are removed:

Authority: Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

4. In § 178.3710 by adding new paragraph (f) to read as follows:

§ 178.3710 Petroleum wax.

* * * * *

(f) Petroleum wax may contain poly(alkylacrylate) (CAS Reg. No. 27029-57-6), as described in § 172.886(c)(2) of this chapter, as a processing aid in the manufacture of petroleum wax.

Dated: May 22, 1986.

BILLING CODE 4160-01-M

21 CFR Part 175

[Docket No. 85F-0785]

Indirect Food Additives: Adhesives and Components of Coatings

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of 2-bromo-2-nitro-1,3-propanediol as a preservative in adhesives for food-packaging applications. This action responds to a petition filed by the Boots Co. PLC.

DATES: Effective May 30, 1986; objections by June 30, 1986.

ADDRESS: Written objections to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Andrew D. Laumbach, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of May 22, 1985 (50 FR 21141), FDA announced that a petition (FAP 5B3836) had been filed by the Boots Co. PLC, 1 Thane Rd., Bldg. D6 Beeston, Nottingham NG2 3AA, England, proposing that § 175.105 *Adhesives* (21 CFR 175.105) be amended to provide for the safe use of 2-bromo-2-nitropropane-1,3-diol as a preservative in adhesives for food-packaging applications.

Following publication of the filing notice in the Federal Register, FDA determined that the more precise chemical name for the additive is 2-bromo-2-nitro-1,3-propanediol. This name identifies the additive in the regulation set forth below.

FDA has evaluated the data in the petition and other relevant material. The agency concludes that the proposed food additive use is safe, and that the regulations should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. FDA's regulations implementing the National Environmental Policy Act (21 CFR Part 25) have been replaced by a rule published in the Federal Register of April 26, 1985 (50 FR 16636, effective July 25, 1985). Under the new rule, an action of this type would require an abbreviated environmental assessment under 21 CFR 25.31a(b)(1).

Any person who will be adversely affected by this regulation may at any time on or before June 30, 1986, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 175

Adhesive, Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, Part 175 is amended as follows:

PART 175—INDIRECT FOOD ADDITIVES: ADHESIVES AND COMPONENTS OF COATINGS

1. The authority citation for 21 CFR Part 175 is revised to read as follows and the authority citations following the sections in Part 175 are removed:

Authority: Secs. 201(s), 409, 72 Stat. 1784-1788 as amended (21 U.S.C 321(s), 348); 21 CFR 5.10 and 5.61.

2. In § 175.105(c)(5) by alphabetically inserting a new item in the list of substances, to read as follows:

§ 175.105 Adhesives.

* * * * *

(c) * * *

(5) * * *

Substances	Limitations
* * *	* *
2-Bromo-2-nitro-1, 3-propanediol (CAS Reg. No. 52-51-7).	For use only as an antibacterial preservative.
* * *	* *

Dated: May 22, 1986.

BILLING CODE 4160-01-M

21 CFR Part 522

Implantation or Injectable Dosage Form New Animal Drugs Not Subject to Certification; Gentamicin Sulfate Injection

Correction

In FR Doc. 86-8257, appearing on page 15806, in the issue of Friday, April 25, 1986, make the following corrections:

1. In the first column, in the second line of the subject heading of this document, "From" should read "Form" as corrected above.

2. In the second column, in the second line of the Part 522 heading, "From" should read "Form".

BILLING CODE 1505-01-M

21 CFR Part 548

Certifiable Peptide Antibiotic Drugs for Animal Use; Bacitracin, Neomycin, Polymyxin B Ophthalmic Ointment (With or Without Hydrocortisone)

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of several supplemental new animal drug applications (NADA's) providing for use of ophthalmic ointments containing bacitracin, neomycin, and polymyxin B (with or without hydrocortisone) for treating dogs and cats. The supplements provide for a change in polymyxin B concentration from 5,000 units to 10,000 units.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT: John R. Markus, Center for Veterinary Medicine (HFV-142), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3442.

SUPPLEMENTARY INFORMATION: Several NADA's providing for use of a bacitracin, neomycin, and polymyxin B ophthalmic ointment (with or without hydrocortisone) for treating dogs and cats have been amended to provide for use of 10,000 units of polymyxin B in lieu of the previously approved 5,000 units. The NADA's are:

NADA 65-015: Bacitracin, polymyxin B, neomycin, and hydrocortisone ophthalmic ointment, Pharmaderm Division of Atlanta Inc., 60 Baylis Rd., Melville, NY 11747.

NADA 65-016: Bacitracin, polymyxin B, and neomycin opthalmic ointment, Pharmaderm Division of Atlanta Inc.

NADA 65-114: Bacitracin, neomycin, and polymyxin B (Mycitracin), The Upjohn Co., Kalamazoo, MI 49001.

NADA 65-478: Polymyxin B, bacitracin, neomycin, and hydrocortisone (Cortisporin), Coopers Animal Health, Inc., Kansas City, MO 64108.

NADA 65-485: Neomycin, polymyxin B, and bacitracin (Neosporin), Coopers Animal Health, Inc.

The supplements are approved and the corresponding regulations are amended accordingly. Approval is based on the decision of the Center for Drugs and Biologics that a minimum of 10,000 units per milliliter or units per gram of polymyxin B is required to provide reliable adequate activity against gram-negative organisms, especially *Pseudomonas* (see 47 FR 23440, May 28 1982).

Approvals of this type do not require a freedom of information summary as provided by Part 20 (21 CFR Part 20) and § 514.11(e) (21 CFR 514.11(e)). However, a summary of the basis for this approval, and for those NADA's approved after July 1, 1975, a summary of safety and effectiveness data, and information supporting approval of the original applications may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(1)(i) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 548

Animal drugs; Antibiotics.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 548 is amended as follows:

PART 548—CERTIFIABLE PEPTIDE ANTIBIOTIC DRUGS FOR ANIMAL USE

1. The authority citation for 21 CFR Part 548 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343-351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

§ 548.314a [Amended]

2. Section 548.314a *Bacitracin, bacitracin zinc-neomycin sulfate-polymyxin B sulfate ophthalmic ointment* is amended in paragraphs (a)(1) (i) and (ii) and (c)(2) (i) and (ii) by revising the phrase "5,000 units of polymyxin B" to read "10,000 units of polymyxin B".

§ 548.314b [Amended]

3. Section 548.314b *Bacitracin zinc-polymyxin B sulfate-neomycin sulfate-hydrocortisone, hydrocortisone acetate ophthalmic ointment* is amended in paragraph (a) (1) and (2) by revising the phrase "5,000 units of polymyxin B" to read "10,000 units of polymyxin B".

Dated: May 22, 1986.

Marvin A. Norcross,

Associate Director for New Drug Evaluation.

BILLING CODE 4160-01-M

21 CFR PART 558

New Animal Drugs For Use in Animal Feeds; Hygromycin B

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the new animal drug regulations to reflect approval of a new animal drug application (NADA) filed for Arkansas Micro Specialties, Inc., providing for making 0.6- and 1.8-grams-per-pound hygromycin B Type A medicated articles from 2.4- and 8-grams-per-pound hygromycin B Type A medicated articles. The hygromycin B Type A medicated articles subject to this approval are for making hygromycin B Type C medicated feeds for use in swine for control of infestations of large roundworms, nodular worms, and whipworms, and for use in chickens for control of large roundworms, cecal worms, and capillary worms.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Benjamin A. Puyot, Center for Veterinary Medicine (HFV-135), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1414.

SUPPLEMENTARY INFORMATION: Arkansas Micro Specialties, Inc., P.O. Box 308, Hwy. 71 North, Lowell, AR 72745, is the sponsor of NADA 140-443 submitted on its behalf by Elanco Products Co. The NADA provides for the use of 2.4- and 8-grams-per-pound hygromycin B Type A medicated articles to make 0.6- and 1.8-grams-per-pound hygromycin B Type A medicated articles. The hygromycin B Type A medicated articles subject to this approval are for making Type C medicated feeds for use in swine for control of infestations of large roundworms (*Ascaris suis*), nodular worms (*Oesophagostomum dentatum*), and whipworms (*Trichuris suis*), and for use in chickens for the control of infestations of large roundworms (*Ascaris galli*), cecal worms (*Heterakis gallinae*), and capillary worms (*Capillaria obsignata*). The NADA is approved and the regulations are amended to reflect the approval.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug

Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(1)(i) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 558 is amended as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for 21 CFR Part 558 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

2. Part 558 is amended in § 558.274 by adding, in numerical sequence, drug labeler code "047663" to the "Sponsor" column in paragraph (c)(1)(i) and (ii), and by adding new paragraph (a)(8), to read as follows:

§ 558.274 Hygromycin B

(a) * * *

(8) 0.6 and 1.6 grams per pound granted to 047663 in § 510.600(c) of this chapter for use in chickens as in paragraph (c)(1)(i) and in swine as in paragraph (c)(1)(ii) of this section.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 906

Approval of Amendment to the Colorado Permanent Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: This document amends 30 CFR Part 906 by approving an amendment to the Colorado permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment pertains to the State's procedures for suspending or revoking permits. This rule is being made effective immediately in order to expedite the State program amendment process and to encourage the State to conform its program to the Federal standards without undue delay; consistency of the State and Federal standards is required by SMCRA.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Arthur W. Abbs, Chief, Division of State Program Assistance, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue, NW., Washington, DC 20240; Telephone: (202) 343–5351.

SUPPLEMENTARY INFORMATION:

I. Background on the Colorado Program Submission

On February 29, 1980, OSMRE received a proposed regulatory program from the State of Colorado. On December 15, 1980, following a review of the proposed program as outlined in 30 CFR Part 732, the Secretary approved the program subject to the correction of 45 minor-deficiencies. The approval was effective upon publication of the notice of conditional approval in the December 15, 1980, **Federal Register** (45 FR 82173–82214). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 906.15 and 906.16.

II. Submission of Program Amendment and Public Comments

On January 23, 1986, Colorado submitted an amendment to the Colorado program for OSMRE's review and approval. The amendment revises section 2CCR 407–2, 5.03.3(2)(b) of the Colorado regulations pertaining to the suspension or revocation of permits. On February 27, 1986, OSMRE announced receipt of the amendment in the **Federal Register** and invited comment on the adequacy of the proposed revised rule in satisfying the criteria for approval of State program amendments at 30 CFR 732.15 and 732.17 (51 FR 6920). The comment period closed March 31, 1986. No comments were received by OSMRE.

III. Secretary's Findings and Decision

After thoroughly reviewing the revised regulation submitted by the State, OSMRE has determined that it is consistent with the Federal regulation at 30 CFR 843.13(a)(3). Colorado has deleted the existing language at Rule 5.03.0(2)(b) which provides that "The Division shall determine that a pattern of violations exists if it finds that there were violations of the same or related requirements of the Act, these Rules, or the permit during three or more inspections of the permit area within any 12-month period." In place of this language Colorado has inserted the following text: "The Administrator shall promptly review the history of violations of any permittee who has been cited for violations of the act, these rules, or the permit during three or more inspections of the permit area within any 12-month period to determine if a pattern of violations exists or has existed." The State's revised regulatory language is virtually identical to the language contained in the Federal regulation of 30 CFR 843.13(a)(3). Accordingly, the Director has determined that Colorado's amendment provision incorporates sanctions no less stringent than those set forth under SMCRA and OSMRE's regulations and contains the same or similar procedural requirements relating there to. Therefore, the Director is approving the State's amendment.

IV. Additional Determinations

1. Compliance With the National Environmental Policy Act

The Secretary has determined that pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared for this rulemaking.

2. Compliance With the Regulatory Flexibility Act

The Secretary hereby determines that this proposed rule will not have a significant economic impact on small entities within the meaning of the Regulatory Flexibility Act, U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. Compliance With Executive Order No. 12291

On August 28, 1981, the Office of Management and Budget (OMB) granted the OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for all actions taken to approve, or conditionally approve, State regulatory programs, actions, or amendments. Therefore, a Regulatory Impact Analysis and regulatory review by OMB is not needed for this program amendment.

4. Paperwork Reduction Act

This rule does not contain information collection requirements which require

approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 906

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: May 27, 1986.

Arthur W. Abbs,

Acting Deputy Director, Operations and Technical Services.

PART 906—COLORADO

Part 906 of Title 30 is amended as follows:

1. The authority citation for Part 906 continues to read as follows:

Authority: Pub. L. 95–87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

2. Section 906.15 is amended by adding a new paragraph (f) to read as follows:

§ 906.15 Approval of amendments to State regulatory programs.

* * * * *

(f) The following amendment is approved effective May 30, 1986. Revised regulation 2CCR 407–2, 5.03.3(2)(b) submitted to OSMRE by the Colorado Mined Land Reclamation Board on January 23, 1986.

BILLING CODE 4310-05-M

POSTAL SERVICE

39 CFR Part 111

Domestic Mail Manual; Plant-Load Operations

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This rule establishes final regulations amending the Domestic Mail Manual (DMM) to implement uniform and comprehensive regulations governing plant-load operations, whereby the Postal Service transports mail from a mailer's plant to a postal processing facility in order to bypass postal handlings that otherwise would be required. These final regulations, which replace previous interim regulations, reflect the restructuring of the Postal Service's field organizations.

EFFECTIVE DATE: June 7, 1986.

FOR FURTHER INFORMATION CONTACT: James E. Orlando, Director, Office of Transportation & International Services, Mail Processing Department, 475 L'Enfant Plaza W., SW., Washington, DC 20260–7130, 202–268–4360.

SUPPLEMENTARY INFORMATION: A detailed explanation of the nature and background of the proposed rule, including the reasons for its proposed adoption and a detailed discussion of the provisions of the proposed rule, accompanied its publication in the Federal Register on December 24, 1985 (50 FR 52534).

A detailed explanation of the nature and background of the interim rules, including the comments of interested persons, the Postal Service's responses, and minor and editorial revisions to the proposed rule, accompanied its publication in the Federal Register on May 8, 1986 (51 FR 17019).

The Postal Service has now finalized the restructuring of its field organizations above the post office level, which will be effective June 7, 1986. Responsibility for plant load operations is assigned to the newly created Field Division General Manager/Postmaster. An application for plant load operations will be approved by the Management Sectional Center (MSC) Manager/Postmaster if the minimum volume and the maximum mileage criteria set forth in section 154.313a or 154.323a are met and, in coordination with the transportation management office (TMO) manager, it is determined that transportation equipment is available. If these criteria are not met, the application will be reviewed and acted on by the Field Division General Manager/Postmaster. The application will be granted if it meets the criteria set forth in sections 154.313b, or 154.323b, or 154.323c for determining whether the plant load will result in a cost savings to the Postal Service by (1) the Field Division Manager, if the application is for an intra-Division service area plant load or (2), if the application is for an inter-Division service area plant load, by the origin and destination Field Division Managers and the serving TMO Managers, because coordination is required between the origin and destination Field Divisions and TMOs.

The following summarizes the revisions to sections 154.2 and 154.3 of the interim regulations which are being made in light of the restructuring of the Postal Service's field organizations:

1. Revise section 154.21 to provide that the local postmaster will review an application for plant load operations for completeness and forward it to the appropriate MSC manager.

2. Replace section 154.22 to set forth the review made by the MSC Manager of an application for plant-load operations.

3. Replace section 154.23 to set forth the review made by the Field Division Managers and TMO Managers of an application for plant-load operations.

4. Replace the first sentence of 154.26 with section 154.27 to provide that a mailer may appeal the denial of an application for plant-load operations to the National Plant-Load Committee. In the appeal, the mailer must specify the reasons why the application should be approved. Revise the second sentence of section 154.24 to provide that the MSC Manager will notify the mailer of any action taken on its application for plant-load operations.

5. Revise section 154.25 to provide that plant-load operations may commence as soon as an application for plant-load operations is approved and the mailer enters into a plant-load agreement with the Postal Service.

6. Add a new 154.26 to provide that the Field Division Manager will be notified if, at any time, a mailer fails to meet the requirements of this part for two consecutive postal accounting periods. In such event, the Field Division Manager will reevaluate the plant-load authorization.

7. Revise 154.323c to provide that the Field Division Manager will determine whether the local origin postal facility is operating at or near its mail processing capacity for the type of mail plant loaded.

For the reasons given and after careful consideration, the Postal Service hereby (1) adopts as final the amendments to the Domestic Mail Manual (incorporated by reference in the Code of Federal Regulations, see 39 CFR 111.1) that were published in the Federal Register on May 8, 1986 on an interim basis and (2) revises 154.2 and 154.3 of these regulations to read as follows:

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority citation for 39 CFR Part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 404, 407, 408, 3001–3011, 3201–3219, 3403–3405, 3621, 3001; 42 U.S.C. 1973cc–13, 1973cc–14.

2. Revise 154.2 and 154.3 to read as follows:

PART 154—PLANT-LOAD OPERATIONS

* * * * *

154.2 *Procedures for Authorization of Plant Loads*

.21 Filing Application. A mailer desiring to have mail plant loaded must complete Form 3615, *Application for*

Plant-Load Authorization, and submit it to the postmaster of the post office serving the mailer's plant. The local postmaster will review an application for completeness and forward it to his Management Sectional Center (MSC).

.22 Action by MSC Manager. An application will be approved by the MSC Manager/Postmaster if (a) it meets the requirements set forth in 154.313a or 154.323a (Alternative 1, Minimum Volume and Maximum Mileage) and (b) after coordination with the transportation management office (TMO) manager, it is determined that transportation equipment is available in accordance with 154.312. If the application is approved, the MSC manager will send a copy to the Field Division General Manager/Postmaster. If the requirements set forth in 154.313a or 154.323a are not met, the MSC manager must send the application to the Field Division Manager for review in accordance with 154.23.

.23 Action by Field Division General Manager/Postmaster.

.231 Intra Division Service Area. An application for an intra-Division service area plant-load will be approved by the Field Division Manager, if (a) it meets the requirements set forth in 154.313b (Alternative 2, Cost Savings Analysis) or 154.323b (Alternative 2, Cost Savings Analysis) or 154.323c (Alternative 3, Mail Processing Capacity) and (b) after coordination with the TMO manager, it is determined that transportation equipment is available in accordance with 154.312. The application will be denied if the requirements of 154.313b or 154.323b or 154.323c are not met.

.232 Inter-Division Service Area. An application for an inter-Division service area plant load will be approved by the origin and destination Field Division Managers and the serving TMO Managers, if it meets the requirements set forth in 154.313b (Alternative 2, Cost Savings Analysis) or 154.323c (Alternative 3, Mail Processing Capacity). The application will be denied if the requirements of 154.313b or 154.323b or 154.323c are not met.

.24 Notification of Action to Mailer. Each official acting upon an application must act upon it within five business days of receipt. The MSC Manager must promptly notify the mailer in writing of the action taken. If the application is denied, the MSC Manager must notify the mailer specifying the reasons for the denial and informing the mailer of his right to appeal the denial.

.25 Commencement of Operations. The application will be approved if it meets all the requirements set forth in 154.3 for either intra- or inter-service-area plant loads, as appropriate. If the application is approved and the mailer desires plant-load operations, the mailer must enter into a plant-load agreement with the Postal Service. Plant-load operations may commence once the application is approved and the mailer enters into the agreement.

.26 Failure to Meet Requirements. The local postmaster of the post office which serves the mailer's plant is responsible for monitoring plant-load operations and must notify his Field Division manager if, at any time, a mailer fails to meet the requirements set forth in these regulations for two consecutive postal accounting periods, or instead a period set forth in the mailer's plant-load agreement. The plant-load authorization must then be reevaluated by the Field Division Manager.

.27 Appeal

.271 Responsibility. If an application is denied by the Field Division Manager, the mailer may appeal to the National Plant Load Policy Committee at Postal Service Headquarters, which will issue a final ruling on the application. Such an appeal must be filed with the Chairman of the National Committee, the Director, Office of Transportation and International Services, Mail Processing Department, Washington, DC 20260–7130, within 10 calendar days of the date of the mailer's receipt of the Divisional manager's notice of denial. The National Committee consists of the following officials or their designees: Director, Office of Transportation and International Services, Mail Processing Department, (chairman); Director, In-Plant Systems Office, Mail Processing Department; Director, Office of Classification and Rates Administration, Rates and Classification Department; Director, Office of Fleet Management, Delivery Services Department; Director, Office of Marketing, Marketing Department; and Associate General Counsel, Office of Postal Rates and Mailing Rules, Law Department.

.272 Procedures. The mailer must specify in its appeal the reasons why the application should be approved.

154.3 Requirements for Approval of Plant Load Applications

.31 Intra-Service Area

.311 General. An application for an intra-service-area plant load will be approved if transportation equipment is available (154.312) and cost savings to the Postal Service are demonstrated under *either* Alternative 1 (154.313a) *or* Alternative 2 (154.313b).

.312 Equipment Availability. Transportation equipment must be available to transport the mail to the BMC, ASF, MSC, or SCF, in the service area of the mailer's plant. If equipment is not available, sufficient additional transportation equipment must be obtained, if possible. The application will not be granted until additional transportation equipment is obtained.

.313 Cost Savings. The plant load must result in cost savings to the Postal Service. A cost savings can be demonstrated *either* under Alternative 1 (154.313a) *or* Alternative 2 (154.313b) below.

a. Alternative 1: Minimum Volume and Maximum Mileage. The current and future volume of mail to be plant loaded must be at least 50 percent of a vehicle by weight or cube, and the mileage from the mailer's plant to the destination postal facility must be 150 miles or less. For mail verified and accepted at a mailer's plant, the Postal Service may allow mailings verified at the plants of two or more mailers located in the same service area to be combined to meet the minimum volume requirement. For mail verified and accepted at the bulk mail acceptance unit of the origin BMC, ASF, MSC, or SCF, the mimimum volume requirement must be met by the mailings of only one mailer. (See 154.423 for requirements for verification at postal facility.)

b. Alternative 2: Cost Savings Analysis. If the mailer does not meet the criteria in Alternative 1 (154.313a), cost savings to the Postal Service must be demonstrated using the analysis on Form 3615.

.32 Inter-Service-Area.

.321 General. An application for an inter-service-area plant load will be approved if transportation equipment is available (154.322) and cost savings to the Postal Service are demonstrated under *either* Alternative 1 (154.3423a) *or* Alternative 2 (154.323b) *or* Alternative 3 (154.323c).

.322 Equipment Availability. Transportation equipment must be available to transport the mail to the BMC, ASF, MSC, or SCF outside the postal facility's service area in which the mailer's plant is located. If equipment is not available, sufficient additional transportation equipment must be obtained, if possible. The application will not be granted until additional transportation equipment is obtained.

.323 Cost Savings. The plant load must result in cost savings to the Postal Service. A cost savings can be demonstrated under *either* Alternative 1 (154.323a) *or* Alternative 2 (154.323b) *or* Alternative 3 (154.323c) below.

a. Alternative 1: Minimum Volume and Maximum Mileage

(1) Minimum Volume. The current and future volume of mail to be plant loaded must be at least 60 percent of a vehicle by weight or cube. Mailings of two or more mailers located in the same service area may be combined to make up the minimum volume.

(2) Maximum Mileage for Highway

(a) If the plant-load transportation is via highway and bypasses the origin SCF and at least one BMC, ASF, or ADC, the mileage from the mailer's plant to the destination postal facility must be 275 miles or less.

(b) If the plant-load transportation is by highway and bypasses only the origin SCF, the mileage from the mailer's plant to the destination postal facility must be 150 miles or less.

(c) There is no mileage criterion for plant-load transportation by railroad or water.

b. Alternative 2: Cost Savings Analysis. If the mailer does not meet the applicable criteria in Alternative 1 (154.323a), cost savings to the Postal Service must be demonstrated by using the analysis on Form 3815.

c. Alternative 3: Mail Processing Capacity. Even if the mailer does not satisfy either Alternative 1 (154.323a) or Alternative 2 (154.323b), the cost savings criteria may be deemed to be satisfied if the local origin postal facility is operating at or near its mail processing capacity for the type of mail plant-loaded. The Field Division Manager shall determine whether a facility is at or near its mail processing capacity and whether to authorize plant load in such cases. If the Field Division Manager subsequently determines that the local origin postal facility is operating below its mail processing capacity for the class or type of mail plant-loaded, the Field Division Manager must reevaluate the plant-load authorization.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

BILLING CODE 7710-12-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-8-FRL-3022-8]

Approval and Promulgation of State Implementation Plans; Utah; Visibility

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: In this action, EPA is approving the New Source Review (NSR) and monitoring plan for visibility as a revision to the Utah State Implementation Plan (SIP). This action results from rulemaking on October 23, 1984, [49 FR 42670] at which EPA proposed to disapprove SIPs of states which failed to comply with the provisions of 40 CFR 51.305 (visibility monitoring) and 51.307 (visibility NSR).

The Governor of Utah submitted a SIP Revision for Visibility Protection and the Visibility Regulation on April 26, 1985. EPA proposed to approve the Utah Visibility SIP for NSR and monitoring on November 13, 1985, 50 FR 46782. Comments were received for and against approval. Review of the comments with respect to the Utah visibility plan and regulations indicates that Utah meets the criteria of 40 CFR 51.305 and 51.307.

DATE: This action will be effective on June 30, 1986.

ADDRESSES: Copies of the revision are available for public inspection between 8:00 a.m. and 4:00 p.m. Monday through Friday at the following offices:

Environmental Protection Agency, Region VIII, Air Programs Branch, One Denver Place, Suite 1300, 999 18th Street, Denver, Colorado 80202.

Environmental Protection Agency, Public Information Reference Unit, Waterside Mall, 401 M Street, SW., Washington, DC 20460.

The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Lee Hanley, Air Programs Branch, Environmental Protection Agency, One Denver Place, Suite 1300, 999 18th Street, Denver, Colorado 80202, (303) 293-1757.

SUPPLEMENTARY INFORMATION:

Background

Section 169A of the Clean Air Act (Act), 42 U.S.C. 7491, requires visibility protection for mandatory Class I Federal areas where EPA has determined that visibility is an important value. ("Mandatory Class I Federal areas" are certain national parks, wilderness areas, and international parks, as described in section 162(a) of the Act, 42 U.S.C. 7472(a), 40 CFR 81.400–81.437.) Section 169A specifically directs EPA to promulgate regulations requiring certain states to amend their State Implementation Plans (SIPs) to provide for visibility protection.

On December 2, 1980, EPA promulgated the required visibility regulations at 45 FR 80084, codified at 40 CFR 51.300 *et seq.* These regulations required the states to submit revised SIPs to satisfy such provisions no later than September 2, 1981. [See 45 FR 80091, codified at 40 CFR 51.302(a)(1).] That rulemaking resulted in numerous parties seeking judicial review of the visibility regulations. In March 1981, a judicial stay of the litigation was granted pending EPA action on related administrative petitions for reconsideration of the visibility regulations.

In December 1982, the Environmental Defense Fund (EDF) filed suit in the U.S. District Court for the Northern District of California alleging that EPA failed to perform a nondiscretionary duty under Section 110 of the Act to promulgate visibility SIPs. A settlement agreement between EPA and EDF outlined a schedule for the promulgation of visibility SIPs. It required EPA to incorporate Federal regulations in states where SIPs were found deficient with respect to the 1980 visibility new source review and monitoring regulations, 40 CFR 51.307 and 51.305, respectively. However, the settlement did allow a state an opportunity to avoid Federal promulgation if it submitted a SIP no later than May 6, 1985. Utah is one of the states listed at 49 FR 42670 as having an inadequate NSR and monitoring plan for visibility protection.

On April 26, 1985, the Governor of Utah submitted a SIP Revision for Visibility Protection together with the Visibility Regulations for monitoring and new source review. On November 13, 1985, FR 46782, EPA proposed to approve the Utah Visibility SIP and regulations. Comments were received in support as well as against approval. The comments are discussed below.

Discussion of comments:

1. Comment: The Utah SIP lacks an adequate and explicit state commitment to a comprehensive and continuous visibility monitoring program adequate to provide the information required to comply with the Act.

Response: As stated in the November 13, 1985 notice, at 50 FR 46783, the monitoring section of the Utah Visibility Protection Plans consist of three components:

(1) Monitoring by the Federal Land Manager (FLM),

(2) Monitoring by sources proposing to locate or modify in an area where emissions may impact Class I areas, and

(3) Implementation of state monitoring network.

"Monitoring by the FLM" is the assessment of visibility background and trends by obtaining existing data available from the FLM. The National Parks in Utah have been or are still being monitored by the National Park Service (NPS). For those areas where monitoring no longer occurs, the NPS believes there exists sufficient

background data (i.e., five to six years of monitoring data). For these areas where monitoring is still being conducted, the State is seeking a cooperative agreement with the NPS to facilitate visibility monitoring and data exchange. Currently, the NPS performs visibility monitoring at the following sites:

(1) Bryce Canyon National Park,
(2) Zion National Park,
(3) Capitol Reef National Park, and
(4) Canyonlands National Park.

Monitoring by sources proposing to locate or modify in a locale where emissions may impact Class I areas will add to the background and trend data bank of that Class I area.

The SIP states a goal to establish a monitoring network by September 1987 to complement the monitoring required by the SIP and to provide additional background data. It will perform visual and photographic monitoring until additional funding can be obtained to begin installation of continuous visibility monitoring equipment.

The Utah monitoring section of the Visibility SIP consists of a statement of goals, a list of monitoring methods, and a provision for future plan revisions.

The commentor cited extensive language relating to the October 23, 1984 proposed rulemaking, 49 FR 42671. The commentor is referred to the language of § 51.305, which requires a strategy by visual observation or other appropriate monitoring techniques taking into account current and anticipated research and techniques. That section also requires consideration of available data and a mechanism for those data's use in decisions. In its general final rulemaking, at 50 FR 28545, EPA discussed the monitoring network requirements. It stated that EPA interprets § 51.305, "in light of structure and purposes of the regulations as a whole, to call for a strategy which will generate visibility data that will reasonably, if roughly, serve the needs of the overall State program."

EPA sees the Utah Visibility SIP as meeting the requirements of § 51.305.

2. Comment: (a) Industry monitoring provisions will not remedy the deficiencies of the state program. (b) Failure to require that the visibility effects of a new source must be analyzed in terms of its cumulative effects taken together with existing sources.

Response: The Utah Visibility regulations and SIP require a visibility impact analysis by a proposed new or modified source with the submittal of a permit application. The SIP requires source specific review as defined in 40 CFR 52.27 and 52.28 to determine the potential visibility impact of the proposed source to existing sources. The regulation provides the mechanism for the permitting authority to require pre-construction as well as post-construction visibility monitoring in any mandatory Class I area to assess the source's impact on visibility.

Monitoring by proposed sources will assist in determining background conditions as well as considering the effects of existing sources. This, coupled with the evaluation of potential impact by the proposed source, can only benefit the visibility program in preventing degradation of the area.

3. Comment: Inadequate provision for attribution to identified sources.

Response: Again, the commentor refers to the proposed rulemaking in 49 FR 42675. The commentor is referred to the July 12, 1985 final rulemaking, 50 FR 28548, which states that "EPA did not mean to imply that the data collection techniques for the background network were to be used in the source-specific studies. The proposed background instrumentation will be used only as appropriate for these studies. The attribution program will be implemented on a case-by-case basis with regard to both siting and equipment.

The EPA has requested that the FLMs identify impairment in each of their areas. From this identification, appropriate studies will be designed which will be unique to each identified problem. Priorities for implementation will be based on availability of existing data, the severity of the suspected impairment, and the probability of an effective control strategy." The FLM had an opportunity to review the Utah Visibility SIP for this phase (monitoring and NSR). No impairment areas were identified by the FLM during the development of this program. Should impairment in mandatory Class I areas be established by the FLM prior to future revisions of the SIP, the State of Utah must consider and comment on the issue at that time.

4. Comment: (a) Excessive discretion in provisions for monitoring by proposed sources. (b) The regulatory portion of the SIP is not clearly distinguished from the explanatory preamble. As a result, the regulations fail to establish clear commitments and obligations, and do not contain some essential requirements.

Response: The State incorporated its permitting regulations into its Visibility SIP as well as requiring the application of Best Available Control Technology and emission limitation requirements of any new or modified source locating anywhere in the State. The regulations state the consideration requirements of the analyses performed by the State and the FLM as well as the denial of a permit if visibility impact is determined by the permitting authority. The regulations provide the mechanisms for permit conditions on control equipment, technology, methods and work practices which would provide the insurance that source emissions will be consistent with making reasonable progress toward the national goal.

5. Comment: (a) The list of factors to be considered in determining control requirements for new source review does not conform to EPA requirements or to the Clean Air Act. (b) Determination of adverse impact should give deference to the adversity determinations of the Federal Land Manager.

Response: The State does allow for consideration of various control requirements (i.e., economic, non-air quality environmental impact, etc.). However, the SIP states it will ensure that source emissions will be consistent with making reasonable progress toward the national goal referred to in § 51.300(a), to consider the FLM's comments and to deny a permit if the permitting authority determines that there will be adverse impact on a mandatory Class I area. Further, the regulation requires the permitting authority to provide an explanation of its decision should it disagree with the FLM's assessment on a proposed source's impact on visibility and to give notice as to where that explanation can be obtained.

40 CFR 51.307(a)(3) and 52.27(d)(2) provide the appropriate mechanism for the permit issuing authority to share with the FLM the review for adverse impact of a proposed source. The final decision rests with the permitting authority.

The State recognizes the expertise of the FLM in monitoring and new source applicability analyses for visibility. It has accorded the FLM (through the NPS) opportunities to participate and comment on its visibility SIP and regulations. Comments by the NPS were considered and incorporated where applicable. It has committed in the SIP to consult continually with the FLM on the review and implementation of the visibility program. It has agreed to notify the FLM of any advance notification or early consultation with a major new or modifying source prior to the submission of the permit application.

Summary of Action

The April 26, 1985 submittal by the Governor of Utah includes an adequate visibility plan and regulation to meet the requirements of § 51.305 and § 51.307.

(One should reference the Federal Register notices on October 23, 1984, 49 FR 42670, July 12, 1985, 50 FR 28544, and November 15, 1985, 50 FR 46762, for additional information.) The Visibility SIP and regulations apply to attainment and nonattainment areas. It requires denial of a permit if adverse impact will occur in these areas. The SIP is deficient for all the other requirements of Subpart P (other than § 51.305 and § 51.307). See 51 FR 3098, January 23, 1986.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 29, 1986. This action may not be challenged later in proceedings to enforce its requirements (See section 307(b)(2)).

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, and Hydrocarbons, Incorporation by reference.

Note. Incorporation by reference of the State Implementation Plan for the State of Utah was approved by the Director of the Federal Register on July 1, 1982.

Dated: May 5, 1986.

Lee M. Thomas,

Administrator

PART 52—[AMENDED]

Part 52 Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart TT-Utah

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642

2. Section 52.2320 is amended by adding paragraph (c)(19) as follows:

§ 52.2320 Identification of plan.

* * * * *

(c) * * *

(19) A revision to the SIP was submitted by the Governor on April 26, 1985, for visibility monitoring and new source review.

(i) Incorporation by reference.

(A) Letter dated April 26, 1985, from Governor Norman Bangerter submitting the Utah Visibility SIP and Regulations.

(B) The Visibility SIP and the Utah Air Conservaton Regulations 3.1.7 and 3.11.1 were adopted on April 15, 1985 referred to in the Governor's letter as April 12, 1985.

BILLING CODE 6560-50-M

DEPARTMENT OF DEFENSE

48 CFR Parts 213, 217, and 252

Department of Defense Federal Acquisition Regulation Supplement; Identification of Sources of Supply

AGENCY: Department of Defense.

ACTION: Final rule.

SUMMARY: The Defense Acquisition Regulatory Council has approved changes to the coverage in the DoD FAR Supplement regarding Identification of Sources of Supply. The purpose of this change is to implement section 1231 of Pub. L. 99-525.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, ODASD(P)/DARS, c/o OASD(A&L)(MRS), Room 3C841, The Pentagon, Washington, DC 20301-3062, telephone (202) 697-7266.

SUPPLEMENTARY INFORMATION:

A. Background

Coverage provides for identification of the actual manufacturer or producer of items and all sources of supplies; identification of sources of technical data to be delivered under contract is also required. Coverage allows for identification of sources at the deliverable item level or at the purchased part/subcontract level.

The DoD FAR Supplement is codified in Chapter 2, Title 48 of the Code of Federal Regulations.

The October 1, 1985 revision of the CFR is the most recent edition of that title. It reflects amendments to the 1984 edition of the DoD FAR Supplement made by Defense Acquisition Circulars 84-1 through 84-10.

Interested parties may submit proposed revisions to this Supplement directly to the DAR Council.

B. Public Comments.

Notice of an interim rule was published in the Federal Register on October 9, 1985 (50 FR 41157, October 9, 1985), requesting Government agencies, private firms, associations, and the general public to submit comments to be considered in the formulation of the final rule. As a result of the review of public comments, the following changes were made:

(1) 217.7204(a) was amended to add "of additional costs" after "avoiding payment".

(2) 217.7204(b)(3) was amended to add "e.g., nonrepetitive local purchases" to the end of that sentence.

C. Regulatory Flexibility Act

This final rule will have a beneficial impact on small entities. The change to 217.7103(b)(3) exempts nonrepetitive local purchases from the rule and will benefit small businesses that sell low-dollar value items to local activities on a one-time basis.

A final Regulatory Flexibility Analysis has been prepared and submitted to the Chief Counsel for Advocacy of the Small Business Administration. Copies of the analysis may be obtained from the Office of the Chief Counsel for Advocacy, U.S. Small Business Administration, 1441 L Street NW. (Room 1012), Washington, DC 20416.

D. Paperwork Reduction Act

Office of Management and Budget (OMB) Approval Number 0704-0214 was approved on February 18, 1986, for 1,506,250 hours.

List of Subjects in 48 CFR Parts 213, 217, and 252

Government procurement.

Charles W. Lloyd,

Executive Secretary, Defense Acquisition Regulatory Council.

Adoption of Amendments

Therefore the DoD FAR Supplement is amended as set forth below.

1. The authority for 48 CFR Parts 213, 217, and 252 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 301.301.

PART 213—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

2. The interim rule published in 50 FR 41157, October 9, 1985, is adopted as final without change.

PART 217—SPECIAL CONTRACTING METHODS

217.7204 [Amended]

3. The interim rule published in 50 FR 41157, October 9, 1985, is adopted as final with the following changes:

Section 217.7204 is amended by adding in the undesignated paragraph following subparagraph (a)(3), between the word "payment" and the word "where" the words "of additional costs"; and by deleting the period at the end of

paragraph (b)(3) and adding at the end of paragraph (b)(3) a comma and the words "e.g., nonrepetitive local purchases."

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

4. The interim rule published in 50 FR 41157, October 9, 1985, is adopted as final without change.

BILLING CODE 3810-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 658

[Docket No. 60585-6085]

Shrimp Fishery of the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of effective date.

SUMMARY: NOAA issues this notice making effective the information collection requirement to the emergency interim rule for the Fishery Management Plan for the Shrimp Fishery of the Gulf of Mexico (FMP). This rule implements the reporting requirements for vessels which incidentally take any endangered or threatened sea turtle. The intended effect is to implement the intent of the emergency rule.

EFFECTIVE DATE: Section 658.6(c) is effective from May 19, 1986, through July 9, 1986.

FOR FURTHER INFORMATION CONTACT: Donald W. Geagan, 813-893-3722.

SUPPLEMENTARY INFORMATION: NOAA published an emergency interim rule on May 13, 1986 (51 FR 17487) to modify the geographic boundary and dates of the seasonal closure to shrimp trawling off Texas to reduce the area closed to trawl fishing to that portion of the fishery conservation zone (FCZ) within 15 nautical miles of the baseline for the territorial sea (shore).

The submission of reports of incidental take of endangered or threatened sea turtles at § 658.5 was not made effective with the emergency interim rule, pending approval of the information collection requirement by OMB. Section 658.5 was approved by OMB under Control No. 0648-0178, effective May 19, 1986, through August 31, 1986.

Other Matters

This action is taken under the authority of 50 CFR Part 658 and is taken in compliance with Executive Order 12291.

List of Subjects in 50 CFR Part 658

Reporting and recordkeeping requirements, Fisheries.

PART 658—[AMENDED]

1. The authority citation for Part 658 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

Dated: May 27, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator For Fisheries Resource Management, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 51, No. 104
Friday, May 30, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 752

Adverse Actions

AGENCY: Office of Personnel Management.

ACTION: Proposed regulations.

SUMMARY: These regulations cover Senior Executive Service suspension and removal actions. The Office of Personnel Management (OPM) issued interim regulations previously on such actions in July 1979. The proposed regulations incorporate statutory revisions since July 1979 of the reasons for taking adverse actions. These regulations also exclude reemployed annuitants from coverage and extend coverage to certain limited appointees in addition to career employees currently covered. The regulations would apply to suspensions for more than 14 days or removals from the civil service for reasons of misconduct, neglect of duty, malfeasance, or failure to accept a directed reassignment or to accompany a position in a transfer of function.

DATE: Comments will be considered if received no later than July 29, 1986.

ADDRESS: Send or deliver written comments to the Chief, Office of Executive Personnel, Office of Executive Administration, Room 6R48, Office of Personnel Management, 1900 E Street, NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Neal Harwood, (202) 632–4825.

SUPPLEMENTARY INFORMATION: On July 31, 1979, OPM published an interim rule (44 FR 44818) on taking adverse actions in the Senior Executive Service (SES) that implemented subchapter V of chapter 75 of title 5, United States Code, by adding Subpart E and Subpart F to Part 752 of Title 5 of the Code of Federal Regulations.

The comment period, which was 60 days from the date of publication, ended on October 1, 1979. No written comments were received. However, there were a number of phone inquiries.

The most frequently asked question was why the interim regulations did not address short term suspensions of SES appointees. The reason is that subchapter V of chapter 75 does not cover suspensions of 14 days or less. Furthermore, subchapter I of chapter 75, which covers such actions, pertains only to employees in the competitive service. Thus, there is no express statutory authority for taking a suspension of 14 days or less against an appointee in the SES.

It appears that the Congress may have viewed suspensions of 14 days or less (normally imposed for less serious offenses) as inappropriate disciplinary measures for SES members. Because of their greater responsibilities, SES members have a significant impact on agency programs and on the public image of the Government. Consequently, offenses by them would be considered more serious and normally would warrant the imposition of a more severe penalty.

After publication of the interim regulations, section 1704(d) of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35, August 13, 1981) revised the cause of action standard in 5 U.S.C. 7543 to read "misconduct, neglect of duty or malfeasance," in place of "such cause as will promote the efficiency of the service." The Conference Report on the Act stated that the change was to assure that adverse actions were taken only for disciplinary reasons. In addition, the Report stated, "Consistent with existing policy, the conferees intend that failure to accept a directed reassignment or failure to accompany a position in a transfer of function would constitute grounds for disciplinary action under the subchapter."

Regulations were drafted to set forth the foregoing changes. Before their issuance, however, further legislation was enacted that revised title 5 to expressly include under adverse actions "failure to accept a directed reassignment or to accompany a position in a transfer of function." Thus, the previously recognized policy in the earlier Conference Report is codified by Pub. L. 98–615 of November 8, 1984, the Civil Service Retirement Spouse Equity Act. The congressional section analysis for the Act points out that a basic premise of the SES is to foster position and geographic movement when in the best interest of the agency. This is further borne out by the fact that the same Act also amends title 5 to specifically provide for transfer of function in the SES. (See 5 U.S.C. 3595(e).) Accordingly, § 752.603 of 5 CFR is amended to incorporate these latest provisions.

In accordance with 5 U.S.C. 3323(b), a reemployed annuitant serves at the will of the appointing authority. Thus, a reemployed annuitant who is serving under an SES career appointment is not entitled to the protections afforded under these regulations. Section 752.601(d) of 5 CFR is amended to reflect this fact.

Under § 317.605 of this chapter, individuals who receive an SES limited appointment without a break in service in the same agency as the one in which they held a career or career conditional appointment (or an appointment of equivalent tenure) in a permanent position outside the SES are entitled to be placed in their former position, or an equivalent one, following termination of their SES appointment, if the termination was not for misconduct, neglect of duty, or malfeasance. Under current regulations, however, individuals who had adverse action coverage before their SES limited appointment lose such coverage while in the SES because the title 5 provision on SES adverse actions and the implementing interim regulations cover only SES career appointees. The proposed regulations cover such limited appointees so that they do not lose adverse action protection for actions involving removal from the civil service or suspension for more than 14 days during the temporary period they are in the SES. Of course, if their conduct removal is upheld, the affected employees would have no reinstatement right under § 317.605 of this chapter. This provision does not affect an agency's authority to terminate an SES limited appointment at any time for reasons other than misconduct, neglect of duty, or malfeasance without the use of adverse action procedures.

Since the interim regulations were first issued in 1979, the Merit Systems Protection Board has held that a suspension during the notice period of an adverse action is illegal. Therefore, paragraph (3) of § 752.604(b) provides

other means for keeping employees away from the work site during the notice period under certain circumstances, such as when an employee's continued presence would post a threat to the employee of others.

Subpart E of 5 CFR Part 752 would be reserved for future use. It currently lists the principal statutory requirements for taking adverse actions in the SES. These requirements appear in 5 U.S.C. and do not need to be repeated in 5 CFR.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it will only affect Government employees who are members of the Senior Executive Service.

List of Subjects in 5 CFR Part 752

Government employees.

U.S. Office of Personnel Management.
Constance Horner,
Director.

Accordingly, OPM is proposing to amend 5 CFR Part 752 as follows:

PART 752—ADVERSE ACTIONS

1. The authority citation for Part 752 is revised as set forth below, and all other authority citations throughout Part 752 are removed:

Authority: 5 U.S.C. 7504, 7514; 5 U.S.C. 1302, Publ. L. 95-494; § 752.401 also issued under 5 U.S.C. 3301 and 3302, and E.O. 10577; Subpart F also issued under 5 U.S.C. 7543.

2. Subpart E is removed and reserved.

3. Subpart F is revised to read as follows:

Subpart F—Regulatory Requirements for Taking Adverse Actions Under the Senior Executive Service

Sec.
752.601. Coverage.
752.602. Definitions.
752.603. Standard for action.
752.604. Procedures.
752.605. Appeal rights.
752.606. Agency records.

Subpart F—Regulatory Requirements for Taking Adverse Actions Under the Senior Executive Service

§ 752.601 Coverage.

(a) *Adverse actions covered.* This subpart applies to suspensions for more than 14 day and removals from the civil service as set forth in 5 U.S.C. 7542.

(b) *Actions excluded.* (1) An agency may not take a suspension action of 14 days or less.

(2) This subpart does not apply to actions taken under 5 U.S.C. 1206(g), 3592, 3595, or 7532.

(c) *Employees covered.* This subpart covers—

(1) A career appointee—

(i) Who has completed the probationary period in the Senior Executive Service;

(ii) Who is not required to serve a probationary period in the Senior Executive Service; or

(iii) Who was covered under 5 U.S.C. 7511 immediately before appointment to the Senior Executive Service.

(2) A limited term or limited emergency appointee—

(i) Who received the limited appointment without a break in service in the same agency as the one in which the employee held a career or career conditional appointment (or an appointment of equivalent tenure as determined by the Office) in a permanent civil service position outside the Senior Executive Service; and

(ii) Who was covered under 5 U.S.C. 7511 immediately before appointment to the Senior Executive Service.

(d) *Employees excluded.* This subpart does not cover an appointee who is serving as a reemployed annuitant.

§ 752.602 Definitions.

In this subpart—

"Career appointee," "limited term appointee," and "limited emergency appointee" have the meaning given in 5 U.S.C. 3132(a).

"Day" means calendar day.

"Suspension" has the meaning given in 5 U.S.C. 7501(2).

§ 752.603 Standard for action.

(a) An agency may take an adverse action under this subpart only for reasons of misconduct, neglect of duty, malfeasance, or failure to accept a directed reassignment or to accompany a position in a transfer of function.

(b) An agency may not take an adverse action under this subpart on the basis of any reason prohibited by 5 U.S.C. 2302.

§ 752.604 Procedures.

(a) *Statutory entitlements.* A career appointee against whom action is proposed under this subpart is entitled to the procedures provided in 5 U.S.C. 7543(b). The same procedures will be followed when an action is proposed against a limited term or limited emergency appointee under this subpart.

(b) *Notice of proposed action.* (1) The notice of proposed action must inform the appointee of his or her right to review the material that is relied on to support the reasons for action given in the notice.

(2) The agency may not use material that cannot be disclosed to the appointee or to the appointee's representative or designated physician under § 297.204(c) of this chapter to support the reasons in the notice.

(3) Under ordinary circumstances, an appointee whose removal has been proposed will remain in a duty status in his or her regular position during the advance notice period. In those rare circumstances when the agency determines that the appointee's continued presence in the work place during the notice period may pose a threat to the appointee or others, result in loss of or damage to Government property, or otherwise jeopardize legitimate Government interests, the agency will consider whether any of the following alternatives is feasible:

(i) Assigning the appointee to duties where he or she is no longer a threat to safety, the agency mission, or Government property;

(ii) Placing the appointee on leave with his or her consent;

(iii) Placing the appointee on involuntary sick or other leave when the agency has medical documentation stating physical or mental incapaciation;

(iv) Placing the appointee on appropriate leave (annual, sick, leave without pay, or absence without leave) if he or she is absent for reasons not originating with the agency; or

(v) Curtailing the notice period when the agency can invoke the provisions of paragraph (d) of this section (the "crime provision").

If none of these alternatives is available, the agency may place the appointee in a paid nonduty status during all or part of the advance notice period.

(c) *Appointee's answer.* (1) The agency will give the appointee a reasonable amount of official time to review the material relied on to support its proposed action, to prepare an answer orally and in writing, and to secure affidavits, if the appointee is otherwise in an active duty status.

(2) The agency will designate an official to hear the appointee's oral answer. The individual designated should be an official who has authority either to make or to recommend a final decision on the proposed adverse action.

(3) The right to answer orally in person does not include the right to a formal hearing with examination of witnesses unless the agency provides one in its regulations in accordance with paragraph (g) of this section.

(d) *Exception.* Section 7543(b)(1) of title 5 of the United States Code authorizes an exception to the 30 days' advance written notice when the crime provision is invoked. This provision may be invoked even in the absence of judicial action if the agency has reasonable cause to believe that the appointee has committed a crime for which a sentence of imprisonment may be imposed. The agency may require the appointee to furnish any answer to the proposed action, and affidavits and other documentary evidence to support the answer, within such time as under the circumstances would be reasonable, but not less than 7 days. When the circumstances require immediate action, the agency may place the appointee in a nonduty status with pay for such time, not to exceed 10 days, as is necessary to effect the action.

(e) *Representation.* (1) Under 5 U.S.C. 7543(b)(3), an appointee covered by this part is entitled to be represented by an attorney or other representative.

(2) An agency may disallow as an appointee's representative—

(i) An individual whose activities as a representative would cause a conflict of interest or position;

((ii) An employee of the agency whose release from his or her official position would give rise to unreasonable costs; or

(iii) An employee of the agency whose priority work assignments preclude the employee's release.

(f) *Agency decision.* In arriving at its written decision, the agency will consider only the reasons specified in the notice of proposed action and any reply of the appointee or the appointee's representative made to a designated official. The agency will deliver the notice of decision to the appointee at or before the time the action will be effective. The notice of decision will inform the appointee of his or her appeal rights.

(g) *Hearing.* Under 5 U.S.C. 7543(c), the agency may in its regulations provide a hearing in place of or in addition to the opportunity for written and oral reply.

§ 752.805 Appeal rights.

(a) Under 5 U.S.C. 7543(d), a career appointee against whom an action is taken under this subpart is entitled to appeal to the Merit Systems Protection Board.

(b) A limited term or limited emergency appointee who is covered under § 752.801(c)(2) also may appeal an action taken under this subpart to the Merit Systems Protection Board.

§ 752.806 Agency records.

The agency will maintain copies of the adverse action record items specified in 5 U.S.C. 7543(e) and furnish them upon request as required by that subsection.

[FR Doc. 86-12203 Filed 5-29-86; 8:45 am]

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

7 CFR Part 810

Standards for Wheat

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Federal Grain Inspection Service (FGIS) proposes to revise the U.S. Standards for Wheat to certificate dockage to the nearest 0.1 percent. The current method of dockage certification rounds the actual dockage percentage down to the nearest half or whole percent. This method may result in understating the level of dockage up to 0.49 percent on the certificate. Certification of dockage to the nearest 0.1 percent is more precise than the current method and should enhance the marketability of U.S. wheat traded in the domestic and export markets. In addition, FGIS solicits comments on a change to its Grain Inspection Handbook that would provide that the protein content of wheat be certified on a constant 12.0 percent moisture basis. Certification on the basis of a constant 12.0 percent moisture instead of the current "as is" moisture will add uniformity to the protein reporting procedure.

DATE: Comments must be submitted on or before July 14, 1986.

ADDRESS: Comments must be submitted in writing to Lewis Lebakken, Jr., Information Resources Staff, RM, USDA, FGIS, Room 1661, South Building, 1400 Independence Avenue, SW., Washington, DC 20250, telephone (202) 382-1738. All comments received will be made available for public inspection at the above address during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., telephone (202) 382-1738.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This proposed rule has been issued in conformance with Executive Order 12291 and Departmental Regulation 1512-1. The action has been classified as nonmajor because it does not meet the criteria for a major regulation established in the Order.

Regulatory Flexibility Act Certification

Dr. Kenneth A. Gilles, Administrator, FGIS, has determined that this proposed rule will not have a significant economic impact on a substantial number of small entities because those persons who apply the standards and most users of wheat inspection services do not meet the requirements for small entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Further, the standards are applied equally to all entities by FGIS employees and licensed persons.

Certification of Dockage in Wheat

Dockage consists primarily of dust, chaff, small weed seeds, very small pieces of broken wheat, and coarse grains larger than wheat. Domestic millers usually remove dockage during grain cleaning and may use it as animal feed. Foreign buyers use dockage in a variety of ways. Some use the dockage in animal feeds, others mill the dockage with the wheat, and some remove and discard the dockage.

In the current U.S. Standards for Wheat (7 CFR 810.301–810.309), dockage is certificated by rounding down to the nearest 0.5 percent (7 CFR 810.305). For example, for 0.0 to 0.49 percent no dockage is shown, 0.5 to 0.99 is shown as 0.5 percent dockage, 1.0 to 1.49 percent is shown as 1.0 percent dockage and so forth. Many foreign buyers question the adequacy of the current dockage certification method asserting that the actual dockage is almost always understated. FGIS proposes recording the dockage to the nearest 0.1 percent on official inspection certificates to more precisely state wheat dockage content.

In current practice a wheat shipment may contain up to 0.49 percent more dockage than the percentage shown on the official inspection certificate. Export shipments certificated with no dockage generally contain 0.35 to 0.45 percent dockage. Export shipments certificated at 0.5 percent dockage generally contain 0.6 to 0.9 percent dockage. An understated amount of dockage may impact on foreign buyers due to wheat prices being paid for understated dockage, freight, and, when applicable, levy charges paid on each ton of wheat imported.

The last review of the wheat standards included an evaluation of the dockage rounding procedure. In the March 22, 1968, Federal Register (43 FR 11953), FGIS stated that a review of the wheat standards would include an

evaluation of dockage certification procedures. Two potential alternatives were suggested:

1. Certification to the nearest 0.1 percent, and

2. Certification to the nearest 0.5 percent by rounding up or down on the basis of 0.25 percent.

In the January 13, 1984, Federal Register (49 FR 1790), FGIS proposed revising the dockage rounding procedue to certificate dockage to the nearest 0.5 percent. After reviewing available information and the comments submitted on the proposal, FGIS determined that additional study was needed prior to taking any action on the dockage issue, and at least one public meeting would be held to discuss the dockage rounding procedure with interested parties. This position was stated in the final rule published in the May 16, 1984, Federal Register (49 FR 20636).

FGIS continued gathering information and data on the level of wheat dockage in the marketplace. Export inspection results for 1984 were collected and analyzed along with domestic inspection results representing the 1984 wheat harvest. The USDA, Economic Research Service (ERS) used these data and other available information to compile a report entitled: "Economic Implications of Alternative Methods of Certificating Dockage in U.S. Wheat." The objectives of the report were to:

1. Review available literature on the relationship between dockage and wheat quality,

2. Estimate economic impact of alternative dockage certification methods, and

3. Estimate the costs and benefits of removing dockage from U.S. wheat through cleaning operations.

The report concludes that dockage certificated to the nearest 0.1 percent could affect price per bushel depending on how market participants view the price quotations for wheat in relation to the certificated dockage content. The price effect on all classes of wheat in the interior market could vary from a decrease of 0.971 cents per bushel to an increase of 0.674 cents per bushel. In the export market, the report concluded that the price effect for all classes of wheat could vary from a decrease of 0.961 cents per bushel to an increase of 0.789 cents per bushel. The report also concluded that elimination of the problem of understated dockage would strengthen the credibility of the official inspection certificate, enhance buyer confidence in the U.S. Standards for Wheat, and strengthen the competitive position of U.S. wheat in the world market.

Other potential benefits of revising the dockage certification procedure to round to the nearest 0.5 percent or the nearest 0.1 percent as noted in the report include:

1. More accurate description of the raw grain. Certification to the nearest 0.1 percent would be more precise and remove incentives to blend grain so as to reach the maximum dockage level allowed by the current rounding down procedure.

2. A reduction in the potential for changing inspection results by 0.5 percent on the same lot or sample. Certification to the nearest 0.1 percent would eliminate the problem.

3. Improvement of pricing efficiency.

4. Removal of the incentive to add dockage to clean grain.

5. Possible reward to producers who deliver wheat with less than the average dockage content.

6. Improvement of grain quality, including: (a) reducing destructive insects, (b) the risk of dust explosions, (c) health problems associated with inhalation of grain dust, and (d) problems associated with segregation of dockage during handling and loading.

Dockage certificated to the nearest 0.1 percent was not proposed previously because of FGIS concerns about grain inspection equipment limitations. To evaluate dockage tester performance, a study was conducted by FGIS on the effect of equipment limitations on the reproducibility of dockage results. Samples of Hard Red Winter wheat, Soft Red Winter wheat, Hard Red Spring wheat, White wheat, and Durum wheat containing four dockage levels (1.0, 2.0, 4.0, and 8.0 percent) were run on three dockage testers. The study revealed that at the 1.0, 2.0, and 4.0 percent dockage levels the equipment provided results within ±0.10 percent. At the 8.0 percent dockage level two significant deviations occurred out of 15 tests results. Since a large majority (about 90 percent) of wheat inspected in the domestic and export markets contains less than 2.0 percent dockage, FGIS expects that results certificated to the nearest 0.1 percent will be reproducible.

Dockage certificated to the nearest 0.5 percent would be more accurate than the current procedure since the actual dockage level could differ from the amount certificated by no more than 0.25 percent. However, this method would still allow up to 0.25 percent understated dockage and foreign buyer complaints about excess dockage could continue.

FGIS held a Wheat Dockage Meeting in Denver, Colorado, on January 7, 1986. This meeting was announced in the Federal Register on December 4, 1985 (50 FR 49737).

Representatives of nearly all segments of the wheat industry attended the meeting, including producers, handlers, merchandisers, millers, exporters, and foreign buyers. Approximately eighty-five individuals were in attendance. The Economic Research Service report cited earlier was made available to the public prior to the meeting and was available to attendees at the meeting.

The wheat dockage certification options presented for discussion at the meeting were:

1. Continue to use the current method whereby the actual percentage of dockage is rounded down to the nearest half or whole percent for certification purposes.

2. Certificate dockage to the nearest 0.5 percent.

3. Certificate dockage in tenths of a percent.

4. Combine dockage and foreign material and count the total percentage against the current foreign material grade standard limits.

FGIS requested that any alternative option(s) be presented by the attendees. However, while variations to the options presented were discussed, no new options were submitted.

More than twenty wheat industry representatives presented formal comments on wheat dockage certification.

Only two speakers supported retaining the current dockage certification procedure. These two speakers believed additional studies on grain handling practices and/or grain quality are necessary before a change could be proposed. A third speaker supported changes in dockage certification but also believed further studies were necessary.

Certificating dockage to the nearest 0.5 percent was not mentioned as the preferred option by any of the speakers.

A large majority of the industry personnel who spoke favored certification of dockage to the nearest 0.1 percent and urged FGIS to implement this method of certification as rapidly as possible. According to their comments, they stated this method of certification would more accurately indicate dockage content and would enhance the quality of U.S. wheat as perceived by foreign buyers.

Combining the percentages of dockage and foreign material and applying the results as a grade-determining factor in the standards was advanced as an option by a number of individuals but was not the option of choice by the majority of speakers. This method could

allow extra dockage to be introduced up to the maximum amount for each grade. In addition, the marketplace could easily calculate the exact amount of dockage and foreign material if desired, provided that dockage is reported to the nearest 0.1 percent. Foreign material is currently certificated to the nearest 0.1 percent.

A few speakers suggested combining dockage, foreign material, and shrunken and broken kernels to form a new factor of non-millable material. Another speaker suggested including the current factors contrasting classes and wheat of other classes in the new factor non-millable material. No consensus was reached regarding these suggestions. Additional research and study would be necessary to establish official grade limits for the non-millable material factor.

In addition to the Wheat Dockage Meeting in Denver, Colorado, comments have been received from growers' and processors' organizations. In addition, a series of Grain Quality Workshops were initiated by the trade. The objective of the workshops is to study problems related to the quality of grain exported from the United States. Workshop members include representatives of producer associations, trade associations and commissions, grain marketing firms, universities, and the Federal Government. Certification of the percentage of dockage in wheat was one of the primary topics considered during the first few workshops. After discussing the current dockage certification procedure and potential alternatives, the majority of the Grain Quality Workshop members recommended that dockage be certificated to the nearest 0.1 percent. Certification to the nearest 0.1 percent was considered to be the most acceptable method to specify the actual dockage content of wheat.

In view of FGIS studies on dockage tester performance, the ERS study on the economics of alternative dockage methods, the comments submitted at the public meeting, and the recommendation received from the Grain Quality Workshops, FGIS proposes that § 810.306(b), be revised to state the percentage of dockage in wheat to the nearest 0.1 percent.

Comments including data, views, and arguments are solicited from interested persons. Pursuant to section 4(b) of the United States Grain Standards Act (7 U.S.C. 75(b)), upon request, such information may be presented orally in an informal manner. Also, pursuant to section 4(b) of the Act, no standards established or amendments or revocations of standards are to become effective less than one calendar year after promulgation unless in the judgment of the Administrator, the public health, interest, or safety requires that they become effective sooner. If finalized, FGIS intends that the change should become effective on May 1, 1987 to coincide with the beginning of the crop year.

Moisture Basis on Protein

In addition to the above rulemaking, FGIS is soliciting views and comments on another topic addressed by the growers' and processors' organizations and the Grain Quality Workshops on the use of a constant moisture basis to certificate the protein content of wheat. Following a discussion of this subject, members recommended that protein content be certificated on a constant 12.0 percent moisture basis to provide uniformity to the certification procedure. A 12.0 percent basis was recommended because this percentage is representative of the average moisture content of wheat exported from the United States.

Protein is an official criteria under the U.S. Grain Standards Act. The procedure for reporting protein content appears in Aux. 21 of the Grain Inspection Handbook. Unless otherwise requested, protein content is currently reported on "as is" moisture basis; that is, the percentage of protein is calculated on the actual moisture content of the wheat. Current procedures also allow protein content to be recorded on a specified moisture basis if requested by the applicant for inspection.

When reported on an "as is" moisture basis, the protein quantity of wheat which has different moisture levels cannot be compared easily. Protein content is inversely related to moisture content. Protein quantity, certificated on a constant moisture basis of 12.0 percent, would provide buyers, sellers, and users of U.S. wheat with results which could be easily evaluated and compared. Also, use of a constant moisture basis would conform with protein reporting procedures used by other major wheat exporting countries.

FGIS is soliciting views and comments as to whether protein content should be certificated on a constant moisture basis of 12.0 percent rather than the "as is" moisture basis which is the current procedure. The procedure for moisture basis appears in the Grain Inspection Handbook and not in the U.S. Standards for Wheat. Accordingly, no change to the grain standards would result nor does this change require rulemaking. However, FGIS believes that it would be beneficial to have industry input prior to changing the moisture basis procedure for protein in wheat. FGIS will notify interested parties, as appropriate, once a final decision is made with respect to this matter.

Export, Grain.

PART 810—OFFICIAL U.S. STANDARDS FOR GRAIN

1. The authority citation for Part 810 continues to read as follows:

Authority: Sections 3A and 4, United States Grain Standards Act (7 U.S.C. 75a, 76).

2. It is proposed that § 810.305 *Percentages* be amended by revising § 810.305(b) to read as follows:

§ 810.305 Percentages.

* * * * *

(b) Percentages shall be stated in whole and tenth percent to the nearest tenth percent, except when determining the identity of wheat, the class, the subclass, and the percentage of ergot. The percentage when determining the identity of wheat, the class, and the subclass shall be stated to the nearest whole percent. The percentage of ergot shall be stated to the nearest hundredth percent.

Dated: May 15, 1986.

Kenneth A. Gilles,
Administrator.

BILLING CODE 3410-EN-M

Agricultural Marketing Service

7 CFR Part 987

Domestic Dates Produced or Packed in Riverside County, CA; Proposed Amendment of Date Expenses and Rate of Assessment for 1985–86 Crop Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would authorize an increase in expenses for the California Date Administrative Committee and an increase in the rate of assessment for the 1985–86 crop year. The expenses would be increased from $20,000 to $170,000, and the assessment rate would be increased from 6 cents to $1.00 per hundredweight of assessable dates. The changes are necessary for the date industry to conduct a market research promotion, and paid advertising program. The Committee

locally administers the Federal marketing order covering dates of domestic production.

DATE: Comments due June 9, 1986.

ADDRESS: Comments should be sent to: Docket Clerk, Room 2085, South Building, U.S. Department of Agriculture, Washington, DC 20250. Two copies of all written materials should be submitted and they shall be available for public inspection at the office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, Washington, DC 20250; (202) 447–5697.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been classified a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules proposed thereunder, are unique in that they are brought about through group action of essentially small entities for their own behalf. Thus, both statutes have small entity orientation and compatibility.

It is estimated that approximately 25 handlers of dates will be subject to regulation under the marketing order for dates produced or packed in Riverside County, California, during the course of the current season and that the great majority of this group may be classified as small entities. While regulations issued during the season impose some costs on affected handlers the added burden on small entities, if present at all, is not significant.

A comment period of less than 30 days is provided because the proposed promotion program must start by the middle of June for the program to have any positive effect on 1986 fall date sales. Normally, the bulk of the domestic industry's sales are made during the fall holiday months.

A final rule establishing expenses in the amount of $26,050 for the 1985–86 crop year and fixing the assessment rate at 8 cents per hundredweight on all assessable dates was published in the Federal Register on February 26, 1986 (51 FR 7054). At a meeting held on March 20, 1986, a date promotion program was proposed. The total expense for the program was estimated at $500,000. Such program would include market research, nutrition research, agency fees, merchandisers, public relations, point of sale material and advertising. The date industry is faced with a serious oversupply problem. The Committee believes that a promotion program can help correct this problem by stimulating demand.

Approximately $150,000 is needed before October 1, 1986, to have date promotion available for sales this fall. At a meeting held on April 3, 1986, the Committee voted to increase this season's expenses and rate of assessment to accomplish that goal.

This proposal sets forth a budget increase in the amount of $150,000 for marketing promotion and advertising for the 1985–86 crop year and a rate of assessment increase to $1.00 per hundredweight of assessable dates.

In a letter dated May 1, 1986, a handler explained that his firm had inspected or sold all of his 1985-crop dates and could not factor any increase in the 1985–86 assessment rate into his 1985 crop pricing like other handlers in the industry who still have large volumes of dates to sell. He further stated that he did not object to the concept of the advertising and promotion program, but he felt it could only be done fairly by starting on October 1, 1986, the beginning of the new season. His contention is that such a starting date would give all participants an equal chance to benefit from the monies being paid. In his opinion, the retroactive assessment is grossly unfair and would create serious financial hardships to firms in his position. Finally, he indicated that a new date committee will be selected in June 1986 and that the new committee may feel differently about a promotion and advertising program of this magnitude.

List of Subjects in 7 CFR Part 987

Marketing agreements and orders, Dates, California.

1. The authority citation for Part 987 continues to read:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

BILLING CODE 3410-02-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 103

Powers and Duties of Service Officers; Availability of Service Records

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise 8 CFR 103.2(b) to authorize a district director to withhold adjudication of a visa petition or application where determined necessary to pursue a criminal investigation. The provisions relating to disclosure of classified material would also be revised to require authorization for disclosure by the classifying agency.

DATE: Comments must be received on or before July 29, 1986.

ADDRESS: Please submit written comments in duplicate to the Director, Policy Directives and Instructions, Immigration and Naturalization Service, 425 I Street NW., Room 2011, Washington, DC 20536. Telephone (202) 633–3048.

FOR FURTHER INFORMATION CONTACT:

For General Information: Loretta J. Shogren, Director, Policy Directives and Instructions, Immigration and Naturalization Service, 425 I Street NW., Room 2011, Washington, DC 20536, Telephone: (202) 633–3048.

For Specific Information: Michael J. Heilman, Associate General Counsel, Immigration and Naturalization Service, 425 I Street NW., Room 7048, Washington, DC 20536, Telephone: (202) 633–2620.

SUPPLEMENTARY INFORMATION: The proposed rule would revise § 103.2(b) to allow a district director of the Immigration and Naturalization Service to hold adjudication of a visa petition or application in abeyance pending a

BEST COPY AVAILABLE

criminal investigation. This proposed rule is offered in lieu of the proposed rule published at 50 FR 27289 on July 2, 1985, which would have allowed a district director to deny a visa petiton or application and then not disclose the grounds for the denial if a civil or criminal investigation had been undertaken.

By this proposed rule, the disclosure of information will be avoided and the petitioner or applicant will not be prejudiced by a denial based on information not disclosed to the petitioner or applicant. The proposed rule would also, as in the previous proposed rule, revise the procedures for disclosure of classified material. Disclosure would only be made if the classifying agency has agreed in writing that the information may be disclosed.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that this rule, if promulgated, would not have a significant impact on a substantial number of small entities.

This rule is not a major rule as defined in section 1(b) of E.O. 12291.

List of Subjects in 8 CFR Part 103

Administrative practice and procedure, Archives and records.

Accordingly, it is proposed to amend Chapter 1 of Title 8 of the Code of Federal Regulations as follows:

PART 103—POWERS AND DUTIES OF SERVICE OFFICERS; AVAILABILITY OF SERVICE RECORDS

1. The authority citation for Part 103 is revised to read as follows and all other authority citations are removed from Part 103:

Authority: Section 501, 65 Stat. 290, section 103, 66 Stat. 173; 31 U.S.C. 483(a), 8 U.S.C. 1103. Interpret or apply sections 281, 382, 343, 344, 405, 66 Stat. 230, 252, 263, 264, 280; 8 U.S.C. 1361, 1443, 1454, 1455, 1101 and note; 7 U.S.C. 2243. § 103.2 is also issued under sections 103, 221, 281 and 285 of the Immigration and Nationality Act, as amended (8 U.S.C. 1103, 1201, and 1301–1306).

2. In § 103.2, paragraph (b)(2) would be redesignated as (b)(3) and revised and a new paragraph (b)(3) would be added to read as follows:

§ 103.2 Applications, petitions, and other documents.

* * * * *

(b) * * *

(2) *Adjudication of application or petition.* A district director may withhold adjudication of a visa petition or other application if the district director personally determines that a criminal investigation has been undertaken or should be undertaken involving any person or organization involved with, or matter related to, the application or visa petition.

(3) *Inspection of evidence.* An applicant or petitioner shall be permitted to inspect the record of proceeding which constitutes the basis for the decision, except as provided in the following paragraphs.

(i) *Derogatory information unknown to petitioner or applicant.* If the decision will be adverse to the applicant or petitioner and is based on derogatory information considered by the Service, of which the applicant or petitioner is unaware, he/she shall be advised of this fact and offered an opportunity to rebut the information and present information in his/her own behalf before the decision is rendered. Any explanation, rebuttal, or information presented by or in behalf of the applicant or petitioner shall be included in the record of proceeding.

(ii) *Determination of statutory eligibility.* A determination of statutory eligibility shall only be based on information contained in the record of proceeding which is disclosed to the applicant or petitioner.

(iii) *Discretionary determination.* Where an application or petition may be granted or denied in the exercise of discretion, the decision may be based in whole or in part on classified information not contained in the record and not made available to the applicant or petitioner.

(iv) *Classified information.* An applicant or petitioner shall not be provided any information contained in the record or outside the record which is classified under Executive Order No. 12356 (47 FR 14874) as requiring protection from unauthorized disclosure in the interest of national security, unless the classifying authority has agreed in writing to such disclosure.

Dated: May 13, 1986.

Alan C. Nelson,

Commissioner, Immigration and Naturalization Service.

BILLING CODE 4410-10-M

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 86-039]

Federal Animal Quarantine Stations

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Request for comments.

SUMMARY: This document requests comments concerning whether the Department should take action to contract with private firms to conduct certain activities at federal animal quarantine stations.

DATE: Written comments must be received on or before June 30, 1986.

ADDRESS: Written comments should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Comments should state that they are in response to Docket Number 86-039. Written comments received may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. R.D. Whiting, Import-Export and Emergency Planning Staff, VS, APHIS, USDA, Room 810, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8695.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR Part 92, among other things, regulate the importation into the United States of specified animals in order to help prevent the introduction into the United States of various diseases.

Certain animals are required to be quarantined as a condition of entry into the United States. Animals are quarantined at fedral animal quarantine stations or at privately operated animal quarantine stations. The Department operates federal animal quarantine stations in Newburgh, New York; Los Angeles, California; Honolulu, Hawaii; and Miami, Florida. The Department also operates the Harry S. Truman Animal Import Center (a maximum security federal animal quarantine station) in Fleming Key, Florida.

Currently, the operations at the federal animal quarantine stations are conducted by technical and professional personnel who are employed by the Department. The duties at these federal animal quarantine stations include care, feed and handling of the animals; maintenance of the station; administrative functions; and conducting and supervising inspections and disease diagnostic procedures. It is necessary to continue to have Veterinary Services personnel supervise the operations at the federal animal quarantine stations insofar as necessary to ensure that the regulatory requirements would be met. However, the Department is considering whether it would be more cost effective and efficient to contract with private firms to

BEST COPY AVAILABLE

conduct all or a portion of the other duties that need to be performed at a federal animal quarantine station.

This document requests comments concerning whether the Department should take action to contract with private firms to conduct such activities.

Done at Washington, DC, this 27th day of May 1986.

J.K. Atwell,

Deputy Administrator, Veterinary Services.

[FR Doc. 86-12119 Filed 5-29-86; 8:45 am]

BILLING CODE 3410-34-M

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 50 and 55

Degree Requirement for Senior Operators at Nuclear Power Plants

AGENCY: Nuclear Regulatory Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Commission is considering an amendment to its regulations to require, after January 1, 1991, that applicants for licenses as a Senior Operator of a nuclear power plant hold a baccalaureate degree in engineering or the physical sciences from an accredited institution. Other baccalaureate degrees from an accredited institution may be accepted on a case-by-case basis. This contemplated rulemaking action is due to a Commission decision to enhance the levels of engineering and accident management expertise on shift. The current requirement, for candidates with a baccalaureate degree, of two years of responsible nuclear power plant operating experience, would be amended to require at least one of the two years of operating experience be with a similar commercial nuclear reactor operating at greater than twenty percent power.

DATE: Comment period expires July 29, 1986.

Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before this date.

ADDRESSES: Send written comments or suggestions on the proposed rulemaking to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch. Copies of the comments received may be examined at the NRC Public Document Room at 1717 H Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: F. H. Rowsome, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: (301) 492-4613.

SUPPLEMENTARY INFORMATION:

Background

The issue of academic requirements for reactor operators has long been a concern of the Nuclear Regulatory Commission (NRC). In July 1979, "TMI-2 Lessons Learned Task Force Status Report and Short-Term Recommendations," (NUREG-0578)[1] made specific recommendations for a Shift Technical Advisor (STA) to provide engineering and accident assessment expertise during other than normal operating conditions. On October 30, 1979, the NRC notified all operating nuclear power licensees of the short-term STA requirements, i.e., that STAs should be on shift by January 1980, and that they should be fully trained by January 1981. In November 1980, "Clarification of TMI Action Plan Requirements," (NUREG-0737), provided further details to licensees regarding implementation of the STA position.

The qualifications of operators were also addressed by the 1979, "Lessons Learned Task Force," (NUREG-0585), the 1980 Rogovin report, "Three Mile Island: A Report to the Commissioners and to the Public," (NUREG/CR-1240), and the 1982, "Report of the Peer Advisory Panel and the Nuclear Regulatory Commission on Operator Qualifications," (SECY 82-162).[2] The consensus among these was that greater technical and academic knowledge among shift operating personnel would be beneficial to the safety of nuclear power plants.

On October 28, 1985, the NRC published in the Federal Register (50 FR 43621) a final policy statement on engineering expertise on shift. Option 1 of the Policy Statement allows an individual to serve in the combined Senior Operator/Shift Technical Advisor (SO/STA) role holding either a baccalaureate degree in engineering, engineering technology, physical science, or a professional engineer's license. Option 2 permits continuation of the separate STA who rotates with the shift and holds a baccalaureate degree or equivalent and meets the criteria as stated in, "Clarification of TMI Action Plan Requirements," (NUREG-0737). The Commission also encourages the shift supervisor to serve in the dual-role position, and the STA to take an active role in shift activities.

The current advanced notice of proposed rulemaking is intended to extend the current level of engineering expertise on shift, as described in the Commission's Policy Statement on Engineering Expertise on Shift (50 FR 43621) and to ensure senior operators have operating experience on a commercial nuclear reactor operating at greater than twenty percent power, e.g., "hot" operating experience (Generic Letter 84-16). This Advance Notice of Proposed Rulemaking is the result of a Commission decision to consider an amendment to its regulations (Parts 50 and 55) and to obtain comments on the contemplated action to upgrade the levels of operating, engineering, and accident management expertise on shift.

Concurrent Policy Statement

The Commission also intends to prepare a concurrent policy statement which will encourage nuclear power plant licensees, i.e., owner-operators, to:

1. Implement personnel policies that emphasize the opportunities for licensed operators to assume positions of increased management responsibility;
2. Develop programs that would enable currently licensed senior operators and reactor operators to obtain college degrees; and
3. Obtain college credit for appropriate nuclear power plant training and work experience through arrangements with the academic sector.

Discussion

The purpose of the contemplated rulemaking is to upgrade the operating, engineering, and accident management expertise provided on shift by combining both engineering expertise and operating experience in the senior operator function. This is being done to further ensure the protection of the health and safety of the public by having personnel on shift with enhanced qualifications.

The NRC is concerned that operator qualifications to deal with accidents beyond design basis conditions warrant improvement. Operator training programs and related emergency

---

Box 37082, Washington, DC 20013-7082. Copies may also be purchased from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, VA 22161. A copy is available for inspection and/or copying for a fee in the NRC Public Document Room, 1717 H Street, NW., Washington, DC.

[2] SECY-82-162 and Generic Letter 84-16 are available at the NRC Public Document Room at 1717 H Street, NW., Washington, DC.

operating procedures, generally do not consider accident conditions beyond inadequate core cooling. There is general consensus that well qualified operators can substantially mitigate the effects of severe accidents. The industry Degraded Core Rulemaking Program (IDCOR) industry group for example, has developed arguments that operators could substantially reduce the risk proposed by these conditions. The NRC is considering the need for more extensive severe accident training and emergency operating procedures as well as engineering qualifications for senior operators.

The policy statement on engineering expertise on shift (October 28, 1985; 50 FR 43621) provided an interim way of achieving more engineering capability on shift. Essentially the NRC is moving from interim requirements which provide engineering capability for accident conditions (the STA), to requiring engineering capability, and nuclear power plant operating experience in the same individual (the SO).

The contemplated rulemaking action would require that all applicants for a Senior Operator (SO) license after January 1, 1991, must have a baccalaureate degree in engineering, engineering technology or the physical sciences from an accredited university or college. Other baccalaureate degrees from an accredited institution may be accepted on a case-by-case basis. Degree equivalency will no longer be accepted. A baccalaureate degree in another subject area would be acceptable if the utility (licensee) certifies that the applicant has demonstrated high potential for the SO position.

The contemplated rule would apply only to the SO. Licensed SOs or otherwise fully qualified applicants prior to January 1, 1991, would be exempt from the degree requirement. Licensed reactor operators (ROs) would not be required to have a degree.

Current senior operators and senior operator applications accepted by the NRC prior to January 1, 1991, would be "grandfathered" with regard to the contemplated rule. It is recognized that "grandfathering" current SOs could result in undegreed SOs for an extended period of time.

The proposed concurrent policy statement will encourage previously licensed SOs to obtain degrees. It is the intent of the present advance notice of proposed rulemaking to specify that senior operator license applications received after January 1, 1991, would not be accepted by the Commission unless the license application holds a baccalaureate degree from an accredited college or university.

In the past the NRC has accepted "equivalents" to the baccalaureate degree. The equivalents were based upon specialized utility training or other work experience. For the contemplated rule, equivalency would not be acceptable to the NRC in lieu of a degree. Because the Commission is not in a position to evaluate the academic equivalency of utility training, it encourages academic institutions to allow course credit for such equivalency based upon work experience or specialized training. Thus the proposed concurrent policy statement would encourage efforts to have the training accepted by the colleges for partial credit toward fulfilling the requirement of an accredited degree.

The degree requirement would not apply to licensed reactor operators (ROs). However, the proposed concurrent policy statement would encourage degrees for ROs. The Commission believes a degree requirement on shift, along with the concurrent proposed policy statement will not only enhance public health and safety, but will also provide a route for promotion by SOs.

The cut off date of January 1, 1991, for application for an SO license by individuals who are not degreed is chosen for three reasons. First, it will allow operators now in training sufficient time and notice to complete a degree before application. Second, it should not cause undue hardship on operators who are now in the process of preparing and training for the senior operator license. Third, licensees are encouraged by the Policy Statement on Engineering Expertise on Shift (Option 1) to move toward a dual-role SO/STA position. Furthermore, operators who are licensed as SOs prior to January 1, 1991, would be "grandfathered." The proposed rule would only allow one re-examination for SO applicants who apply for a license just prior to January 1, 1991. This would prevent essentially unqualified individuals (without degrees) from applying just to "beat" the deadline.

The contemplated rule also requires one year of "hot" operating experience for a degreed SO after January 1, 1991. This is simply a continuation of current NRC established policy to provide engineering and accident expertise on shift. It is essential that the SO know and understand plant operations as well as the theoretical, academic, and accident management aspects of the position.

The concurrent policy statement is planned as a way of encouraging licensees (utilities) and the nuclear industry to provide incentives and management opportunities for SOs as well as improving the engineering capabilities of the on-shift crew. The SO with a degree and shift operating experience can become a valuable personnel resource for the utility, one who combines shift operational management experience with the potential for greater management responsibility. The policy statement will encourage licensees to provide that career path.

A regulatory analysis and a backfit assessment will be developed after the comments are received and evaluated, prior to notice of the proposed rulemaking and concurrent policy statement.

Invitation to Comment

Comments regarding the proposed rule are encouraged. Comments on the contemplated rule are solicited in regard to:

1. Is January 1, 1991, a feasible deadline for requiring senior operators to be degreed and licensed, and if not, what should the deadline be?
2. What the implementation and operation costs of the contemplated rule to utilities would be?
3. Assuming regular shift rotation, could the typical SO obtain an engineering or technical degree prior to January 1, 1991?
4. What type of engineering degree would be appropriate, e.g., nuclear, electrical, mechanical, industrial, etc?
5. What has been the industry's experience in securing college-equivalent credit for nuclear power plant training and/or work experience?
6. Should there be similar experience requirements for one-of-a-kind advanced reactors?
7. What are the combined impacts of requiring two years of responsible nuclear power plant experience, the degree requirements, and one year "hot" operating requirement for the position of SO?
8. Should the contemplated degree requirement for senior operators be supplemented with or replaced by intensive focused training requirements in severe accidents for nuclear power plant operators?
9. What are the appropriate criteria for assessing a utility's certification that an individual with a baccalaureate degree in other than engineering or the physical sciences has "demonstrated high potential" for the SO position?
10. What are the implications of this contemplated rulemaking on decisions concerning future reactor designs?

11. Should the NRC require specialized training in severe reactor accidents beyond inadequate core cooling and/or require extension of emergency operating procedures into the realm of more severe accidents instead of or in addition to baccalaureate degrees? What are the implications of the work by IDCOR for the qualifications, training, and emergency operating procedures for licensed reactor operators and senior operators?

12. What is an appropriate cut-off date for allowing only one re-examination for those SO applicants without a degree who apply for a license just prior to January 1, 1991?

13. The proposed rule would require an SO applicant to have a baccalaureate degree in engineering or the physical sciences from an accredited university or college. What should be the appropriate definition (e.g., Department of Education, ABET, etc.) for "an accredited university or college?"

14. What immediate impact will the contemplated rule have on operator morale?

15. [Chairman Palladino believes] that the attached Table [1] correctly identifies the present control room staff as well as that envisioned by the ANPRM by 1991 and after 1991. Should other alternative control room staffing requirements be considered?

16. TMI improvements in control room capabilities and staffing have been undertaken by the industry, i.e., STA's have been added, detailed control design reviews have been undertaken, safety parameter display systems have been installed, emergency operating procedures have been improved, and the combined SO/STA position has been approved by policy. To what extent have these improvements been effective?

17. Requiring SO's in the control room to have a technical college degree will have an impact on RO's and AO's, especially with regard to a career path for these personnel. To what extent will the SO requirement drive out capable operators, and result in high personnel turnover and instability in the workforce?

18. Presently one degreed engineer is required to be within 10 minutes of the control room or a member of the control room staff, the STA or the combined SRO/STA, respectively. While requiring a second control room operator to have a technical degree may enhance operator organizational status, professionalism and esprit de corps, will a second degreed engineer significantly improve operator performance beyond the STA or combined SRO/STA improvements? Will these improvements become apparent in the short term or the long term?

19. What is the industry view about availability of new college graduates who can be trained in nuclear power plant operation or about the feasibility of having present plant operators pursue and obtain a technical college degree?

20. Should there be a numerical limit on the total number of "grandfathered" SO's at any particular plant?

Additional Comments of Commissioner Roberts

The additional comments of Commissioner Thomas M. Roberts on this ANPRM follow:

"Although I continue to believe that well-trained and qualified operators are important in assuring safe and reliable operation of nuclear plants, I am concerned that this rulemaking will negatively affect the level of experience and expertise of senior operators (the potential for negative implications was raised in the 1982 report of the Commission's Peer Advisory Panel on Operator Qualifications). I will be specifically interested in public comments on: (1) The extent that a formal degree requirement for senior operators is related to job performance, (2) whether requiring a baccalaureate degree for senior operators will enhance public health and safety, and (3) what negative safety implications may result from this proposal."

Additional Views of Commissioner Asselstine

The additional views of Commissioner James K. Asselstine on this ANPRM also follow:

"I have approved this advance notice of proposed rulemaking for the purpose of obtaining public and industry comment on the various options for upgrading the level of operating, engineering and accident management expertise on shift at operating nuclear powerplants. I agree entirely with the conclusion expressed in this advance notice that operator qualifications to deal with accidents beyond the design basis for the plants warrant improvement. Qualified operators can play a potentially significant role in mitigating the consequences of severe accidents. However, in order to carry out this role, operators must have sufficient knowledge of engineering and reactor theory to understand plant behavior under severe accident conditions.

"Although considerable progress has been made in recent years in improving operator training programs and plant emergency operating procedures, these training programs and procedures generally do not consider accident conditions beyond inadequate core cooling. Moreover, despite the improvements in reactor operator training, recent experience with NRC-administered reactor operator requalifications examinations indicates that some operators are having difficulty in retaining the level of knowledge of engineering and reactor theory needed to deal effectively with design basis events. These indications of weakness in operator knowledge of engineering and reactor theory, the absence of emergency procedures to deal with beyond design basis events, and the reliance on operator actions as one means of mitigating the effects of severe accidents all point to the need for more extensive knowledge of engineering and reactor theory on the part of plant operators, and particularly those operators holding senior reactor operator (SRO) licenses and serving in the position of shift supervisor.

"Although I believe that additional engineering knowledge is needed by licensed senior reactor operators, I am not satisfied either with the approach recommended by the NRC staff or with the position adopted by the Commission in this advance notice of proposed rulemaking. The NRC staff proposed that after January 1, 1991, all applicants for a senior reactor operator license hold a baccalaureate degree in engineering or a related science from an accredited institution. In addition, the staff proposed a requirement that after January 1, 1991, at least one SRO per shift at a nuclear powerplant (the SRO serving as the shift manager) meet the degree requirement. For purposes of this advance notice, the Commission accepted the staff's first recommendation but not the second. The practical effect of the Commission's position is to exempt forever from the degree requirement any person holding an SRO license on January 1, 1991.

"While the staff and the Commission proposals would bring about some improvement in the engineering knowledge of some licensed reactor operators, both of the proposals suffer from a number of disadvantages. First, it is not clear that requiring a baccalaureate degree in engineering provides the best means for assuring that senior reactor operators have the knowledge needed to carry out their responsibilities. Some courses required for an engineering degree may well be irrelevant to an understanding of reactor behavior during accident conditions. At the same time, some engineering knowledge and reactor theory needed to understand and cope with beyond design basis accident situations will not be covered by the courses needed to obtain a baccalaureate engineering degree. Second, imposing a degree requirement for SRO's is likely to result in the loss of some experienced and skilled reactor operators. After 1991, experienced reactor operators (RO's) will not be permitted to become SRO's without obtaining a degree, and the SRO's without a degree will not be able to advance to the position of shift manager or supervisor. Third, by focusing on degree requirements for SRO's, these proposals will require literally years before engineering knowledge on shift is substantially upgraded. In the case of the staff proposal, some SRO's wil have upgraded engineering expertise (applicants for SRO licenses after January 1, 1991, and pre-1991 SRO's serving as shift managers) while others need not upgrade their engineering knowledge at all (pre-1991 SRO's not serving as the shift manager). In the case of the Commission proposal, large numbers of licensed SRO's could be exempt from any upgrading of their engineering knowledge because the degree requirement would only apply to new SRO applicants after January 1, 1991. To avoid the requirement, a utility could simply obtain SRO licenses for all its reactor operators prior to 1991.

"In view of the disadvantages of the NRC staff and Commission proposals, I would appreciate comments on an alternative method for upgrading the engineering knowledge and understanding of reactor theory needed by licensed senior reactor operators. This method would include the following steps:

"1. Establish a working group, with NRC, academic and industry participants, with the responsibility to define the engineering knowledge and understanding of reactor theory needed for reactor operators to deal effectively with design basis events and severe accidents.

"2. Establish a training curriculum for each nuclear utility operator training program that will provide all senior reactor operators with the knowledge and understanding defined by step 1. This curriculum would establish milestones in individual subject areas to be achieved by new SRO candidates and previously licensed SRO's and would lead to satisfactory completion of the curriculum not later than January 1, 1991. These curriculums would be reviewed and accredited by NRC or by an appropriate industry or third party organization.

"3. Develop and administer new NRC senior reactor operator licensing examinations and NRC and licensee SRO requalification examinations that will test achievement by operators at each of the milestones defined under Step 2, leading to a comprehensive examination not later than 1991 for all new and previously-licensed senior reactor operators. A passing grade on this examination would be required to obtain or retain an SRO license after January 1, 1991."

Food and Drug Administration

21 CFR Part 155

[Docket No. 86N-0175]

Canned Dry Peas; Advance Notice of Proposed Rulemaking on the Possible Amendment of U.S. Standards of Identity, Quality, and Fill of Container

AGENCY: Food and Drug Administration.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Food and Drug Administration (FDA) is offering to interested persons an opportunity to review the Codex Standard for Canned Mature Processed Peas (Codex Standard 81–1981) (Codex standard) developed by the Codex Alimentarius Commission and to comment on the desirability of and need for amending the U.S. standards for this food to achieve consistency with the Codex standard. The Codex standard was submitted to the United States for consideration for acceptance. If the comments received do not support the need to amend the U.S. standards for canned dry peas, FDA will not propose their amendment.

DATE: Comments by July 29, 1986.

ADDRESS: Written comments, data, or other information to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Howard A. Anderson, Center for Food Safety and Applied Nutrition (HFF–214), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–485–0118.

SUPPLEMENTARY INFORMATION: The Food and Agriculture Organization (FAO) and the World Health Organization (WHO) jointly sponsor the Codex Alimentarius Commission, which conducts a program for developing worldwide food standards. The program has developed a number of Codex standards, among which is the Codex standard for Canned Mature Processed Peas (Codex Standard 81–1981).

As a member of the Codex Alimentarius Commission, the United States is obligated to consider all Codex standards for acceptance. The rules of procedure of the Codex Alimentarius Commission state that a Codex standard may be accepted by a participating country in one of three ways: Full acceptance, target acceptance, or acceptance with specified deviations. A commitment to accept at a designated future date constitutes target acceptance. A country's acceptance of a Codex standard signifies that except as provided for by specified deviations, a product that complies with the Codex standard may be distributed freely within the accepting country. A participating country which concludes that it will not accept a Codex standard is requested to inform the Codex Alimentarius Commission of this fact and the reasons therefor, the manner in which similar foods marketed in the country differ from the Codex standard, and whether the country will permit products complying with the Codex standard to move freely in that country's commerce.

For the United States to accept some or all of the provisions of a Codex standard for any food to which the Federal Food, Drug, and Cosmetic Act (the act) applies, it is necessary either to establish a standard under the authority of section 401 of the act (21 U.S.C. 341) or to appropriately revise an existing standard to incorporate the provisions within the U.S. standard. At present, the United States has standards of identity, quality, and fill of container for canned dry peas which differ in some respects from the Codex standard.

Under the procedure prescribed in 21 CFR 130.6(b)(3), FDA is providing an opportunity for review and informal comment on: (1) The desirability of and need for amending the U.S. standards for canned dry peas, (2) the specific provisions of the Codex standard, (3) additional or different requirements that should be in the U.S. standards, and (4) any other pertinent points.

FDA advises that if the comments received do not support the need to amend the U.S. standards of identity, quality, and fill of container, no amendment will be proposed. If this decision is reached, FDA will inform the Codex Alimentarious Commission of the differences between the Codex and U.S. requirements and that imported foods may move freely in interstate commerce in this country, providing they comply with the applicable U.S. laws and regulations which include the U.S. standards of identity, quality, and fill of container for canned dry peas.

Because of the large number of countries, often with diverse food regulations, that are associated with the development of Codex standards, certain provisions of the Codex standards may not be consistent with aspects of U.S. policy and regulations. Codex standards customarily include hygiene requirements, certain basic labeling requirements such as declaration of the net quantity of contents, name of manufacturer and country of origin, and other factors. These factors are not considered a part of U.S. food standards under section 401 of the act, rather, they are dealt with under the authority of other sections of the act.

For the benefit of interested persons who may wish to submit comments relative to this notice, FDA points out that the following major differences exist between the Codex standard and the U.S. standards for canned dry peas:

1. Viscosity of packing medium. The Codex standard in section 2.2.2 requires that the packing medium shall separate from the peas at 20° C. The U.S. standards contain no requirement regarding the viscosity of the packing medium.

2. Defects and allowances. (a) The Codex standard in section 2.2.5 and the U.S. standard by cross reference in § 155.172(b)(1) to the U.S. standard for canned peas in § 155.170(b)(1) (i) through (v) contain the following defect action levels:

	Based on the weight of drained peas	
	Codex standard (percent)	U.S. standard (percent)
Blond and yellow peas (i.e., white or yellow but edible peas)	(1)	2
Blemished peas (i.e., slightly stained or spotted peas)	10	5
Seriously blemished peas (i.e., peas that are hard, shriveled, spotted, discolored, or otherwise blemished to the extent that the appearance or eating quality is seriously affected)	2	1
Pea fragments	10	10
Extraneous vegetable material	0.6	0.5

(1) No requirement.

In addition to the requirements above, the Codex standard in section 2.2.5 states that the sum of the individual defect action levels shall not exceed 15 percent and the U.S. standard by cross reference in § 155.172(b)(1) to§ 155.170(b)(1)(vii) states that the sum shall not exceed 12 percent.

(b) The Codex standard does not provide a limitation on ruptured skins. The U.S. standard in § 155.172(b)(1)(ii) states that skins of not more than 25 percent by count of the peas in a container may be ruptured to a width of 1.6 millimeters (0.06 inch) or more.

3. Softening agents. The Codex standard in section 3.2 provides for a maximum level of 150 milligrams/kilogram (0.005 ounce/2.2 pounds), expressed as sodium, singly or in combination, of sodium bicarbonate and sodium citrate as softening agents. The U.S. standard of identity does not provide for softening agents.

4. Flavorings. The Codex standard in section 3.4 has temporarily endorsed the use of natural flavors and their identical synthetic equivalents at levels limited by good manufacturing practice. The U.S. standard by cross reference in § 155.172(a) to the U.S. standard for canned peas in § 155.170(a)(2)(ix) provides for safe and suitable flavoring ingredients (except artificial).

5. Vacuum pack. The Codex standard is silent on vacuum pack. The U.S. standard by cross reference in § 155.172(a) to the U.S. standard for canned peas in § 155.170(a)(3)(ii)(*c*) states that the words "vacuum pack" or "vacuum packed" shall be included as part of the name or in close proximity to the name of the food when the weight of the liquid in the container is not more than 20 percent of the net weight and the container is closed under conditions creating a high vacuum in the container.

6. Minimum total soluble solids or drained weight. The Codex standard in section 6.1.2.1 states that the total solids of the product is not less than 19.5 percent of the weight of distilled water at 20 °C which the sealed container will hold when completely filled. As an alternative to this requirement, the Codex standard in section 6.1.2.3 states that the drained weight is not less than 60 percent by weight of distilled water at 20 °C which the sealed container will hold. The U.S. standard by cross reference in § 155.172(c)(1) to the U.S. standard for canned peas in § 155.170(c)(2) states that when the peas and liquid are removed from the container, and returned thereto, the peas (irrespective of the quantity of liquid) 15 seconds after they are returned fill the container to a vertical distance of 5 millimeters (0.20 inch) below the top of the double seam of the containers and to a vertical distance of 13 millimeters (0.5 inch) below the top of glass containers.

7. Compliance. The Codex standard in section 8 specifies analytical methods by which compliance with certain provisions would be determined. In making such determinations, FDA prefers to rely on methods of analysis recognized by the Association of Official Analytical Chemists.

Under § 130.6(c), all persons who wish to submit comments are encouraged and requested to consult with different interested groups (consumers, industry, academic community, professional organizations, and others) in formulating their comments, and to include a statement of any meetings or discussions that have been held with other groups.

List of Subjects in 21 CFR Part 155

Food standards; Vegetables.

The Codex standard under consideration is as follows:

Codex Stan. 81–1981—Codex Standard for Canned Mature Processed Peas [1] (World-wide Standard)

1. *DESCRIPTION.*

1.1 *Product Definition.*

Canned processed peas or canned mature peas are the product:

—*prepared* from clean, substantially sound, whole, threshed, dried mature seeds of green pea varieties (cultivars) conforming with the characteristics of the species *Pisum sativum L.* which have been soaked, but excludes the sub-species *macrocarpum;*

—*packed* with water to which may be added nutritive sweeteners, seasoning and other ingredients appropriate to the product; and

—*processed* by heat in an appropriate manner before or after being sealed in a container so as to prevent spoilage.

1.2 *Varietal types.*

Any suitable variety (cultivar) of pea may be used.

2. *ESSENTIAL COMPOSITION AND QUALITY FACTORS.*

2.1 *Basic ingredients.*

—Peas

—Water

2.1.1 Optional ingredients.

—Salt

—One or more of the carbohydrate sweeteners as defined by the Codex Alimentarius Commission and fructose

—Aromatic herbs and spices; stock or juice of vegetables and aromatic herbs (lettuce, onions, etc.); garnishes composed of one or more vegetables (lettuce, onions, pieces of green or red peppers, or mixtures of both, etc.) up to a maximum of 15% of the total drained vegetable ingredient

—Essences (see 3.3)

2.2 *Quality Criteria.*

2.2.1 Colour.

The drained peas shall have normal colour characteristic of canned processed peas, taking into consideration any added artifical colour.

2.2.2 Packing Medium.

The packing medium shall not be so viscous that the liquid will not separate from the peas at 20 °C. It shall not have a colour nor an appearance which is foreign to the product.

2.2.3 Odour and flavour.

Processed peas shall have a normal odour and flavour and be free from odours or flavors foreign to the product.

Processed peas with other permitted ingredients shall have the flavour characteristic of that imparted by the peas and the other substances used.

2.2.4 Texture.

The peas shall be reasonably tender and reasonably uniform in texture.

2.2.5 Defects and allowances.

Processed peas shall be reasonably free from defects and within the limits set forth herein for common defects as defined.

	Maximum limits (based on weight of drained peas)
(a) *Blemished peas* (peas which are slightly stained or spotted).	10% m/m.
(b) *Seriously blemished peas* (peas which are spotted, discoloured, or otherwise blemished to an extent that the appearance or eating quality is seriously affected; these shall include worm eaten peas).	2% m/m.
(c) *Pea fragments* (portions of peas: separated or individual cotyledons; crushed, partial or broken cotyledons; and loose skins).	10% m/m.
(d) *Extraneous plant material* (any vine or leaf or pod material from the pea plant, or other plant material).	0.5% m/m.
Total of the foregoing defects (a), (b), (c), (d).	15% m/m.

2.2.6 Classification of "defectives".

A container that fails to meet one or more of the applicable quality requirements, as set out in subsections 2.2.1 through 2.2.5, shall be considered a "defective".

2.2.7 Lot Acceptance.

A lot will be considered as meeting the applicable quality requirements referred to in subsection 2.2.6 when the number of "defectives", as defined in subsection 2.2.6, does not exceed the acceptance number (c) of the appropriate sampling plan (AQL–6.5) in the FAO/WHO Codex Alimentarius Sampling Plans for Prepackaged Foods (Ref. No. CAC/RM 42–1969).

		Maximum level
3. Food additives		
3.1 Firming Agents	Firming agents and softening agents may not be used in the same product.	
3.1.1 Calcium chloride.		350 mg/kg expressed as Ca, singly or in combination.
3.1.2 Calcium lactate.		
3.1.3 Calcium gluconate.		
3.2 Softening agents.		150 mg/kg expressed as Na, singly or in combination.
3.2.1 Sodium bicarbonate.		
3.2.2 Sodium citrate.		
3.3 Colours		
3.3.1 Fast Green FCF.		200 mg/kg singly or in combination.
3.3.2 Tartrazine		
3.3.3 Brilliant Blue FCF.		
3.4 Flavours		
Natural flavours and their identical synthetic equivalents.		Limited by good manufacturing practice. [1]
4. Contaminants		
Tin		250 mg/kg, [1] calculated as Sn.

[1] Temporarily endorsed.

5. *HYGIENE.*

5.1 It is recommended that the product covered by the provisions of this standard be prepared in accordanace with the Recommended International code of Hygienic Practice for Canned Fruit and Vegetable Products (Ref. No. CAC/RCP 2–1969).

5.2 To the extent possible in good manufacturing practice the product shall be free from objectionable matter.

5.3 When tested by appropriate methods of sampling and examination, the product:

[1] Formerly CAC/RS 81–1978.

(a) shall be free from microorganisms capable of development under normal conditions of storage; and

(b) shall not contain any substances originating from microorganisms in amounts which may represent a hazard to health.

5.4 Products with an equilibrium pH above 4.6 shall have received a processing treatment sufficient to destroy all spores of *Clostridium botulinum* unless growth of surviving spores is permanently prevented by product characteristics other than pH.

6. *WEIGHTS AND MEASURES*

6.1 *Fill of container*

6.1.1 Minimum Fill

The container shall be well filled with peas and the product (including packing medium) shall occupy not less than 90% of the water capacity of the container. The water capacity of the container is the volume of distilled water at 20 °C which the sealed container will hold when completely filled (see also 8.2.3).

6.1.1.1 Classification of "defectives"

A container that fails to meet the requirement for minimum fill (90 percent container capacity) of 6.1.1 shall be considered a "defective".

6.1.1.2 *Lot Acceptance*

A lot will be considered as meeting the requirement of 6.1.1 when the number of "defectives" does not exceed the acceptance number (c) of the appropriate sampling plan (AQL-6.5) in the FAO/WHO Codex Alimentarius Sampling Plans for Prepackaged Foods (Ref. No. CAC/RM 42-1969).

6.1.2 Minimum total solids content

6.1.2.1 The Total solids content (see 8.2.1) of the product shall be not less than 19.5% of the weight of distilled water at 20 ° C which the sealed container will hold when completely filled.

6.1.2.2 The requirements for minimum total solids content shall be deemed to be complied with when the average total solids content of all containers examined is not less than the minimum required, provided that there is no unreasonable shortage in individual containers.

6.1.2.3 As an alternate to the requirement in 6.1.2.1, a minimum drained weight (see 8.2.2) of 80% m/m of distilled water at 20 ° C, which the sealed container will hold when completely filled, may be utilised. However, in cases of dispute the requirement in 6.1.2.1 will be the referee method and requirement.

7. *LABELLING*

In addition to Sections 1, 2, 4 and 6 of the General Standard for the Labelling of Prepackaged Foods (Ref. CODEX STAN. 1-1981) the following specific provisions apply:

7.1 *The name of the food*

7.1.1 The name of the product shall be "Processed Peas" or "Mature Peas" or "Reconstituted Dried Peas" or "Cooked Dried Peas" or "Soaked Dried Peas" or the equivalent description used in the country in which the product is intended to be sold.

7.1.2 A declaration, as part of the name or in close proximity to the name, shall be made of characteristic flavorings or seasonings, e.g., "with X", when appropriate. ("X" shall be the name of the characteristic flavouring or seasoning).

7.1.3 The name of the product shall include the varietal type and/or colour of the pea if the colour of the pea is not green (e.g. "Dun peas", "Yellow peas").

7.1.4 No reference shall be made to the pea being "fresh", "garden", or "green" nor shall any other word or picture be used indicating either directly or by ambiguity, omission or inference that the peas are other than peas which have been dried and soaked.

7.2 *List of ingredients*

A complete list of ingredients shall be declared on the label in descending order of proportion in accordance with subsections 3.2(b) and (c) General Standard for the Labelling of Prepackaged Foods except that water need not be declared.

7.3 *Net Contents*

The net contents shall be declared by weights in either metric system ("Systeme international" units) or avoirdupois or both systems of measurement as required by the country in which the product is sold.

7.4 *Name and address*

The name and address of the manufacturer, packer, distributor, importer, exporter, or vendor of the product shall be declared.

7.5 *Country of Origin*

The country of origin of the product shall be declared if its omission would mislead or deceive the consumer.

7.6 *Lot Identification*

Each container shall be embossed or otherwise permanently marked in code or in clear to identify the producing factory and the lot.

8. *METHODS OF SAMPLING, ANALYSIS AND EXAMINAITON*

8.1 *Sampling*

In accordance with the FAO/WHO Codex Alimentarious Sampling Plans for Prepackaged Foods (Ref. No. CAC/RM 42-1969).

8.2 *Test Procedures*

8.2.1 Total solids content

In accordance with AOAC Method "Determination of total solids content", XII (1975) 32.004. The results are expressed as % total solids in the product.

This percentage of total solids arrived at by the above method is then converted to total solids as a percentage of water capacity as follows:

$$\frac{\text{\% total solids (AOAC)} \times \text{net contents}}{\text{water capacity}} = \text{Total solids as a percentage of water capacity}$$

8.2.2 Determination of drained weight

In accordance with the FAO/WHO Codex Alimentarius Methods of Analysis for Processed Fruits and Vegetables (Ref. No. CAC/RM 35-1970), Determination of Drained Weight—Method I. Results are expressed as % m/m calculated on the basis of the mass of distilled water at 20 °C which the sealed container will hold when completely filled.

8.2.3 Determination of Water Capacity of Container

In accordance with the FAO/WHO Codex Alimentarius Recommended Method (Ref. No. CAC/RM 40-1972).

For the convenience of the reader, FDA is including the text of the existing U.S. standards of identity, quality, and fill of container for canned dry peas. FDA is also including the standards of identity, quality, and fill of container for canned peas, for reference purposes only.

§ 155.170 Canned peas.

(a) *Identity*—(1) *Definition.* Canned peas is the food prepared from fresh or frozen succulent seeds of the pea plant of the species *Pisum sativum* L. but excluding the subspecies *macrocarpum*. Only sweet wrinkled varieties, smooth-skin varieties, or hybrids thereof may be used. The product is packed with water or other suitable aqueous liquid medium to which may be added one or more of the other optional ingredients set forth in paragraph (a)(2) of this section. Such food is sealed in a container and, before or after sealing, is so processed by heat as to prevent spoilage.

(2) *Optional ingredients.* In addition to the optional packing media provided for in paragraph (a)(1) of this section, the following safe and suitable optional ingredients may be used:

(i) Salt.

(ii) Monosodium glutamate.

(iii) Disodium inosinate.

(iv) Disodium guanylate.

(v) Hydrolyzed vegetable protein.

(vi) Autolyzed yeast extract.

(vii) One or any combination of two or more of the dry or liquid forms of sugar, invert sugar sirup, dextrose, glucose sirup, and fructose.

(viii) Spice.

(ix) Flavoring (except artificial).

(x) Color additives.

(xi) Calcium salts, the total amount of which added to firm the peas shall not result in more than 350 milligrams/kilogram (0.01 ounce/2.2 pounds) of calcium in the finished food.

(xii) Magnesium hydroxide, magnesium oxide, magnesium carbonate, or any mixture or combination of these in such quantity that the pH of the finished canned peas is not more than 8, as determined by the glass electrode method for the hydrogen ion concentration.

(xiii) Seasonings and garnishes:

(*a*) Pieces of green or red peppers or mixtures of both, either of which may be dried, or other vegetables not exceeding in total 15 percent of the drained weight of the finished food.

(*b*) Lemon juice or concentrated lemon juice.

(*c*) Mint leaves.

(*d*) Butter or margarine in a quantity not less that 3 percent by eight of the finished food, or other vegetable or animal fats or oils in a quanity not less than 2.4 percent by weight of the finished foods. When butter, margarine, or other vegetable or animal fats or oils are added, emulsifiers or stablizers or both may be added, but no color, spice, or flavoring simulating the color or flavor imparted by butter or margarine may be used.

(3) *Labeling.* The name of the food is "peas" and may include the designation "green." The term "early," "June," or "early June" shall precede or follow the name in the case of smooth-skin peas or substantially smooth-skin peas, such as Alaska-type peas

or hybrids having similar characteristics. Where the peas are of sweet green wrinkled varieties or hybrids having similar characteristics, the name may include the designation "sweet," "wrinkled," or any combination thereof. The term "petit pois" may be used in conjunction with the name of the food when an average of 80 percent or more of the peas will pass through a circular opening of a diameter of 7.1 millimeters (0.28 inch). If any color additive has been added, the name of the food shall include the term "artificially colored."

(ii) The following shall be included as part of the name or in close proximity to the name of the food:

(*a*) A declaration of any flavoring that characterizes the food, as specified in § 101.22 of this chapter.

(*b*) A declaration of any spice, seasoning, or garnishing that characterizes the product, e.g., "seasoned with green peppers", "seasoned with butter", "seasoned with ——— oil", the blank to be filled in with the common or usual name of the oil, "with added spice", or, in lieu of the word spice, the common or usual name of the spice.

(*c*) The words "vacuum pack" or "vacuum packed" when the weight of the liquid in the container, as determined by the method prescribed in § 155.3(a) is not more than 20 percent of the net weight, and the container is closed under conditions creating a high vacuum in the container.

(4) *Ingredient statement.* Each of the optional ingredients used shall be declared on the label as required by the applicable sections of Part 101 of this chapter.

(b) *Quality.* (1) The standard of quality for canned peas is as follows:

(i) *Blond and yellow peas.* Not more than 2 percent of the drained weight is blond and/or yellow peas, i.e., white or yellow but edible peas.

(ii) *Blemished peas.* Not more than 5 percent of the drained weight is blemished peas, i.e., slightly stained or spotted peas.

(iii) *Seriously blemished peas.* Not more than 1 percent of the drained weight is seriously blemished peas, i.e., peas that are hard, shrivelled, spotted, discolored, or otherwise blemished to an extent that the appearance or eating quality is seriously affected.

(iv) *Pea fragments.* Not more than 10 percent of the drained weight is pea fragmented, i.e., portions of peas, separated or individual cotyledons, crushed, partial or broken cotyledons, and loose skins, but excluding entire intact peas with skins detached.

(v) *Extraneous vegetable material.* Not more than 0.5 percent of the drained weight is extraneous vegetable material, i.e., vine or leaf or pod material from the pea plant or other such material.

(vi) *Alcohol-insoluble solids.* The alcohol-insoluble solids of smooth-skin or substantially smooth-skin peas, such as Alaska-type peas or hybrids having similar characteristics, may not be more than 23.5 percent and, of sweet green wrinkled varieties or hybrids having similar characteristics, not more than 21 percent based on the procedure set forth in the "Official Methods of Analysis of the Association of Official Analytical Chemists," 13th Ed. (1980), section 30.012, which is incorporated by reference. Copies are available from the Association of Official Analytical Chemists, P.O. Box 540, Benjamin Franklin Station, Washington, DC 20044, or available for inspection at the Office of the Federal Register, 1100 L St. NW., Washington, DC 20408.

(vii) *Limitation.* The sum of the pea material described in paragraphs (b)(1), (i), (ii), (iii), (iv), and (v) of this section shall not exceed 12 percent.

(2) Determine compliance as specified in § 155.3(b).

(3) If the quality of canned peas falls below the standard prescribed in paragraph (b)(1) of this section, the label shall bear the general statement of substandard quality specified in § 130.14(a) of this chapter, in the manner and form therein specified; but in lieu of such general statement of substandard quality when the quality of canned peas falls below the standard in only one respect, the label may bear the alternative statement, "Below standard in quality ", the blank to be filled in with the words specified after the corresponding paragraph under paragraph (b)(1) of this section which such canned peas fail to meet, as follows: (i) "Excessive blond and/or yellow peas"; (ii) "Excessive blemished peas"; (iii) "Excessive seriously blemished peas"; (iv) "Excessive pea fragments"; (v) "Excessive vegetable material"; (vi) "Excessive mealy". Such alternative statement shall immediately and conspicuously precede or follow without intervening written, printed, or graphic matter, the name "peas" and any words and statements required or authorized to appear with such name by paragraph (a)(3) of this section.

(c) *Fill of container.* (1) Except in the case of vacuum pack peas, the fill of pea ingredient and packing medium, as determined by the general method for fill of container prescribed in § 130.12(b of this chapter, is not less than 90 percent of the total capacity of the container.

(2) When the peas and liquid are removed from the container and returned thereto, the leveled peas (irrespective of the quantity of the liquid), 15 seconds after they are so returned, completely fill the container. A container with lid attached by double seam shall be considered to be completely filled when it is filled to 5 millimeters (0.2 inch) vertical distance below the top of the double seam; and a glass containr shall be considered to be completely filled when it is filled to 13 millimeters (0.5 inch) vertical distance below the top of the container.

(3) Determine compliance for fill of container as specified in § 155.3(b).

(4) If canned peas fall below the standard of fill of container prescribed in paragraph (c)(1) and/or (2) of this section, the label shall bear the general statement of substandard fill specified in § 130.14(b) of this chapter, in the manner and form therein specified.

§ 155.172 Canned dry peas.

(a) *Identity.* Canned dry peas conforms to the definition and standard of identity, and is subject to requirements for label statement of optional ingredients prescribed for canned peas by § 155.170(a), except that:

(1) The optional pea ingredient is the dry seeds of the pea plant of the species *Pisum sativum* L. but excluding the subspecies *macrocarpum*.

(2) The optional ingredients specified in § 155.170(a)(2)(xii) shall not be used.

(3) The name of the food is "cooked dry peas" or "soaked dry peas". The optional terms specified by § 155.170(a)(3), "early", "June", "sweet", "green", "wrinkled", or any combination thereof, shall not be used on the labels.

(b) *Quality.* (1) The standard of quality for canned dry peas is that specified for canned peas by § 155.170(b) except that:

(i) The alcohol-insoluble solids maximums specified in § 155.170(b)(1)(vi) do not apply.

(ii) The skins of not more than 25 percent by count of the peas in the container are ruptured to a width of 1.6 millimeters (0.06 inch) or more.

(2) If the quality of canned dry peas falls below the standard of quality prescribed by paragraph (b)(1) of this section, the label shall bear the statement of substandard quality in the manner and form specified in § 155.170(b)(3) for canned peas, except that the words "Excessively mealy" shall not be used.

(c) *Fill of container.* (1) The standard of fill of container for canned dry peas is that prescribed for canned peas by § 155.170(c).

(2) If canned dry peas fall below the standard of fill of container prescribed by paragraph (c)(1) of this section, the label shall bear the general statement of substandard fill specified in § 130.14(b) of this chapter, in the manner and form therein specified.

Interested persons may, on or before July 29, 1986, submit to the Dockets Management Branch (address above) written comments regarding this notice. Two copies of any comments are to be submitted, except that individuals may submit one copy. Each comment should identify the title of the Codex standard and the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Any comments submitted in support of amendment to the U.S. standards of identity, quality, and fill of container for canned dry peas should be supported by appropriate information and data regarding impact on small business consistent with requirements of the Regulatory Flexibility Act (Pub. L. 96-354).

Dated: May 9, 1986.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

Procedure and Administration; Miscellaneous Provisions Related to the Tax Treatment of Partnership Items

Correction

In FR Doc. 86-8763 beginning on page 13231 in the issue of Friday, April 18, 1986, make the following corrections:

1. On page 13235, in the first column, in the Authority citation, tenth line, "Section 301.6223(a)-2" should read "Section 301.6223(a)-1". In the eleventh line, "Section 301.6223(a)-1" should read "Section 301.6223(a)-2".

2. In the same column, in the fourth line from the bottom, "Section 301.623(c)-6" should read "Section 301.6231(c)-6".

3. On the same page, in the second column, in Par. 2, eighth line, "301(g)-1" should read "301.6223(g)-1".

4. On page 13236, in the first column, paragraph (2), third line, "(b)(3)" should read "(c)(3)".

5. On page 13240, in the first column, fourth line, "or" should read "of".

6. On the same page, in the second column, paragraph (vii), second line, the second "or" should read "of".

7. On page 13242, in the third column, sixth line, insert "only" after "deposit".

8. On page 13244, in the first column, paragraph (4), third line from the bottom, "6231(a)(B)" should read "6231(a)(1)(B)".

9. On page 13245, in the first column, in *Example (2)*, eighth line, insert "under" after "tax".

10. On the same page and column, in paragraph (a), sixth line, insert ". A computational adjustment" before "may".

11. On the same page, in the third column, paragraph (4), second line, insert "tax" before "matters".

12. On page 13246, in the first column, delete the first paragraph (3).

13. On page 13249, third column, paragraph (b), in the twelfth line, "the" should read "that".

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 2 and 94

[PR Docket No. 86-174, RM 5072; FCC 86-219]

Radio Local Area Network Stations in the 1700-1710 MHz Band

AGENCY: Federal Communications Commission.

ACTION: Proposed rules.

SUMMARY: This document proposes to amend Parts 2 and 94 of the Commission's rules to permit the operation of radio local area network and similar systems in the 1700-1710 MHz band. The use of radio to interconnect local area networks could result in significant economic savings during installation of relocation of terminal equipment.

DATES: Comments must be submitted on or before July 23, 1986, reply comments on or before August 22, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Eugene Thomson, Private Radio Bureau, (202) 634-2443.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, PR Docket No. 86-174, adopted May 1, 1986, and released May 19, 1986. The full text of Commission decisions are available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC 20037. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, 2100 M Street NW., Suite 140, Washington, DC 20037. Telephone (202) 857-3800.

Summary of Notice of Proposed Rule Making

1. On May 1, 1986, the Commission adopted a Notice of Proposed Rule Making which proposed to allow the operation of radio local area network (LAN) systems in the 1700-1710 MHz band.

2. Personal computers and desktop terminals are commonplace in today's office environment and are interconnected by cable to form local area networks. However, when a LAN is interconnected by cable, relocating the LAN because of office or employee relocations can be very expensive and time consuming. A radio LAN would allow users to move computing machines without the expense or disruption of disconnecting and rerouting wires and cables.

3. In response to a petition submitted by Motorola, Inc., the Commission has proposed to permit radio LANs to operate, on a secondary basis, in the 1700-1710 MHz band. This band is allocated on a primary basis for the Meteorological Satellite Service and for government fixed use. Rules are proposed to minimize potential interference to existing stations, to allow maximum reuse of frequencies, and to establish equipment technical standards.

4. The Commission is considering requiring frequency coordination in this band and has asked that potential coordinator candidates submit their qualifications along with their comments.

5. The Commission also proposed that the use of the 1700-1710 MHz band should not be limited to radio LANs, but should be open to other office of non-office related systems that may utilize similar interconnection techniques.

6. This is a non-restricted notice and comment rule making proceeding. *See* § 1.1231 of the Commission's rules, 47 CFR 1.1231, for rules governing permissible *ex parte* contracts.

7. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 605, it is certified that the proposed rule will not, if promulgated, create a significant economic burden on a substantial number of small entities.

8. The decision contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or recordkeeping, labeling, disclosure or record retention requirements, and will not increase or decrease burden hours imposed on the public.

9. Interested persons may file comments on or before July 23, 1986, and reply comments on or before August 22, 1986. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided

that the fact of the Commission may take into consideration information and ideas not contained in the comments, provided the fact of the Commission's reliance on such information is noted in the report and order.

10. In accordance with the provision of § 1.419 of the Commission's Rules, 47 CFR § 1.419, formal participants shall file an original and five copies of their comments and other materials. Participants wishing each Commissioner to have a personal copy of their comments should file an original and 11 copies. Members of the general public who wish to express their interest by participating informally may do so by submitting one copy. All comments are given the same consideration, regardless of the number of copies submitted. All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters at 1919 M Street, NW., Washington, DC.

11. For further information concerning this rule making contact Eugene Thomson, Rules Branch, Land Mobile and Microwave Division, Private Radio Bureau, Federal Communications Commission, Washington, DC 20554, (202) 634–2443.

List of Subjects in 47 CFR Parts 2 and 94

Radio; Private operational-fixed microwave service.

William J. Tricarico,
Secretary.

Appendix

It is proposed to amend Parts 2 and 94 of the Commission's Rules and Regulations as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

PART 94—PRIVATE OPERATIONAL-FIXED MICROWAVE SERVICE

The authority citations for Parts 2 and 94 continue to read as follows:

Authority: Sections 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted.

§ 2.106 [Amended]

1. The Table of Frequency Allocations in § 2.106 is amended by adding the Private Operational-Fixed Microwave Service to column (6), Rule part(s), for the 1700–1710 MHz frequency band.

§ 2.106 Table of Frequency Allocations.

UNITED STATES TABLE

Government	Non-Government	FCC use designators	
Allocation MHz	Allocation MHz	Rules part (s)	Special-use frequencies
(4)	(5)	(6)	(7)
• • • •	• • • •	• • •	•
1700-1710 FIXED METEOROLOGICAL-SATELLITE (space-to-Earth) 671 722 G118	1700-1710 METEOROLOGICAL-SATELLITE (space-to-Earth) FIXED 671 722	Private Operational-Fixed Microwave (94)	
• • • •	• • • •	• • •	•

2. § 94.15 is amended by adding paragraph (k) as follows:

§ 94.15 Policy governing the assignment of frequencies.

• • • • • •

(k) Applications filed for frequencies in the 1700–1710 MHz band will not be subject to the provisions of paragraphs (a) through (j) of this section.

3. § 94.61(b) is amended by adding the band 1700–1710 MHz between 960 and 1850 MHz to the table as follows:

§ 94.61 Applicability.

• • • • • •

(b) • • •

Frequency Band (MHz)	
• • • • •	
1700 to 1710	(13)
• • • • •	

4. § 94.63(b) introductory text is revised to read as follows:

§ 94.63 Interference protection criteria for operational-fixed stations.

• • • • • •

(b) The intereference protection criteria for operational-fixed stations other than those licensed on frequencies set out in §§ 94.65(a)(1), 94.90, and 94.65(m) are as follows:

• • • • • •

5. A new § 94.65(m) is added to read:

§ 94.65 Frequencies.

• • • • • •

(m) 1700–1710 MHz. (1) 2 megahertz authorized channels:

Transmit (receive) MHz

1701
1703
1705
1707
1709

(2) Upon adequate justification, up to 5 contiguous channels may be authorized at a single location.

6. § 94.71(b) is amended by adding the band 1700–1710 MHz between 960 and 1850 MHz to the table.

§ 94.71 Emission and bandwidth limitations.

• • • • • •

(b) • • •

Frequency band (MHz)	Maximum authorized bandwidth
• • • • •	
1700–1710	10 megahertz.
• • • • •	

7. § 94.73(a)(2) is amended by adding the band 1700–1710 MHz between 960 and 1850 MHz and footnote 7 to the table.

§ 94.73 Power limitations.

(a) (2)

Frequency band (MHz)	Maximum allowable EIRP (dBw)
• • • • •	
1700–1710	−10 [1]
• • • • •	

[1] Either omnidirectional or directional antennas may be authorized.

8. A new § 94.97 is added to Subpart C to read:

§ 94.97 Special provisions for the use of the 1700–1710 MHz band.

Notwithstanding any contrary provision in this part, frequencies in the 1700–1710 MHz band may be authorized subject to the following:

(a) All systems authorized in this band shall be licensed at the prescribed set of coordinates. To provide co-channel interference protection, the minimum separation between co-channel assignments shall be 2000 feet. Lesser separations will be authorized if the applicant obtains consent from affected co-channel licensees.

(b) Communications between components of a system shall be restricted to within a single building. These frequencies may not be utilized for communications between different buildings.

(c) All systems in this band shall be authorized on a secondary basis. Applicants for stations within 100 km of the following government earth station installations will submit a technical analysis stating the expected radio station signal level at the earth station coordinates.

Name and location	Coordinates (degrees-minutes)

BILLING CODE 6712-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Parts 32 and 33

Addition of Seven National Wildlife Refuges to the Lists of Open Areas for Migratory Game Bird Hunting, Upland Game Hunting, and Big Game Hunting, and Eleven Refuges for Sport Fishing

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Fish and Wildlife Service (Service) proposes to add seven national wildlife refuges (NWRs) to the lists of open areas for migratory game bird hunting, upland game hunting, and/or big game hunting, and 11 NWRs to sport fishing. The Service has determined that such uses would be compatible with and, in some cases, enhance the major purposes for which each refuge was established. The Service has further determined that this action would be in accordance with the provisions of all applicable laws, would be consistent with the principles of sound wildlife management, and would otherwise be in the public interest by providing additional recreational opportunities. It is also the intent of this action to revise the entry for Alaska, under §§ 32.11, 32.21, 32.31, and 33.4. Under the Alaska National Interest Lands Conservation Act of 1980, refuges in Alaska were renamed and new ones added to the National Wildlife Refuge System (NWRS). 50 CFR Part 36 (Alaska NWRs) supplements the general NWRS regulations found in 50 CFR Subchapter C and includes a table listing all the refuges in Alaska.

DATE: Comments must be received on or before June 30, 1986.

ADDRESS: Comments may be addressed to: Associate Director—Wildlife Resources, U.S. Fish and Wildlife Service, 18th and C Streets, NW., Room 3252, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: James F. Gillett, Division of Refuge Management, U.S. Fish and Wildlife Service, 18th and C Streets NW., Room 2343, Washington, DC 20240; Telephone (202) 343–4311.

SUPPLEMENTARY INFORMATION: National wildlife refuges, other than those in Alaska, are generally closed to hunting and sport fishing until opened by rulemaking. The Secretary may open refuge areas to hunting and/or fishing upon a determination that such uses are compatible with the major purposes for which each refuge was established, and that funds are available for development, operation, and maintenance of a hunting or fishing program. The action must also be in accordance with provisions of all laws applicable to the areas, must be consistent with the principles of sound wildlife management, and must otherwise be in the public interest. This rulemaking proposes to open seven refuges to hunting and eleven to sport fishing. Some of the hunting and fishing programs that are proposed require refuge-specific hunting or fishing regulations. These regulations will be included in a separate rulemaking document or refuge-specific hunting and fishing regulations.

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. It is, therefore, the purposes of this proposed rulemaking to seek public input regarding the opening of the refuges cited below to migratory game bird, upland game or big game hunting, and/or sport fishing. Accordingly, interested persons may submit written comments, suggestions, or objections concerning this proposal to the Associate Director—Wildlife Resources (address above) by the end of the comment period. All relevant comments will be considered by the Department prior to issuance of a final rule.

Conformance With Statutory and Regulatory Authorities

The National Wildlife Refuge System Administration Act of 1966, as amended (NWRSAA) (16 U.S.C. 668dd), and the Refuge Recreation Act of 1962 (16 U.S.C. 460K) govern the administration and public use of national wildlife refuges. Specifically section 4(d)(1)(A) of the NWRSAA authorizes the Secretary to permit the use of any area within the Refuge System for any purpose, including but not limited to hunting, fishing, public recreation and accommodations, and access, when he determines that such uses are compatible with the major purposes for which each refuge was established. The Service administers the Refuge System on behalf of the Secretary of the Interior (Secretary).

The Refuge Recreation Act gives the Secretary additional authority to administer refuge areas within the Refuge System for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary purposes for which the refuges were established. In addition, prior to opening refuges to hunting or fishing under this act, the Secretary is

required to determine that funds are available for the development, operation, and maintenance of these permitted forms of recreation.

In accordance with the NWRSAA and the Refuge Recreation Act, the Secretary has determined that the proposed openings for hunting and fishing would be compatible and consistent with the primary purposes for which each of the refuges listed below was established. The hunting and fishing programs will be within State and Federal (migratory game bird) regulatory frameworks. A discussion of the compatibility of the hunting and fishing programs with the purpose(s) for which each refuge was established and the availability of funding for each program follows:

Ash Meadows NWR was purchased in 1984 to protect the endemic, endangered, and rare plants and animals (primarily fish) from alteration of their terrestrial and aquatic environments [Supplemental Appropriations Act of 1983]. The refuge is currently administered by the Desert NWR Complex, is located in a sparsely populated area and does not attract a large number of visitors. The Service proposes to open the refuge to migratory game bird (waterfowl, mourning dove) and upland game (quail, pheasant, rabbit) hunting. Because of the very limited participation expected in the hunting program and the remote chance of adverse interaction by the hunters with any endangered plant or fish species, hunting would be compatible with refuge purposes. Further, a section 7 consultation concludes that hunting "is not likely to jeopardize" the continued existence of any species listed as threatened or endangered. Opening Ash Meadows NWR to migratory game bird and upland game hunting would thus be in compliance with the NWRSAA. The annual cost of the hunting program will be approximately $9,500. Within the annual Refuge Complex budget of approximately $387,000, the necessary funds are available for the administration of the hunting program. Therefore, opening Ash Meadows NWR to migratory game bird and upland game hunting would be in compliance with the Refuge Recreation Act.

Bandon Marsh NWR was established in 1983 by authority of the Fish and Wildlife Act of 1956 to protect migratory bird habitat. It is administered by the Western Oregon Refuge Complex. The Service proposes to open the refuge to migratory game bird (waterfowl, snipe, dove, pigeon) hunting and sport fishing. Hunting and fishing pressures will be light because the area, and access to it, are somewhat remote, and most participants would come from the surrounding lowly populated area. Consequently, it is anticipated that these activities would result in only minor trampling of the vegetation which will recover the next growing season. A section 7 consultation concludes that hunting or sport fishing are "not likely to jeopardize" the continued existence of any species listed as threatened or endangered that are using the refuge. These recreational opportunities will not interfere with or distract from the purpose for which the refuge was established, therefore, they would be in compliance with the NWRSAA. The annual cost of the hunting and fishing program is estimated at $2,000. Within the annual Refuge Complex budget of approximately $430,000, the necessary funds are available for the administration of these hunting and fishing programs. Therefore, opening Bandon Marsh NWR to migratory game bird hunting and sport fishing would be in compliance with the Refuge Recreation Act.

Bear Valley NWR was established in 1978 by authority of the Fish and Wildlife Act of 1956 to protect a major winter roost for bald eagles. The refuge is administered by the Klamath Basin NWR Complex. The Service proposes to open the refuge to deer hunting. The refuge is closed to *all* public entry from November 1 through March 31, the only period of time eagles use the refuge. The hunt would occur from late August through October and will be regulated (such as vehicle access restrictions and no open fires) to insure that eagle roosting habitat is not jeopardized. A section 7 evaluation concludes that deer hunting "would not effect" the continued existence of the bald eagle. Therefore, opening Bear Valley NWR to deer hunting would be compatible with the purpose for which the refuge was established and would be in compliance with the NWRSAA. Refuge administration, operation and maintenance costs are derived from the general tax fund by congressional appropriation. The estimated annual cost of $2,500 to manage the hunt program would be available from the annual Klamath Basin NWR Complex budget of approximately $800,000. Therefore, opening Bear Valley NWR to deer hunting would be in compliance with the Refuge Recreation Act.

Cedar Island NWR was established in 1964 by authority of the Migratory Bird Conservation Act to preserve migratory waterfowl habitat. It is administered by the Mattamuskeet NWR. The Service proposes to open the refuge to sport fishing which would be limited to fishing from refuge ditch banks, islands and bridges during daylight hours. Because of the restricted locations where fishing would occur, there will be very little or no disturbance to the waterfowl habitat, which is salt marsh dominated by *Spartina sp.* A section 7 evaluation states that "no threatened or endangered species exist on the refuge". Opening Cedar Island NWR to sport fishing would therefore be compatible with the purpose for which the refuge was established and would be in compliance with the NWRSAA. The estimated annual cost of the fishing progam would be approximately $200. Within the annual Mattamuskeet NWR budget of approximately $406,000, the necessary funds would be available for the administration of the proposed fishing program. Therefore, opening Cedar Island NWR to sport fishing would be in compliance with the Refuge Recreation Act.

Cedar Point NWR was established in 1964 by authority of the Migratory Bird Conservation Act to protect migratory bird habitat. Sport fishing is proposed for one 15-acre borrow pond and the Cedar Point Bay. It is proposed to open the pond to fishing only during the months of June, July and August when waterfowl use is very low. Access for fishing in the Bay will be limited to boat only thereby minimizing disturbance to shorebirds. A section 7 evaluation concludes that this sport fishing program "will not affect" bald eagles around the area. By selecting only those areas where fishing would cause little disturbance to the migratory birds and their habitat and limiting fishing activities to periods of low waterfowl use, opening Cedar Point NWR to sport fishing would be compatible with the purpose for which the refuge was established and would be in compliance with the NWRSAA. The estimated annual cost of administering the program is $2,800. Within the annual refuge budget of approximately $230,000, the necessary funds are available for the administration of the fishing program. Therefore, opening Cedar Point NWR to sport fishing would be in compliance with the Refuge Recreation Act.

Chickasaw NWR was established in 1985 by authority of the Migratory Bird Conservation Act to manage and conserve habitat for migratory birds, but not as an inviolate sanctuary for such (as allowed by the 1978 Improvements Act). The Service proposes to open the refuge to migratory game bird (waterfowl, dove, snipe, woodcock), big game (deer, wild boar and turkey) and upland game (squirrel, rabbit, quail, raccoon, opossum) hunting. Hunting will

have a beneficial effect in controlling the abundant game populations that can damage migratory bird habitat due to overpopulation. This is especially true of the deer population which could increase beyond the carrying capacity of the refuge and cause damage to the habitat through over-browsing. Further, in an Intra-Service Section 7 consultation the Region 4 Director concludes that the proposed hunting programs "are not likely to jeopardize the existence of the bald eagle or result in the destruction or adverse modification of its habitat". Opening Chickasaw NWR to migratory game bird, upland game, and big game hunting would be compatible with the purpose for which the refuge was established and would be in compliance with the NWRSAA. With an estimated annual cost of $2,500 to administer the hunting program and an annual budget of $227,800, to operate the refuge, the necessary funds are available to administer the hunting program. Therefore, opening Chickasaw NWR to migratory game bird, upland and big game hunting would be in compliance with the Refuge Recreation Act.

Eufaula NWR was established in 1964 by authority of the Fish and Wildlife Act of 1956 to provide resting and feeding habitat for waterfowl, in a cooperative agreement with the U.S. Army Corps of Engineers. The Service proposes to open the refuge to deer hunting. Hunting will occur prior to the major arrival of migratory waterfowl in early November. The resultant deer harvest will help control the size of the herd which, if allowed to expand, could destroy the forest habitat and consume crops planted for waterfowl. A section 7 evaluation concludes that the proposed hunting program "will not affect" the bald eagle or American alligator. For these reasons, opening Eufaula NWR to big game hunting would further the purpose for which the refuge was established, and would be in compliance with the NWRSAA. The estimated annual cost to administer the hunting program is $1,000. Within the annual refuge budget of approximately $193,000, the necessary funds are available to administer this program. Therefore, opening the Georgia portion of Eufaula NWR to big game hunting would be in compliance with the Refuge Recreation Act.

Hanalei NWR was established in 1972 by authority of the Fish and Wildlife Act of 1956 to preserve and manage critical habitat for the endangered Hawaiian stilt, coot, duck and gallinule. It is administered by the Hawaiian/Pacific Islands Refuge Complex. The Service proposes to open the refuge to sport fishing. This recreational opportunity would involve fishing from a refuge dike into non-refuge waters. The location where this activity would occur is used very little by endangered waterbirds as the deep water and dense California grass on the river banks provide poor waterbird habitat. Further, a section 7 evaluation concludes that the proposed fishing program "is not likely to jeopardize" any of the species listed as endangered. Therefore, opening Hanalei NWR to sport fishing would be compatible with the purpose for which the refuge was established and would be in compliance with the NWRSAA. The annual cost of the sport fishing program would be negligible, since no special services or facilities are required to administer it and public access would be via a county road available to all visitors. Within the annual Hawaiian/Pacific Islands Refuge Complex budget of approximately $800,000, the necessary funds are available for the administration of this sport fishing program. Therefore, opening Hanalei NWR to sport fishing would be in compliance with the Refuge Recreation Act.

Johnston Atoll NWR was established in 1928 by Executive Order 4467 for "the protection of native birds". In 1934, President Roosevelt placed administrative control and jurisdiction of the refuges under the Secretary of the Navy but maintained the island as a refuge. Currently, the U.S. Department of Defense has overall administrative authority for the refuge. The Service provides the Base Commander with technical assistance on habitat maintenance, species management and environmental interpretation. The State of Hawaii has no jurisdiction over the refuge as it is outside State boundaries. Throughout the period of military occupation, residents and visitors of Johnston Atoll have been given recreational fishing opportunities which include shore fishing from the four islands in the lagoon and boat fishing in the lagoon and outside the reef. Recreational fishing at current levels has had minimal adverse impact on the resources. Present refuge and base regulations prohibit entry to the breeding seabird colonies during the breeding season and limit fishing to pier and unvegetated beach areas on the islands. Further, a section 7 evaluation concludes that the proposed fishing program "is not likely to affect" any threatened green and hawksbill turtles or humpback whales. Therefore, opening Johnston Atoll NWR to sport fishing would be compatible with the purpose for which the refuge was established and would be in compliance with the NWRSAA. The Department of Defense currently provides approximately $50,000 annually to the Service to operate the refuge. Few special services or facilities are required by the Service to administer the fishing program and public access is not allowed on the refuge without prior approval by the Base Commander, so program administration costs are not great. Miscellaneous costs incurred by the program are met by the Hawaiian/Pacific Islands Refuge Complex budget of approximately $800,000. Therefore, opening Johnston Atoll NWR to sport fishing would be in compliance with the Refuge Recreation Act.

Kakahaia NWR was established in 1977 by authority of the Fish and Wildlife Act of 1956 to preserve and manage critical habitat for the endangered Hawaiian stilt, coot, duck and gallinule. It is administered by the Hawaiian/Pacific Islands Refuge Complex. The Service proposes to open the refuge to sport fishing which would involve fishing from a refuge beach to take fish from ocean waters. A highway and fence separate the beach from wetlands used by the endangered waterbirds. Further, a section 7 evaluation concludes that the proposed fishing program "will not affect" the endangered waterbirds or adversely modify their habitat. Opening Kakahaia NWR to sport fishing would be compatible with the purpose for which the refuge was established and would be in compliance with the NWRSAA. The annual cost of the program would be negligible, since no special services or facilities are required to administer it and public access would be via a county road available to all visitors. Within the annual Hawaiian/Pacific Islands Refuge Complex budget of approximately $800,000, the necessary funds are available for the administration of this program. Therefore, opening Kakahaia NWR to sport fishing would be in compliance with the Refuge Recreation Act.

Nantucket NWR was established in 1973 by authority of the Fish and Wildlife Act of 1956 to preserve coastal habitat for shorebirds and migratory passerine birds and to provide wildlife-oriented recreation. It is currently administered by the Parker River NWR. The Service proposes to open the refuge to sport fishing. This activity would involve fishing from refuge lands into the waters of Nantucket Sound and the Atlantic Ocean. Access to the fishing areas will be allowed only over designated routes, away from the prime

migratory bird habitat and driving within 20 feet of the bases of the dunes facing the beaches will be prohibited. A section 7 evaluation concludes that threatened and endangered wildlife would "not be affected" by the proposed fishing program. For these reasons, opening Nantucket NWR to sport fishing would not disturb coastal habitat, would enhance wildlife-oriented recreation and would be in compliance with the NWRSAA. The estimated annual cost to administer the fishing program is approximately $500. Within the annual Parker River NWR budget of approximately $430,000, the necessary funds would be available to administer the fishing program. Therefore, opening Nantucket NWR to sport fishing would be in compliance with the Refuge Recreation Act.

Ottawa NWR was established in 1961 by authority of the Migratory Bird Conservation Act for the conservation and management of migratory bird habitat. Sport fishing is proposed for the open water section of Metzger Marsh Bay, a part of the refuge. Fishing would be a management tool to remove carp whose feeding and spawning activities make the water turbid, thereby reducing the growth of submergent and emergent vegetation necessary for migratory bird feeding and nesting. Waterfowl use of the bay is moderate in the fall and spring with marsh and shorebird use low. A borrow pond, established as a result of dike construction, is also proposed to be opened for sport fishing during the months of June, July and August only. A section 7 evaluation indicates that "there are no threatened or endangered species on the refuge to be impacted by the proposed fishing program." By selecting only those areas where fishing would cause little disturbance, selecting the least disruptive time of year for public access, and encouraging an activity that would enhance the habitat for migratory birds, opening Ottawa NWR to sport fishing would be compatible with the purpose for which the refuge was established and would be in compliance with the NWRSAA. The established annual cost to administer the program is approximately $2,500. Within an annual refuge budget of approximately $230,000, the necessary funds are available to administer the program. Therefore, opening Ottawa NWR to sport fishing would be in compliance with the Refuge Recreation Act.

Pond Island NWR was established in 1973 by authority of the Fish and Wildlife Act of 1956 to preserve habitat for waterfowl, shorebirds, and passerine birds and to provide wildlife-oriented recreation. It is currently administered by the Parker River NWR. The Service proposes to open the refuge to sport fishing. This activity would consist of access by boat to a small beach and fishing from refuge lands into the waters of Casco Bay. Fishing would not be permitted during the waterfowl and shorebird nesting season, March 1 through July 31. A section 7 evaluation indicates that "there are no threatened or endangered species on the refuge to be affected by the proposed fishing program". Because of limited access to the island restricting the volume/disturbance by the public and closing it to fishing during the nesting season, opening Pond Island NWR to sport fishing would be compatible with the purpose of habitat protection. Further, it would enhance wildlife-oriented recreation and would be in compliance with the NWRSAA. The estimated annual cost to administer the program is approximately $100. Within the annual Parker River NWR budget of approximately $430,000, the necessary funds would be available to administer the program. Therefore, opening Pond Island NWR to sport fishing would be in compliance with the Refuge Recreation Act.

Prime Hook NWR was established in 1963 by authority of the Migratory Bird Conservation Act to preserve coastal wetlands as waterfowl habitat. Opening the refuge to sport fishing would be limited to two small freshwater ponds, and to certain tidal water areas for bank and boat fishing. Fishing in the ponds would be restricted seasonally so as not to interfere with wood duck and black duck nesting. Bank fishing along tidal waterways will be restricted to areas not over 250 feet off the roadways to prevent disturbance to nesting waterfowl.

A section 7 evaluation indicates that the bald eagle and peregrine falcon "will not be affected" by the proposed fishing program. For these reasons, opening Prime Hook NWR to sport fishing would be compatible with the purpose for which the refuge was established and would be in compliance with the NWRSAA. The estimated annual cost to administer the fishing program would be approximately $2,300. Within the annual refuge budget of approximately $160,000, the necessary funds would be available to administer the program. Therefore, opening Prime Hook NWR to sport fishing would be in compliance with the Refuge Recreation Act.

San Bernardino NWR was established in 1982 by authority of the Endangered Species Act to preserve habitat for the endangered Rio Yaqui fish. The Service proposes to open the refuge (lands east of Black Draw) to migratory game bird (white-winged and mourning dove) and upland game (rabbit, quail) hunting. Sensitive springs and water developments east of Black Draw will be closed so that accidental pollution will be prevented. Also, vehicular traffic will be prohibited. Further, a section 7 evaluation concludes that the proposed hunting program "will not affect" the continued existence of the endangered fish. Therefore, opening San Bernardino NWR to upland game hunting would be compatible with the purpose for which the refuge was established and would be in compliance with the NWRSAA. Annual costs to administer the program are expected to be approximately $3,600, primarily for enforcement. Within an annual refuge budget of approximately $75,000, the necessary funds are available to administer the program. Therefore, opening San Bernardino NWR to migratory game bird and upland game hunting would be in compliance with the Refuge Recreation Act.

San Pablo Bay NWR was established in 1974 by authority of the Migratory Bird Conservation Act to preserve migratory bird habitat. It is administered by the San Francisco Bay NWR Complex. Most of the refuge consists of tidelands leased from the State of California in 1982. They were leased to protect almost 12,000 acres of shoreline and open water and under the terms of the lease must be open to waterfowl hunting. The Service proposes to open the leased lands of the refuge to migratory game bird and upland game hunting. Pheasant hunting will be permitted on certain leased lands where the population consists of pen reared birds which escape from a neighboring hunting club. Waterfowl hunting will be permitted on leased portions of San Pablo Bay and its tributaries in accordance with provisions of the lease. A section 7 evaluation and consultation concludes that the proposed hunting programs "are not likely to jeopardize" the threatened or endangered species on the refuge. Since the area being opened to waterfowl and pheasant hunting is required by the lease, opening San Pablo Bay NWR to migratory game bird and upland game is in compliance with the NWRSAA. The estimated annual cost to administer the hunting program would be approximately $5,000. Within the Refuge Complex operating budget of approximately $1,126,000, the necessary funds would be available to administer the hunting program. Therefore, opening San Pablo Bay NWR to migratory game bird and upland game hunting would be

in compliance with the Refuge Recreation Act.

Swanquarter NWR was established in 1935 by authority of the Migratory Bird Conservation Act to provide winter sanctuary for migratory waterfowl. It is administered by the Mattamuskeet NWR. The Service proposes to open the refuge to sport fishing and only permit fishing from refuge islands and the Bell Island pier into State controlled waters. Waterfowl use of these areas in the winter is low as is angler use due to the colder weather at this time of year. Therefore, no disturbance to migratory waterfowl is expected to occur from this program. Sport fishing, permitted in the State controlled waters surrounding the refuge, also has had no adverse impacts on migratory bird habitat. Further, a section 7 evaluation concludes that the proposed fishing program "will not affect" the continued existence of the bald eagle or American alligator. Opening Swanquarter NWR to sport fishing would be compatible with the purpose for which the refuge was established and would be in compliance with the NWRSAA. The estimated annual cost of the fishing program would be approximately $500. Within the annual Mattamuskeet NWR budget of approximately $406,000, the necessary funds would be available to administer the program. Therefore, opening Swanquarter NWR to sport fishing would be in compliance with the Refuge Recreation Act.

In summary, the Service believes that these hunting and fishing programs would be appropriate incidental or secondary uses of the refuges; would be compatible with, and in some cases enhance, the primary purposes for which they were established; would be biologically sound and compatible with the principles of sound wildlife management; and would be consistent with other previously authorized Federal programs or the primary objectives of these refuges. The Service further believes that funds would be available to administer the programs, and that they would be in the public interest by providing recreational opportunities that would not impair the resource.

Hunting and fishing plans have been developed for each respective program on the listed refuges prior to the proposed opening of them to hunting and/or fishing. Refuge-specific hunting or fishing regulations are generally included as part of the hunting or fishing plan to ensure the compatibility of the programs with refuge purposes. Necessary refuge-specific regulations proposed for the programs will be included in a separate rulemaking document on refuge-specific hunting and fishing regulations.

Economic Effect

Executive Order 12291, "Federal Regulation," of February 17, 1981, requires the preparation of regulatory impact analyses for major rules. A major rule is one likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, government agencies or geographic regions; or significant adverse effects on the ability of United States-based enterprises to compete with foreign-based enterprises. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 et seq.) further requires the preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small businesses, organizations or governmental jurisdictions.

It is estimated that the proposed opening of these refuges to hunting and fishing will generate approximately 42,666 annual visits. Using data from the 1980 National Survey of Hunting, Fishing, and Wildlife-Associated Recreation, total annual receipts generated from purchases of food, transportation, hunting equipment, fishing gear, fees, and licenses associated with these programs are expected to be approximately $975,700, or substantially less than $100 million. In addition, since these estimated receipts will be spread over 12 states, the implementation of this rule should not have a significant economic impact on the overall economy, or a particular region, industry or group of industries, or level of government.

With respect to small entities, this rule would have a positive aggregate economic effect on small businesses, organizations, and governmental jurisdictions. The proposed openings would provide recreational opportunities and generate economic benefits that would not otherwise exist, and will impose no new costs on small entities. While the number of small entities likely to be affected is not known, the number is judged to be small. Moreover, the added cost to the Federal government of law enforcement, posting, etc., needed to implement activities under this rule would be less than the income generated from the implementation of these hunting and/or sport fishing programs. Accordingly, the Department of the Interior has determined that this rule is not a "major rule" within the meaning of Executive Order 12291 and would not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 et seq.

Environmental Considerations

The "Final Environmental Statement for the Operation of the National Wildlife Refuge System" [FES 76-59] was filed with the Council on Environmental Quality of November 12, 1976; a notice of availability was published in the Federal Register on November 19, 1976 (41 FR 51131). Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(C)), environmental assessments have been prepared for these proposed openings. Section 7 evaluations have been prepared pursuant to the Endangered Species Act. These documents are available for public inspection and copying in Room 2343, Department of the Interior, 18th and C Streets NW., Washington, DC 20240, or by mail, addressing the Director at the above address.

Nancy A. Marx, Division of Refuge Management, U.S. Fish and Wildlife Service, Washington, DC 20240, is the primary author of this proposed rulemaking document.

List of Subjects

50 CFR Part 32

Hunting, National Wildlife Refuge System, Wildlife, Wildlife refuges.

50 CFR Part 33

Fishing, National Wildlife Refuge System, Wildlife refuges.

Accordingly, it is proposed to amend Parts 32 and 33 of Chapter I of Title 50 of the Code of Federal Regulations as set forth below:

PART 32—[AMENDED]

1. The authority citation for Part 32 is revised as follows and the authority citation following § 32.41 is removed.

Authority: Sec. 2, 33 Stat. 614, as amended, sec. 5, 43 Stat. 651, sec. 5, 45 Stat. 449, sec. 10, 45 Stat. 1224, sec. 4, 48 Stat. 402, as amended, sec. 4, 48 Stat. 451, as amended, sec. 2, 49 Stat. 1270, sec. 4, 76 Stat. 654, as amended, sec. 4, 80 Stat. 927, sec. 2, 80 Stat. 928; 5 U.S.C. 301, 16 U.S.C. 460k, 664, 668bb, 668dd, 685, 690d, 715i, 715d, 725, 43 U.S.C. 315a; Proclamation 2416, 5 FR 2677, 3 CFR, 1938–1943 Comp., p. 107; 44 U.S.C. 3501 et seq.; E.O. 1014 (January 26, 1909).

PART 33—[AMENDED]

2. The authority citation for Part 33 is revised as follows and the authority citation following § 33.4 is removed.

Authority: Sec. 2, 33 Stat. 614, as amended, sec. 5, 43 Stat. 651, secs. 5, 10, 45 Stat. 449, 1224, secs. 4, 2, 48 Stat. 402, as amended, 451, 1270, sec. 4, 75 Stat. 884, sec. 4, 80 Stat. 927, sec. 2, 80 Stat. 928; 5 U.S.C. 301, 16 U.S.C. 460k, 664, 668dd, 668dd, 685, 690d, 715i, 715d, 725, 43 U.S.C. 315a; Proclamation 2416, 5 FR 2677, 3 CFR, 1938–1943 Comp., p. 187; E.O. 4667, 6935, and 10214 (January 26, 1909).

3. Section 32.11 would be amended by revising the entry for Alaska and by adding San Bernardino NWR, AZ, San Pablo Bay NWR, CA, Ash Meadows NWR, NV, Bandon Marsh NWR, OR, and Chickasaw NWR, TN, alphabetically by State as follows:

§ 32.11 List of open areas; migratory game birds.

* * * * *

Alaska

See 50 CFR 36.

* * * * *

Arizona

San Bernardino National Wildlife Refuge.

* * * * *

California

* * * * *

San Pablo Bay National Wildlife Refuge.

* * * * *

Nevada

Ash Meadows National Wildlife Refuge.

* * * * *

Oregon

* * * * *

Bandon Marsh National Wildlife Refuge.

* * * * *

Tennessee

Chickasaw National Wildlife Refuge.

* * * * *

4. Section 32.21 would be amended by revising the entry for Alaska and by adding San Bernardino NWR, AZ, San Pablo Bay NWR, CA, Ash Meadows NWR, NV, and Chickasaw NWR, TN, alphabetically by State as follows:

§ 32.21 List of open areas; upland game.

* * * * *

Alaska

See 50 CFR 36.

* * * * *

Arizona

* * * * *

San Bernardino National Wildlife Refuge.

* * * * *

Notices

Federal Register
Vol. 51, No. 104
Friday, May 30, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 86-404]

Productivity Improvement Review List and Estimated Dates for Beginning Studies (OMB A-76 Implementation)

AGENCY: Animal and Plant Health Inspection Service (APHIS), USDA.

ACTION: Notice of intent of conduct efficiency reviews or cost comparison studies under guidelines set forth in OMB Circular No. A-76 and OMB Bulletin No. 86-8.

SUMMARY: This notice provides locations and projected dates for starting productivity improvement studies within APHIS during fiscal year 87.

Location and type of activity	Projected review start
1. Los Angeles CA, AIC	Oct. 1986.
2. Newburgh, NY, AIC	Oct. 1986.
3. Fleming Key, FL, AIC	Nov. 1986.
4. Miami FL, AIC	Nov. 1986.
5. Honolulu, HI, AIC	Dec. 1986.

FOR FURTHER INFORMATION CONTACT: Burt C. Hawkins, Assistant Deputy Administrator for Management and Budget, Animal and Plant Health Inspection Service, Department of Agriculture, Room 1133-S, Washington, DC 20250.

SUPPLEMENTARY INFORMATION: Reviews will be conducted under the guidelines of OMB Circular No. A-76, Performance of Commercial Activities and OMB Bulletin 86-8, Productivity Improvement Program. Some of the listed activities may be evaluated in subunits or combined with other units for review. Activities may also be reviewed on the basis of all, some, or none. This is a notice of intent only and not a request for proposals.

Done at Washington, DC, this 22nd day of May 1986.

Larry B. Siegle,

Deputy Administrator for Management and Budget, Animal and Plant Health Inspection Service.

Forest Service

Environmental Statement for the Pacific Southwest Region

AGENCY: Forest Service, USDA.

ACTION: Availability of documents and notice of public meetings for review of the Pacific Southwest Region Supplement to the Vegetation Management for Reforestation; draft environmental impact statement.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Department of Agriculture, Forest Service, has prepared a Supplement to the 1983 Draft Environmental Impact Statement for Vegetation Management for Reforestation for the Pacific Southwest Region. The proposal involves implementing a vegetation management program on public lands administered by the Forest Service. The Supplement presents a risk assessment and worst-case analysis of effects on human health for use herbicide. It also evaluates the effects of the various vegetation management methods on soil and water quality, and on fisheries and wildlife habitat.

Copies of the Supplement and the original Draft EIS are available at the following Office: Office of Information, USDA Forest Service, 630 Sansome Street, San Francisco, California 94111.

Reading copies will be placed in all National Forest and Ranger Distric Offices in the Pacific Southwest Region. In addition reading copies will be placed in the following libraries:

I. County Libraries

Alameda, Alpine, Amador, Butte, Calaveras, Colusa, Contra Costa County, Crescent City Public Library, El Dorado, Fresno, Glenn, Eureka Main Library Dee Sockbeson, Imperial, Inyo, Kern, Documents Librarian, Kings, Lake, Lassen, Los Angeles, Madera, Marin, Mariposa, Mendocino, Merced, Modoc, Mono, Monterey, Napa, Nevada, Orange, Placer, Plummas, Riverside, Sacramento, San Benito, San Bernardino, San Diego, San Francisco, San Luis Obispo, San Mateo, Santa Barbara, Santa Clara, Santa Cruz, Shasta, Sierra, Public Library Siskiyou County Reference Librarian, Solano, Sonoma, Stanislaus, Sutter, Tehama, Trinity, Tulare, Ventura, Yolo, Yuba

Public meetings to review the content and organization of the Supplement will

be held at 1 PM and again at 7:30 PM at the following locations:

Redding, June 23
Eureka, June 24
Sacramento, June 26
Fresno, June 27
Riverside, June 30

Four public hearings at which formal comment on the Supplement may be presented will be held at 1 PM and again at 7 PM at the following locations:

Sacramento, July 21
Eureka, July 22
Redding, July 23
Riverside, July 24

Special information about these meetings will be made available through media releases and direct mailing to the project mailing list in the near future.

Written comments on the Supplemental DEIS should be *postmarked by August 11, 1986* in order to be included in the public comment analysis. They should be sent to: USDA Forest Service, Office of Information—VM, 630 Sansome Street, San Francisco, California 94111.

FOR FURTHER INFORMATION CONTACT: Michael D. Srago at the above address or by calling (415) 556–2563.

Raymond G. Weissenborn,
Assistant Regional Forester for Timber Management.

BILLING CODE 3410–11–M

Pacific Crest National Scenic Trail, Willamette National Forest, Lane County, Eugene, OR; Trail Relocation

A segment of the Pacific Crest National Scenic Trail will be relocated to better meet the criteria and purpose for which it was established. The change in location is compliance with the provisions of section 7(b) of the National Trails System Act (82 Stat. 919; U.S.C. 1241–1249). The official location of the Pacific Crest National Scenic Trail was published in the **Federal Register**, Vol. 38, No. 19, part II, Tuesday, January 30, 1973.

A Final Environmental Impact Statement examining alternatives for the proposed expansion of the Willamette Pass Ski Area was published on April 29, 1985. The selected alternative called for relocation of the Pacific Crest Trail as described below. That document is on file in the Supervisor's Office, Willamette National Forest, 211 East 7th Avenue, Eugene, OR 97401.

The segment as described in the **Federal Register** is within the Gold Lake Bog Research Natural Area to the east shores of the Rosary Lakes segment. The change in location more fully meets the established criteria than the published route. The change in location is denoted by a dotted line marked on the map entitled Pacific Crest Trail, Oregon #2886. A map showing the relocation is on file in the office of the Forest Superviser, Willamette National Forest, Eugene, Oregon.

The official location is amended as follows: Page 2833, Column 3, Paragraph 2, Lines 3, 4, and 9.

Delete: ". . . intersects Forest Road No. 204 . . . west edge . . ."

The sentences will now read:

"It traverses the west shore of Charlton Lake, then traverses the west side of the crest, east of Waldo Lake, for the next 8 miles. It passes just east of the Gold Lake Bog Research Natural Area, along the east side of Douglas Horse pasture, skirts the east shores of the Rosary Lakes, then abruptly turning to the west, descends into the Odell Lake Basin."

Questions concerning the trail relocation may be addressed to Richard Grace, Recreation Staff Officer, Willamette National Forest, 211 East 7th Avenue, Eugene, OR 97401, telephone (503) 687–6521.

Dated: May 19, 1986.

Gerald W. Gause,
Acting Regional Forester.

BILLING CODE 3410–11–M

Soil Conservation Service

Pioneer School RC&D Measure, California; Environmental Statement

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Pioneer School RC&D Measure, El Dorado County, California.

FOR FURTHER INFORMATION CONTACT: Mr. Eugene E. Andreuccetti, State Conservationist, Soil Conservation Service, 2121–C 2nd Street, Davis, California 95616–5475, telephone (916) 449–2848.

SUPPLEMENTARY INFORMATION: The environmental assessment of this Federal action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Eugene E. Andreuccetti, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for the project.

This measure concerns a plant for critical area treatment. The planned works of improvement include erosion control practices such as drop inlet pipe structures, diversion trenches, minor grading and shaping, and revegetation of exposed and critically eroding areas.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. The basic data developed during the environmental assessment are on file and may be reviewed by contracting Mr. Eugene E. Andreuccetti.

No administrative action or implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

BILLING CODE 3410-16-M

DEPARTMENT OF COMMERCE

International Trade Administration

Initiation of Antidumping and Countervailing Duty Administrative Reviews

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of initiation of antidumping and countervailing duty administrative reviews.

SUMMARY: The Department of Commerce has received requests to conduct administrative reviews of various antidumping and countervailing duty orders and findings. In accordance with the Commerce Regulations, we are initiating those administrative reviews.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT: William L. Matthews or Richard Moreland, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-5253/2786.

SUPPLEMENTARY INFORMATION:

Background

On August 12, 1985, the Department of Commerce ("the Department") published in the **Federal Register** (50 FR 32556) a notice outlining the procedures for requesting administrative reviews. The Department has received timely request, in accordance with §§ 353.53a(a)(5) and 355.10(a)(2) of the Commerce Regulations, for administrative reviews of various antidumping and countervailing duty orders and findings.

Initiation of Reviews

In accordance with §§ 353.53a(c) and 355.10(c) of the Commerce Regulations, we are initiating administrative reviews of the following antidumping and countervailing duty orders and findings. As a result of the orders of the United States Court of International Trade, issued on March 12, April 2, and April 30, 1986, we are also initiating administrative reviews of certain firms in the antidumping finding on elemental sulphur from Canada. We intend to issue the final results of all these reviews no later than May 31, 1987.

Antidumping proceedings and firms	Periods to be reviewed
Elemental Sulphur from Canada:	
Burza Resources	12/82-11/84
Canadian Occidental	12/82-11/84
Canadian Superior Oil	04/84-03/86
Chevron Standard	04/84-03/86
Gulf Oil Canada	04/84-03/86
Home Oil	12/82-11/84
Hudson's Bay Oil & Gas	04/84-03/86
InterRedec	12/82-11/84
Petro-Canada	12/82-11/84
Petro-Canada Exploration	12/82-11/84
Shell Canada Resources	04/84-03/86
Timahel Ltd.	12/82-11/84
Steel Jacks from Canada: J.C. Hallman	09/85-08/86
Sodium Nitrate from Chile: SQM	05/84-08/86
Bicycle Speedometers from Japan:	
Aoshi Keiki/All exporters	04/76-10/84
Tsuyama/All exporters	11/82-10/84
Bicycle Tires and Tubes from S. Korea: KIK	04/82-08/82
Birch 3-Ply Doorskins from Japan:	
Matsumoto/C.Itoh	02/82-07/83
Nitta Veneer/C.Itoh	02/82-11/82
Sanmoku/C.Itoh	12/82-01/85
Seitsuru Veneer/C.Itoh	12/82-07/83
Tuners (of the Type Used in Consumer Electronic Products) from Japan:	
Alps Electric	12/82-08/22/84
Maruberi	09/84-11/84
Mitsumi	12/82-08/22/84
Murata	09/84-11/84
Shin-Shirasuna	12/81-11/84
Tos Electric	12/82-11/84
PVC Sheet and Film from Taiwan: Edet	01/84-11/84
Elsevital	02/85-08/86
Everlush	02/85-05/85
Fashion Plastics	09/84-05/85
Hop Kee Hong	08/89-08/20/84
K.E. Kingstone	08/83-05/85
Lumay	01/85-08/86
Taiwan Eva	01/85-05/86
Union	01/85-05/85
Titanium Sponge from the U.S.S.R.: Technoexport	08/83-07/86

Countervailing duty proceedings	Periods to be reviewed
Leather Wearing Apparel from Argentina	07/85-12/84
Non-rubber Footwear from Argentina	01/84-12/84
Bars and Shapes from Mexico	08/84-09/84
Cotton Sheeting and Sateen from Peru	01/84-12/84
Cotton yarn from Peru	01/84-12/84
Ferrochrom from South Africa	01/85-12/84
Carbon Steel Wire Rod from Trinidad/Tobago	01/85-12/84

These initiations and this notice are in accordance with section 751(a) of the Tariff Act of 1930 (19 U.S.C. 1675(a)) and §§353.53a(c) and 355.10(c) of the Commerce Regulations (19 CFR 353.53a(c), 355.10(c); 50 FR 32556, August 13, 1985).

Dated: May 22, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

[A-122-047]

Elemental Sulphur From Canada; Reinstatement in Part of Antidumping Finding

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of reinstatement in part of antidumping finding.

SUMMARY: On November 7, 1985, the United States Court of Appeals for the Federal Circuit reversed the Department of Commerce decision to revoke the antidumping finding on Canadian elemental sulphur with respect to Shell Canada Resources, Ltd. and Canadian Superior Oil, Ltd. On March 12, 1986, the United States Court of International Trade reversed the Department's revocation and remanded the proceeding for reconsideration consistent with the opinion of the Court of Appeals. On April 2, 1986, the Court of International Trade, in accordance with the Court of Appeals decision, also reversed the Department's decision to revoke the antidumping finding with respect to Chevron Standard, Ltd. On April 30, 1986, the Court of International Trade similarly reversed the Department's revocation with respect to Gulf Oil Canada, Ltd. and Hudson's Bay Oil & Gas, Ltd.

As a result, the Department is reinstating the antidumping finding on elemental sulphur from Canada with regard to merchandise produced and exported by Shell Canada Resources, Ltd., Canadian Superior Oil, Ltd., Chevron Standard, Ltd., Gulf Oil Canada, Ltd., and Hudson's Bay Oil & Gas, Ltd.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Sean P. Kelley or Linnea Bucher, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2923.

SUPPLEMENTARY INFORMATION:

Background

On December 17, 1973, the Treasury Department published in the **Federal Register** (38 FR 34655) a dumping finding with respect to elemental sulphur from Canada. On April 9, 1981, the Department of Commerce ("the Department") published in the **Federal Register** (46 FR 21214) the preliminary results of its first administrative review of that finding and tentative determination to revoke the finding with respect to Shell Canada Resources, Ltd., Canadian Superior Oil, Ltd., and

BEST COPY AVAILABLE

Hudson's Bay Oil & Gas, Ltd. On January 27, 1982, the Department published in the Federal Register (46 FR 31911) the final results of its administrative review and revoked the finding with regard to Shell Canada Resources, Ltd. and Canadian Superior Oil, Ltd. On September 9, 1983, the Department revoked the finding with regard to Chevron Standard, Ltd. (48 FR 40760). On January 16, 1984, the Department revoked the finding with regard to Gulf Oil Canada, Ltd. and Hudson's Bay Oil & Gas, Ltd. (49 FR 1920). The revocations applied to unliquidated entries entered, or withdrawn from warehouse, for consumption on or after February 8, 1979.

The petitioner, Freeport Minerals Company (now Freeport-McMoran Inc.), sued the Department in the United States Court of International Trade regarding the revocations. On March 24, 1982, the Court of International Trade granted the Government's motion for summary judgment with regard to Shell Canada Resources, Ltd. and Canadian Superior Oil, Ltd. and thereby affirmed the Department's revocation for those two firms. On November 7, 1985, the Court of Appeals for the Federal Circuit ("CAFC") reversed the lower court's decision and remanded the matter.

On March 12, 1986, the Court of International Trade reversed the Department's revocation and remanded the proceeding for reconsideration consistent with the opinion of the CAFC. On April 2, 1986, the Court of International Trade, under the authority of the CAFC decision, also reversed and remanded the Department's revocation with respect to Chevron Standard, Ltd. On April 30, 1986, the Court of International Trade, under the authority of the same CAFC decision, reversed and remanded the Department's revocation with respect to Gulf Oil Canada, Ltd. and Hudson's Bay Oil & Gas, Ltd.

The Department, in accordance with the orders of the Court of International Trade, reinstates the antidumping finding with regard to merchandise produced and exported by Shell Canada Resources, Ltd., Canadian Superior Oil, Ltd., Chevron Standard, Ltd., Gulf Oil Canada, Ltd., and Hudson's Bay Oil & Gas, Ltd. Further, the Department is ordering the suspension of liquidation of all entries of the merchandise produced and exported by those firms and entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the Federal Register.

This reinstatement in part of the antidumping finding is in accordance with the orders of the United States Court of International Trade, issued on March 12, 1986, April 2, 1986, and April 30, 1986, and § 353.54 of the Commerce Regulations (19 CFR 353.54).

Dated: May 22, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

Certain Stainless Steel Sheet and Strip Products From France; Intention to Review and Preliminary Results of Changed Circumstances Administrative Review and Tentative Determination To Revoke Antidumping Duty Order

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of intention and preliminary results of changed circumstances administrative review and tentative determination to revoke antidumping duty order..

SUMMARY: The Department of Commerce has received information which shows changed circumstances sufficient to warrant an administrative review, under section 751(b)(1) of the Tariff Act of 1930, of the antidumping duty order on certain stainless steel sheet and strip products from France. The review covers the period from March 1, 1986. The remaining petitioners to this proceeding have notified the Department that they are no longer interested in the antidumping duty order. Their affirmative statement of no interest provides a reasonable basis for the Department to revoke the order. Therefore, we tentatively determine to revoke the order. In accordance with the petitioners' notification, the revocation will apply to certain stainless steel sheet and strip products exported on or after March 1, 1986. Interested parties are invited to comment on these preliminary results and tentative determination to revoke.

EFFECTIVE DATE: March 1, 1986.

FOR FURTHER INFORMATION CONTACT: Linda C. Odom or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-1130/5255.

SUPPLEMENTARY INFORMATION:

Background

On June 22, 1983, the Department of Commerce ("the Department") published in the Federal Register (48 FR 28520) an antidumping duty order on certain stainless steel sheet and strip products from France.

In a letter dated April 11, 1986, Allegheny Ludlum Steel Corporation, Armco, Inc., Carpenter Technology Corporation, Jessop Steel Company, LTV Specialty Steel, Inc., Cyclops Corporation, Washington Steel Corporation, and the United Steelworkers of America, the remaining petitioners in this proceeding, informed the Department that they were no longer interested in the order and stated their support of revocation of the order. Under section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department may revoke an antidumping duty order that is no longer of interest to domestic interested parties.

Scope of the Review

Imports covered by the review are shipments of certain stainless steel sheet and strip products currently classifiable under item 607.7610, 607.9010, 607.9020, 608.4300, and 608.5700 of the Tariff Schedules of the United States Annotated. The review covers the period from March 1, 1986.

Preliminary Results of the Review and Tentative Determination

As a result of our review, we preliminarily determine that the petitioners' affirmative statement of no interest in continuation of the antidumping duty order on certain stainless steel sheet and strip products from France provides a reasonable basis for revocation of the order.

Therefore, we tentatively determine to revoke the order on certain stainless steel sheet and strip product from France effective March 1, 1986. We intend to instruct the Customs Service to proceed with liquidation of all unliquidated entries of this merchandise exported on or after March 1, 1986, without regard to antidumping duties and to refund any estimated antidumping duties collected with respect to those entries.

The current requirement for a cash deposit of estimated antidumping duties will continue until publication of the final results of this review. This notice does not cover unliquidated entries of certain stainless steel sheet and strip products from France which were exported prior to March 1, 1986. The Department will cover any such entries in a separate review, if one is requested.

Interested parties may submit written comments on these preliminary results and tentative determination to revoke within 30 days of the date of publication of this notice, and may request a hearing within five days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. The Department will publish the final results of the review and its decision on revocation, including its analysis of issues raised in any such written comments or at a hearing.

This intention to review, administrative review, tentative determination to revoke, and notice are in accordance with sections 751(b) and (c) of the Tariff Act (19 U.S.C. 1675(b), (c)) and §§ 353.53 and 353.54 of the Commerce Regulations (19 CFR 353.53, 353.54).

Dated: May 27, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary Import Administration.

Certain Stainless Steel Sheet and Strip Products From the Federal Republic of Germany; Intention To Review and Preliminary Results of Changed Circumstances Administrative Review and Tentative Determination To Revoke Antidumping Duty Order

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of intention to review and preliminary results of changed circumstances administrative review and tentative determination to revoke antidumping duty order.

SUMMARY: The Department of Commerce has received information which shows changed circumstances sufficient to warrant an administrative review, under section 751(b)(1) of the Tariff Act of 1930, of the antidumping duty order on certain stainless steel sheet and strip products from the Federal Republic of Germany. The review covers the period from March 1, 1986. The remaining petitioners to this proceeding have notified the Department that they are no longer interested in the antidumping duty order. Their affirmative statement of no interest provides a reasonable basis for the Department to revoke the order. Therefore, we tentatively determine to revoke the order. In accordance with the petitioners' notification, the revocation will apply to certain stainless steel sheet and strip products exported on or after March 1, 1986. Interested parties are invited to comment on these preliminary results and tentative determination to revoke.

EFFECTIVE DATE: March 1, 1986.

FOR FURTHER INFORMATION CONTACT: Linda C. Odom or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-1130/5255.

SUPPLEMENTARY INFORMATION:

Background

On June 23, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 28660) an antidumping duty order on certain stainless steel sheet and strip products from the Federal Republic of Germany.

In a letter dated April 14, 1986, Allegheny Ludlum Steel Corporation, Armco, Inc., Carpenter Technology Corporation, Jessop Steel Company, LTV Specialty Steel Inc., Cyclops Corporation, Washington Steel Corporation, and the United Steelworkers of America, the remaining petitioners in this proceeding, informed the Department that they were no longer interested in the order and stated their support of revocation of the order. Under section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department may revoke an antidumping duty order that is no longer of interest to domestic interested parties.

Scope of the Review

Imports covered by the review are shipments of stainless steel sheet and strip products either hot- or cold-rolled, excluding hot- or cold-rolled stainless sheet and strip not over 0.01 inch in thickness, currently classifiable under item 607.7610, 607.9010, 607.9020, 608.4300, and 608.5700 of the Tariff Schedules of the United States Annotated. The review covers the period from March 1, 1986.

Preliminary Results of the Review and Tentative Determination

As a result of our review, we preliminarily determine that the petitioners' affirmative statement of no interest in continuation of the antidumping duty order on certain stainless steel sheet and strip products from the Federal Republic of Germany provides a reasonable basis for revocation of the order.

Therefore, we tentatively determine to revoke the order on certain stainless steel sheet and strip products from the Federal Republic of Germany effective March 1, 1986. We intend to instruct the Customs Service to proceed with liquidation of all unliquidated entries of this merchandise exported on or after March 1, 1986, without regard to antidumping duties and to refund any estimated antidumping duties collected with respect to those entries. The current requirement for a cash deposit of estimated antidumping duties will continue until publication of the final results of this review. This notice does not cover unliquidated entries of certain stainless steel sheet and strip products from the Federal Republic of Germany which were exported prior to March 1, 1986. The Department will cover any such entries in a separate review, if one is requested.

Interested parties may submit written comments on these preliminary results and tentative determination to revoke within 30 days of the date of publication of this notice, and may request a hearing within five days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. The Department will publish the final results of the review and its decision on revocation, including its analysis of issues raised in any such written comments or at a hearing.

This intention to review, administrative review, tentative determination to revoke, and notice are in accordance with sections 751 (b) and (c) of the Tariff Act (19 U.S.C. 1675 (b), (c)) and §§ 353.53 and 353.54 of the Commerce Regulations (19 CFR 353.53, 353.54).

Dated: May 22, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary, Import Administration.

Tool Steel From the Federal Republic of Germany; Intention To Review and Preliminary Results of Changed Circumstances Administrative Review and Tentative Determination To Revoke Antidumping Duty Order

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of intention to review and preliminary results of changed circumstances administrative review and tentative determination to revoke antidumping duty order.

SUMMARY: The Department of Commerce has received information which shows changed circumstances sufficient to warrant an administrative review, under section 751(b)(1) of the Tariff Act of 1930, of the antidumping duty order on tool steel from the Federal Republic of Germany. The review covers the period from March 1, 1986. The remaining petitioners to this proceeding have notified the Department that they are no longer interested in the antidumping duty order. Their affirmative statement of no interest provides a reasonable basis for the Department to revoke the order. Therefore, we tentatively determine to revoke the order. In accordance with the petitioners' notification, the revocation will apply to all tool steel exported on or after March 1, 1986. Interested parties are invited to comment on these preliminary results and tentative determination to revoke.

EFFECTIVE DATE: March 1, 1986.

FOR FURTHER INFORMATION CONTACT:

Linda C. Odom or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-1130/5255.

SUPPLEMENTARY INFORMATION:

Background

On July 25, 1983, the Department of Commerce ("the Department") published in the Federal Register (48 FR 33730) an antidumping duty order on tool steel from the Federal Republic of Germany.

In a letter dated April 22, 1986, Al Tech Specialty Steel Corporation, Columbia Tool Steel Company, Carpenter Technology Corporation, Crucible Specialty Metals Division of Colt Industries, Inc., and Latrobe Steel Company, the remaining petitioners in this proceeding, informed the Department that they were no longer interested in the order and stated their support of revocation of the order. Under section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department may revoke an antidumping duty order that is no longer of interest to domestic interested parties.

Scope of the Review

Imports covered by the review are shipments of tool steel currently classifiable under item 606.9100, 606.9105, 606.9110, 606.9500, 606.9505, 606.9512, 606.9514, 606.9520, 606.9525, 606.9535, 606.9542, 606.9544, 606.9548, 606.9549, 607.2800, 607.3200, 607.3405, 607.3420, 607.4600, 607.4800, 607.5405, and 607.5420 of the Tariff Schedules of the United States Annotated. The review covers the period from March 1, 1986.

Preliminary Results of the Review and Tentative Determination

As a result of our review, we preliminarily determine that the petitioners' affirmative statement of no interest in continuation of the antidumping duty order on tool steel from the Federal Republic of Germany provides a reasonable basis for revocation of the order.

Therefore, we tentatively determine to revoke the order on tool steel from the Federal Republic of Germany effective March 1, 1986. We intend to instruct the Customs Service to proceed with liquidation of all unliquidated entries of this merchandise exported on or after March 1, 1986, without regard to antidumping duties and to refund any estimated antidumping duties collected with respect to those entries. The current requirement for a cash deposit of estimated antidumping duties will continue until publication of the final results of this review. This notice does not cover unliquidated entries of tool steel from the Federal Republic of Germany which were exported prior to March 1, 1986. The Department will cover any such entries in a separate review, if one is requested.

Interested parties may submit written comments on these preliminary results and tentative determination to revoke within 30 days of the date of publication of this notice, and may request a hearing within five days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. The Department will publish the final results of the review and its decision on revocation, including its analysis of issues raised in any such written comments or at a hearing.

This intention to review, administrative review, tentative determination to revoke, and notice are in accordance with sections 751(b) and (c) of the Tariff Act (19 U.S.C. 1675(b), (c)) and §§ 353.53 and 353.54 of the Commerce Regulations (19 CFR 353.53, 353.54).

Dated May 22, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary Import Administration.

Final Negative Countervailing Duty Determination; Oil Country Tubular Goods From Taiwan

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: NOTICE.

SUMMARY: We determine that no benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters of oil country tubular goods (OCTG) in Taiwan. The net subsidy is 0.11 percent *ad valorem*. This rate is *de minimis*, and therefore this determination is negative. We have notified the United States International Trade Commission (ITC) of our determination.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT:

Laurel LaCivita or Loc Nguyen Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-0189 (LaCivita) or 377-0167 (Nguyen).

SUPPLEMENTARY INFORMATION:

Final Determination

Based on our investigation, we determine that the following programs are countervailable:

- Preferential Export Financing.
- Export Loss Reserves.

We determine the net countervailable benefits for OCTG to be 0.11 percent *ad valorem*. Although we have determined these programs to be countervailable, the respondent received *de minimis* benefits during the review period. Therefore, we determine that no benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers or exporters of OCTG in Taiwan.

Case History

On July 22, 1985, we received a petition in proper form filed by the Lone Star Steel Company and CF & I Steel Corporation, producers of OCTG. In compliance with the filing requirements of § 355.26 of our regulations (19 CFR 355.26), the petition alleged that manufacturers, producers or exporters of OCTG in Taiwan directly or indirectly receive benefits which constitute subsidies within the meaning of section 701 of the Act, and that these imports materially injure, or threaten

material injury to, a U.S. industry. In addition, the petition alleges that "critical circumstances" exist within the meaning of section 703(e)(1) of the Act.

We found that the petition contained sufficient grounds upon which to initiate a countervailing duty investigation, and on August 12, 1985, we initiated such and investigation (50 FR 33384).

Since Taiwan is entitled to an injury determination under section 701(b) of the Act, the ITC is required to determine whether imports of the subject merchandise from Taiwan materially injure, or threaten material injury to, U.S. industry. Therefore, we notified the ITC of our initiation. On September 5, 1985, the ITC preliminarily determined that there is a reasonable indication that these imports materially injure a U.S. industry (50 FR 37056).

On August 20, 1985, we presented a questionnaire concerning the petitioners' allegations to the American Institute on Taiwan in Washington, DC. Responses to the questionnaire were received on September 20 and 23, 1985.

There is only one known producer of OCTG in Taiwan, the Far East Machinery Company, Ltd. (FEMCO). China Steel Corporation (China Steel), a state-owned supplier of pipe-and-tube inputs, responded to the Department's questionnaire concerning preferentially-priced inputs.

On September 23, 1985, we received a timely request by petitioners for an extension of the deadline date for the preliminary determination. An extension was granted on September 26, 1985 (50 FR 40560). We stated that we expected to issue our preliminary determination by November 29, 1985.

Verification was conducted in Taiwan from October 15, 1985, to November 5, 1985.

On November 29, 1985, we issued our preliminary negative determination.

Our notice of preliminary determination gave interested parties an opportunity to submit oral and written views. A hearing was not held because no interested party requested one in this case. Written views were received from petitioners on February 3 and 14, 1986, from respondents on February 4 and 14, 1986, and from China Steel on February 3, 1986.

On December 4, 1985, petitioners filed a request to extend the deadline date for a final determination in the countervailing duty investigation to correspond to the date of the final determination in the antidumping investigation, pursuant to section 606 of the Trade and Tariff Act of 1984. This request was granted on January 27, 1986 (51 FR 3377).

On January 16, 1986, respondents requested a delay on the deadline for the antidumping duty determination. Therefore, pursuant to section 735(a)(2) of the Act, we granted a postponement of the final antidumping and countervailing duty determinations on February 22, 1986 (51 FR 7308). We stated that we expected to issue a final determination by May 21, 1986. On April 16, 1986, the United States Steel Corporation (U.S. Steel) filed comments on our preliminary determination.

Scope of Investigation

The products covered by this investigation are "oil country tubular goods," which are hollow steel products of circular cross-section intended for use in drilling for oil or gas. These products include oil well casings, tubing, and drill pipe of carbon or alloy steel, whether welded or seamless, manufactured to either American Petroleum Institute (API) or non-API (such as proprietary) specifications as currently provided for in the *Tariff Schedules of the United States, Annotated* (TSUSA) under items 610.3216, 610.3219, 610.3233, 610.3234, 610.3242, 610.3243, 610.3249, 610.3252, 610.3254, 610.3256, 610.3258, 610.3262, 610.3264, 610.3721, 610.3722, 610.3751, 610.3925, 610.3935, 610.4025, 610.4035, 610.4210, 610.4220, 610.4225, 610.4230, 610.4235, 610.4240, 610.4310, 610.4320, 610.4325, 610.4335, 610.4942, 610.4944, 610.4946, 610.4954, 610.4955, 610.4956, 610.4957, 610.4966, 610.4967, 610.4968, 610.4969, 610.4970, 610.5221, 610.5222, 610.5226, 610.5234, 610.5240, 610.5242, 610.5243 and 610.5244. This investigation includes OCTG that are in both finished and unfinished condition.

Analysis of Programs

Throughout this notice, we refer to certain general principles applied to the facts of the current investigation. These principles are described in the "Subsidies Appendix" attached to the notice of "Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina; Final Affirmative Countervailing Duty Determination and Countervailing Duty Order," which was published in the April 26, 1984, issue of the Federal Register (49 FR 18006).

For purposes of this determination, the period for which we are measuring subsidies, the review period, is calendar year 1984.

Based upon our analysis of the petition, the responses to our questionnaires submitted by the Taiwan authorities, FEMCO and China Steel, the verification, the amended response submitted after verification, and the briefs submitted by interested parties, we determine the following:

I. Programs Determined to be Countervailable

We determine that the following programs provide countervailable benefits to manufacturers, producers or exporters of OCTG in Taiwan:

A. Preferential Export Financing

The Export Loan Discount Regulations of the Central Bank of China permit registered exporters in possession of a letter of credit to apply for low-cost export loans covering up to 85 percent of the value of the export transaction. Export loans are arranged through authorized foreign-currency banks, which may apply for an interest-rate reduction from the Central Bank. Exporters settle the loan with foreign exchange within 180 days or pay an interest-rate penalty on the full amount of the loan.

The Central Bank sets the maximum and minimum interest rates for commercial lending in Taiwan. Export loans were set at rates equal to or below the minimum rates established for commercial lending during the review period. Because the rates given by commercial banks are near the maximum interest rate set by the Central Bank and because no further information is available regarding average commercial lending rates in Taiwan, we used the maximum lending rates set by the Central Bank as our short-term commercial benchmark.

FEMCO obtained export loans to finance exports of the products under investigation to the United States. Because these loans are contingent upon export performance and provide funds to borrowers at interest rates lower than those available for other purposes, we determine that this program confers a benefit which constitutes an export subsidy.

To calculate the benefit, we compared the Central Bank's export-loan rate with its maximum short-term loan rate. We then multiplied the difference by the principal amount and allocated the benefit over the value of FEMCO's 1984 exports to the United States of the product under investigation. The net subsidy is 0.10 percent *ad valorem*.

B. Export Loss Reserves

Article 31 of the Statute for Encouragement of Investment (SEI) permits exporters to establish an export loss reserve of up to one percent of the previous year's export exchange settlement to be used exclusively to compensate export losses. Companies treat the export loss reserve as a business expense and deduct it from taxable income in one year, then settle

the account and carry the reserve funds forward as taxable income for the next year. FEMCO received benefits from export loss reserves during the review period.

Because this program is contingent upon export sales, we determine that it confers a benefit which constitutes an export subsidy. To calculate the benefit received in 1984, we treated tax savings from the export loss reserve as a one-year interest-free loan received in mid-1983 at the time the income tax forms were filed. We compared the interest-free rate with the maximum lending rate set by the Central Bank and divided the benefit by the value of FEMCO's total 1984 exports and found the net subsidy to be 0.01 percent *ad valorem*.

II. Programs Determined Not to Confer Subsidies

We determine that the following programs do not confer subsidies on the manufacturers, producers or exporters of OCTG in Taiwan:

A. Business Tax Exemptions for Export Sales

The authorities on Taiwan levy a business tax on selling goods, rendering services or other profit seeking activities within the territory of Taiwan. Article 20 of the SEI exempts export sales, which include sales to trading companies and to manufacturers for further processing before export, from the business tax. The amount of the exemption equals the amount of business tax due on each sale destined for export. Companies pay the business tax monthly and receive exemptions for export at that time. However, if the export remains unconfirmed at the time the taxes are due, or, if the goods are sold to trading companies or to other manufacturers for further processing before export, companies initially report the sale as a domestic sale, then apply for the business tax exemptions at the time of export. Such exemptions take the form of a rebate of taxes paid. Under the Act, the non-excessive remission of indirect taxes levied at the final stage is not considered a subsidy. We verified that the amount of the exemption or rebate is not greater than the amount of business tax due; therefore, we determine that this program does not confer countervailable benefits on manufacturers, producers or exporters of OCTG within the meaning of the countervailing duty law.

B. Stamp Tax Reductions

The authorities on Taiwan levy a stamp tax on sales invoices. Article 28 of the SEI permits the reduction of the stamp tax from 0.4 percent to 0.1 percent for all invoices issued by a profit-seeking enterprise for transactions exempt from the business tax. The stamp tax reduction is less than the amount of stamp tax due on each sale destined for export. Under the Act, the non-excessive remission of indirect taxes levied at the final stage is not considered a subsidy. Because we verified that the amount of the reduction is not greater than the amount of the stamp tax due, we determine that this program does not confer countervailable benefits within the meaning of the countervailing duty law.

C. Preferential Prices for Raw Materials

Petitioners alleged that the Taiwan authorities direct China Steel to provide coil at preferential prices to exporters. China Steel, a state-owned corporation and a supplier of pipe-and-tube inputs, maintains a two-tiered pricing policy. The higher first-tier price is applicable to domestic producers who manufacture goods for the Taiwan market. It is based on the landed, duty-paid price of imported hot-rolled coil. The lower second-tier price is offered to manufacturers who purchase coil to produce export products and is based on the landed, duty-free price of hot-rolled coil.

Under item (d) of the Illustrative List of Export Subsidies annexed to the Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade, a price preference for inputs used in the production of export goods constitutes a subsidy only if the preference lowers the price below world-market levels (*See, Final Negative Countervailing Duty Determination: Certain Steel Wire Nails from the Republic of Korea*, 47 FR 39549). Based on an examination of China Steel's second-tier prices for hot-rolled coil used in the production of OCTG, and of the World Market prices for such coil, we found that China Steel's prices were at world-market levels; therefore, we determine that China Steel's two-tiered pricing policy does not confer a counteravailable benefit within the meaning of the countervailing duty law.

D. Preferential Income Tax Ceiling—25 Percent

Petitioners alleged that manufacturers, producers or exporters of OCTG in Taiwan benefit from a preferential income tax ceiling. Article 15 of the SEI permits productive enterprises and big trading companies to pay no more than 25 percent in corporate income taxes on income exceeding NT$500,000 rather than the 35 percent required by Taiwan's graduated corporate income tax law.

Article 15 benefits are available to all productive enterprises, defined in the SEI as stock companies engaged in manufacturing, handicrafts, mining, agriculture, forestry, fishery, animal husbandry, transportation, warehousing public utilities, public facility construction and development, public housing construction, technical services, hotels and heavy machinery construction.

In prior cases, we found this program to be countervailable because respondents were unable to demonstrate that these benefits were not limited to a specific enterprise or industry, or group of enterprises or industries. However, in the *Final Negative Countervailing Duty Determination: Welded Carbon Steel Line Pipe from Taiwan* (50 FR 53363) (*Line Pipe*), we determined that these benefits were not limited to a specific industry or enterprise or group of industries or enterprises; therefore, we determine that this program does not confer a subsidy within the meaning of the countervailing duty law.

E. Tax Credit for Investment in Production Equipment

Under Article 10 of the SEI, productive enterprises may deduct from income tax payable an amount of up to 15 percent of the value of capital equipment purchased during the year. In the event that the amount of the tax credit exceeds the value of income tax payable, the balance may be carried forward for up to four subsequent years.

Article 10 benefits are available to all productive enterprises defined above. In prior cases, we found this program to be countervailable because respondents were unable to demonstrate that these benefits were not limited to a specific enterprise or industry, or group of enterprises or industries. However, in *Line Pipe*, we determined that these benefits are not limited to a specific enterprise or industry, or group of enterprises or industries; therefore, we determine that this program does not confer a subsidy within the meaning of the countervailing duty law.

III. Programs Determined Not to be Used

We determine that the following programs are not used by the manufacturers, producers, or exporters of OCTG in Taiwan:

A. Preferential Income Tax Ceiling—22 Percent

Article 15 of the SEI also permits enterprises engaged in the basic metal production industry, heavy machinery industry, petrochemical industry or other important productive enterprises which conforms with the needs for development of economic and national defense industries and are capital-intensive and/or technology-intensive in nature to use a marginal tax rate of no more than 22 percent. We verified that FEMCO did not use the 22-perent tax ceiling.

B. Accelerated Depreciation and Tax Holiday

Article 6 of the SEI permits newly-established productive enterprises to select one of the following benefits: (1) A tax holiday of up to five years provided that the company depreciates its assets according to Taiwan's Service Life of Fixed Assets; or (2) accelerated depreciation on the service life of machinery, equipment and buildings, construction facilities, and communication and transportation facilities. In addition, Article 6 permits expanding enterprises to select (1) a tax-holiday of up to four years on the income derived from increased capacity, if it depreciates its assets according to Taiwan's Service Life of Fixed Assets, or (2) a rapid depreciation of the newly purchased equipment beginning in the year in which the machines begin operation.

We verified that FEMCO neither claimed accelerated depreciation nor took a tax holiday during the period of review.

C. Duty Exemptions and Deferrals on Imported Equipment

Article 21 of the SEI allows productive enterprises to pay import duties in a series of installments beginning one year from the date of importation on selected machinery and equipment that is not manufactured domestically. In addition, qualified enterprises may be exempt from paying import duties on selected machinery and equipment which is used for the establishment or expansion of an approved project or for research and development.

We verified that FEMCO did not receive duty exemptions or deferrals.

D. Preferential Long-Term Loans

Article 84 of the SEI permits the Executive Yuan to establish and administer a special development fund to promote investments of interest to national economic development. We verified that FEMCO did not use Article 84 financing with respect to U.S. sales of the products under investigation.

Petitioners' Comments

Comment 1: Petitioners allege that the Department did not conduct a complete verification of FEMCO's short-term loan history due to the Central Bank's refusal to allow the Department to examine its discount loan records. They maintain that because the Department was unable to examine the Central Bank's records, it was unable to confirm whether FEMCO reported all of its subsidized short-term loans. Petitioners further argue that since all of FEMCO's exports of OCTG to the U.S. meet the criteria for low-cost export financing, it is reasonable to believe that FEMCO received export financing for all of its OCTG export sales. Petitioners request that the Department use best information available to determine that FEMCO received preferential export financing for all of its OCTG exports to the United States.

DOC Position: We disagree. The Department conducted a complete verification of FEMCO's loan transactions (see FEMCO Verification Report). Furthermore, the Department examined that loan ledgers regarding commercial and export financing at the branch of the International Commercial Bank of China (ICBC) which FEMCO uses.

The ICBC's records matched those reported by FEMCO with respect to the dates of disbursement and repayment of principal and interest and with respect to the terms and conditions of all such loans; therefore, the Department maintains that FEMCO's loan reporting was accurate and complete and, as such, should be sole basis for determining whether a subsidy was received.

Comment 2: Petitioners allege that the Department did not verify the lending rates charged by independent commercial banks in Taiwan, nor whether these banks require compensating balances in return for granting commercial loans. U.S. Steel, an interested party to the proceeding, further contends that the benchmark used to quantify benefits on short-term export loans should recognize that compensating balances requirements increase effective interest rates, citing the preliminary affirmative countervailing duty determination *Certain Steel Products from Brazil* (49 FR 17988, 17991). Petitioners and U.S. Steel request that the Department use best information available to construct a benchmark assuming the existence of compensating balances to raise the benchmark to the effective commercial lending rate.

DOC Position: We disagree. The Department did verify the minimum and maximum lending rates set by the Central Bank to which all commerical banks must adhere (See Government Verification Report). Because there was no allegation of, and we found no evidence of, a uniform requirement for compensating balances and no government publication gives a definitive measure of the extent to which compensating balances are actually used, we have determined not to use compensating balances in calculating our benchmark interest rate.

Comment 3: Petitioners allege that FEMCO may have qualified for a preferential income tax ceiling of 22 percent under the Statute for Encouragement of Investment (SEI). They further allege that because the authorities on Taiwan refused to provide a list of all companies receiving such financing, the Department should infer that FEMCO was among the companies on that list. Petitioners note that FEMCO's original tax return held by the City Tax Administration listed the company's tax rate whereas the copy held by FEMCO did not provide this information; therefore, petitioners argue that the Department should use the best information available to assume that FEMCO received the ceiling rate of 22 percent.

DOC Position: We disagree. FEMCO does not qualify for the 22-percent rate under Article 2.1 of the Categories and Criteria for Special Encouragement of Important Productive Enterprises. Furthermore, the Department examined FEMCO's tax forms kept on file at the City Tax Administration which reported tha FEMCO paid taxes at the 25-percent rate. Since this is the tax form filed with the tax authorities, this adequately establishes that the firm paid taxes at the 25-percent rate. Therefore, we maintain that FEMCO did not receive the more favorable 22-percent tax rate.

Comment 4: Petitioners argue that the Department should countervail the SEI's provision of a 25-percent tax rate to all productive enterprises as defined in Article 3 of the SEI. Petitioners maintain that the 25-percent rate is not generally available because various industries, and "non-productive" activities, such as interest income, are excluded from using this rate.

DOC Position: We disagree. Eligibility for the programs covers a wide variety of industries including those in the manufacturing, service, and agricultural sectors. Therefore, we have determined that benefits under this program are not

limited to a specific enterprise or industry, or group of enterprises or industries within the meaning of the Act. (See *Analysis of Programs* section of this notice.)

Comment 5: Petitioners allege that during verification, the Department determined that carbon and alloy steel seamless pipes, including OCTG, were among the metallurgical products qualifying for accelerated depreciation under Artilce 6 of the SEI. They further allege that the Department failed to properly verify this program because the Ministry of Finance, which authorizes the benefits and "would naturally be presumed to maintain a list," informed the Department that a list of Article 6 beneficiaries does not exist.

DOC Position: We disagree. Petitioners incorrectly quote the verification report with respect to the findings on OCTG. The OCTG that FEMCO produces is neither a carbon steel seamless pipe nor an alloy steel seamless pipe, and therefore, expansion or establishment of its OCTG facilities does not qualify for such benefits.

Furthermore, the Department cannot consider a verification deficient based on the presumption that a government agency should maintain a list of its beneficiaries. The Department examined FEMCO's depreciation schedules to determine utilization of the accelerated depreciation provision of Article 6 of the SEI. Upon examination of these records, and those at the City Tax Administration, we found no evidence that this provision had been used.

Comment 6: Petitioners allege that the Department's verification of FEMCO's use of the tax holiday provision of Article 6 of the SEI was inadequate. The Department learned at verification that FEMCO had approval of a four-year tax holiday stemming from the 1982 purchase of specific machinery. Petitioners allege that since FEMCO did not volunteer this information in its questionnaire response, and that, since it is difficult to believe that FEMCO would not have taken advantage of other benefits of Article 6 of the SEI, the Department should assume that FEMCO received a tax holiday upon introduction of its OCTG capacity.

DOC Position: We disagree. The Department verified at the local tax authorities, and at FEMCO, that FEMCO did not take a tax holiday in conjunction with its purchase of the approved capital equipment.

Comment 7: Petitioners fully support the arguments made by the Committee of Pipe and Tube Imports ("CPTI"), petitioners in the countervailing duty investigation of welded carbon steel line pipe from Taiwan, with respect to China Steel's provision of inputs at three price levels. (*See Final Negative Countervailing Duty Determination* 50 FR 53363). FEMCO was a respondent company in this investigation. The first-tier price is based on the CIF landed duty-paid price of imported coil for producers selling domestically. The second-tier price is based on the CIF landed duty-free price of imported coil for producers selling for export. The third-tier price is a variance price lowering the second-tier price to compensate for declining world prices. In particular, petitioners believe that the prices of China Steel's inputs should have been compared to the actual price that domestic users such as FEMCO paid for their imported inputs in order to determine if the China Steel sales provided a subsidy as argued by CPTI.

DOC Position: Under item (d) of the Illustrative List of Export Subsidies annexed to the Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade, a price preference for inputs used in the production of export goods constitutes a subsidy only if the preference lowers the price below "those commercially available on the world market to their exporters", *i.e.*, below world-market levels. Accordingly, in determining whether China Steel's prices were preferential, we compared not only the actual prices FEMCO paid China Steel to the actual prices FEMCO paid for imported coil, but also compared the prices FEMCO paid China Steel to generally available world-market prices for coil. In so doing, we found that the prices were at or above the benchmark prices. Therefore, there was no subsidy.

Comment 8: Petitioners maintain that the Department was unable to verify the price FEMCO paid for its hot-rolled coil from China Steel, and hence, must use best information to determine that FEMCO purchased hot-rolled coil for OCTG at the variance, or lowest, price.

DOC Position: The Department examined FEMCO's contract with China Steel for API hot-rolled coil used to make OCTG; we traced this purchase through its invoice, transfer voucher and ledger entry. We determined that the price paid was above the world-market price.

Comment 9: U.S. Steel argues that the proper benchmark interest rate to quantify the subsidy rate for short-term export loans should include nonbank financing. They cite the final affirmative countervailing duty determinations on *Cold Rolled Sheet from Korea* (49 FR 47284, 47287), *Cold Rolled Sheet from Argentina* (49 FR 18006, 1807), and *Wire Rod from Saudi Arabia* (51 FR 4206, 4208) as cases where the Department determined the benchmark by weight averaging the interest rates on short-term domestic credit, both bank and nonbank, as the best approximation of what firms pay for financing, absent preferential export loans.

DOC Position: In the cases cited by U.S. Steel, we did not use average of bank and non-bank credits as our benchmark. In the Korean case, we used the weighted-average cost of all short-term credit to measure the preference built into the government's rediscount mechanism for short-term export loans. In that investigation, we still used the government-mandated ten-percent interest rate as our short-term interest-rate benchmark for other programs. In the Saudi Arabian case, we looked only to long-term loan programs and used an average of commerical bank lending rates and generally-available government lending rates. Our normal practice is to look to the lending rates available in the country from either commercial banks or generally-available government sources. If the government mandates an interest-rate ceiling, as it does in Taiwan, we would still use those rates provided they were generally available.

Comment 10: U.S. Steel argues that the state-owned China Steel Corporation (China Steel) provides hot-rolled coil at preferential prices to OCTG exporters. They allege that the authorities on Taiwan restrict coil imports, thus requiring producers of OCTG in Taiwan to buy the domestic coil. They contend that, because of this import restriction, it is irrelevant as a matter of law and policy whether China Steel's preferentially-priced coil (for export use) is sold at, above, or below world prices.

DOC Position: There is no evidence that the authorities on Taiwan restrict imports. We verified that FEMCO did import hot-rolled coil; therefore, we need not address whether a prohibition on the importation of a product makes comparison to world market-prices irrelevant. Finally, comparison to world-market prices is consistent with the law and with paragraph (d) of the Annex to the Subsidies Code.

Comment 11: U.S. Steel argues that a subsidy is being provided to FEMCO in the form of reduced electricity rates by the state-run Taiwan Power Co. and that this should be included in the final determination because the Department's practice is to consider program-wide changes that occur prior to the preliminary determination.

DOC Position: U.S. Steel did not submit this allegation until 30 days

before the final determination. There was ample opportunity to submit this allegation in time for the Department to investigate. Since this allegation was submitted far too late to be investigated, we have not done so. In addition, as a general rule, we may take into account program-wide changes which occur after the period of investigation and before the preliminary determination if we have verified information on the change and the magnitude of the resulting subsidy. We do not have verified information that FEMCO has received benefits that constitute a subsidy in the form of reduced electricity rate by the state run Taiwan Power Co.; therefore, we cannot include this in our final determination.

Comment 12: U.S. Steel alleges that subsidies are also being provided to the steel industry in Taiwan by the Ministry of Economic Affairs (MOEA) in a plan that allows the industry to extend the period of bank checks and to pay tariffs at a date subsequent to importation of machinery and other plant facilities. They content that the MOEA will also ask local banks to be lenient in approving loans to the steel industry. U.S. Steel argues that since this program, and the one discussed in Comment 4, were adopted in mid-1985, before the Department's preliminary determination, they should be included in the subsidy rate for this final determination.

DOC Position: See our response to Petitioner's eleventh comment.

Respondent's Comments

Comment 1: Respondent argues that in regard to the Preferential Export Financing Program, the Department should use the number of days outstanding, and not assume a full 180-day term, when calculating the benefits for short-term loans.

DOC Position: We agree. Our short-term loan methodology includes the number of days outstanding as one of the variables in the formula for calculating a subsidy rate. We verified the number of days each loan was outstanding and used this in the calculation.

China Steel's Comments

Comment 1: China Steel asserts that the world-market price for coil is the price available to customers in the position of the respondents, which in this investigation is the price available to Southeast Asian coil users on the open world market.

DOC Position: We disagree. See our response to Petitioner's seventh and eighth comment.

Comment 2: China Steel argues that the appropriate price comparison for world-market-price analysis is between China Steel's base price for hot-rolled coil and the base price for hot-rolled coil offered by foreign suppliers.

DOC Position: We disagree. In this case, the appropriate price comparison is between the final F.O.B. price offered by foreign suppliers for each grade, quality, and size of hot-rolled coil and between China Steel's second-tier ex-works price of the comparable grade, quality and size of hot-rolled coil.

Comment 3: China Steel argues that a restriction on imports, as alleged by U.S. Steel, does not constitute a countervailable subsidy *per se*, rather, U.S. countervailing duty law determines whether inputs are preferentially priced by reference to world market price.

DOC Position: See our response to Petitioners' tenth comment.

Final Negative Determination of Critical Circumstances

Petitioners alleged that imports of OCTG from Taiwan present "critical circumstances." Under section 703(e)(1) of the Act, critical circumstances exist when the Department has a reasonable basis to believe or suspect that (1) the alleged subsidy is inconsistent with the Agreement on Interpretation and Application of Articles VI, XVI, ad XXIII of the General Agreement of of Tariffs and Trade ("the Subsidies Code"), and (2) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period. We generally consider the following concerning massive imports: (1) The volume and value of the imports; (2) seasonal trends; and (3) the share of domestic consumption accounted for by the imports.

Based upon our analysis, the export subsidies bestowed upon OCTG in Taiwan are *de minimis*. Accordingly, we preliminarily determined that these subsidies are not inconsistent with the Subsidies Code.

Since we have determined that the subsidies are not inconsistent with Code commitments, we need not determine whether there have been massive imports. Accordingly, we determine that "critical circumstances" do not exist with respect to OCTG from Taiwan.

Verification

In accordance with 776(a) of the Act, we conducted a verification of the information provided in the questionnaire response. During verification, we followed normal verification procedures, including meeting with government officials and inspection of documents, as well as on-site inspection of the companies producing and exporting the merchandise under investigation to the U.S.

ITC Notification

In accordance with section 705(d) of the Act, we will notify the ITC of our determination. Since this determination is negative, the investigation will be terminated upon the publication of this notice in the Federal Register. Hence, the ITC is not required to make a final injury determination.

This notice is published pursuant to section 705(d) of the Act (19 U.S.C. 1671d(d)).

Paul Freedenberg,

Assitant Secretary for Trade Administration.

May 21, 1986.

Automated Manufacturing Equipment Technical Advisory Committee; Partially Closed Meeting

A meeting of the Automated Manufacturing Equipment Technical Advisory Committee will be held June 18, 1986, 9:30 a.m., Herbert C. Hoover Building, Room 3407, 14th Street and Constitution Avenue NW., Washington, DC. The Committee advises the Office of Technology and Policy Analysis with respect to technical questions that affect the level of export controls applicable to automated manufacturing equipment and related technology.

Agenda:

1. Opening remarks by the Chairman
2. Presentation of papers or comments by the public
3. Numerical Control Equipment
4. Precision Inspection Equipment
5. Sensory Control Systems
6. Electric Arc Devices/Isostatic Presses
7. Local Area Networking

Executive Session

8. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria realted thereto.

The general session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1986,

pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: 202/377-4217. For further information or copies of the minutes, call 202/377-4959.

Dated: May 27, 1986.

Margaret A. Cornejo,

Director, Technical Support Staff, Office of Technology and Policy Analysis.

BILLING CODE 3510-DT-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amending the List of Exempt Textile Products Imported from Colombia

May 27, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 30, 1986. For further information contact Nathaniel Cohen, Trade Reference Assistant, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

Effective on May 30, 1986, under the terms of the Bilateral Cotton, Wool and Man-made Fiber Textile Agreement of July 1, and August 1, 1982, as amended, between the Government of the United States and Colombia, the exempt certification mechanism established for certain textile products produced in Colombia is being amended to include "Molas" and "Santa Rosa tapestries" on the agreed list of exempt items. A complete list of currently exempt items is published as an enclosure to the letter to the Commissioner of Customs which follows this notice.

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

May 27, 1986.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of July 20, 1976 from the Chairman of the Committee for the Implementation of Textile Agreements that directed you to prohibit, under certain specified conditions, entry into the United States for consumption and withdrawal from warehouse for consumption, of certain cotton, wool and man-made fiber textile products, produced or manufactured in Colombia, for which the Government of Colombia had not issued an appropriate export visa or certification for exemption.

Effective on May 30, 1986, the directive of July 20, 1976 is hereby further amended to add "Molas" and "Santa Rosa Tapestries" to the agreed list of exempt items. To qualify for exemption as folklore items both must contain a folklore subject and be imported in a condition for use as a household furnishing. They may not be imported as folklore items if they must be cut to make an article of household furnishing. Neither article may be imported as fabric or as shirt or jacket material. A complete and current list of "Colombian Traditional Folklore Handicraft Textile Products" is enclosed.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Colombian Traditional Folklore Handicraft Textile Products

"Colombia Items" are traditional Colombian products, cut, sewn, or otherwise fabricated by hand in cottage units of the cottage industry. The following is the agreed upon list of such items:

(1) *Bedspread.*

Bedspread made on manual loom.

(2) *Blouse with crochet knitted neck.*

A blouse made of greige cloth heavily decorated around the neck, extending down the front and around the sleeves with *hand crocket* work. This blouse also has embroidered panels extending down the front on either side of the crochet work.

(3) *Embroidered Blouse.*

Hand cut and hand sewn blouse with extensive hand embroidery on the upper front and lower portions.

(4) *Embroidered Skirt.*

Hand cut and hand sewn skirt with extensive hand embroidery.

(5) *Blankets, Hand Woven.*

These colorful blankets are hand woven from wool, cotton or wool and cotton, heavy yarns to form striped or block patterns. The ends may be finished with spangles formed by the ends of the yarn and knotted, or may be hemmed.

(6) *Indian Embroidered Cloth.*

Cloth panels hand embroidered with various crude and colorful Indian scenes. Generally these cloths are used as wall hangings.

(7) *Typical Colombia Dress.*

An ankle length dress with a very wide skirt trimmed with wide handmade lace. The entire dress is hand cut and hand sewn and is a typical dress for gaiety affairs.

(8) *Typical Guajira Dress.*

A traditional loose fitting women's garment formed by a folded rectangular piece of fabric with a hole or slot in the center for the head, with intricate embroidery around the neck. This dress is made similar to a ruana, but has the outer edges sewn together except for slots for the hands and arms, and has closures on the front.

(9) *Typical Mapale Dress.*

A knee length dress consisting of very wide skirt having a row of heavy ruffles around the blouse portion and two bands of wide ruffles forming the skirt. A very gay colored festival dress.

(10) *Typical Mestiza Dress.*

A native handmade dress with wide neckline, ruffled collar and wide skirt and with ruffles on the lower part of the skirt.

(11) *Hammock.*

Multicolored stripped hammocks made by hand from coarse fabrics. Ends are formed and reinforced with strong rope.

(12) *Jacket, hand knitted.*

Wholly hand knitted jacket. These jackets are usually knitted from wool yarns. Patched pockets, also hand knitted, are hand sewn to the garment.

(13) *Jacket of hand loomed fabric.*

These jackets are wholly hand made from hand loomed fabrics. Patched pockets, also of hand loomed fabric, are hand sewn to the garment.

(14) *Ruana.*

A cloak made from a heavy rectangular piece of fabric or a blanket with hole in the center for the head to pass through. This is a typical garment worn by men, women and children throughout the higher and cooler altitudes of Colombia. The men's ruana will generally have no fringes. Women's ruanas may have fringes and are sometimes slit from the neck opening to the edge to permit the wearer to put it on as a cape.

Children's ruanas sometimes have a collar around the opening with draw strings for a close fit. These garments are sometimes known as ponchos.

(15) *Rugs, hand woven or hand knotted.*

These rugs are usually made from wool yarns and are either wholly hand woven or hand knotted. They are generally square or rectangular in shape and are in colorful designs.

(16) *Macrame Shawl.*

Hand made shawls wholly of macrame lace or with macrame lace edge. The shawls are in various colors with the typical long fringe around the lower edges.

(17) *Sweaters and Cardigans, hand knitted.*

Wholly hand knitted sweaters and cardigans, generally a bulky knit with decorative vertical patterns.

(18) *Table Cloths and Napkins, embroidered.*

Table cloths and napkins cut and hemmed by hand and extensively embroidered by hand.

(19) *Colorful waist band.*

Hand plaited waist bands in multicolors. These are sometimes sewn together to form wide bands.

(20) *Wall hangings, rectangular.*

A colorful wall hanging made from coarse yarns connected to decorative crudely woven bands. These are hand made and come in various sizes.

(21) *Wall hanging, tree.*

Tree shaped wall hangings formed by connecting together crudely woven bands in graduated sizes with coarse yarns to form the outline of a tree. The wall hanging is decorated with small balls of cotton fiber.

(22) *Indian Color Knapsack.*

Knapsack made with belt like woven or plaited strap and multicolored bag, to be worn on the shoulder.

(23) *Pillow Covers, Embroidered by hand.*

Covers for throw pillow containing extensive hand embroidery covering 50 percent or more of the outer surface of the cover.

(24) *Hand made macrame handbags.*

(25) *Molas.*

Hand appliqued layers of different colors, forming geometric and abstract designs, made of cotton material.

(26) *Santo Rosa Tapestries, Bedspreads and Pillowcases.*

Tapestries, bedspreads and pillowcases, of vivid colors, with hand appliqued figures forming landscapes and folk scenes, made of cotton material.

BILLING CODE 3510-DR-M

Adjusting Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Mexico

May 27, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 27, 1986. For further information contact Ann Fields, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce (202) 377–4212.

Background

A CITA directive dated February 4, 1986 (51 FR 4781) established limits for certain specified categories of cotton, wool and man-made fiber textile products, including Categories 330 pt. 633, 641 and 647/648, produced or manufactured in Mexico and exported during the six-month period which began on January 1, 1986 and extends through June 30, 1986. The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 26, 1979, as amended and extended, under the terms of which these limits were established, also includes provisions for the carryover of shortfalls from the previous agreement year in certain categories (carryover). Under the foregoing provision of the bilateral agreement and at the request of the Government of Mexico, the limits established for the aforementioned categories are being increased for carryover, as available, for goods exported during the six-month period which began on January 1, 1986 and extends through June 30, 1986.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 26, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

May 27, 1986.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of February 4, 1986 from the Chairman of the Committee for the Implementation of Textile Agreements concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in Mexico and exported during the six-month period which began on January 1, 1986 and extends through June 30, 1986.[1]

[1] The Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of February 26, 1979, as amended and extended, provides, in part, that: (1) Specific limits and sublimits may be exceeded by not more than seven percent for swing in any agreement period; (2) these same limits may be adjusted for carryforward and carryover up to 11 percent of the applicable category limit or sublimit; and (3) administrative arrangements or adjustments may be made to resolve problems arising in the implementation of the agreement. Effective on May 27, 1986, paragraph 1 of the directive of February 4, 1986 is hereby amended to include the following adjusted restraint limits:

Category	Adjusted 6-month restraint limit [1]
330pt.[2]	920,119 pounds.
633	28,182 dozen.
641	235,875 dozen.
647/648	692,000 dozen of which not more than 444,000 dozen shall be in Category 647 and not more than 444,000 dozen shall be in Category 648.

[1] The limit has not been adjusted to reflect any imports exported after December 31, 1985.

[2] In Category 330, only T.S.U.S.A. numbers 381.0002, 381.0010, 384.0028, and 384.5227.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553 (a)(1).

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 86-12147 Filed 5-29-86; 8:45 am]

BILLING CODE 3510-DR-M

Limits for Certain Cotton Textile Products Produced or Manufactured in Turkey

May 27, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 30, 1986. For further information contact Ann Fields, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Background

On September 6, 1985, a notice was published in the Federal Register (50 FR 36462), which established import restraint limits for women's, girls' and infants' cotton coats in Category 335 and men's and boys' cotton shirts in Category 340, produced or manufactured in Turkey and exported during the twelve-month period which began on May 30, 1985 and extends through May 29, 1986. These limits filled on November 6, 1985 (Cat. 340) and December 16, 1985 (Cat. 335).

On December 24, 1984 a notice was published in the Federal Register (49 FR 49679) announcing that, as of January 1, 1985, the Committee for the Implementation of Textile Agreements, in order to prevent market disruption, would direct the U.S. Customs Service, as appropriate, to permit entry into the United States for consumption, or withdrawal from warehouse for consumption, of such goods which were exported during a prior restraint period in excess of the restraint limit

established for that period at a prescribed rate during the following period. CITA has decided, in the case of imports in Categories 335 and 340, exported from Turkey on and after May 30, 1985 and extending through May 29, 1986, to direct Customs to permit entry in amounts not to exceed 8,415 dozen (Cat. 335) and 50,075 dozen (Cat. 340) during each of the thirty-day periods stipulated in the letter to the Commissioner of Customs which follows this notice.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

May 27, 1986.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed, effective on May 30, 1986, to permit entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 335 and 340, produced or manufactured in Turkey and exported during the twelve-month period which began on May 30, 1985 and extends through May 29, 1986, which were in excess of the limits established for that period, in the following amounts per category in each thirty-day period:

Category	Amount to be entered
335	8,415 dozen.
340	50,075 dozen.

The thirty-day periods shall be as follows:

May 30–June 29, 1986
June 29–July 28, 1986
July 29–August 27, 1986
August 28–September 26, 1986
September 27–October 26, 1986

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

William H. Houston, III,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Request for Extension of Approval for Information Collection Requirements—Export of Noncomplying Products

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1981 (44 U.S.C. Chapter 35), the Consumer Product Safety Commission (CPSC) has submitted to the Office of Management and Budget a request for extension of approval, through June 30, 1989, of information collection requirements applicable to exporters.

Three statutes administered by CPSC—the Consumer Product Safety Act, the Federal Hazardous Substances Act, and the Flammable Fabrics Act—contain requirements on the exportation of noncomplying products, those that fail to comply with a safety regulation issued under one of the acts. The requirements are implemented by regulations at 16 CFR Part 1019. Exporters must notify the CPSC of their intention to export noncomplying products and the CPSC must, in turn, notify the countries of destination.

The notification information consists of the name, address, and telephone number of the exporter, the name and address of each consignee, the quantity and a description of the products to be exported, an identification of the applicable safety requirements, and the anticipated date of shipment and port of destination. The requirements are designed to assure that foreign countries are able to make informed choices about whether to allow into their territories products that are prohibited from commerce in the United States. Foreign countries use the collected information to make that determination, and the CPSC uses the information to fulfill its reporting obligations to the foreign countries.

The information must be submitted by exporters only when they intend to export noncomplying products. At that time, the information would be readily available to them.

Additional Details About the Request for Extension of Collection of Information

Agency address: Consumer Product Safety Commission, 1111 18th Street NW., Washington, DC 20207.

Title of information collection: Procedures for Export of Noncomplying Products. 16 CFR Part 1019.

Type of request: Extension of approval of information collection requirements contained in regulations.

Frequency of collection: Occasional reporting of information.

General description of respondents: Exporters of consumer products.

Estimated number of respondents: 20.

Estimated number of hours for all respondents: 100.

Comments: Comments on this request for extension of approval of information collection requirements should be addressed to Andy Velez-Rivera, Desk Officer, Office of Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, telephone: (202) 395-7340. Copies of the request for extension of approval of information collection requirements are available from Francine Shacter, Office of Budget, Program Planning and Evaluation, Consumer Product Safety Commission, Washington, DC 20207, telephone: (301) 492-6529.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: May 22, 1986.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

[FR Doc. 86-12117 Filed 5-29-86; 8:45 am]

BILLING CODE 6355-01-M

DEPARTMENT OF DEFENSE

Engineers Corps, Department of the Army

Intent to Prepare a Draft Environmental Impact Statement for a Flood Control Project for Fort Wayne and Vicinity, IN

AGENCY: Army Corps of Engineers, DOD.

ACTION: Notice of intent to prepare a draft environmental impact statement (DEIS).

SUMMARY:

Proposed Action

A flood control project for Fort Wayne, Indiana, and vicinity is being studied to resolve flooding problems. Recognizing the economic, social and cultural problems caused by recurring floods in Fort Wayne and its vicinity, Congress provided the authority for this study by Resolution of the Committee on Public Works, House of Representatives, Congress of the United States, dated 20 October 1972.

Alternatives

A number of alternatives for flood control at Fort Wayne and vicinity have been formulated; both structural and nonstructural alternatives were included. Twelve alternative plans were identified to meet the identified problems and opportunities of the study area. Following evaluation at the Reconnaissance study stage, six alternatives are considered viable. Six alternatives, including the No Action alternative would be addressed in detail in the proposed Draft Environmental Impact Statement:

(1) No Action. Without project condition, no Federal action would be taken.

(2) 40 Percent Trier Ditch Diversion with Channel Modification. This alternative calls for construction of a Trier Ditch Cut-off that would carry 40 percent of the design flood peak discharge of the St. Marys River; channel modification of the Maumee River from Bruick Road to the confluence with the St. Marys River, of the St. Joseph River from Constance Avenue to its mouth, and of the St. Marys River from the confluence to Fairfield Ditch, and construction of levees where economically beneficial.

(3) 40 Percent Trier Ditch Diversion with Levee and Floodwall Protection. This alternative calls for construction of a Trier Ditch Cut-off which would carry 40 percent of the design flood peak discharge of the St. Marys River; channel modification of the Maumee River channel downstream of Trier Ditch and of the St. Joseph River from the mouth to Constance Avenue; construction of levees as necessary from U.S. (on the Maumee River) to Bear Field Thruway (on the St. Marys River); and floodplain evacuation and recreational development of selected areas.

(4) 80 Percent Trier Ditch Diversion. This alternative calls for construction of a Trier Ditch Cut-off that would carry 80 percent of the design flood peak discharge of the St. Marys River and channel modification of the Maumee River downstream from Trier Ditch and of the St. Joseph River from Constance Avenue to its mouth.

(5) Total Levee and Floodwall Protection. This alternative proposes to protect flood prone areas by constructing levees and/or increasing the heights of existing levees to a sufficient elevation to alleviate floodling.

(6) Flood Plain Evacuation with Wetland Retention. This alternative would include evacuation and restoration of the floodway fringe and improvement of existing levees to certifiable standards. In addition, sites on Trier Ditch would be evaluated to determine their potential for wetland development for flood storage purposes.

Scoping Process

a. Public Involement. A public workshop was held on December 7, 1983 at Fort Wayne. The purpose of this workshop was to afford an opportunity to all parties to express their views concerning the need for flood protection in the Fort Wayne area. A reconnaissance report for Flood Control at Fort Wayne and vicinity, Indiana, was completed in June 1984 and distributed for public review and comment. Meetings have been held with Federal, state and local interests to discuss various aspects of the study, most recently a planning meeting in November 1985. This meeting included representatives of all interested agencies and allowed them to express any concerns with the above alternatives. Other public workshops, public meetings and informal planning meetings will be held throughout the study process to insure complete consideration of public interests. Coordination with Federal, State and local officials has been, and will continue to be, maintained.

b. Significant issues to be addressed in the EIS are:

(1) Water quality impacts to the St. Joseph River, St. Marys River, Maumee River and their tributaries, as a consequence of the proposed flood control alternatives.

(2) Nature of bottom sediment material to be disturbed or removed and the location of potential disposal sites.

(3) Impacts of alternatives on fish and wildlife resources, and historical/archaeological resources.

(4) Social and economic impacts of the proposed alternatives.

c. Other Environmental Review and Consultation Requirements—This project will be reviewed for compliance with the following: The Fish and Wildlife Act of 1956; Fish and Wildlife Coordination Act of 1958; National Historic Preservation Act of 1966; National Environmental Policy Act of 1969; Endangered Species Act of 1973; Water Resources Development Act of 1976; Executive Order 11990, Wetlands Protection, May 1977; Executive Order 11988, Floodplain Management, May 1977; Clean Air Act of 1977; Clean Water Act of 1977; Corps of Engineers, Department of Army, 33 CFR Part 230, Environmental Quality; Corps of Engineers, Department of Army, Policy and Procedures for Implementing NEPA [ER 200-2-2].

Estimated Date of Environmental Impact Statement Release

It is anticipated that the Draft Environmental Impact Statement will be available to the public in October 1986.

Address

Questions about the proposal action and Environmental Impact Statement can be answered by Ms. Florence Bissell, Environmental Analysis Branch, U.S. Army Corps of Engineers, Box 1027, Detroit, Michigan 48231.

Dated: May 22, 1986.

Robert F. Harris,

Colonel, Corps of Engineers, District Engineer.

BILLING CODE 3710-GN-M

DEPARTMENT OF EDUCATION

Office of Postsecondary Education

College Housing Program; Application Notice for New Awards for Fiscal Year 1986

Applications are invited for new projects under the College Housing Program for fiscal year 1986.

This program is authorized under Title IV of the Housing Act of 1950, 12 U.S.C. 1749–1749d, and administered by the Secretary of Education under section 306

of the Department of Education Organization Act, 20 U.S.C. 3446.

Under this program, the Secretary is authorized to award low-interest loans to assist eligible institutions (1) in providing housing and other educational facilities for students and faculty members, and (2) in conserving energy and reducing related operating costs.

Closing Date for Transmittal of Applications

Applications for awards must be mailed or hand-delivered on or before June 30, 1986.

Applications Delivered by Mail: An application sent by mail must be addressed to the U.S. Department of Education, Attention: 84.142, Division of Higher Education Incentive Programs, 400 Maryland Avenue, SW., (ROB–3, Room 3022), Washington, DC 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping lable, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office. An applicant is encouraged to use registered or at least first class mail.

Applications Delivered by Hand: An application that is hand-delivered must be taken to the U.S. Department of Education, Division of Higher Education Incentive Programs, Room 3022, Regional Office Building 3, 7th and D Streets, SW., Washington, DC between 8:00 a.m. and 4:30 p.m. (Washington, DC time) daily except Saturdays, Sundays, or Federal holidays. Applications that are hand-delivered will not be accepted after 4:30 p.m. on the closing date.

Program Information: The College Housing Program provides three percent interest loans to postsecondary educational institutions for the construction, rehabilitation or acquisition of student and faculty housing and related facilities, and for conserving energy and reducing related operating costs in existing facilities. The maximum amount that may be borrowed by an institution is $3,500,000, and the minimum amount is $100,000.

The program regulations specify selection criteria for the two types of loans available under this program. All applications are ranked according to the criteria contained in 34 CFR 614.31 and 614.32.

Available Funds: The Secretary is authorized to make available for new college housing loan commitments in fiscal year 1986, the amount of income from repayments, less expenses, up to a ceiling of $57,420,000. This amount reflects the 4.3 percent reduction in budget authority effected by the Balanced Budget and Deficit Control Act of 1985 (Gramm-Rudman-Hollings). Twenty-five percent of the available funds will be apportioned for energy conservation loans and seventy-five percent of the available funds will be apportioned for housing loans. These estimates do not bind the U.S. Department of Education to a specific number of loans or to the amount of any loan, unless that amount is otherwise specified by statute or regulations. However, the Administration has proposed to withdraw authority to make new loans in fiscal year 1986. Applicants should prepare and submit applications pending further notice.

In accordance with the program regulations (34 CFR 614.34), the Secretary may deviate from the rank order of applications, as necessary, to ensure that not less than 10 percent of total funds available and not less than 10 percent of the number of loans made are reserved for applications from Historically Black Colleges.

Application Forms: Application packages will not be mailed routinely to all institutions of higher education. Copies may be obtained by writing to the Division of Higher Education Incentive Programs, U.S. Department of Education, 400 Maryland Avenue, SW., (ROB–3, Room 3022), Washington, DC 20202. Telephone: (202) 245–3253.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. However, the program information package is only intended to aid applicants in applying for assistance under this program. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or performance requirement beyond those imposed under the statute and regulations. The application form is approved by the Office of Management and Budget under control number 1840–0096.

Applicable Regulations: The regulations applicable to this program are as follows:

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74, Subpart P; Part 75, §§ 75.600–75.615 (Construction); and Part 77, § 77.1 (Definitions).

(b) The regulations governing intergovernmental review of programs and activities in 34 CFR Part 79.

(c) The regulations governing the College Housing Programs in 34 CFR Part 614.

Intergovernmental Review: On June 24, 1983, the Secretary published in the Federal Register final regulations (34 CFR Part 79, published at 48 FR 29158 et seq.) implementing Executive Order 12372 entitled "Intergovernmental Review of Federal Programs." The regulations took effect September 30, 1983.

The objective of Executive Order 12372 is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

The Executive Order—

- Implements section 401 of the Intergovernmental Cooperation Act of 1968 (31 U.S.C. 6506) and section 204 of the Demonstration Cities and Metropolitan Development Act of 1966 (42 U.S.C. 3334);
- Allows States after consultation with local officials to establish their own process for review and comment on proposed Federal financial assitance;
- Increases Federal responsiveness to State and local officials by requiring Federal agencies to accommodate State and local views or explain why those views will not be accommodated; and
- Revokes OMB Circular A–95.

For programs subject to section 204 of the Demonstration Cities and Metropolitan Development Act, State review and comment is obtained in accordance with the procedures set forth in that Act.

This program is listed in the Department's regulations as subject to section 204. Accordingly any applicant whose project comes within the crtieria of section 204 should immediately contact the State Single Point of Contact established under the Executive Order and follow the procedures established in that state to meet requirements of section 204.

Section 204 requires that—

1. Each application be accompanied by comments and recommendations from the areawide agency;

2. Each application contain a statement by the applicant that such comments and recommendations have been considered prior to formal submission of the application; and

3. In the absence of comments and recommendations, the applicant certifies that the areawide agency was provided at least 60 days to comment on the application and did not do so.

Any applicant subject to section 204 must submit its application by the June 30 closing date and shall supplement its application with the comments or assurances required by section 204 by July 31, 1986.

Special Procedures: On or before the closing date for submitting its application to the Secretary, the applicant shall submit a copy of its application to the appropriate State agency for postsecondary education for review. Comments, if any, are to be addressed to the Division of Higher Education Incentive Programs, U.S. Department of Education, 400 Maryland Avenue, SW., [ROB-3, 3022], Washington, DC 20202. Comments must be received within 20 days after the closing date if they are to be considered.

Technical Assistance Workshops: Applicants are invited to participate in technical assistance workshops to be held in five regional locations to assist applicants in application preparation. The workshops will take place in San Francisco on June 10, Dallas on June 13, Atlanta on June 17, Washington, DC on June 17, and Cincinnati on June 19. For specific information on these workshops, please contact the Division of Higher Education Incentive Programs on (202) 245-3253.

Further Information: For further information, contact the Division of Higher Education Incentive Programs (College Housing Program), Department of Education, 400 Maryland Avenue, SW (ROB-3, 3022), Washington, DC 20202. Telephone: (202) 245-3253.

BILLING CODE 4000-01-M

Assessment Policy Committee, National Assessment of Educational Progress; Meeting

AGENCY: Department of Education.

ACTION: Notice of meeting.

SUMMARY: The Secretary of Education has scheduled a meeting of the Assessment Policy Committee of the National Assessment of Educational Progress (NAEP). The purpose of the meeting is to provide guidance and direction to the Office of Educational Research and Improvement supported NAEP project. The entire meeting will be open to the public.

DATE: May 31, 1986, 8:30 a.m. to 3:00 p.m.

Location: Henry Chauncey Conference Center, Educational Testing Service, Princeton, New Jersey.

FOR FURTHER INFORMATION CONTACT: Mr. Paul Barton, Liaison-APC, National Assessment of Educational Progress, CN 6710, Princeton, NJ 08541-6710, telephone: (800) 223-0267.

SUPPLEMENTARY INFORMATION: One of the primary purposes of NAEP is to assess the performance of children and young adults in the basic skills of reading, mathematics, and communications. The Assessment Policy Committee (APC) is established by section 406(k)(2)(A) of the General Education Provisions Act, 20 U.S.C 1221e(k)(2)(A). The committee is responsible for the design of NAEP including the selection of learning areas to be assessed, the development and selection of goal statements and assessment items, the assessment methodology, and the form and content of the reporting and dissemination of the assessment results. The committee is also responsible for the implementation of studies to evaluate and improve the form and utilization of the National Assessment.

The Agenda for the meeting includes—

- Content of the 1987-88 assessment;
- Policy on the release of assessment exercises;
- Prior review by OERI of NAEP publications;
- Report of the Technical Advisory Committee;
- Expiring terms of members;
- Planning for NAEP's future;
- Status of upcoming NAEP reports.

To assure adequate seating arrangements and to obtain an advance copy of the final agenda, individuals wishing to attend may contact Mr. Paul Barton at the address above.

Dated: May 22, 1986.

(Catalog of Federal Domestic Assistance Number 84.117, Educational Research and Improvement)

Chester E. Finn, Jr.,

Assistant Secretary for Educational Research and Improvement.

BILLING CODE 4001-01-M

DEPARTMENT OF ENERGY

Proposed Subsequent Arrangement

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning Peaceful Uses of Atomic Energy, as amended, and the Agreement for Cooperation Between the Government of the United States of America and the Government of Switzerland Concerning Civil Uses of Atomic Energy, as amended.

This subsequent arrangement would give approval, which must be obtained under the above-mentioned agreements for the following transfer of special nuclear materials of United States origin, or of special nuclear materials produced through the use of materials of United States origin, as follows: From Switzerland to France (Compagnie Generale des Matieres Nucleaires) for the purpose of reprocessing 64 irradiated fuel assemblies, containing 11,289 kilograms of uranium enriched to 0.91% in U-235 and 94 kilograms of plutonium from the Muhleberg power station. This subsequent arrangement is designated as RTD/EU(SD)-59. The Department of Energy has received letters of assurance from the Government of Switzerland that the recovered uranium and plutonium will be stored in France, and will not be transferred from France, nor put to any use, without the prior consent of the United States Government.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice and after fifteen days of continuous session of the Congress, beginning the day after the date on which the reports required by section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) are submitted to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate. The two time periods referred to above shall run concurrently.

For the Department of Energy.

Dated: May 23, 1986.

George J. Bradley, Jr.,

Acting Assistant Secretary for International Affairs and Energy Emergencies.

BILLING CODE 6450-01-M

Economic Regulatory Administration

[Docket No. ERA-FC-85-023; OFP Case No. 61050-8254-22-22]

Powerplant and Industrial Fuel Use; Order Granting Alaska Electric Generation and Transmission

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Order Granting Alaska Electric Generation and Transmission, Cooperative, Exemption from Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice that it has granted a permanent reliability of service exemption from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et seq.* ("FUA" of "the Act"), to Alaska Electric Generation and Transmission, Cooperative (AEG&T or "the petitioner"), of Palmer, Alaska. The permanent reliability of service exemption for a proposed new electric powerplant permits the use of a natural gas-fired combustion turbine with a nameplate rating of 39 MW, that will operate as a simple-cycle combustion turbine unit to produce electrical power at AEG&T's plant at Soldotna, Alaska. The new unit, identified as Soldotna powerplant unit No. 2, is expected to commence operation to meet load forecast electrical demands commencing in the winter of 1988. The final exemption order and detailed information on the proceeding are provided in the SUPPLEMENTARY INFORMATION section, below.

DATES: The order shall take effect on July 29, 1986.

The public file containing a copy of the order, other documents, and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E-190, Washington, DC 20585, Monday through Friday, 9:00 a.m. to 5:00 p.m., except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Frank Duchaine, Coal & Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA-045, Washington, DC 20585 Telephone (202) 252-8233

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Forrestal Building, Room 6A-113, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202) 252-6749

SUPPLEMENTARY INFORMATION: AEG&T proposes to install a new combustion turbine powerplant unit at Soldotna, Alaska. The new unit will operate as a baseload intergrated system producing electricity to meet forecast demands commencing with the winter of 1987-88.

The major equipment component will be a packaged combustion turbine powerplant, similar to a simple-cycle type, having an ISO base rating of approximately 39,000 kW when firing natural gas. Heat rate is anticipated to be 11,000 Btu/kWh, and planned capacity factor is 90 percent.

Natural gas will be the primary fuel; distillate oil may be used as backup fuel for emergency purposes only. Natural gas consumption, at base rated load, will be approximately *7200* standard cubic feet per minute. Fuel oil consumption, when firing oil, will be at a rate of approximately 55 gpm at base rated load.

Basis for Permanent Exemption Order

The permanent exemption order is based upon evidence in the record including AEG&T's certification to ERA, in accordance with 10 CFR 503.40(a)(c), that:

1. AEG&T is not able to construct an alternate fuel fired powerplant in time to prevent an impairment of reliability of service;

2. Despite diligent good faith efforts, AEG&T is not able to make the demonstraiton necessary to obtain a permanent exemption for lack of alternate fuel supply, site limitations, environmental requirements, inadequate capital, or State and local requirements in the time required to prevent an impairment of reliability of service;

3. No alternate power supply exists; and

4. Use of mixtures is not feasible.

Procedural Requirements

In accordance with the procedural requirements of section 701(c) of FUA and 10 CFR 501.3(b), ERA published its Notice of Acceptance of Petition and Availability of Certification in the Federal Register on September 20, 1985, commencing a 45-day public comment period.

A copy of the petition was provided to the Environmental Protection Agency for comments as required by section 701(f) of the Act. During the comment period, interested persons were afforded an opportunity to request a public hearing. The comment period closed on November 4, 1985; no comments were received and no hearing was requested.

NEPA Compliance

After review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act.

Order Granting Permanent Reliability of Service Exemption

Based upon the entire record of this proceeding, ERA has determined that AEG&T has satisfied the eligibility requirements for the requested permanent reliability of service exemption, as set forth in 10 CFR 503.40. Therefore, pursuant to section 212(c) of FUA, ERA hereby grants a permanent reliability of service exemption to AEG&T to permit the use of natural gas as the primary energy source for its proposed facility in Soldotna, Alaska.

Pursuant to section 702(c) of the Act and 10 CFR 501.69, any person aggrieved by this order may petition for judicial review thereof at any time before the 60th day following the publication of this order in the Federal Register.

Issued in Washinton, DC on May 14, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 86-12130 Filed 5-29-86; 8:45 am]

BILLING CODE 6450-01-M

Proposed Remedial Order to Thetis Energy Corporation

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Proposed Remedial Order to Thetis Energy Corporation.

SUMMARY: Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Thetis Energy Corporation, John C. Rudolph, President, 1726 Cole Boulevard, Suite 325, Golden, Colorado 80401. This Proposed Remedial Order alleges pricing violations in the amount of $145,240.19 plus interest, in connection with the sale of crude oil at prices in excess of those permitted

under 10 CFR Part 212 during the time period June 1, 1979 through December 31, 1980. The effect of the alleged violations is nationwide..

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from: Office of Freedom of Information Reading Room, United States Department of Energy, Forrestal Building, Room 1E-190, 1000 Independence Avenue, SW., Washington, DC 20585.

Within fifteen (15) days of publication of this Notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, United States Department of Energy, Forrestal Building, Room 6F-078, 1000 Independence Avenue, SW., Washington, DC 20585, in accordance with 10 CFR 205.193. The Notice shall be filed in duplicate, shall briefly describe how the person would be aggrieved by issuance of the Proposed Remedial Order as a final order and shall state the person's intention to file a Statement of Objections.

Pursuant to 10 CFR 205.193(c), a person who files a Notice of Objection shall on the same day serve a copy of the Notice upon:

Sandra K. Webb, Director, Economic Regulatory Administration, U.S. Department of Energy, One Allen Center, Suite 610, 500 Dallas Street, Houston, Texas 77002

and upon:

Carl A. Corvallo, Solicitor, Economic Regulatory Administration, U.S. Department of Energy, Room 3H-017, RG-15, 1000 Independence Avenue, SW., Washington, DC 20585

Issued in Houston, Texas on the 25th day of April, 1986.

Sandra K. Webb,

Director, Houston Office, Economic Regulatory Administration.

[FR Doc. 86-12129 Filed 5-29-86; 8:45 am]

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of Implementation of Special Refund Procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy announces the procedures for disbursement of $4,852,548.54 (plus accrued interest) obtained from three crude oil producers: Windsor Gas Corporation, Union Oil Company of California, and Timco Oil Company. Case Nos. KEF-0002, KEF-0004, KEF-0006. The funds will be distributed in accordance with the DOE Policy of Restitution for Crude Oil Overcharges.

FOR FURTHER INFORMATION CONTACT: Thomas Wieker, Deputy Director, or Irene Bleiweiss, Attorney, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-2400.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the procedural regulations of the Department of Energy (DOE), notice is hereby given of the issuance of the Decision and Order set out below. The Decision and Order sets forth the procedures that the DOE has formulated to distribute monies obtained from three crude oil producers: Windsor Gas Corporation (Windsor), Union Oil Company of California (Union), and Timco Oil Company (Timco). Each firm remitted monies to the DOE to settle possible pricing violations with respect to its sales of crude oil. Additional information on each firm is contained in the Appendix to the Decision and Order. The firms' payments are being held in three separate interest-bearing escrow accounts pending distribution by the DOE.

The DOE had decided that the distribution of the monies received from Windsor, Union, and Timco will be governed by the DOE Policy of Restitution for Crude Oil Overcharges, 50 FR 27400 (1985). That policy states that all overcharge funds associated with crude oil miscertifications should be held in escrow pending Congressional action.

Dated: May 22, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

May 22, 1986.

Names of Cases: Windsor Gas Corporation, Union Oil Company of California, Timco Oil Company

Dates of Filings: October 16, 1985, October 16, 1985, October 18, 1985

Case Numbers: KEF-0002, KEF-0004, KEF-0006

Pursuant to the Department of Energy (DOE) procedural regulations, the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special refund procedures. See 10 CFR Part 205, Subpart V. Such procedures enable the DOE to distribute funds received as the result of enforcement proceedings involving alleged violations of DOE regulations. This Decision and Order addresses the ERA's request that the OHA formulate procedures to distribute $4,852,548.54 plus interest received from the following three companies: Windsor Gas Corporation (Windsor); Union Oil Company of California (Union); the Timco Oil Company (Timco) (hereinafter referred to collectively as "the three firms").

As crude oil producers, each of the three firms was subject to the DOE's Mandatory Petroleum Price Regulations. The ERA's audit of each firm revealed that it may have violated those regulations in its crude oil sales. The DOE's disputes with Timco and Union were settled when these firms signed separate Consent Orders, agreeing to pay specified sums of money to the DOE. Neither Timco nor Union has admitted to any violations of the regulations. [1] Windsor, however, was found to have violated the regulations in a Decision and Order issued by the OHA. *Windsor Gas Corp.*, 8 DOE ¶ 83,038 (1981), *aff'd*, 25 FERC ¶ 61,254 (1983). Pursuant to the OHA's Decision, Windsor was required to refund its overcharges. The three firms' payments are currently being held in separate interest-bearing escrow accounts pending distribution by the DOE. Additional information about the three firms' payments is set forth in the Appendix to this Decision and Order.

On March 20, 1986, the OHA issued a Proposed Decision and Order setting forth its tentative conclusions concerning distribution of the Windsor, Union, and Timco monies. 51 FR 11100 (April 1, 1986). The OHA concluded that since the monies were received in settlement of alleged crude oil overcharges and the DOE has set a policy for the distribution of all crude oil refunds, the monies received from Windsor, Union, and Timco should be distributed in accordance with DOE Policy. *Cf.* 50 FR 27400 (1985)

The OHA solicited comments to the Proposed Decision and 14 interested parties submitted such comments. Each of the commenters argue that OHA should not follow the DOE Policy in this case. Since all of the comments are directed at the DOE Policy, we will discuss the Policy in greater detail before addressing the comments received.

[1] In 1983, the OHA issued a Decision and Order ruling that Timco violated the regulations. *Timco Oil Co.*, 10 DOE ¶ 83,025 (1983). Timco appealed this Decision but entered into a Consent Order before the appeal was ruled upon.

The DOE Crude Oil Policy

Under the DOE Policy no claims for direct restitution will be accepted if those claims are based on crude oil overcharges. Instead, such overcharge funds will be held in escrow to afford Congress the opportunity to select the means of making indirect restitution.

The DOE Crude Oil Policy arose out of a report which the OHA issued in the Stripper Well Exemption Litigation. *Report of the Office of Hearings and Appeals, In Re: The Department of Energy Stripper Well Exemption Litigation*, MDL No. 378 (D. Kan. filed June 21, 1985), Fed. Energy Guidelines ¶ 90,507 (1985). That Report concluded that the Entitlements Program spread the effects of crude oil miscertifications throughout the crude oil industry.[2] From the OHA's findings, the Deputy Secretary of Energy concluded that an indirect means of effectuating restitution was appropriate in crude oil refund proceedings. Therefore, on June 21, 1985, the Deputy Secretary established the DOE Policy of restitution for Crude Oil Overcharges. 50 FR 27400 (July 2, 1985). The policy statement announced that the DOE would maintain overcharge monies in escrow to afford Congress the opportunity to select the means of making indirect restitution. Should Congress decline to act on the issue by the fall of 1986, the DOE stated that the funds should be paid to the miscellaneous receipts accounts of the United States Treasury in order to benefit all Americans.

In June 1985, the OHA issued an order announcing that it intended to follow the DOE Policy. 50 FR 27402 (July 2, 1985). The OHA solicited and considered comments to that announcement and determined that it would apply to DOE Policy in all special refund cases involving crude oil. *Amber Refining, Inc.*, 13 DOE ¶ 85,217 (1985) (*Amber*).

With this background in mind, we turn to the comments submitted to our proposal to distribute the Windsor, Union, and Timco monies in accordance with the DOE Policy.

[2] The Crude Oil Entitlements Program, part of the DOE's system of mandatory petroleum price and allocation controls, was in effect from November 1974 through January 1981. The program was intended to equalize access to the benefits of crude oil price controls among all domestic refiners and their downstream customers. To accomplish this end, refiners were required to make transfer payments among themselves through the purchase and sale of entitlements. Because of the manner in which the program worked, it had the effect of dispersing overcharges resulting from crude oil miscertifications throughout the domestic refining industry. *Amber Refining, Inc.*, 13 DOE ¶ 85,217 (1985).

Comments to the Proposed Decision

In response to the Proposed Decision and Order in this case, the OHA received comments from 14 parties. While all of the comments argue that the Windsor, Union, and Timco monies should not be distributed in accordance with the DOE Policy, none of the comments presents any reason why the Policy is inapplicable to these funds. Rather, the comments suggest that alternative methods of restitution are preferable. For example, the States of Arkansas, California, Delaware, Iowa, Louisiana, North Dakota, Rhode Island, Utah and West Virginia and the Commonwealth of Pennsylvania argue that state governments are the most appropriate recipients of refund monies not designated for readily identifiable injured parties. Four end-users argue that end-users should be allowed to present and prove claims for refunds.[3]

We have reviewed each of the comments submitted in this proceeding. However, we cannot agree with the views which these comments present. In light of our Decision in *Amber*, we have determined that the funds obtained from Windsor, Union, and Timco should be pooled with other crude oil funds for distribution in accordance with departmental policies. Each of the parties who commented in this proceeding also submitted comments to the OHA in *Amber* or in *In Re: Stripper Well Litigation*. Therefore, their views were known to the OHA prior to its decision to apply the DOE Policy in crude oil refund proceedings. As we stated in *Amber*, there is no merit to comments which disagree with the OHA implementation of DOE policies. *Amber*, 13 DOE at 88,569. The DOE Policy is based upon our fact-finding in the OHA Stripper Well Report and is within the DOE's restitutionary authority. OHA's delegation expressly subjects it to Departmental policies and determinations such as this one are governed by Departmental policy. *Id.*

It Is Therefore Ordered That:

The refund amount obtained from Windsor Gas Corporation pursuant to the Remedial Order issued on October 23, 1981 and the refund amounts obtained from Union Oil Company of California and Timco Oil Company pursuant to Consent Orders entered into with the Economic Regulatory Administration on June 13, 1985 and October 22, 1984, shall be distributed in the manner set forth in the foregoing Decision and Order.

George B. Breznay,

Director, Office of Hearings and Appeals.

Dated: May 22, 1986.

[3] Each of these commenters (Philadelphia Electric Company, National Freight, Inc., RJG Cab, Inc. and Geraldine H. Sweeney) purports to represent a class of petroleum end-users (public utilities, trucking companies, taxicab companies, and non-commercial automobile owners).

Appendix

Firm: Windsor Gas Corporation
Case Number: KEF-0002
Refund Amount (Principal): $77,558.54
Covered Time Period: September 1, 1974 through December 31, 1977
Violations: Miscertification of crude oil
Producing Area: Sutton and Duval Counties, Texas

Firm: Union Oil Company of California
Case Number: KEF-0004
Consent Order Amount: $4,500,000.00
Consent Order Period: June 1979 through January 1981
Alleged Violations: Regulations concerning marginal and newly discovered crude oil
Producing Area: Louisiana

Firm: Timco Oil Company
Case Number: KEF-0006
Consent Order Amount: $75,000.00
Consent Order Period: January 1, 1974 through December 31, 1977
Alleged Violations: Miscertification of curde oil
Producing Area: Signal Hill Area of Long Beach, California

BILLING CODE 6450-01-M

Issuance of Decisions and Orders; Week of April 7 Through April 11, 1986

During the week of April 7 through April 11, 1986, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeals

Daniel Hirsch, 04/11/86, HFA-0243

Daniel Hirsch filed an Appeal from a denial by the Acting Director of the Department of Energy, Office of Classification of a request for information which Mr. Hirsch had submitted under the Freedom of Information Act (FOIA). Portions of the document, entitled "Memorandum on the History of the Thermonuclear Program," were initially withheld under Exemption 3 of the FOIA. In considering the Appeal, DOE found that most of the material originally deleted from the document still contained classified information which was exempt from mandatory disclosure under the FOIA. However, the DOE found that some material could be released because of revisions in the classification code. Accordingly, a copy of the document in releasable form was transmitted to Mr. Hirsch.

Ivan Van Zuckerstein, 04/11/86, KFA-0023

Ivan Van Zuckerstein (Apellant) filed a Motion for Reconsideration of a Decision issued to him by the DOE in connection with a Freedom of Information Act Appeal. In the appeal decision, the DOE upheld the determination of the Manager of the Chicago Operations Office that information requested by the Appellant concerning his employment by a DOE contractor was exempt from mandatory disclosure under Exemption 5 of the FOIA. In considering the Motion for Reconsideration, the DOE found that the Appellant had failed to demonstrate error or omission in the appeal decision and had simply reiterated arguments raised in the underlying appeal proceeding. Accordingly, the DOE denied the Motion.

Natural Resources Defense Council, 04/08/86, KFA-0028

Natural Resources Defense Council (NRDC) filed an Appeal from a denial by the Director, Office of the Executive Secretariat (OES) a request for a document analyzing a Russian above-ground nuclear test, which NRDC had submitted pursuant to the Freedom of Information Act (FOIA). In his determination, the Director stated that he was unable to locate the document in OES files and therefore denied the request on the basis that no documents responsive to NRDC's request existed. In considering the Appeal, the DOE contacted the Albuquerque Operations Office, which discovered that a copy of the document existed in the files of the Los Alamos National Laboratory. The DOE determined that NRDC's FOIA request should be transferred to the Albuquerque Operations Office for processing. Accordingly, the Appeal was granted.

Remedial Orders

C&H REFINERY, INC., 04/07/86, KRO-0100

C&H Refinery, Inc. (C&H) objected to a Proposed Remedial Order alleging that it claimed small refiner bias (SRB) entitlements benefits for crude oil processed by other refiners pursuant to three processing agreements and violated 10 CFR 211.67(e). That section prohibited a small refiner from claiming SRB entitlements based on runs to stills, where the crude oil was purchased from, and the resulting products were sold directly or indirectly to, the processing refiner. DOE found that with respect to two processing agreements, C&H both indirectly purchased the crude oil from, and sold the resulting refined products to, the processing refiner. With respect to a third processing agreement, the DOE found that the crude oil obtained by C&H from the processing refiner in an exchange agreement was no different from any other purchase of crude oil for purposes of § 211.67(e)(2). Thus, the DOE found that C&H's claim for SRB entitlements benefits for its runs to stills in connection with these three processing agreements violated § 211.67(e)(2). Accordingly, the Proposed Remedial Order was issued as a final Remedial Order and C&H was directed to remit $2,004,679 plus interest to the DOE to compensate for its excess SRB entitlements benefits.

Osborne Energy Corporation, E.O. WHITE, 04/08/86, HRO-0116

Osborne Energy Corporation and its president, E.O. White, (Respondents) objected to Proposed Remedial Order alleging that they violated the provisions of the DOE layering regulation, by reselling crude oil at a price in excess of its purchase price, without providing any service or other function associated with the resale of crude oil. The DOE first found that because neither party convincingly traced the exact source of the crude oil involved in the layered sales, the appropriate measure of the overcharge in the case was the amount of the respondents' gross crude oil profits during the audit period. The DOE then determined that, with the exception of two specific sales, the Respondents had provided no financing services, market function services, or transportation services. Finally, the DOE determined that White should be held personally responsible for Osborne's prohibited trading activities, and had benefited from those transactions. Accordingly, the PRO was issued as a final Remedial Order directing the Respondents to remit $925,101.27 plus interest to the DOE.

R.W. Tyson Producing Company, Inc., 04/08/86, HRO-0165

R.W. Tyson Producing Company, Inc. objected to a Proposed Remedial Order alleging that it charged prices in first sales of domestic crude oil which exceeded the applicable ceiling prices permitted under 10 CFR Part 212, Subpart D. The DOE found that Tyson's production qualified as "crude oil," despite its extraordinarily heavy density. In addition, the DOE found that the overcharges resulted from charging prices for crude oil that were based on the wrong posted prices. The DOE determined that in the absence of a specific posted price for Tyson's oil fields on May 15, 1973, Tyson should have referred to the nearest field for which there was a posted price for a similar grade of heavy crude oil. However, the DOE also found that the PRO may not have taken into account previously granted exception relief at one of Tyson's wells, and that the alleged overcharge in connection with that well should therefore be dismissed without prejudice. Accordingly, the PRO was modified and issued as a final Remedial Order, directing Tyson to remit $90,731.05 plus interest to the DOE.

Shell Oil Company, 04/10/86, HRO-0018, HRZ-0019

Shell Oil Company objected to a Proposed Remedial Order alleging that it had (i) improperly calculated its increased domestic crude oil costs by using the volume of crude oil taken into the firm's refineries during the month of measurement, rather than the volume of crude oil purchased during that month, and (ii) improperly included in its landed cost of crude oil the value which the firm attributed to its fee-free import licenses. The DOE determined that the refiner price regulations required the calculation of crude oil costs increases using the volume of crude oil purchased during the month, not the volume of crude oil refined, and further that since Shell had incurred no costs in receiving its fee-free import licenses, it could not properly include any "costs" of such licenses units landed cost of crude oil. The Proposed Remedial Order was therefore issued as a final Remedial Order, directing Shell to recalculate its crude oil costs and make approriate adjustments to its banked costs.

Texaco, Inc., 04/11/86, HRO-0012

Texaco, Inc. objected to a Proposed Remedial Order alleging that it violated the refiner cost recovery rules in its pricing of gasoline and No. 2 oils. The DOE rejected Texaco's claim that the doctrines of estoppel and laches applied to the PRO's allegations that the equal application/deemed recovery rule applied when the firm used different increased cost increments for its consumer and reseller classes in sales of motor gasoline and No. 2 oils. The DOE also rejected Texaco's contention that for purposes of the equal application rule, each grade of gasoline constituted a separate product, and found that a refiner could not apply increased costs attributable to gasoline in unequal increments to different grades of gasoline without invoking the rule. The DOE therefore issued the PRO as a final Order, and directed that Texaco either refund a total of $142,783,783 to the DOE, or make appropriate adjustments to its bank of unrecouped product costs.

Implementation of Special Refund Procedures

Howell Corporation and Quintana Refinery Company, 04/08/86, HEF-0212

The DOE issued a Decision and Order implementing procedures for the distribution of $2,205,115 remitted by Howell Corporation and Quintana Refinery Company pursuant to a consent order entered into with the DOE. The Decision stated that customers of refined petroleum products from Howell or the Quintana Howell Joint Venture during the period August 19, 1973 through December 31, 1978 who were injured by their purchases may apply for refunds from the consent order fund. The Decision further provided that reseller claimants who limit their claims to $5,000 and end-users would not be required to prove that they absorbed the alledged overcharges.

Refund Applications

Armour Oil Company/E-Z Serve, Inc. 04/08/86, RF167-2

The DOE issued a Decision and Order concerning an Application for Refund filed by E-Z Serve, Inc., in connection with a consent order fund made available by the Armour Oil Company. E-Z Serve, a reseller of motor gasoline, provided documentation showing it was injured with respect to some of its Armour purchases, but did not submit sufficient data to establish that it was injured in each month of the period for which a refund was claimed. Accordingly, the DOE granted the firm a refund based on the $5,000 threshold amount. The total refund amount approved in this Decision is $6,616 ($5,000 principal plus $1,616 interest).

F.O. Fletcher, Inc./Alfred Norm Drew, Paddy's Fuel, 04/08/86, RF173-27, RF173-28

The DOE issued a Decision and Order concerning Applications for Refund filed by Alfred Norm Drew and Paddy's Fuel, in connection with a consent order fund made available by F.O. Fletcher, Inc. The applicants, resellers of motor gasoline,

provided evidence that they purchased motor gasoline from Fletcher during the consent order period and requested a refund below the $5,000 small claims threshold. The DOE granted each applicant a refund based on a prorated portion of its Fletcher overcharges, as set forth in DOE audit files. The total amount of refunds approved in this Decision is $1,179 ($614 in principal plus $565 in interest).

Gulf Oil Corporation/Day and Night Gas Company, Inc., 04/07/86, RF40-3009

The DOE issued a Decision and Order concerning an Application for Refund filed by a reseller of Gulf petroleum products, Day and Night Gas Company, Inc., in connection with the Gulf Oil Corporation refund proceeding. In considering the application, the DOE pointed out that the firm had no records of its Gulf purchases for the pertinent period and could not explain how it developed its purchase volume figures. Accordingly, the DOE found that it was impossible to calculate a refund amount for the firm. However, the DOE recognized that at some future date the purchase volume data and pricing information necessary to support a claim might become available to the firm. Therefore, Day and Night's Application for Refund was dismissed without prejudice to a future refiling.

Gulf Oil Corporation/Ernie's Guld Service, et al., 04/10/86, RF40-217, et al.

The DOE issued a Decision and Order granting refunds to four retailers of Gulf refined products from the Gulf Oil Corporation consent order fund. The DOE found that each of the applicants had demonstrated that it would not have been required to pass through to its customers a cost reduction equal to the refund claimed. The firms were granted refunds totalling $4,443 ($3,739 principal plus $704 interest).

Kingston Oil Supply Corporation/David Rubin, 04/10/86, RF197-1

David Rubin filed an Application for Refund in connection with a consent order fund made available by Kingston Oil Supply Corporation. Mr. Rubin was an end-user of No. 4 residual fuel oil who was identified by the DOE's audit of Kingston as an allegedly overcharged customer. Accordingly, the DOE approved a total refund to Mr. Rubin of $864, representing $546 in principal and $318 in interest.

Little America Refining Company/Silco Oil Company, 04/08/86, RF112-7

The DOE issued a Decision and Order concerning an Application for Refund filed by Silco Oil Company, a purchaser of products covered by a consent order between the DOE and Little America Refining Company (Larco). Silco requested a refund of $45,884, its volumetric share of the Larco consent order funds. In considering the application, the DOE determined that Silco was unable to demonstrate whether it had banks of unrecovered costs throughout the consent order period. Therefore, the DOE found it appropriate to limit Silco's refund to the $5,000 small claims threshold. Accordingly, Silco was granted a refund of $5,000 in principal and $2,475 in interest.

Lowe Oil Company/Central Cooperatives, Inc., Stan's Hardware, 04/10/86, RF206-1, FR206-5

The DOE issued a Decision and Order concerning Applications for Refund filed by Central Cooperatives, Inc. and Stan's Hardware, in connection with a consent order fund made available by Lowe Oil Company. Each of the two firms was identified in the DOE's audit files as having purchased motor oil from Lowe during the audit period. Further, each firm submitted evidence of the quantity of Lowe product it purchased. Since the refunds requested were below the $5,000 small claims threshold, they were not required to submit a detailed showing of injury. The total refunds granted were $3,630, including $2,423 in principal and $821 in interest.

MAPCO, Inc./Jim Thomas Enterprises, Inc., 04/10/86, RF108-10

Jim Thomas Enteprises, Inc. (JTE) filed an Application for Refund in which the firm sought a portion of the fund obtained by the DOE through a consent order entered into with MAPCO, Inc. The DOE found that JTE demonstrated that it purchased MAPCO propane and butane during the consent order period and that JTE experienced a competitive disadvantage as a result of those purchases. Accordingly, JTE was granted a refund of $84,986.57, including $48,076.42 in principal and $36,910.15 in interest.

Moyle Petroleum Company/Poctola Pines, et al., 04/07/86; RF201-1, et al.

The DOE issued a Decision and Order concerning four Applications for Refund filed in connection with a consent order fund made available by Moyle Petroleum Company. Each of the four applicants was identified in the DOE's Moyle audit file as having sustained overcharges. The DOE concluded that each of the firms was eligible for a refund of less than $5,000. The total amount of refunds granted was $3,251, representing $1,861 in principal and $1,390 in interest.

National Helium Corp./Indiana, Pennzoil Co./Indiana, Standard Oil Co. (Indiana)/Indiana, 04/07/86, RQ3-273, RQ10-284, HM21-17

The Office of Hearings and Appeals issued a Decision and Order considering the State of Indiana's second stage refund plan for use of National Helium Corporation and Pennzoil Company consent order funds, and the State's motion to modify the use of $25,000 of Standard Oil Company (Indiana) (Amoco) funds which had been previously approved. The OHA approved Indiana's restitutionary plan to use $273,167 in National Helium funds, $35,386 in Pennzoil funds and $25,000 in Amoco funds to supplement funding of a loan subsidy and matching grant weatherization program. Immediate disbursement of the Pennzoil funds was not authorized because of pending litigation.

Palo Pinto Oil and Gas/State of New Mexico, 04/10/86, RM5-20

The DOE issued a Decision and Order denying the State of New Mexico's Motion to Modify its second-stage refund plan for use of money allotted to it that the Palo Pinto Oil and Gas consent order fund. The DOE found that New Mexico's proposal to purchase energy education materials for its public school students would not provide restitutionary benefit to those citizens that were likely to have been injured by the relevant Palo Pinto transactions. The State was invited to submit an alternate plan for use of those funds.

Plateau, Inc./Graves Oil & Butane Company/Dial Oil Company, 04/09/86, RF204-6, RF204-8

The DOE issued a Decision and Order granting refunds from the Plateau, Inc. desposit escrow account to two wholesale resellers of Plateau covered products. Since neither firm's refund request exceeded the small claims threshold level, the DOE granted the refunds without requiring the applicants to submit additional evidence of injury. The refunds to these firms total $8,269, representing $5,367 in principal and $2,902 in interest.

Dismissals

The following submissions were dismissed:

Name and Case No.

Adamo's Gulf Service Garage, RF40-2163
Bublitz Oil Company, KEE-0023
Butler's Gulf Service, RF40-323
C.G. Sweigart Oil Co., RF40-2566
Don & Stan's Gulf, RF40-1216
Fallwood Service Center, RF40-1166
Furniture City Gulf Service, RF193-1280
Gray's International of Oregon, RF193-21
Henke Fair Gulf Service, Inc., RF40-1358
Irondale Gulf, RF40-1349
Lower State Gas Co., RF40-2627
M.C. Newsome & Son Gulf Station, RF40-340
Rishel's Gulf Service, RF40-265
Royer Auto Service, RF40-250
Russell Creek Gulf, RF40-1161
Schiavone Service Station, RF40-1159
Swain & Whiteman, RF40-2607
Tom's Gulf Service, RF40-1090
Valley Distributing Co., RF40-2506
Walsh's Service, RF40-1383
Wiles Oil Company, RR112-1

Copies of the full text of these decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Buiding, 1000 Independence Avenue SW., Washington, D.C. 29585, Mondays through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

Western Area Power Administration

Rio Grande Project; Proposed Power Rate Adjustment

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of Proposed Power Rate Adjustment—Rio Grande Project, New Mexico.

SUMMARY: The Western Area Power Administration (Western) is proposing a rate increase for power and energy from the Rio Grande Project (RGP). The rate increase is required to cover increased annual operating expenses and to repay the Federal investment in the project. The proposed rate is composed of a $7.93 per kilowatt-month capacity charge and an 18.66 mills per kWh energy charge. This proposed rate is equal to a composite rate of 37.32 mills per kWh at 58.2 percent load factor (LF). The present rate is composed of a $6.545 per kilowatt-month capacity charge and a 15.45 mills per kWh energy charge which equals a composite rate of 30.85 mills per kWh at 58.2 percent LF.

A brochure explaining the need for a rate increase and outlining the methodology used in developing the current proposed rate will be distributed to the RGP power customers and other interested parties. According to the "Procedures for Public Participation in Power and Transmission Rate Adjustments and Extensions," 10 CFR Part 903, the proposed RGP rate adjustment is a minor rate adjustment since annual sales are normally less than 100 million kilowatthours, and a public information and comment forum is not required. After review of public comments, Western will recommend a final proposed rate.

DATES: The consultation and comment period will begin with publication of this notice in the Federal Register and will end 30 days thereafter or 15 days after any written response to questions submitted during the comment period, whichever is later. It is anticipated that the proposed rate will go into effect with the April 1987 billing period.

Written comments should be received by the end of the consultation and comment period to be assured of consideration. Written comments may be submitted to the address below.

FOR FURTHER INFORMATION CONTACT: Mr. Lloyd Greiner, Area Manager, Salt Lake City Area Office, Western Area Power Administration, P.O. Box 11606, Salt Lake City, UT 84147, (801) 524-5493.

SUPPLEMENTARY INFORMATION: Power rates for the RGP are established pursuant to the Department of Energy Organization Act of August 4, 1977, 42 U.S.C. 7101 *et seq.*, the Reclamation Act of 1902, ch. 1093, 32 Stat. 388 (1902), as amended and supplemented by subsequent enactments, particularly section 9(c) of the Reclamation Project Act of 1939, 43 U.S.C. 485h(c); and the acts specifically applicable to the project.

The Secretary of Energy, by Delegation Order No. 0204-108 (48 FR 55664, December 14, 1983), delegated to the Administrator of Western the authority to develop power and transmission rates; to the Deputy Secretary of Energy, the authority to confirm, approve, and place in effect such rates on an interim basis; and to the Federal Energy Regulatory Commission the authority to confirm, approve, and place in effect on a final basis, to remand, or to disapprove those rates.

Procedures for public participation in rate adjustments for power marketed by Western (10 CFR Part 903) were published in the Federal Register at 50 FR 37835 on September 18, 1985.

Availability of Information

All brochures, studies, comments, letters, memorandums, and other documents made or kept by Western for the purpose of developing the proposed rate are and will be available for inspection and copying at the Salt Lake City Area Office, 438 East 200 South, Salt Lake City, Utah 84111.

Regulatory Flexibility Analysis

Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 601 *et seq.*, each agency, when required by 5 U.S.C. 553 to publish a proposed rule, is further required to prepare and make available for public comment an initial regulatory flexibility analysis to describe the impact of the proposed rule on small entities. Under 5 U.S.C. 601(2), rules relating to rates or services of particular applicability are not considered rules within the meaning of the act. In this instance, the rate adjustment for the RGP relates to rates for services provided by Western from a particular project; therefore, no flexibility analysis is required.

Determination under Executive Order 12291

The Department of Energy (DOE) has determined that this is not a major rule because it does not meet the criteria of section 1(b) of Executive Order 12291 (46 FR 13193, February 17, 1981). In addition, Western has an exemption from sections 3, 4, and 7 of Executive Order 12291 and, therefore, will not prepare a regulatory impact statement.

Environmental Evaluation

In compliance with the National Environmental Policy Act of 1969 (NEPA), Council of Environmental Quality regulations, and section D of the DOE guidelines published in the Federal Register on February 23, 1982 (47 FR 7976), Western conducts environmental evaluations of certain rate and allocation actions. Section D of the DOE guidelines states that the level of documentation required under NEPA for rate increases by power marketing administrations depends upon the size of the rate increase as it relates to the rate of inflation since the last rate increase. Western has compared the proposed power rate increase to the rate of inflation in the period since the existing power rate was placed in effect and determined that it exceeds the rate of inflation. Therefore, an environmental assessment will be prepared and copies will be sent to interested persons upon request.

Issued at Golden, Colorado, May 22, 1986.

William H. Clagett,
Administrator.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared May 12, 1986 through May 16, 1986 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382-5075/76. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated February 7, 1986 (51 FR 4804).

Draft EISs

ERP No. LD-AFS-A60115-00, Rating LO, Bureau of Land Mgmt. and Forest Service, Transfer of Jurisdiction Over Certain Federal Lands and Minerals, US. SUMMARY: EPA's review identified no issues of concern.

ERP No. D-CDB-F89028-MI, Rating EC2, Oakland Technology Park Development, CDB Grant, MI. SUMMARY: EPA's review resulted in concerns related to loss of wetlands and a lack of information regarding ancillary highway development. EPA requested a thorough implementation of wetland mitigation and specific information regarding the proposed highway projects, be included in the FEIS. Only then can EPA make a complete evaluation of impacts.

ERP No. D-COE-G36035-OK, Rating LO, Kingfisher and Uncle Johns Creeks Local Flood Protecton Project, OK. SUMMARY: EPA expressed no objection to the proposed action as described.

ERP No. D-OSM-EO 1007-TN, Rating EC2, Rock Creek Watershed, Designation of Lands Unsuitable for Surface Coal Mining Operations, TN. SUMMARY: EPA's main concern is the natural susceptibility of the petition area to acid mine drainage and the present apparent lack of need for coal production. EPA recommends selection of Alternate 1 (Grant the Petition: declare the petition area unsuitable for surface coal mining). EPA requested that additional information relative to surface water quality, groundwater interconnections, total suspended particulates (TSP) modeling, noise impacts, and other areas be provided in the final EIS.

ERP No. D-SCS-G36134-LA, Rating LO, Upper Vermilion Bayou Watershed Protection Flood Prevention and Drainage Plan, LA. SUMMARY: EPA expressed no objection to the proposed action as described.

Final EISs

ERP No. F-AFS-E65032-00, Cherokee Nat'l Forest, Land and Resource Mgmt. Plan, TN and NC. SUMMARY: The preferred alternative responded to many of the concerns EPA had with the preferred plan of the draft EIS. EPA noted the increased emphasis on water quality and habitat values in the currently proposed plan, but suggested further improvements in the management of sensitive/vulnerable forest zones, eg., riparian areas. Restrictions on land disturbing activities should be strengthened to include the prohibition of clear cutting and construction in buffer strips along all perennial streams.

ERP No. FA-APH-A82105-00, 1986 Rangeland Grasshopper Cooperative Mgmt. Program, Updated Information, US. SUMMARY: EPA noted APHIS' responsiveness to the comments on the draft EIS and recommendations made at the follow-up meeting. However, EPA continues to express concerns about the way the final EIS interprets integrated pest management, addresses non-target exposures, and discusses mitigation measures. EPA recommended that these be fully discussed in the new EIS planned for 1987.

ERP No. BLM-L70003-AK, Central Yukon Planning Area Resource Mgmt. Plan, Northwest Resource Area, AK. SUMMARY: EPA remains concerned that the final EIS does not make a strong commitment to monitoring for compliance with permit conditions and water quality standards for mines. EPA specificially requested that clarifying language be included in the Record of Decision for this plan.

ERP No. F-CDB-F89025-MN, Duluth Paper Mill Project, Construction and Operation, CDB Grant, 404 Permit, MN. SUMMARY: EPA's review resulted in an objection to the project as currently proposed. EPA recommended that Federal Funds and the 404 permit be withheld from this project until after the Agency reviews the remedial action plan for the contaminated soil and groundwater at the site, the wetland mitigation plan, and the prevention of significant deterioration air quality permit application. EPA also requests information on the future expansion potential of the paper mill.

ERP No. F-COE-L320007-WA, Quillayute River Navigation Project, Long-Range Operations and Maintenance, WA. SUMMARY: EPA remains concerned abut the potential for juvenile salmon entrainment by the hydraulic dredging used for the maintenance dredging in the Quillayute River after March 31. No criteria have been established for acceptable levels of entrainment or to judge what is an acceptable loss of fish. EPA recommended two approaches that would establish acceptable entrainment levels or loss of fish, and stated that one of the approaches should be undertaken prior to any dredging occurring after March 31, as a condition for EPA's approval of the Section 404 permit.

ERP No. F-IBR-K39026-CA, Freeman Diversion Improvement Project, Construction and Operation, Santa Clara River, Combat of Seawater Intrusion, CA. SUMMARY: The final EIS adequately addressed the concerns EPA raised on the draft EIS.

ERP No. F-JUS-C1010-NJ, Fairfield Federal Correctional Institution, Construction and Operation, NJ. SUMMARY: EPA does not anticipate any significant environmental impacts as a result of the construction of the proposed federal correctional institution.

Amended Notice

The following EPA EIS review summary noticed in the May 23, 1986 FR was in error typographically, and therefore substantively. A sentence read, "Due to these concerns EPA found the project to be environmentally satisfactory." It should have read, "Due to these concerns EPA found the project to be environmentally unsatisfactory."

ERP No. DC-IBR-J61127-ND, Rating EU2, Garrison Diversion Unit, New Irrigation Areas and New Project Features, Operation and Maintenance, Pick-Sloan Missouri Basin Program, James R., ND.

Dated: May 27, 1986.

Allan Hirsch,

Director, Office of Federal Activities.

FEDERAL HOME LOAN BANK BOARD

[86-539]

Fair Housing and Nondiscrimination in Lending

Dated: May 23, 1986.

AGENCY: Federal Home Loan Bank Board.

ACTION: Notice.

SUMMARY: The public is advised that the Federal Home Loan Bank Board ("Board") has submitted for extension, without revision, an information collection request, "Fair Housing and Nondiscrimination in Lending" to the Office of Management and Budget for approval in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Comments: Comments on the information collection request are welcome and should be submitted on or before June 16, 1986. Comments regarding the paperwork-burden aspects of the request should be directed to: Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503, Attention: Desk Officer for the Federal Home Loan Bank Board.

The Board would appreciate commenters sending copies of their comments to the Board.

Requests for copies of the proposed collection request and supporting documentation are obtainable at the Board address given below: Director, Information Services Section, Office of Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552, Phone: 202-377-6933.

FOR FURTHER INFORMATION CONTACT: Richard Tucker, Office of Community Investment, (202) 377-6211, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552.

By the Federal Home Loan Bank Board.

Jeff Sconyers,

Secretary.

BILLING CODE 6720-01-M

[No. 86-527]

Self Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Philadelphia Stock Exchange, Inc.; Application for Unlisted Trading Privileges and Opportunity for Hearing

Dated: May 22, 1986.

The Philadelphia Stock Exchange has filed on April 10, 1986, pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1, an application with the Federal Home Loan Bank Board ("Board") for unlisted trading privileges in the following security: Columbia Savings & Loan Association (FHLBB No. 6325) Common Stock, $1.00 Par Value.

The security is listed and registered on one or more other national securities exchanges and is reported in the consolidated transaction reporting system.

Any interested person may inspect the application at the Board and, on or before June 9, 1986, submit to the Corporate and Securities Division, Office of General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552, written data, views and arguments bearing upon whether the extensions of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors. Following this opportunity for hearing, the Board will issue an order granting the application after the date mentioned above if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such application are consistent with the maintenance of fair and orderly markets and the protection of investors.

By the Federal Home Loan Bank Board.

Nadine Y. Penn,

Acting Secretary.

BILLING CODE 6730-01-M

[Fact Finding Investigation No. 14]

Possible Unlawful Activity of Eller & Co, Inc., et al.; Order

On October 9, 1985, Eller & Company, Inc., and Harrington & Co., Inc., filed an agreement with the Federal Maritime Commission under the provisions of the Shipping Act of 1984, 46 U.S.C. app. 1701, *et seq.*, to operate a joint venture called Continental Stevedoring & Terminal, Inc. The Agreement, which was designated No. 224-010843, became effective on November 23, 1985, and authorized the parties to provide marine terminal services through Continental.

The Federal Maritime Commission has reason to believe that Eller & Company, Inc., and Harrington & Company, Inc., and/or Continental Stevedoring & Terminal, Inc., may have operated under Agreement No. 224-010843 prior to its November 23, 1985, effective date in violation of section 10(a)(2) of the Shipping Act of 1984, 46 U.S.C. app. 1709(a)(2). The Commission also has reason to believe that Eller & Company, Inc., and Harrington & Company, Inc., and/or Continental Stevedoring & Terminal, Inc., may be operating under agreements with one or more ocean common carriers in violation of section 10(a)(2) of the Shipping Act of 1984.

Despite repeated efforts to obtain information bearing on these matters, the parties have failed to comply with our informal requests. Accordingly, the Commission is initiating this nonadjudicatory investigation to determine whether sufficient evidence exists to warrant a formal investigation and assessment proceeding for violations of the Shipping Act of 1984.

Therefore, it is ordered, That pursuant to sections 11 and 12 of the Shipping Act of 1984, 46 U.S.C. app. 1710 and 1711, and Subpart R of Title 46 of the Code of Federal Regulations, a nonadjudicatory investigation is hereby instituted into the practices of Eller & Company, Inc., Harrington & Company, Inc., and Continental Stevedoring & Terminal, Inc., regarding the furnishing of terminal facilities and services at Miami, Florida, and other ports.

It is further ordered, That the Investigative Officer shall be Alan J. Jacobson of the Commission. Mr. Jacobson shall direct the investigation and shall be assisted by such staff members as he may designate.

The Investigative Officer shall have the full authority of the Commission to hold public or nonpublic sessions, to resort to all compulsory processes authorized by law (including the issuance of subpoenas), to administer oaths and to perform such other duties as may be necessary in accordance with the laws of the United States and the regulations of the Commission;

It is further ordered, That the Investigative Officer shall issue a final report of findings and recommendations no later than 120 days after publication of this Order in the Federal Register, such report to remain confidential unless and until the Commission rules otherwise; and

It is further ordered, That Notice of this Order be published in the Federal Register.

By the Commission.
John Robert Ewers,
Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Consumer Advisory Council; Meeting

The Consumer Advisory Council will meet on Thursday, June 19, and Friday, June 20. The meeting, which will be open to public observation, will take place in Terrace Room E of the Martin Building. The June 19 session is expected to begin at 9:00 a.m. and to continue until 5:00 p.m., with a lunch break from 1:00 to 2:00 p.m. The June 20 session is expected to begin at 9:00 a.m. and to continue until 1:00 p.m. The Martin Building is on C Street, Northwest, between 20th and 21st Streets in Washington, DC.

The Council's function is to advise the Board on the exercise of the Board's responsibilities under the Consumer Credit Protection Act and on other matters on which the Board seeks its advice. Time permitting, the Council will discuss the following topics:

1. *Growth of Consumer Credit.* Discussion led by the Council's planning group on this topic, with a brief presentation by Board staff on (1) the growth in consumer credit, (2) whether the level of consumer debt is reasonable, and (3) the outlook for consumer debt for the future.

2. *Pricing and Disclosure of Service Charges.* Status report by the Council's Ad Hoc Committee on Service Charges about recent developments related to the setting of service charges paid by consumers, focusing on the *Perdue* v. *Crocker National Bank* case, which raised the issue of unconscionability regarding charges for checks returned.

3. *Emerging Technologies.* Report by the Council's Ad Hoc Committee on Emerging Technologies on a proposed amendment to Regulation E (Electronic Fund Transfers) that would eliminate periodic statement disclosure requirements for the issuer of a debit care (or other access device) when the issuer does not hold the consumer's account.

4. *Reduced-Rate Financing.* Report from the Council's planning group on reduced-rate financing, which was directed to explore further the issues of whether the programs being offered by various automobile companies lessen the value of the annual percentage rate as a tool for consumer's use in credit shopping, what the Truth in Lending implications are for such programs, and what (if any) actions the Council might recommend that the Board take in this area.

5. *Delayed Funds Availability.* Members of the Council's Ad Hoc Committee on Service Charges will make a presentation on check processing operations and how they affect funds availability and on various other delayed availability issues.

6. *Financial Counseling.* Discussion of issues surrounding a bank holding company being able to provide financial counseling to consumers.

7. *Credit Card Interest Rates.* Briefing by Board staff on a recent study on the effects of proposed credit card interest rate ceilings on consumers and creditors.

8. *CRA Protest Activity.* Briefing by Board staff on the increase in Community Reinvestment Act protest activity by community groups and on the role of the Federal Reserve in bringing bank and community representatives together.

9. *Regulatory Update.* Status of recent Board regulatory actions in the area of consumer financial services.

Other matters previously considered by the Council or initiated by Council members also may be discussed.

Persons wishing to submit to the Council their views regarding any of the above topics may do so by sending written statements to Ms. Ann Marie Bray, Secretary, Consumer Advisory Council, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551. Comments must be received no later than close of business Monday, June 16, and must be a quality suitable for reproduction.

Information with regard to this meeting may be obtained from Ms. Bedelia Calhoun, Staff Specialist, at (202) 452-3306; for Telecommunications Device for the Deaf (TDD) users, Earnestine Hill or Dorothea Thompson (202) 452-3544; Board of Governors of the Federal Reserve System, Washington DC 20551.

Board of Governors of the Federal Reserve System, May 23, 1986.

James McAfee,

Associate Secretary to the Board.

BILLING CODE 6210-01-M

GENERAL SERVICES ADMINISTRATION

Report on Revised System of Records Under the Privacy Act of 1974

AGENCY: General Services Administration.

ACTION: Notification of revised system of records.

SUMMARY: The purpose of this document is to give notice, under the provisions of the Privacy Act of 1974, 5 U.S.C. 552a, of intent to revise a system of records being maintained by GSA. The system of records, Incident Reporting, Investigation, and Security Case Files, GSA/PBS-3, will be revised to change the system name, increase the categories of individuals and records covered by the system, add two routine use statements required by the Office of Management and Budget, and exempt contingency planning and analysis files in the system from certain subsections of the act. As the records being added to this system are new, a new system report was filed with the Speaker of the House, the President of the Senate, and the Office of Management and Budget.

DATES: Any interest party may submit written comments about this revised system. Comments must be received on or before the 30th day following publication of this notice. The system will become effective without further notice on the 30th day following publication of this notice unless comments are received that would result in a contrary decision.

ADDRESS: Address comments to General Services Administration (CAID), Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Ms. Alexandra Mallus, GSA Privacy Act Officer, telephone (202) 535-7983.

Background

The system of records, Incident Reporting, Investigation, and Security Case Files, GSA/PBS-3, is being revised to reflect the establishment of contingency planning and analysis files. These files will be a compilation of information received from other law enforcement and intelligence agencies through written communications, conferences and briefings involved with terrorists groups and individuals. This information is required by 41 CFR 101-20.5 to make contingency action plans and provide patterns and trends of potential or actual terrorists groups or other activities that could disrupt the orderly operation of GSA-owned or -controlled facilities. The name of the system and the categories of individuals and records in the system are revised to cover the establishment and maintenance of these new files. The system of records notice GSA/PBS-3 was last published in the Federal Register on August 29, 1980, 45 FR 57892.

The revised system of records is as follows:

GSA/PBS-3

SYSTEM NAME:

Incident Reporting, Investigation, Contingency Planning/Analysis, and Security Case Files.

SECURITY CLASSIFICATION:

Unclassified to Top Secret.

SYSTEM LOCATION:

This system of records is located in the Central Office Law Enforcement Division and the regional offices of the Office of Public Buildings and Real Property at the listed addresses following this notice.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals covered by the system are:

a. Persons who were the source of (1) the initial complaint and (2) an allegation that a crime took place;

b. Witnesses having information or evidence about any side of an investigation;

c. Possible and actual suspects in the criminal situation that are subjects of investigations;

d. Subjects of investigations on noncriminal matters;

e. Employees of GSA contractors performing custodial or guard services in buildings and areas under GSA jurisdiction;

f. Current and former applicants for the position of Federal Protective Officer;

g. Sources of information and evidence. The identity for these individuals may be confidential as well as the subject matter they contribute. These files contain information vital to the outcome of administrative procedures and civil and criminal cases; and

h. Individuals associated with terrorists or terrorist groups and activities and names of regional and nationwide terrorist organizations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records include:

a. Preliminary and other reports of criminal investigations from the opening of a case until it is closed. These records are instituted and maintained at varying points in the process. The processes of criminal justice and civil or administrative remedies require their partial or total disclosure.

b. Security files. These records contain information such as name, date and place of birth, address, Social Security Number, education, occupation, experience, and investigatory material.

c. Contingency Planning/Analysis files. These records contain information such as name and other identifying information and investigatory material on an individual associated with terrorists or terrorist groups and activities. They also contain information about regional and nationwide terrorists organizations and their effects on security of GSA-owned or -controlled facilities.

d. Intelligence briefs; tactical, operational and strategic informational reports; regional and nationwide contingency analysis; contingency action plans; and patterns and trends of potential or actual terrorists or terrorist groups, or other activities that could

disrupt the orderly operation of GSA-owned or -controlled facilities.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

40 U.S.C. 318 through 318d; GSA Organization Manual (OHR P 5540.1).

PURPOSE:

To assemble in one system information on (1) preliminary and other criminal investigation reports that are used to enforce criminal law and rules and regulations for punitive action; prevent, control, or reduce crime and apprehend criminals; and for correction, probation, pardon, and parole activities; (2) security files that are used as a basis for suitability decisions for GSA contract guards and cleaners; and (3) contingency action plans that provide patterns and trends of potential or actual terrorists or terrorist groups or other activities that could disrupt orderly operations of GSA-owned or-controlled facilities.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USE:

a. To disclose information to a Federal, State, local, or foreign agency responsible for investigating, prosecuting, enforcing, or carrying out a statute, rule, regulation, or order, where the agencies become aware of a violation or potential violation of civil or criminal law or regulation.

b. To disclose information to a Member of Congress or a congressional staff member in response to an inquiry from that congressional office made at the request of that individual.

c. To disclose information to a Federal, State, or local agency keeping civil, criminal, enforcement, or other information to get information relevant in making a decision on hiring or retaining an employee; issuing a security clearance; letting a contract; or issuing a license, grant, or other benefit.

d. To disclose information to a requesting Federal agency in connection with hiring or retaining an employee; issuing a security clearance; reporting an employee investigation; clarifying a job; letting a contract; or issuing a license, grant, or other benefit by the requesting agency where the information is relevant and necessary for a decision.

e. To disclose information to an appeal, grievance, or formal complaints examiner; equal employment opportunity investigator; arbitrator; exclusive representative; or other official engaged in investigating, or settling a grievance, complaint, or appeal filed by an employee.

f. To disclose information to the Office of Personnel Management under the agency's responsibility for evaluating Federal personnel management.

g. To disclose information to various bureaus and divisions of the Department of Justice that have primary jurisdiction over subject matters and locations which the Law Enforcement Division shares.

h. To disclose information to subdivisions of the Department of Justice that have responsibility for prosecuting criminal cases and pursuing civil cases arising from authorized activities of the Law Enforcement Division.

i. To disclose information to law enforcement agencies which have lawfully participated in an investigation jointly conducted with the Law Enforcement Division.

j. To disclose information to the Department of Justice when the agency, and agency employee, or the United States is party to or has interest in litigation, and using the records is relevant and necessary and compatible with the purpose of collecting the information.

k. To disclose information to a court or adjudicative body when the agency, any agency employee, or the United States is party to or has interest in litigation, and using the records is relevant and necessary and compatible with the purpose of collecting the information.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders; magnetic tape and index cards in file cabinets.

RETRIEVABILITY:

Filed by name, file number, case number, incident and location, and type of incident.

SAFEGUARDS:

Paper records stored in lockable filing cabinets with built-in 3 position dial type combination safe locks and in secured rooms. Magnetic tapes which store unclassified records protected by password system.

RETENTION AND DISPOSAL:

Disposal of records is described in the HB, GSA Records Maintenance and Disposition System (OAD P 1820.2).

SYSTEM MANAGER(S) AND ADDRESS:

Director, Law Enforcement Division, Public Buildings Service, General Services Administration (PML), 18th and F Streets NW, Washington, DC 20405.

NOTIFICATION PROCEDURE:

Inquiries from individuals should be addressed to the system manager.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the system manager. For identification requirements refer to the agency regulations outlined in 41 CFR Part 105–64.

CONTESTING RECORD PROCEDURES:

GSA rules for contesting the contents and appealing initial decisions are issued in 41 CFR Part 105–64.

RECORD SOURCE CATEGORIES:

Investigations, informants, witnesses, official records, investigative leads, statements, depositions, business records, or any other information source available to the Law Enforcement Division.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Under 5 U.S.C. 552a(j), the criminal investigation case files and contingency planning/analysis files in this system of records are exempt from all provisions of the Privacy Act of 1974 with the exception of subsections (b); (c) (1) and (2); (e)(4) (A) through (F); (e) (6), (7), (9), (10), (11); and (i) of the act. Under 5 U.S.C. 552a(k), the general investigation and security files in this system of records are exempt from subsections (c)(3); (d); (e)(1); (e)(4) (G), (H), and (I); and (f) of the Privacy Act of 1974.

Dated: May 20, 1986.

Johnny T. Young,

Director, Information Management Division.

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on May 23, 1986

Public Health Service

(Call Reports Clearance Officer on 202–245–2100 for copies of packages).

National Institutes of Health

Subject: Atherosclerosis Risk in Communities Study—NEW.

Respondents: Individuals or households.

Health Resources and Services Administration

Subject: Application to Participate in the Health Professions Capitation Program—Reinstatement—(0915–0068).

Respondents: Non-profit institutions.

Office of the Assistant Secretary

Subject: Application for Correction of Public Health Service Commissioned Corp Records—Extensions—(0937–0095).

Respondents: Individuals or households.

OMB Desk Officer: Bruce Artim.

Health Care Financing Administration

(Call Reports Clearance Officer on 301–594–8650 for copies of packages).

Subject: Questions on Other Insurance Available to Medicare Beneficiary—Revision—(0938–0214)—HCFA–L–0009, HCFA—365.

Respondents: Individuals or households; State or local governments; Businesses or other for-profit; Federal agencies or employees; Non-profit institutions; Small businesses or organizations.

Subject: Information Collection Requirement Contained in the Sterilization Regulations and the Consent Form—HCFA–R–94—Existing Collection.

Respondents: States, Individuals, Physicians.

OMB Desk Officer: Fay S. Iudicello.

Copies of the above information collection clearance packages can be obtained by calling the Reports Clearance Officer on the number shown above.

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503, attn: (name of OMB Desk Officer).

Dated: May 27, 1986.

K. Jacqueline Holz,

Deputy Assistant Secretary for Management Analysis and Systems.

Acquired Immunodeficiency Syndrome (AIDS) Surveillance and Associated Epidemiologic Investigations; Program Announcement and Notice of Availability of Funds for Fiscal Year 1986

Correction

In FR Doc. 86–10569, beginning on page 17412, in the issue of Monday, May 12, 1986, make the following corrections:

1. On page 17414, in the first column, the sentence beginning in the third line from the top of the page should read: "Funds may not be used to supplant funds supporting existing AIDS activities provided by the health department or to support construction costs."

2. In the same column, in section 1(f), in the first line, insert "current" after "applicant's".

BILLING CODE 1505–01–M

Fluoride Chemical Shortage Seminar; Open Meeting

On June 17, 1986, the Centers for Disease Control will sponsor a Fluoride Chemical Shortage Seminar. The seminar is scheduled to begin at 8:30 a.m. and will conclude at 4:30 p.m. at the Viscount Hotel in Atlanta, Georgia. The seminar is open to the public, limited only by the space available.

The purpose of the seminar is to evaluate the recent fluoride chemical shortage and to propose recommendations to keep this problem from recurring in the future. Group discussions will be held, with a general topic covered in each group.

For further information, please contact: Thomas G. Reeves, P.E., Fluoridation Engineer, Dental Disease Prevention Activity, Freeway Park, Room 345, Center for Prevention Services, Centers for Disease Control, Atlanta, Georgia 30333, Telephone: FTS: 236–1833, Commercial: (404) 329–1833.

Dated: May 23, 1986.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160–18–M

Food and Drug Administration

[Docket No. 86F–0209]

Argus Chemical, Division of Witco Chemical Corp.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Argus Chemical, Division of Witco Chemical Corp., has filed a petition proposing that the food additive regulations be amended to provide for the safe use of sodium di(*p-tert*-butylphenyl)-phosphate as a clarifying agent for propylene homopolymer and high-propylene copolymer articles intended for contact with food.

FOR FURTHER INFORMATION CONTACT: Rudolph Harris, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 6B3932) has been filed on behalf of Argus Chemical, Division of Witco Chemical Corp., c/o 1150 17th Street NW., Washington, DC 20036, proposing that § 178.3295 *Clarifying agents for polymers* (21 CFR 178.3295) be amended to provide for the safe use of sodium di(*p-tert*-butylphenyl)phosphate as a clarifying agent for propylene homopolymer and high-propylene copolymer articles intended for contact with food.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c) as published in the **Federal Register** of April 26, 1985 (50 FR 16636).

Dated: May 22, 1986.

Sanford A. Miller,

Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160–01–M

[Docket No. 86M–0203]

Davis & Geck, American Cyanamid Co.; Premarket Approval of Maxon® Monofilament Polyglyconate Absorbable Surgical Suture, Clear or Green

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its

approval of the application by Davis & Geck, American Cyanamid Co., Wayne, NJ, for premarket approval, under the Medical Device Amendments of 1976, of the MAXON® Monofilament Polyglyconate Absorbable Surgical Suture, Clear or Green. After reviewing the recommendation of the General and Plastic Surgery Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant of the approval of the application.

DATE: Petitions for administrative review by June 30, 1986.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Palmer, Center for Devices and Radiological Health (HFZ–410), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7238.

SUPPLEMENTARY INFORMATION: On October 15, 1984, Davis & Geck, American Cyanamid Co., Wayne, NJ 07470, submitted to CDRH an application for premarket approval of the MAXON® Monofilament Polyglyconate Absorbable Surgical Suture, Clear or Green. The device is indicated for use in all types of soft tissue approximation and use as a ligature. The device is not indicated for use in cardiovascular, ophthalmic, or microsurgery, and not indicated for use in neural tissue. The device is available in diameter sizes 02 through 7/0 millimeters.

On May 9, 1985, the General and Plastic Surgery Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On April 20, 1986, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Kenneth A. Palmer, (HFZ–410), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before June 30, 1986, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554–555, 571 (21 U.S.C. 360e(d), 360j(h)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: May 22, 1986.

John C. Villforth,

Director, Center for Devices and Radiological Health.

[FR Doc. 86–12101 Filed 5–29–86; 8:45 am]

BILLING CODE 4160–01–M

[Docket No. 85M–0107]

Gish Biomedical, Inc.; Premarket Approval of MicroYAG Nd:YAG Ophthalmic Laser

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Gish Biomedical, Inc., Santa Ana, CA, for premarket approval, under the Medical Device Amendments of 1976, of the MicroYAG Nd:YAG Ophthalmic Laser. After reviewing the recommendation of the Ophthalmic Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant of the approval of the application.

DATE: Petitions for administrative review by June 30, 1986.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Philip J. Phillips, Center for Devices and Radiological Health (HFZ–460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–8221.

SUPPLEMENTARY INFORMATION: On September 3, 1985, Gish Biomedical, Inc., Santa Ana, CA 92705, submitted to CDRH an application for premarket approval of the MicroYAG Nd:YAG Ophthalmic Laser. The MicroYAG Nd:YAG Ophthalmic Laser is a neodymium:yttrium-aluminum-garnet (Nd:YAG) ophthalmic laser that is indicated for discission of the posterior capsule of the eye (posterior capsulotomy).

On October 17, 1985, the Ophthalmic Devices Panel, and FDA advisory committee, reviewed and recommended approval of the application. On January 31, 1986, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Philip J. Phillips (HFZ–460), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21

U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before June 30, 1986, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554–555, 571 (21 U.S.C. 360e(d), 360j(h)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: May 22, 1986.

John C. Villforth,

Director, Center for Devices and Radiological Health.

BILLING CODE 4160-01-M

[Docket No. 83P-0274]

Health Industry Manufacturers Association; Cardiopulmonary Bypass Oxygenator; Denial of Petition for Reclassification

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is issuing an order denying a petition submitted by the Health Industry Manufacturers Association (HIMA) to reclassify the cardiopulmonary bypass oxygenator from class III (premarket approval) into class II (performance standards). This action is being taken under the Medical Device Amendments of 1976.

DATE: Comments by July 29, 1986.

ADDRESS: Written comments are to be submitted to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lynne A. Reamer, Center for Devices and Radiological Health (HFZ-450), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7559.

SUPPLEMENTARY INFORMATION: In the Federal Register of February 5, 1980 (45 FR 7958), under section 513 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360c), FDA published a regulation, 21 CFR 870.4350, classifying the cardiopulmonary bypass oxygenator, a generic type of device, into class III. (See 21 CFR 860.3(i) of FDA's regulations governing medical device classification procedures for a definition of the term "generic type of device.") Section 870.4350(a) identifies the cardiopulmonary bypass oxygenator as a device used to exchange gases between blood and a gaseous environment to satisfy the gas exchange needs of a patient during open-heart surgery.

On June 30, 1983, HIMA of Washington, DC 20005, a trade association here representing seven manufacturers of cardiopulmonary bypass device products, submitted to FDA, under section 513(e) of the act and § 860.130 of the regulations, a petition to reclassify the cardiopulmonary bypass oxygenator from class III into class II. The petitioner requested FDA to reclassify all models of the device now in commercial distribution, including, as described in the petition, "bubble-type oxygenators and membrane oxygenators—both flat sheet and hollow fiber types," and used during open heart surgery for a period of up to 6 hours.

FDA referred the petition to the Circulatory System Devices Panel (the Panel), an FDA advisory committee, to obtain a recommendation on whether to approve or deny the petition. The Panel reviewed the petition during an open public meeting on October 14, 1983. A copy of the transcript of the meeting is on file in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, under Docket No. 83P-0274 and is available for review by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

The Legal Standard Governing Reclassification

Section 513(a)(1) of the act establishes three classes of devices. Classification of a device is determined by the level of regulatory control needed to provide reasonable assurance of the safety and effectiveness of the device. A class I device is a device for which the general controls authorized by or under various sections of the act are sufficient to provide reasonable assurance of the safety and effectiveness of the device. A class II device is a device for which general controls by themselves are insufficient to provide reasonable assurance of the safety and effectiveness of the device, for which there is sufficient information to establish a performance standard to provide such assurance, and for which "it is therefore necessary to establish * * * a performance standard under section 514 [21 U.S.C. 360d] to provide reasonable assurance of its safety and effectiveness." A class III device is a device that cannot be classified into class I or class II and that is purported or represented to be for a use in supporting or sustaining human life or for a use which is of substantial importance in preventing impairment of human health, or that presents a potential unreasonable risk of illness or injury. Premarket approval obtained in accordance with section 515 of the act (21 U.S.C. 360e) is required to provide reasonable assurance of the safety and effectiveness of a class III device.

Section 513(e) of the act authorizes FDA to reclassify a device based on "new information" respecting the device. The term "new information" comprehends information developed as a result of a reevaluation of the data before the agency when a device was classified, as well as information not presented, not available, or not developed at that time. See, e.g., *Holland-Rantos* v. *United States Department of Health, Education, and Welfare*, 587 F.2d 1173, 1174, n.1 (D.C. Cir. 1978); *Upjohn* v. *Finch*, 422 F.2d 944 (6th Cir. 1970); *Bell* v. *Goddard*, 366 F.2d 177 (7th Cir. 1966). The "new information" on which any reclassification is based is required to consist of "valid scientific evidence," as defined in section 513(a)(3) of the act and § 860.7 of the regulations governing medical device classification procedures. As specified in § 860.7(c),

FDA relies only upon such evidence to determine whether there is reasonable assurance that a device is safe and effective.

For the purpose of reclassification, the valid scientific evidence upon which the agency relies is required to be publicly available, i.e., may not be based on (1) trade secrets or commercial or financial information which is privileged or confidential and which is obtained by FDA under various sections of the act (see section 520(c) of the act (21 U.S.C. 360j)) and § 860.5(e) of the regulations or (2) the detailed summaries of information respecting the safety and effectiveness of devices for which there are approved premarket approval applications (see section 520(b)(3) of the act). All data and information in a petition for reclassification filed under section 513(e) of the act, however, may be disclosed by the agency and used as the basis for reclassification of a device [§ 860.5(e)].

To reclassify a device under section 513(e) of the act, the statute and the regulations require that the new, publicly available, valid scientific evidence of safety and effectiveness show (1) why the device should not remain in its present classification and (2) that the proposed reclassification will provide reasonable assurance of the safety and effectiveness of the device. In the case of a device classified into class III and proposed for reclassification into class II, the statute and the regulations require such evidence to show (1) why the device should not remain in class III and (2) that a performance standard will provide reasonable assurance of the safety and effectiveness of the device.

FDA notes that under section 513(c)(2)(C) of the act, the classification panel is required to recommend that a device that is purported or represented to be life-supporting or life-sustaining (e.g., the cardiopulmonary bypass oxygenator) be classified into class III, unless the panel concludes that class III is not necessary to provide reasonable assurance of the safety and effectiveness of the device and provides reasons for this conclusion (see also § 860.93(a)). Section 513(d)(2)(B) of the act, moreover, requires FDA to classify a life-supporting or life-sustaining device into class III unless such classification is not necessary to provide reasonable assurance of its safety and effectiveness (see also § 860.93(b)).

The Panel's Recommendation

The Panel considered the information contained in the petition as well as presentations made during the October 14, 1983, open Panel meeting. Michael B. Hurdle, Secretary of the American Society of Extracorporeal Technology, and Aaron Hill, a member of the Executive Committee of the American Academy of Cardiovascular Perfusionists, made presentations at the Panel meeting. Both speakers stated that insufficient clinical data are currently available to reclassify the hollow fiber type of membrane oxygenator device products into class II. Mr. Hurdle stated that he believes that sufficient information is available to enable a performance standard to be written for the bubble-type oxygenator and for the flat sheet membrane oxygenator device products. He suggested, however, that reclassification should not become effective except upon the effective date of a performance standard for the device. Mr. Hill stated that be believes that a standard cannot be written for any of the three types of device products because there currently are insufficient clinical data on all complications associated with use of the device.

The Panel believed that the petition does not contain any valid scientific evidence to show why the cardiopulmonary bypass oxygenator should not remain in class III, or to show that a performance standard for the device under section 514 of the act would provide reasonable assurance of the safety and effectiveness of the device. The Panel found that the petition does not show the existence of sufficient scientific and medical data to establish such a standard. Accordingly, the Panel concluded that class III is still necessary to provide reasonable assurance of the safety and effectiveness of the device, and recommended that FDA deny the petition.

Summary of the Data Upon Which the Recommendation is Based

At the time that the Panel recommended to FDA that the agency classify the cardiopulmonary bypass oxygenator into class III, the Panel identified four main risks to health from use of the device: (a) Blood damage: If the materials, surface finish, or cleanliness of the device are inadequate, damage to the blood may result. (b) Inadequate or excessive gas transfer: Improper design of the gas transfer mechanism can lead to the risk of inadequate gas transfer or to excessive gas transfer. (c) Thromboembolism: Inadequate blood compatibility of the materials used in the device and inadequate surface finish and cleanliness may lead to potentially debilitating or fatal thromboemboli. (d) Gas embolism: Ineffective debubbling, filtering, or separation of the gas and blood phases can lead to potentially debilitating or fatal gas embolism. (See the Federal Register of March 9, 1979; 44 FR 13406.) During review of the petition submitted by HIMA, the Panel reaffirmed its belief that the device continues to present each of these hazards.

The Panel identified a number of deficiencies in the petition.

Models of devices. The petitioner requested FDA to reclassify all models of the generic type of device now in commercial distribution. The petitioner stated that the models now in commercial distribution include (a) bubble-type oxygenators and (b) membrane oxygenators of two types, flat sheet membrane oxygenators and hollow fiber membrane oxygenators. Although the bubble-type oxygenators and the flat sheet membrane oxygenators were in commercial distribution before May 28, 1976, the enactment date of the amendments, the hollow fiber membrane oxygenators were placed in commercial distribution after that enactment date. The Panel noted that most clinical experience with the cardiopulmonary bypass oxygenator has been with the bubble-type oxygenators and the flat sheet membrane oxygenators, and that little clincial evidence is available with respect to the hollow fiber membrane oxygenators.

Data on results of tests performed by industry. The petition identified three test methods which are used by manufacturers of the cardiopulmonary bypass oxygenators to address three of the four main risks to health that the Panel identified as presented by use of the device: blood damage, inadequate or excessive gas transfer, and thromboembolism. The petition does not, however, contain any in vitro data or other data obtained using these test methods identified by the petitioner, nor does the petition correlate any results from the test methods with any clinical data obtained for each of the three models of the device for which reclassification was requested. Further, although the petition discussed complaints with respect to the device received by manufacturers through June 1980, the petition does not contain an analysis of these data or any more recent data.

Data regarding nonformed elements of blood. The Panel found that the petition does not contain any data regarding the device's effect on the nonformed elements of blood. Changes in device materials, e.g., the flat sheet membrane material, may cause changes

in the membrane's ability to transfer gases due to protein deposition. Such changes also may cause changes in blood proteins, which, in turn, may affect the nonformed elements of blood, such as the coagulation cascade, fibrinolysis, the kallikrein/bradykinin system, and the complement system. These changes may adversely affect the patient.

FDA's Analysis and Conclusion

FDA agrees with the recommendation of the Panel and finds that the petitioner failed to include in the petition the valid scientific evidence required by §§ 860.7(c) and 860.123(a)(6) of the regulations to reclassify the device from class III into class II, or to demonstrate that a performance standard could be written. The burden of presenting such valid scientific evidence is placed on the person requesting that a device be reclassified. FDA continues to believe that premarket approval is necessary to control the risks to health presented by the cardiopulmonary bypass oxygenator and to assure the safety and effectiveness of the device.

Accordingly, FDA is issuing an order under section 513 of the act and § 860.130(d) of the regulations denying HIMA's petition to reclassify the cardiopulmonary bypass oxygenator from class III into class II.

The agency is providing a 60-day comment period during which it will accept comments on the order. Interested persons may, on or before July 29, 1986, submit to the Dockets Management Branch (address above) written comments concerning this action. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday. If FDA decides on the basis of the comments received that it should reconsider this action, it will publish a notice in the Federal Register.

FDA certifies that this notice requires neither a regulatory impact analysis, as specified in Executive Order 12291, nor a regulatory flexibility analysis, as defined in the Regulatory Flexibility Act (Pub. L. 96-354).

Dated: May 22, 1986.

Joseph P. Hile,

Acting Commissioner of Food and Drugs.

[FR Doc. 86-12089 Filed 5-29-86; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 86F-0222]

Ranka, Hovis, McDougall Research, Ltd.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a petition has been filed on behalf of Ranka, Hovis, McDougall Research, Ltd., proposing that the food additive regulations be amended to provide for the safe use of myco-protein, derived from *Fusarium graminearum*, as a direct source of protein in certain foods.

FOR FURTHER INFORMATION CONTACT: James H. Maryanski, Center for Food Safety and Applied Nutrition (HFF-334), Food and Drug Administration, 200 C St., SW., Washington, DC 20204, 202-426-9950.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 6A3930) has been filed on behalf of Ranka, Hovis, McDougall Research, Ltd., c/o 2550 M St. NW., Washington, DC 20037, proposing that the food additive regulations be amended to provide for the safe use of myco-protein, derived from *Fusarium graminearum*, as a direct source of protein in certain foods.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the Federal Register in accordance with 21 CFR 25.40(c), as published in the Federal Register of April 26, 1985 (50 FR 16636).

Dated: May 23, 1986.

John M. Taylor,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

[Docket No. 84P-0346]

Surgical Simplex™ P Antibiotic Bone Cement; Review Before Advisory Committee of Howmedica, Inc.'s Petition for Reconsideration of FDA's Denial of Premarket Approval; Request for Nominations

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that it intends to refer for review before an advisory committee Howmedica, Inc.'s petition for reconsideration of the agency's denial of premarket approval for its Surgical Simplex™ P Antibiotic Bone Cement. The advisory committee of experts to be formed for the review will consist of five persons, qualified by training and experience to evaluate the petition, and will be appointed by the Commissioner of Food and Drugs (the Commissioner). The advisory committee will independently study the petitioner's application as it relates to the issues announced in this notice and will provide the Commissioner with its report and recommendations regarding those issues.

DATE: Nominations should be submitted by July 29, 1986.

ADDRESS: Written nominations should be submitted to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Carl A. Larson, Center for Devices and Radiological Health (HFZ-410), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7188.

SUPPLEMENTARY INFORMATION: On June 29, 1984, the Director of the Office of Device Evaluation of FDA's Center for Devices and Radiological Health (CDRH) denied approval of a premarket approval application (PMA) (P830011) for the Surgical Simplex™ P Antibiotic Bone Cement filed by Howmedica, Inc., 235 East 42d St., New York, NY 10017. This device, including two antibiotics, is intended for fixation of prostheses to living bone in orthopedic surgical procedures and in pathological fractures. The addition of antibiotics to the bone cement is proposed to help reduce the risk of localized infection during the intraoperative and postoperative period.

The petitioner's antibiotic bone cement has been under consideration by FDA since February 19, 1980, when the petitioner filed a notice of claimed investigational exemption with the agency's then Bureau of Drugs. In June 1980, FDA transferred its regulation of antibiotic bone cement products from its Bureau of Drugs to its Bureau of Medical Devices, now CDRH, pursuant to section 520(1) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360j(1)), a provision of the Medical Device Amendments of 1976 (the amendments). Under this provision, antibiotic bone cement and certain other

products that FDA had regulated as new drugs before the amendments broadened and clarified the definition of "device" are regulated by FDA as class III medical devices. Class III devices are subject to the agency's approval under section 515 of the act (21 U.S.C. 360e) prior to commercial distribution.

The petitioner filed a PMA for its antibiotic bone cement on March 9, 1983. The PMA was evaluated and the agency issued deficiency letters on June 3, 1983, and November 23, 1983. The petitioner amended its PMA on January 23, 1984. After full consideration of all information before it, CDRH denied approval of the petitioner's PMA on June 29, 1984. This denial was based on the petitioner's failure to satisfy the safety and effectiveness requirements of section 515(d)(2) (A) and (B) of the act (21 U.S.C. 360e(d)(2) (A) and (B)). In response to CDRH's action, the petitioner filed a petition for reconsideration on October 4, 1984, requesting that the Commissioner refer CDRH's denial of approval of the petitioner's application to an advisory committee of experts established pursuant to section 515(g)(2)(B) of the act for a report and recommendation with respect to the denial. The petitioner limited its request for an advisory committee review to a determination of whether an adequate and well-controlled clinical trial in humans is needed to satisfy the act's requirements for demonstrating the device's safety and effectiveness. See Petition for Reconsideration, p. 8. The review provided by the advisory committee, therefore, will be limited to the issues set forth below which respond to the petitioner's request. The advisory committee's recommendation will not be one of approval or denial of the PMA, but instead will evaluate the correctness of CDRH's denial as it relates to the demand that the applicant perform an adequate and well-controlled clinical investigation in humans as part of the applicant's demonstration of safety and effectiveness of the antibiotic bone cement. CDRH's other grounds for denial of the application will be considered by FDA to be correct insofar as they have not been challenged. The Commission's action on the recommendation of the advisory committee, therefore, will be limited to either affirming CDRH's denial order or affirming it with alterations. This result is apparently understood by the petitioner. See id.

CDRH believes that for this device an adequate and well-controlled study in humans is necessary to resolve various questions regarding the clinical effect of the antibiotic as a prophylactic agent during the perioperative period, and the cement's safety and effectiveness over time. CDRH believes that the petitioner's present submission fails to demonstrate that the antibiotic bone cement is effective against localized microorganisms that may be present during the implant situation, and it fails to demonstrate that the presence of antibiotics in the cement does not weaken the cement in the clinical situation.

In the petition for reconsideration, the petitioner argues that the information presented in the PMA is sufficient to meet the statutory requirements of section 515(d)(2) (A) and (B) of the act and that an adequate and well-controlled study in humans is unnecessary for demonstrating a reasonable assurance that the device is safe and effective under the conditions of use prescribed, recommended, or suggested in the proposed labeling.

Accordingly, pursuant to section 515(g)(2)(A) of the act, the Commissioner is granting the request for administrative review by establishing an advisory committee under section 515(g)(2)(B) of the act to submit to the agency a report and recommendation with respect to the issues raised by the petitioner's request for review.

Upon completion of the review, the Commissioner will make public the advisory committee's report and recommendations, and will issue an order affirming past agency action, with or without alteration, as is appropriate.

The following questions will define the scope of the advisory committee's review of CDRH's denial of the premarket approval application for the antibiotic bone cement:

1. Is a well-controlled clinical investigation in humans necessary to demonstrate a reasonable assurance that the device is safe and effective as labeled?

2. Assuming that a well-controlled investigation in humans is necessary, what parameters should be investigated in such a study to demonstrate a reasonable assurance that the device will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the device's labeling?

3. Can clinical studies in humans (reported in the literature or in an individual surgeon's case reports) of bone cement with concentrations of antibiotic different from the concentrations of antibiotic in the device subject to the PMA demonstrate a reasonable assurance of safety and effectiveness to support a PMA approval?

4. Does the PMA contain studies that adequately demonstrate that the device will fix prostheses to living bone in orthopedic surgical procedures in humans?

5. Does the PMA contain studies that adequately demonstrate that the leaching out of antibiotic from the bone cement will not adversely affect the cement's long-term function in humans?

6. Does the PMA contain studies or evidence that adequately demonstrate that when the product is used as recommended in the labeling, adequate amounts of antibiotic will be delivered to the operative site in humans to eliminate those bacteria commonly found to cause infections associated with implant surgery?

7. Does the PMA adequately demonstrate that a reasonable assurance of safety and effectiveness is present for those persons most likely to be exposed to the device (e.g., the elderly) when the device is used as labeled?

The advisory committee meeting, public participation, and other activities will be governed by the Federal Advisory Committee Act (Pub. L. 92-463) and FDA's regulations in 21 CFR Part 14 governing its public advisory committees. After the Commissioner issues the order based on the recommendation of the advisory committee, a summary of the safety and effectiveness information submitted to the advisory committee will be made available to the public pursuant to section 520(h)(2) of the act (21 U.S.C. 360j(h)(2)).

The advisory committee will consist of five experts, qualified by training and experience to evaluate the petition, and be appointed by the Commissioner. Advisory committee members will be selected from among authorities knowledgeable in some or all of the following fields: clinical and administrative medicine, pathology, engineering, microbiology, infectious disease, epidemiology, and the biological and physical sciences.

Any public hearing associated with the advisory committee's review will be subject to FDA's guideline (Subpart C of 21 CFR Part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings. These procedures are primarily intended to expedite media access to FDA public proceedings, including hearings before a public advisory committee conducted pursuant to Part 14 of the agency's regulations. Under this guideline, representatives of

the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including the presentations of participants in this proceeding. Accordingly, all interested persons are directed to the guideline, as well as the Federal Register notice announcing issuance of the guideline (49 FR 14723; April 13, 1984), for a more complete explanation of the guideline's effect on this hearing. Individuals who are interested in being appointed by the Commissioner to serve on the advisory committee should contact Carl A. Larson (address above) or may be nominated by any interested person. Nominations are required to be in writing and submitted to the Dockets Management Branch (address above) by July 29, 1986.

Any interested person may nominate one or more qualified persons for membership. A complete curriculum vitae of the nominee shall be included with the nomination. Nominations shall state that the nominee is aware of the nomination, is willing to serve as a member of the committee, and appears to have no conflict of interest. FDA will ask potential candidates to provide detailed information concerning financial holdings, consultancies, and research grants or contracts to permit evaluation of possible sources of conflict of interest.

All documents filed in this matter are filed under Docket No. 84P-0348 and are available for public review in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Additional information about this proceeding will be published in a future Federal Register notice, including announcement of the date, time, and place of the advisory committee meeting.

Dated: May 22, 1986.

Joseph P. Hile,

Acting Commissioner of Food and Drugs.

[FR Doc. 86-12100 Filed 5-29-86; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 86G-0202]

The Herald Organization; Filing of Petition for Affirmation of GRAS Status

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a petition (GRASP 6G0305) has been filed on behalf of the Herald Organization proposing that *alpha*-cyclodextrin is generally recognized as safe (GRAS) as a direct human food ingredient.

DATE: Comments by July 29, 1986.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Susan Thompson, Center for Food Safety and Applied Nutrition (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-426-9463.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))) and the regulations for affirmation of GRAS status in § 170.35 (21 CFR 170.35), notice is given that a petition (GRASP 6G0305) has been filed on behalf of the Herald Organization, 401 Christopher Ave., Suite 11, Gaithersburg, MD 20877. This petition proposes to affirm that *alpha*-cyclodextrin used as an encapsulating agent is GRAS as a direct human food ingredient.

The petition has been placed on display at the Dockets Management Branch (address above).

Any petition that meets the format requirements outlined in § 170.35 is filed by the agency. There is no prefiling review of the adequacy of data to support a GRAS conclusion. Thus, the filing of a petition for GRAS affirmation should not be interpreted as a preliminary indication of suitability for GRAS affirmation.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the Federal Register in accordance with 21 CFR 25.40(c), as published in the Federal Register of April 26, 1985 (50 FR 16636).

Interested persons may, on or before July 29, 1986, review the petition and/or file comments (two copies, identified with the docket number found in brackets in the heading of this document) with the Dockets Management Branch (address above). Comments should include any available information that would be helpful in determining whether the substance is, or is not, GRAS. A copy of the petition and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: May 22, 1986.

Sanford A. Miller,

Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 86-12097 Filed 5-29-86; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 79N-0019]

Minor Use of Animal Drugs; Availability of Guidelines

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of revised guidelines concerning the submission of data for approval of new animal drug applications for minor uses of new animal drugs. The revised guidelines describe the types of data required to establish safety and effectiveness, and to address environmental considerations for "minor use" new animal drugs under section 512 of the Federal Food, Drug, and Cosmetic Act, and 21 CFR 514.1(d) of the animal drug regulations.

ADDRESS: The revised guidelines are available for public examination at, further written comments may be submitted to, and requests for single copies may be sent to the Dockets Management Branch (HF-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Thomas V. Raines, Center for Veterinary Medicine (HFV-135), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4913.

SUPPLEMENTARY INFORMATION: "Minor use" new animal drugs and drugs used in minor animal species or used in any animal species for a disease that occur infrequently or in limited geographical areas. FDA published a proposed rule and a notice of availability of guidelines concerning minor use new animal drugs in the Federal Register of July 20, 1979 (44 FR 42714). In the Federal Register of January 14, 1983 (48 FR 1922), FDA published a final rule amending the animal drug regulations to provide for minor use applications (21 CFR 514.1(d)) and the availability of revised guidelines concerning their submission. FDA is now providing six specific guidelines, namely: (I) Game birds, (II) minor ruminants, (III) rabbits, (IV) food fish, (V) human food safety, and (VI) environmental considerations. These guidelines have been updated to reflect more recent experience, including comments from three workshops on the

minor use of new animal drugs (March 14–16, 1983, August 21–22, 1984, and September 25–26, 1985). The most significant revisions reflect clarification of the requirements for minor ruminants, rabbits, and human food safety, and for environmental considerations to reflect the National Environmental Policy Act and FDA's implementing regulations in 21 CFR Part 25 (50 FR 16636; April 26, 1985).

This notice of availability is issued under 21 CFR 10.90(b), which provides for the use of guidelines to establish procedures of general applicability that are not legal requirements but are acceptable to the agency. Sponsors may rely upon a guideline with the assurance that it represents procedures acceptable to the agency (see 21 CFR 10.90). If a sponsor believes that alternative procedures are applicable, a guideline does not preclude a sponsor from pursuing the alternative procedures. Under such circumstances, however, the agency encourages sponsors to discuss the alternative procedures in advance with FDA to prevent the expenditure of money and effort for work that may later be found to be unacceptable.

Interested persons may, at any time, submit additional written comments on the guidelines to the Dockets Management Branch (HFA–305). Such comments will be considered in determining if further revisions of the guidelines are required. Respondents should submit two copies, except that individuals may submit single copies, identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the Dockets Management Branch from 9 a.m. to 4 p.m., Monday through Friday.

Dated: May 22, 1986.

Joseph P. Hile,

Acting Commissioner of Food and Drugs.

BILLING CODE 4160–01–M

Health Resources and Services Administration

National Advisory Council on the National Health Service Corps Advisory Committee; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of June 1986:

Name: National Advisory Council on the National Health Service Corps.

Date and Time: June 23–25, 1986, 8:30 a.m.

Place: Fresno Hilton, 1055 Van Ness, Fresno, California 93721.

Visits will be made to National Health Service Corps funded sites, including a migrant, a freestanding and an Indian Health site on Tuesday, June 24. No transportation will be provided for visitors and observers.

The entire meeting is open to the public.

Purpose: The Council will advise and make appropriate recommendations on the National Health Service Corps (NHSC) program as mandated by legislation. It will also review and comment on proposed regulations promulgated by the Secretary under provisions of the legislation.

Agenda

The agenda will include a discussion of Region IX activities, overall National Health Service Corps policies, budget and other topics at the pleasure of the Council.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should write to or contact Anna Mae Voigt, National Health Service Corps, Bureau of Health Care Delivery and Assistance, Health Resources and Services Administration, Room 8–40, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, telephone: 301 443–4814.

Agenda items are subject to change as priorities dictate.

Dated: May 22, 1986.

Jackie E. Brown,

Advisory Committee Management Officer, HRSA.

BILLING CODE 4160–15–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Pueblo of Santa Ana, NM; Proclaiming Certain Lands as Part of the Reservation

April 30, 1986.

This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.1.

On April 30, 1986, pursuant to authority contained in Section 7 of the act of June 18, 1934 (48 Stat. 984; 25 U.S.C. 467), the following described lands, located in Sandoval County, New Mexico, were added to and made a part of the Reservation of the Pueblo of Santa Ana.

A tract of land situate in Section 18, T. 13 N., R. 4 E., NMPM, located in the County of Sandoval and State of New Mexico, being more particularly described by metes and bounds as follows:

Beginning at a point, the SW Corner of Section 19, said point being a USGLOS Brass Cap on pipe, section corner common to Sections 19, 30, T. 13 N., R. 4 E., NMPM; thence,

North 0°33'44" East, 2455.51 feet distant to a point, said point being a USGLOS Brass Cap on pipe, East ¼ Corner, Section 24, T. 13 N., R. 3 E., NMPM; thence,

North 0°36'16" East, 179.67 feet distant to a point, said point being a USGLOS Brass Cap on pipe, West ¼ Corner, Section 19, T. 13 N., R. 4 E., NMPM; thence,

North 0°38'45" East, 2495.45 feet distant to a point, said point being a USGLOS Brass Cap on pipe, Section Corner common to Sections 13, 24, T. 13 N., R. 3 E., NMPM; thence,

North 0°38'49" East, 138.61 feet distant to a point, said point being a USGLOS Brass Cap on pipe, Section Corner common to Sections 18, 19, T. 13 N., R. 4 E., NMPM; thence,

North 89°59'13" East, 2640.61 feet distant to a point, said point being a USGLOS Brass Cap on pipe, North ¼ Corner, Section 19, T. 13 N., R. 4 E., NMPM; thence,

North 89°45'31" East, 130.44 feet distant to a point, said point being a USGLOS Brass Cap on pipe, South ¼ Corner, Section 18, T. 13 N., R. 4 E., NMPM; thence,

North 89°46'10" East, 2368.06 feet distant to a point, said point being a concrete filled 1" pipe, C.C., Sections 18, 19, T. 13 N., R. 4 E., NMPM; El Ranchito Grant; thence,

South 23°06'17" West, 3882.85 feet distant to a point, said point being a USGLOS Brass Cap on pipe, M.C. 3, El Ranchito Grant; thence,

South 22°44'38" West, 523.33 feet distant to a point, said point being a USGLOS Brass Cap on pipe, 1 M, El Ranchito Grant; thence,

South 23°49'07" West, 315.74 feet distant to a point, said point being a USGLOS Brass Cap on pipe, M.C. 2, El Ranchito Grant; thence,

South 8°48'19" West, 962.88 feet distant to a point, said point being a USGLOS Brass Cap, C.C. Sections 19, 30, T. 13 N., R. 4 E., NMPM; El Ranchito Grant, thence,

North 89°57'32" West, 582.20 feet distant to a point, said point being a USGLOS Brass Cap, ¼ Corner common to Sections 19, 30, T. 13 N., R. 4 E., NMPM; thence,

North 89°57'42" West, 2640.06' distant to the point of beginning, said point being a USGLOS Brass Cap on pipe.

Section Corner common to Sections 19, 30, T. 13 N., R. 4 E., NMPM, containing 494.36S acres more or less.

Excepting Therefrom the Following Described Tract of Land

Beginning at the southwest corner of this excepted tract from which point the southwest corner of Section 19, Township 13 North, Range 4 East, NMPM, bears S 0°33'44" W., 660.08 feet and from said beginning point running:

Thence N 0°33'44" E., along the Range line between Range 3 East and 4 East, a distance of 798.00 feet;

Thence N 79°32'31" E., 2111.41 feet;

Thence S 85°53'39" E., 1613.61 feet to a USGLOS Brass Cap marked ERMC 3 1914;

Thence S 22°44'36" W., 526.33 feet;

Thence S 23°49'07" W., 315.74 feet;

Thence S 8°46'19" W., 962.86 feet to a point to a USGLOS brass cap marking the closing corner of Sections 19 and 30 with the El Ranchito Grant;

Thence North 89°57'32" West, 582.20 feet distant to a point, said point being a USGLOS Brass Cap, ¼ Corner common to Sections 19, 30, T. 13 N., R. 4 E, NMPM;

Thence North 89°57'42" West, 1320.06' distant to a point;

Thence North 0°2'18" E., 660.00 feet;

Thence N 89°57'42" W., 1313.97 feet to the point of beginning and containing *113.00* acres, more or less, all in said Section 19, Township 13 North, Range 4 East, NMPM.

Excepting Further Therefrom the Following Described Tract of Land

Beginning at the Southwest Corner of the Tract herein described which point is the Northwest corner of SUN COUNTY SUBDIVISION, Phase 1, filed and recorded in the office of the County Clerk of Sandoval County, New Mexico, on October 23, 1973, and from said beginning point running:

Thence N 00°39'44" E., along the Range Line between Range 3 East and Range 4 East, a distance of 909.48 feet to a U.S.GLO Brass Cap, this being the Quarter corner of Section 24, Township 13 North, Range 3 East;

Thence N 00°36'16" E., a distance of 179.67 feet to a U.S.GLO Brass Cap, this being the Quarter corner of Section 19, Township 13 North, Range 4 East;

Thence N 00°39'45" E., a distance of 630.00 feet;

Thence S 89°21'15" E., a distance of 472.05 feet;

Thence S 00°38'45" W., a distance of 1716.80 feet;

Thence S 79°32'31" W., a distance of 479.52 feet along the Northerly boundary of SUN COUNTY SUBDIVISION, Phase 1 to the TRUE POINT OF BEGINNING, and containing *19.089* acres, more or less, all in Section 19, Township 13, North, Range 4 East, NMPM, Sandoval County, New Mexico.

Excepting Further Therefrom the Following Described Tract of Land

From a point, S.W. Corner of Section 19, said point being a USGLOS Brass Cap on pipe, Section Corner common to Sections 19, 30, T. 13 N., R. 4 E., NMPM; South 89°57'57"42" East, 660.00 feet distant to a point, said point being a #3 deformed reinforcing bar and the true point of beginning, thence.

North 0°02'18" East, 660.00 feet distant to a point, said point being a #3 deformed reinforcing bar; thence,

South 89°57'42" East, 660.00 feet distant to a point, said point being a #3 deformed reinforcing bar; thence;

South 0°02'18" West, 660.00 feet distant to a point, said point being a #3 deformed reinforcing bar; thence,

North 89°57'42" West, 660.00 feet distant to the true point of beginning, said point being a #3 deformed reinforcing bar, and containing 10.000 acres more or less.

Excepting Further Therefrom the Following Described Track of Land

Beginning at a point, said point being a USGLOS Brass Cap on pipe, M.C. 3, El Ranchito Grant; thence,

North 85°53'39" West 1613.61 feet distant to a point, said point being a 1" pipe; thence;

North 0°08'26" West, 1557.72 feet distant to a point, said point being a #5 deformed reinforcing bar; thence,

South 68°09'33" East, 2140.72 feet distant to a point, said point being a #5 deformed reinforcing bar; thence,

South 23°05'17" West, 952.56 feet distant to the point of beginning, said point being a USGLOS Brass Cap on pipe, M.C. 3, El Ranchito Grant and containing 52.173 acres more or less.

Excepting Further Therefrom the Following Described Tract of Land

That certain non-exclusive easement as referred to in Warranty Deed recorded in Book 11 DR, page 332, and in Quitclaim Deeds recorded in Book DR 28, page 619, and in Book DR 28, page 820, records Sandoval County, New Mexico.

The above-described parcels contain a total of 300.105 acres, more or less which are subject to all valid rights, reservations, rights-of-way, and easements of record.

Rose O. Swimmer,

Assistant Secretary—Indian Affairs.

May 21, 1986.

BILLING CODE 4310-02-M

Bureau of Land Management

[AA-6679-A2]

Alaska Native Claims Selection; Manokotak Natives, Ltd.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43 U.S.C. 1601, 1613(a), will be issued to Manokotak Natives Limited for approximately 3,200 acres. The lands involved are in the vicinity of Manokotak, Alaska.

Seward Meridian, Alaska

T. 14 S., R. 58 W. (Unsurveyed)
T. 12 S., R. 60 W. (Unsurveyed)

A notice of the decision will be published once a week for four (4) consecutive weeks, in the ANCHORAGE TIMES. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513. ((907) 271-5960.)

Any party claiming a property interest which is adversely affected by the decision shall have until June 30, 1986 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR 4, Subpart E shall be deemed to have waived their rights.

Joe J. Labay,

Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-JA-M

Dickinson District Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Meeting.

SUMMARY: The citizen advisory council for the Bureau of Land Management's Dickinson District will meet June 18, 1986, in Dickinson, North Dakota. This is a rescheduling from the previously announced date of June 11, 1986, (51 FR 17838, May 15, 1986). The change was necessitated when unforeseen conflicts

would not allow at least six council members to be present on that date. The agenda and all other information is the same as announced for the June 11 meeting.

LOCATION, DATE, AND TIME: June 18, 1986, from 8:30 a.m. to approximately 4:00 p.m. Mountain Daylight Time, Community Room (basement) of the Gate City Building, 204 Sims Street, Dickinson, North Dakota.

FOR MORE INFORMATION CONTACT: William F. Krech, District Manager, P.O. Box 1229, Dickinson, North Dakota 58602; telephone (701) 225-9148.

Dated: May 23, 1986.

William F. Krech,

District Manager.

BILLING CODE 4310-DN-M

Sale of Public Lands in Yavapai County, AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Competitive Sale of Public Land in Yavapai County, A-21945 through A-21951.

SUMMARY: The Bureau of Land Management will offer 7 tracts of land for public sale. These tracts are located near Wickenburg, Arizona. It has been determined that the sale of these tracts is consistent with section 203 of the Federal Land Policy and Management Act of October 21, 1976. These tracts will be sold at no less than the appraised fair market value.

The subject lands are located at:

Gila and Salt River Meridian, Arizona

Serial No.	Legal description	Acres
A-21945	T. 8 N., R. 5 W., Sec. 15, NE¼NE¼NW¼.	10.00
A-21946	T. 8 N., R. 5 W., Sec. 15, SE¼NE¼NW¼.	10.00

NOTE.—The average aggregates 140.00 acres of land in Yavapai County.

Current Department of Interior policy for competitive land sales provides for a sealed bid process only.

Federal law limits sale of this land to United States citizens, corporations subject to the law of any State or of the United States, States, State instrumentalities or political subdivisions authorized to hold property, and any entity legally capable of conveying and holding lands or interests therein under the laws of the State within which the lands to be conveyed are located. The purchaser is deemed to be the individual(s) or corporation that will actually take title to the land from the government; the citizenship limitation does not apply to agents who bid on behalf of an associate, client or employer.

All of the parcels listed will be subject to the following reservation when patented:

1. A right-of-way for ditches and canals constructed by the authority of the United States. (Act of August 30, 1890, 26 Stat. 391, 43 USC 945.)

2. A reservation of all oil and gas to the United States with the right to prospect for, mine, and remove such deposits.

The following tracts will be sold subject to the following reservations:

1. Parcels A-21945—A-21951 will be sold subject to BLM road right-of-way A-18888.

2. A-21949 will be subject to BLM road right-of-way A-18889.

Additionally, all parcels will be sold subject to the Wickenburg Inn grazing lease No. AZ-020-2530. The purchaser of the land will honor the terms and conditions of this grazing lease until February 28, 1989. The purchaser will not charge more than the BLM grazing free schedule for a given year. Modification of these terms and conditions will occur only thorugh mutual agreement between the purchaser and the lessee.

The successful bidder will also be required to purchase the mineral estate at the time of final payment.

Upon publicaton of this notice in the Federal Register, the land described above will be segregated from all forms of non-discretionary appropriation under the public land laws, including the mining laws, except the mineral laws, for a period of 270 days or until the lands are sold. The segregative effect may otherwise be terminated by the authorized officer by publication of a termination notice in the Federal Register prior to the expiration of the 270 day period.

Additional information regarding these tracts of land will be contained in the sale brochure made available at least 30 days prior to the sale. This additional information includes: 1. Sealed bid instructions. 2. Times of first sealed bid opening. 3. Appraised fair market value of the tracts. 4. Any reservations or terms and conditions that apply to the tracts of land. 5. Maps showing the location of the tracts of land. 6. Requirements of parties wishing to bid. 7. Payment procedures for the successful bidder.

For a period of 45 days from the date of this notice, interested parties may submit comments regarding the proposed action. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior. Comments regarding this action or requests for additional information should be sent to the Phoenix District, 2015 W. Deer Valley Road, Phoenix, Arizona 85027.

Dated: May 22, 1986.

Marilyn V. Jones,

District Manager.

BILLING CODE 4310-32-M

Nevada, Filing of Plats of Survey and Order Providing for Opening of Lands

May 22, 1986.

1. The Plat of Survey of lands described below will be officially filed at the Nevada State Office, Reno, Nevada, effective at 10:00 a.m., on July 14, 1986.

Mount Diablo Meridian, Nevada

T. 2 N., R. 56 E.

2. The elevation of the land within the confines of the survey in Township 2 North, Range 56 East, is approximately 6,000 ft. above sea level and the terrain is rolling to mountainous. The vegetation consists of scattered juniper, pinion pine, sagebrush, Brigham tea, rabbitbrush and sparse cacti. The soil is sandy clay loam and rocky. Cottonwood Creek flows southeasterly across the southern part of section 13.

Improvements consist of an improved gravel road bearing generally east and west in section 13 and a building under construction is located in the northwest quarter of the northwest quarter of section 13.

Principal users of the area are landowners in the vicinity.

T. 18 N., R. 63 E.

The land within the confines of this survey in Township 18 North, Range 63 East, is located approximately 8 miles north of Ely, Nevada, and more specifically, in Smith Valley, 2 miles northwest of Hercules Gap. The elevation is about 6,600 ft. above sea level. The soil is sandy clay loam and the vegetation consists of medium to scattered densities of juniper and pinion pine in the northeast part and scattered

sagebrush, native grass and sparse cacti. Drainage is primarily southwesterly along the alluvial fan of the Egan Range.

Access is gained via Bothwick Road which, commencing in Ely, enters the area at the south boundary of section 31, heading in a straight northwesterly direction through the section. There are numerous trail roads in the area. In addition, there is a power line which basically parallels Bothwick Road.

Principal users of the area are landowners, hunters, and wood cutters.

3. Subject to valid existing rights, the provisions of existing withdrawals and classifications, and the requirements of applicable land laws, the lands described above are hereby open to such applications and petitions as may be permitted. All such valid applications received at or prior to 10:00 a.m., on July 14, 1986, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in order of filing. The lands decribed above have been open and continue to be open to the mining and mineral leasing laws.

4. The Plats of Survey of lands described below were officially filed at the Nevada State Office, Reno, Nevada, effective at 10:00 a.m., on the dates indicated:

Mount Diablo Meridian, Nevada

T. 2 N., R. 42 E.	May 14, 1986	Tract survey.
T. 12 N., R. 21 E.	May 14, 1986	Corrective resurvey and corrective survey.
T. 31 N., R. 49 E.	May 14, 1986	Supplemental plat.

The purpose of this notice is to inform the public and interested State and local government officials of the filing of plats of survey. Inquiries concerning the surveys shall be addressed to the Nevada State Office, Bureau of Land Management, 300 Booth Street, P.O. Box 12000, Reno, Nevada 89520.

Robert G. Steele,

Deputy State Director, Operations.

BILLING CODE 4310-HC-M

Shoshone District Advisory Council Meeting

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda for a meeting of the Shoshone District Advisory Council.

DATE: Thursday, June 26, 1986 at 9:00 a.m.

ADDRESS: BLM District Office, 400 West F Street, Shoshone, Idaho 83352.

FOR FURTHER INFORMATION CONTACT: Jon Ideo, District Manager, Shoshone District Office, P.O. Box 2 B, Shoshone, Idaho 83352. Telephone (208) 886-2206 or FTS 554-0575.

SUPPLEMENTARY INFORMATION: The proposed agenda for the meeting includes the following items:

Current Issues Update
Field Tour of Fire Rehabilitation Projects

The Shoshone District Advisory Council is established under Section 309 of the Federal Land Policy and Management Act of 1976 (Pub. L. 94-579; 43 U.S.C. 1701 et seq.) as amended. Operation and administration of the Council will be in accord with the Federal Advisory Committee Act of 1972 (Pub. L. 92-463; 5 U.S.C. Appendix 1) and Department of Interior regulations, including 43 CFR Part 1784.

The meeting will be open to the public. Anyone may present an oral statement before the Council between 9:00 and 10:00 a.m. or may file a written statement with the Council regarding matters on the agenda. Oral statements will be limited to ten minutes. Anyone wishing to make an oral statement should notify the Shoshone District Manager by June 25, 1986. Records of the meeting will be available in the Shoshone District Office for public inspection or copying within 30 days after the meeting.

Dennis D. Schulze,

Acting District Manager.

[W-81777]

Wyoming: Termination of a Public Meeting and Associated Withdrawal Action For Spanish Point Caves

AGENCY: Bureau of Land Management, Interior.

ACTION: Cancellation of a previously announced public meeting.

SUMMARY: The Notice of a Public Meeting, to accept public comment on the proposed Spanish Point Cave Withdrawal published in the Federal Register, Volume 51, Number 85 on Friday, May 2, 1986, is hereby cancelled.

A revised segregation application effort will be proposed for the subject area that will reflect updated information obtained as a result of the land use planning process. The public meeting previously scheduled to occur on June 10, 1986, at the Worland District Office, 101 South 23rd Street, Worland, Wyoming, is therefore cancelled.

FOR FURTHER INFORMATION CONTACT: Roger D. Inman, Area Manager, Washakie Resource Area, Worland District Office (307-347-9871).

Dated: May 23, 1986.

Chester E. Conard,

District Manager.

BILLING CODE 4310-22-M

Proposed Reinstatement of Terminated Oil and Gas Lease

Under the provisions of Pub. L. 97-451, a petition for reinstatement of oil and gas lease M 65771, Blaine County, Montana, was timely filed and accompanied by the required rental accruing from the date of termination, July 1, 1985.

No valid lease has been issued affecting the lands. The lessee has agreed to new lease terms for rentals and royalties at rates of $5 per acre and 16⅔ respectively. Payment of $500 administration fee has been made.

Having met all the requirements for reinstatement of the lease as set out in sec. 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease, effective as of the date of termination, subject to the original terms and conditions of the lease, the increased rental and royalty rates cited above, and reimbursement for cost of publication of this Notice.

Dated: May 20, 1986.

Karen L. Skauge,

Chief, Leasing Unit.

BILLING CODE 4310-DN-M

[CA 18779]

Realty Action; Exchange of Public and Private Lands in Riverside County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, CA 18779.

SUMMARY: The following described lands have been determined to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of October 21, 1976 (43 U.S.C. 1716):

San Bernardino Meridian, California

T. 3S., R. 4E.,
Sec. 32: NE¼NE¼.
Containing 40 acres of public land.

In exchange for these lands the United States will acquire a like value of land from The Nature Conservancy, located within the following described area:

San Bernardino Meridian, California

T. 4S., R. 6E.,
Sec. 11, all;
Sec. 12: W½.
Containing 960 acres of private land.

SUPPLEMENTARY INFORMATION: The purpose of the exchange is to acquire a portion of the non-Federal lands within the proposed 13,030 acre preserve for the Coachella Valley fringe-toed lizard. The lizard is federally listed as threatened and State listed as endangered. The Bureau of Land Management's goal is to acquire approximately 6700 acres within the preserve. The acres being acquired do not constitute habitat for the lizard, but provide a sand source required for the continuing production of active sand dune areas that are critical habitat for the lizard. Other State and Federal agencies will acquire the remaining portions of the preserve. The public interest will be well served by completing this exchange.

Publication of this notice in the Federal Register segregates the public lands from operation of the public land laws and the mining law, except for mineral leasing. The segregative effect will end upon issuance of patent or two years from the date of publication, whichever occurs first.

The exchange will be conducted on a value for value basis. Following an appraisal, full equalization of values will be achieved by acreage adjustments or by a payment to the United States by The Nature of Conservancy of funds in an amount not to exceed 25 percent of the total value of the lands to be transferred out of Federal ownership.

Land to be transferred from the United States will be subject to the following reservations, terms, and conditions.

1. A right-of-way for ditches and canals constructed by the authority of the United States. Act of August 30, 1890 (43 U.S.C. 945).

2. All the oil, gas, and geothermal steam and associated geothermal resources shall be reserved to the United States, together with the right to prospect for, mine and remove the minerals. A more detailed description of this reservation, which will be incorporated in the patent document, is available for review at this BLM Office.

3. A right-of-way for a Federal Aid Highway, Serial No. LA 0152960, under the Act of November 9, 1921. (42 Stat. 216; 23 U.S.C. 18).

4. The patent will be subject to those rights granted by oil and gas lease CA 10758, issued under the Act of February 25, 1920, as amended (41 Stat. 437, 30 U.S.C. 181).

FOR FURTHER INFORMATION CONTACT: John Sullivan, Indio Resource Area (714) 351–6663. Information relating to this exchange, including the environmental assessment and land report, is available for review at the California Desert District Office, 1695 Spruce Street, Riverside, California 92507.

DATE: For a period of 45 days from the date of publication of this notice in the Federal Register, interested parties may submit comments to the District Manager, California Desert District Office, Bureau of Land Management, at the above address. Objections will be reviewed by the State Director, who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of Interior.

Dated: May 22, 1986.

Hugh W. Riecken,

Acting District Manager.

BILLING CODE 4310–40–M

[I–22270, I–22803 and I–22804]

Coeur d'Alene District, Idaho; Sale of Public Lands

AGENCY: Bureau of Land Management, Idaho; Interior.

ACTION: Notice of Realty Action, Sale of Public Land in Shoshone and Bonner Counties, Idaho (I–22270, I–22803, and I–22804).

DATE AND ADDRESS: The sale offering for parcels I–22270 and I–22803 will be held on Wednesday, August 20, 1986, at 10:00 a.m. at the Coeur d'Alene District Office, 1808 North Third Street, Coeur d'Alene, ID 83814. The sale offering for parcel I–22804 will be held on Wednesday, October 15, 1986, at 10:00 a.m. at the same location. Unsold parcels will be offered every Wednesday through January 20, 1987, on which date this sale offering will be suspended.

SUMMARY: The following-described lands will have been examined and through the public-supported land use planning process have been determined to be suitable for disposal by sale pursuant to section 203 of the Federal Land Policy and Management Act of 1976, at no less than fair market value as determined by an appraisal:

Parcel	Legal description	Fair market value	Sale type
I–22270	T. 48N., R. 3E., B.M., sec. 11, lot 6 (0.02 acres).	$50.00	Competitive.
I–22803	T. 55N., R. 3E., B.M., sec. 18, SE¼NW¼ (40.00 acres).	13,000.00	Competitive.
I–22804	T. 55N., R. 3E., B.M., sec. 18, NW¼NW¼ (40.00 acres.	1,000.00	Competitive.

When patented, each parcel will be subject to the following reservations:

1. Ditches and canals, Act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945).

2. To all valid existing rights of record.

The previously-described lands are hereby segregated from appropriation under the public land laws including the mining laws for a period of 270 days or until patent is issued, whichever comes first.

Sale Procedures

All three parcels will be sold by competitive bidding procedures as follows: A sealed bid must be submitted in person or by mail prior to the date and time of sale in the Coeur d'Alene District Office located at 1808 North Third Street, Coeur d'Alene, Id 83814. The bid must be sealed in an envelope with the envelope specifying the serial number and the sale date in the lower left hand corner (i.e. "Sealed bid—public land sale I–00000—August 20, 1986"). If two or more valid sealed bids are received for the same amount and are high bid, a supplemental bidding of the high bidders will be held.

Bids must be submitted for at least fair market value and will constitute an application to purchase the mineral estate for parcels I–22270, I–22803 and I–22804. A thirty percent (30%) deposit must accompany each bid. An additional $50 non-returnable mineral conveyance processing fee is required and is an addition to the 30% deposit. Bids will be rejected if the correct amount of deposit and mineral processing fee is not received. The filing fee and deposit must be paid by certified check, money order, bank draft or cashier's check. Bids will be rejected if accompanied by a personal check.

SUPPLEMENTARY INFORMATION: Detailed information concerning the conditions of the sale can be obtained by contacting Robert Olson, Realty Specialist, at (208) 765–7358.

For a period of 45 days from the date of publication of this notice in the Federal Register, interested parties may submit comments to the District Manager, Bureau of Land Management,

1808 North Third Street, Coeur d'Alene, ID 83814. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of Interior.

Dated: May 21, 1986.

John B. O'Brien, III,

Acting District Manager.

BILLING CODE 4310-GG-M

[CA 3589]

Partial Termination of Proposed Withdrawal and Termination of Land; California

May 22, 1986.

Notice of the Forest Services, U.S. Department of Agriculture, application CA 3589 for withdrawal and reservation from appropriation under the mining laws (30 U.S.C. Ch. 2) for use as an administrative site in the Eldorado National Forest, Placer County, California, was published in the Federal Register on July 2, 1976, page 27404, FR Doc. 76-19172 and republished on July 28, 1977, page 38434, FR Doc. 77-21685. The applicant agency has cancelled its application as to the following described lands:

Mount Diablo Meridian

T. 14, R. 14 E.,
Sec. 16, E½NE¼NW¼NW¼, W½NW¼ NW¼NW¼ S½NW¼NW¼.

The area described aggregates 30.00 acres.

Therefore, pursuant to the regulations in 43 CFR 2310.2-1(c), such land at 10:00 a.m. July 7, 1986, will be relieved of the segregative effect on the above mentioned application.

Nancy J. Alex,

Chief, Lands & Locatable Minerals Section, Branch of Lands & Minerals Operations.

[FR Doc. 86-12177 Filed 5-29-86; 8:45 am]

BILLING CODE 4310-40-M

[N-42796]

Realty Action; Leasing of Public Lands for Private Airstrip; Nevada

This Notice of Realty Action involves the leasing of public lands for a private airstrip. The airstrip is for the exclusive use of Empire Farms for commuting to and from the farm. It would also be used by crop dusters which would be used for spraying the farm fields.

The site proposed for leasing under provisions of section 302 of the Federal Land Policy and Management Act (FLPMA) of 1976 and 43 CFR Part 2920 is described as follows:

Mount Diablo Meridian, Nevada

T. 30 N., R. 22 E.,
Sec. 25, E½E½E½SW¼;
Sec. 36, E½E½NE¼NW¼, NE¼NE¼S E¼NW¼.

The proposal would include 32.5 acres.

The proposed parcel is located in the San Emidio Desert immediately adjacent to the Fox Range.

The proposed area would be cleared of vegetation and levelled. A fence would be constructed to prevent large animals from wandering onto the airstrip.

No other proposals will be accepted. The proposed airstrip lies immediately adjacent to Empire Farms private land and housing. Therefore, no other proposals would be acceptable considering adjacent land uses.

The proposal would be authorized by a lease for a term of 20 years. The lease could be renewed at the discretion of the authorized officer.

The proposal would be a working part of Empire Farms. Empire Farms is an operating farm and therefore has the legal, financial, and managerial qualifications necessary to complete the proposed airstrip construction.

The proposed parcel has not been appraised at this time, so no estimate of rent is available. However, rent will not be less than the appraised fair market value.

Operation of the airstrip would require special Federal Aviation Administration stipulations to be followed. Since the proposal includes using the airstrip by crop dusters special requirements for the handling and use of pesticides would be imposed.

For a period of 45 days from the date of publication of this Notice in the Federal Register, interested parties may submit comments to the District Manager, 705 East Fourth Street, Winnemucca, Nevada 89445. In the absence of adverse comments, an application for the proposed use will be processed in accordance with proper application procedures.

Dated: May 20, 1986.

Frank C. Shields,

District Manager.

BILLING CODE 4310-HC-M

Minerals Management Service Alaska OCS Region; Public Hearings; Alaska Offshore

This Notice establishes the location and alternative dates of a public hearing to be held pursuant to section 810 of the Alaska National Interest Lands and Conservation Act (ANILCA).

The Minerals Management Service recently prepared Environmental Assessment (EA) No. AK 86-02, regarding Amoco's request for a waiver of Stipulation No. 4 (Seasonal Drilling Restriction for Protection of Bowhead Whales), Outer Continental Shelf Sale 87, Diapir Field, as applied to the approved exploration plan at the Erik and Belcher Prospects. The Erik Prospect is located approximately 20 kilometers northwest of Kaktovik in the Beaufort Sea.

The EA found, among other things, that the one-time waiver of Stipulation No. 4 for the Erik Prospect "may significantly restrict subsistence uses." Section 810(a)(2) of ANILCA requires that when such a finding is made a public hearing will be held in the vicinity of the area involved. Thus, a hearing will be held on June 26, 1986, from 7:00 p.m. to 9:00 p.m. in the Community Hall in Kaktovik, Alaska. If it is necessary to cancel the June 26 hearing, it will be held June 30, 1986, at the same time and location.

The determinations required by section 810(a)(3) of ANILCA will be made after the hearing is held. Copies of EA No. AK 86-02 can be obtained from the Alaska OCS Region, Leasing and Environment Office, Minerals Management Service, P.O. Box 101159, Anchorage, Alaska 99510, Telephone (907) 261-4080.

Interested individuals, representatives of organizations, and public officials are invited to testify at the hearing. Time limitations may make it necessary to limit the length of oral presentations to 10 minutes. Oral statements may be supplemented by a more complete written statement which may be submitted to a hearing official or by mail. Those unable to testify at the public hearing may make their views known by submitting written comments by mail. Written comments should be addressed to the Regional Director, Alaska OCS Region, Minerals Management Service, P.O. Box 101150, Anchorage, Alaska 99510 and should be received by July 7, 1986.

Alan D. Powers,

Regional Director.

BILLING CODE 4310-MR-M

Development Operations Coordination Document; Exxon Co., U.S.A.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Exxon Company, U.S.A. has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 1619, Block 93, South Pass Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Grand Isle, Louisiana.

DATE: The subject DOCD was deemed submitted on May 21, 1986.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Rules and Production, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Phone (504) 838–0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected States, local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: May 23, 1986.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 30812]

Railroad Operation; Illinois Central Gulf Co.; Exemption for Track Acquisition

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts from the requirements of prior approval, under 49 U.S.C. 11343, *et seq.*, the acquisition and operation of 5.54 miles of track from Consolidated Rail Corporation in Madison and St. Clair Counties, IL, subject to standard employee protective conditions.

DATES: This exemption will be effective on June 30, 1986. Petitions to stay must be filed by June 9, 1986. Petitions for reconsideration must be June 19, 1986.

ADDRESSES: Send petitions referring to Finance Docket No. 30812 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423

(2) Petitioner's representative: Howard D. Koontz, 233 North Michigan Avenue, Chicago, IL 60601.

FOR FURTHER INFORMATION CONTACT: Donald J. Shaw, Jr. (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289–4357 (DC Metropolitan area), or toll-free (800) 424–5403.

Decided: May 22, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley.

James H. Bayne,

Secretary.

DEPARTMENT OF JUSTICE

Joint Newspaper Operating Agreement

Notice is hereby given that the Attorney General has received an application for approval of a joint newspaper operating arrangement involving the two daily newspapers in Detroit, Michigan. The application was filed on May 9, 1986 by the Detroit News, Inc., publisher of the Detroit News, and the Detroit Free Press, Inc., publisher of the Detroit Free Press. The proposed arrangement provides that the printing and commercial operations of both newspapers would be handled by the Detroit Newspaper Agency, a joint venture partnership created by the newspapers. According to the application all the editorial functions and policies of each newspaper would remain separate.

The Newspaper Preservation Act, 15 U.S.C. 1801 et seq., requires that joint newspaper operating arrangements such as that proposed by the Detroit newspapers have the prior written consent of the Attorney General of the United States in order to qualify for the antitrust exemption provided by the Act. Before granting his consent, the Attorney General must find one of the publications is a failing newspaper and that approval of the arrangement would effectuate the policy and purpose of the Act.

In accordance with the Newspaper Preservation Act Regulations, published in the Federal Register on January 2, 1974, 28 CFR Part 48, copies of the proposed agreement and other materials filed by the newspapers in support of the application are available for public inspection in the main offices of the newspapers involved and at the Department of Justice. Any person with views about the proposed arrangement may file written comments stating the reasons why approval should or should not be granted, or requesting that a hearing be held on the application. A request for a hearing must set forth the issues of fact to be determined and the reason that a hearing is believed to be required to determine them. Comments should be filed by mailing or delivering five copies to the Assistant Attorney General for Administration, Justice Management Division, Department of Justice, Washington, DC 20530, and must be received by June 30, 1986.

Replies to any comments filed on or before that date may be filed on or before July 29, 1986.

Dated: May 23, 1986.

W. Lawrence Wallace,

Assistant Attorney General for Administration.

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to Clean Air Act; United States v. Badger Paper Mills, Inc.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on May 12, 1986, a proposed consent decree in *United States v. Badger Paper Mills, Inc.*, Civ. No. 84-C-1236, was lodged with the United States District Court for the Eastern District of Wisconsin. This agreement resolves a judicial enforcement action brought by the United States against Badger Paper Mills, Inc., which alleged violations of the Clean Air Act at Badger's pulp mill in Peshtigo, Wisconsin.

The proposed consent decree provides that Badger will install a scrubber at its pulp mill and implement certain other modifications to its facility system by April 1, 1988. Badger is also subject to an interim control program until it achieves compliance with the final emission limitations established under the Decree. Many of the measures in the Decree have already been completed by Badger. Badger has agreed to pay a civil penalty of $50,000 for past violations. Finally, the decree establishes monitoring and reporting requirements and provides for stipulated penalties for failure to comply with the provisions of the decree.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States v. Badger Paper Mills, Inc.*, D.J. Ref. 90-5-2-1-709.

The proposed consent decree may be examined at the office of the United States Attorney or the regional office of the Environmental Protection Agency as follows:

U.S. Attorney

U.S. Attorney, Eastern District of Wisconsin, Suite 500, 330 Federal Building, 517 E. Wisconsin Avenue, Milwaukee, Wisconsin 53202

EPA

Office of Regional Counsel, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

A copy of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please attach a check in the amount of $2.10, payable to the Treasurer of the United States.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Lodging of Modification of Consent Decree Under the Clean Water Act; United States v. City of Fort Smith and the State of Arkansas

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on May 23, 1986, a proposed modification to Consent Decree in *United States v. City of Fort Smith and the State of Arkansas*, Civil Action No. 83-2121 was lodged with the Western District of Arkansas, Fort Smith Division. The complaint alleges violations of the Clean Water Act and the City's National Pollution Discharge Elimination System permit.

A Consent Decree was entered in this case on June 17, 1983. That decree provided for a comprehensive study of the City's two wastewater treatment facilities, from which a corrective action plan was proposed; provided for a civil penalty for past violations; and established interim effluent limitations for discharges from the plants.

The modification to the Consent Decree requires the City to pay a civil penalty for past violations of the decree and submit a Pretreatment Implementation Status Report of the City's industrial users. The modification additionally revises the interim effluent limits, facility construction schedule, and stipulated penalty provisions of the original decree.

The Department of Justice will receive comments on the proposed modification to Consent Decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistance Attorney General of the Land and Natural Resources Division, Department of

Justice, Washington, DC 20530, and should refer to *City of Fort Smith, Arkansas and the State of Arkansas*, Civil Action No. 83–2121 (W.D. Ark.) DOJ Ref. 90–5–1–1–1782.

The proposed modification to the Consent Decree may be examined at the office of the United States Attorney, U.S. Post Office and Courthouse Building, 6th and Rogers Streets, Fort Smith, Arkansas 72901. Copies of the Consent Decree may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Tenth and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed modification to the decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $.70 (ten cents per page reproduction cost), payable to the Treasurer of the United States.

F. Henry Habicht II,

BILLING CODE 4410–01–M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the redcordkeeping/reporting requirements.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202 523–6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N–1301, Washington, DC 20210. Comments should also be sent to the OMB reviewer, Nancy Wentzler, Telephone 202 395–6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, Washington, DC 20503.

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; All American Trucking et al.

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 9, 1986.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 9, 1986.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC, this 19th day of May 1986.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance; Penick Corp. et al.

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period May 12, 1986–May 16, 1986.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–16,591; Penick Corporation, Newark, NJ

TA–W–16,573; SL Electronics, Westville, NJ

TA–W–16,636; Pelican Fashion, Hialeah, FL

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA–W–16,586; Texaco, Inc., Exploration Dept., Denver, CO

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

Affirmative Determination

TA–W–16,589; Hurletron, Inc., Danville, IL

A certification was issued covering all workers of the firm separated on or after October 18, 1984.

TA–W–16,632; Aeolian Pianos, Foundry Division, Randolph, NY

A certification was issued covering all workers of the firm separated on or after November 7, 1984 and before July 31, 1985.

TA–W–16,543; House Glass Corp., Point Marion, PA

A certification was issued covering all workers of the firm separated on or after November 1, 1984.

TA–W–16,662; Anderson Shake and Shingle, Inc., Cathlamet, WA

A certification was issued covering all workers of the firm separated on or after July 1, 1985.

TA–W–16,579; Fashion Apparel, Jesup, GA

A certification was issued covering all workers of the firm separated on or after October, 4, 1984 and before October 5, 1985.

TA–W–16,601; FMC Corporation, Specialty Chemicals Div., South Charleston, WV

A certification was issued covering all workers of the firm separated on or after August 1, 1985 and before September 30, 1986.

I hereby certify that the aforementioned determinations were issued during the period May 12, 1986–May 16, 1986. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Street NW., Washington, DC 20213, during normal business hours or will be mailed to persons who write to the above address.

Dated: May 20, 1986.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

[TA–W–16,742]

AT&T Information Systems, Pittsburgh, PA; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on November 29, 1985, in response to a worker petition which was filed by the Communications Workers of America on behalf of workers at the Pittsburgh, Pennsylvania service center of AT&T Information Systems. (Up to July 1, 1985, the entire network of service centers was directly under the jurisdiction of AT&T Technologies). In the course of the investigation, it was ascertained that the Pittsburgh, Pennsylvania service center, which included a repair and refurbishing shop and a warehouse, was closed more than one year before the date of the petition, which is September 30, 1985. The repair shop closed in 1983, and the warehouse closed in June 1984.

Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC, this 19th day of May 1986.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Employment Standards Administration

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statues referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the Federal Register, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made in part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPS) document entitled "General Wage Determination Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue NW., Room S-3504, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determination Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the Federal Register are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 80 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for

any or all of the three separate volumes, arranged by State. The subscription cost is $277 per volume. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 23rd day of May 1986.

James L. Valin,

Assistant Administrator.

BILLING CODE 4510-27-M

LIBRARY OF CONGRESS

Copyright Office

[Docket No. RM 86-3]

Privacy Act of 1974; Current Systems of Records; Establishment of New Systems Privacy Act Extract Program

AGENCY: Library of Congress, Copyright Office.

ACTION: Notice of current systems of records and of establishment of new systems of records.

SUMMARY: The Copyright Office last published the full text of its systems of records under the Privacy Act of 1974 (5 U.S.C. 552a) at 47 FR 36996, August 24, 1982; and a notice of establishment of a new system of records at 49 FR 46628, November 28, 1984. This publication of the Copyright Office systems of records reflects changes in the records maintained by the Office in light of its new functions and duties under the Semiconductor Chip Protection Act of 1984, Pub. L. 98-620. New systems CO-21 and CO-22 have been established to cover the registration and recordation files relating to claims of protection in mask works under the 1984 Act.

There has also been a change in an existing system of records. The name of system CO-3 has been changed from "Deposit Accounts System" to "Copyright In-Process System (COINS)." The records in this revised system cover all fee service requests to the Office, and not just information pertaining to deposit accounts. Before September 14, 1985, records pertaining to individuals who requested fee services, and did not maintain deposit accounts with the Office, were kept in index cards in the Master Index Card Files (CO-1). No cards were produced and added to system CO-1 after September 14, 1985. This information is now maintained in automated form in system CO-2.

The titles and addresses of several system managers have been changed and the respective systems revised accordingly. Additional technical changes have been made throughout the text.

DATE: Comments should be received on or before June 30, 1986.

ADDRESSES: Interested persons should submit five copies of their written comments:

If by mail to: Office of General Counsel, Department D.S., Library of Congress, Washington, DC 20540; or

By hand to: Office of General Counsel, Copyright Office, Library of Congress, Room 403, James Madison Memorial Building, 1st and Independence Ave., SE., Washington, DC 20540.

FOR FURTHER INFORMATION CONTACT: Dorothy Schrader, General Counsel, Copyright Office, Library of Congress, Washington, DC 20559; (202) 287-8380.

These systems of records will become effective June 30, 1986, unless the Copyright Office publishes notice to the contrary.

Dated: May 15, 1986.

Ralph Oman,

Register of Copyrights.

Approved:

Daniel J. Boorstin,

The Librarian of Congress.

Prefatory Statement

The Copyright Office serves primarily as an office of public record. Section 705 of title 17 of the United States Code requires the Register of Copyrights to provide and keep in the Copyright Office records of all deposits, registrations, recordations, and other actions taken under title 17, and to prepare indexes of all such records. It also provides that such records and indexes, as well as the articles deposited in connection with completed copyright registrations and retained under the control of the Copyright Office, shall be open to public inspection. Therefore, information from these records and indexes is routinely disclosed to the public. Further, in accordance with 17 U.S.C. 706(a), copies may be made of the public records and indexes of the Copyright Office. In accordance with section 906(b) of title 17, the provisions of chapter 7 relating to the records and publications of the Copyright Office apply to records pertaining to mask works under chapter 9 of title 17 U.S.C.

The source for Copyright Office systems of records are, wherever possible, the individuals to whom the records pertain or their authorized agents. Copyright Office personnel frequently make additions or notations on Office records in the performance of their official duties. To the extent they add information on individuals to Office files, they should be considered sources of records. However, because of the volume of such additions and notations, Copyright Office personnel have not been cited specifically under the heading "source categories" in this Systems' Notice.

CO-1

SYSTEM NAME:

Master Index Card Files.

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington, D.C. 20559.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Remitters of all cash received by the Office, and individuals who submit documents for recordation, whether or not accompanied by a remittance.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of material and remittances received; records of final disposition of cases (in the form of registration numbers or identity of other fee services), the amount charged and/or the amount refunded, if any. Last cards produced 9/14/85.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 705, 708.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Office uses this system: (1) To keep a record of the receipt and disbursement of all incoming cash; (2) to locate cases in-process before the permanent catalog record is available; and (3) to prepare refund vouchers.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

4 x 6 index cards in file cabinets.

RETRIEVABILITY:

Alphabetically by remitter's name.

SAFEGUARDS:

These records are maintained in a room which is generally restricted to authorized personnel and locked during non-working hours. Limited, provisional public access to these records is allowed from 10 a.m. to 11 a.m., Monday through Friday, except legal holidays.

RETENTION AND DISPOSAL:

Five Years from 9/14/85.

SYSTEM MANAGER(S) AND ADDRESS:

Section Head, Mail and Correspondence Control Section, Receiving and Processing Division, Copyright Office, Library of Congress, Washington, DC 20559.

NOTIFICATION PROCEDURE:

Inquiries about an individual's record should be in writing addressed to the Supervisory Copyright Information Specialist, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURE:

Requests from individuals should be in writing addressed to the official designated under "Notification procedure".

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204.

RECORD SOURCE CATEGORIES:

Remitters or their authorized agents.

CO-2

SYSTEM NAME:

Copyright In-Process System (COINS).

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington, DC 20559

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who make fee service requests to the Office, including individuals who maintain deposit accounts.

CATEGORIES OF RECORDS IN THE SYSTEM:

If remittance received: Name of remitter, appropriate cross-references, title of work, amount received, amount used, class of application or fee service code, number of copies, nature of deposit code.

If deposit account: Name of deposit account holder, title of work, debit, credit notation, old balance, new balance, class of application or fee service code, number of copies, nature of deposit code.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 705, 708.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Office uses these records: (1) To record copyright fee charges, reconcile deposits of fees and generate accounting reports; (2) to create a record of receipt of all fee service requests; (3) to determine the status of recently submitted requests, including the registration number assigned; (4) to send periodic statements to deposit account holders of their transactions with the Office; (3) to notify deposit account holders that their accounts have become depleted.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records kept from November 1, 1977. All such records are on computer discs and tapes.

RETRIEVABILITY:

By name of remitter, title, deposit account holder, deposit account number, and transaction identification number.

SAFEGUARDS:

Records are stored on tapes and discs in a room which is restricted to authorized personnel and locked during nonworking hours. Computer access is by functional passwords which are restricted to personnel who require access to these records in the performance of their official duties.

RETENTION AND DISPOSAL:

The computerized system is used to store transactions for at least six months, at which time the record is transferred to microfilm for permanent retention.

SYSTEM MANAGER(S) AND ADDRESS:

Section Head, Fiscal Control Section, Receiving and Processing Division, Copyright Office, Library of Congress, Washington, DC 20559.

NOTIFICATION PROCEDURE:

Inquiries about an individual's record should be in writing addressed to the Supervisory Copyright Information Specialist, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURE:

Requests from individuals should be in writing addressed to the official designed under "Notification procedure."

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204.

RECORD SOURCE CATEGORIES:

Individuals who request fee services, including deposit account holders and Office charge sheets.

CO-3

SYSTEM NAME:

Copyright Claims Registration Files

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington, DC 20559; Landover Center Annex, 1701 Brightseat Road, Landover, Md. 20785; Washington National Records Center, Washington, DC 20409.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Authors and other copyright owners, copyright claimants, applicants for registration or copyright renewal, or the authorized agents of such individuals.

CATEGORIES OF RECORDS IN THE SYSTEM:

Names and addresses of copyright claimants; certified statements pertaining to authorship, creation, publication, and other registration-related information; general correspondence pertaining to registration of claims to copyright.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 705, 708.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Office uses these records: (1) In the preparation of search reports at the request of a member of the public; (2) to respond to requests by the public for information; (3) to correspond with

applicants or otherwise process applications and related materials; (4) to monitor and control the flow of work in the Office; and (5) to establish and maintain a public record. It is the general policy of the Copyright Office to deny direct public inspection of in-process application forms and correspondence, and any related material forming part of a pending application, except upon the request of the copyright claimant or his/her authorized representative. However, information about the material facts alleged in the application will be given to the public upon request. Once registration of a copyright claim has been completed or refused at the final agency level, the registration and correspondence records pertaining to that claim are open for public inspection from 8:30 a.m. to 5 p.m., Monday through Friday, except legal holidays.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manila envelopes in file cabinets and on shelves; index cards in file cabinets; bound volumes and microform computer tapes and discs.

RETRIEVABILITY:

Registration number, cross-referenced by name of author, name of claimant, and title of work in the Copyright Card Catalog and post-1977 automated catalog files; alphabetically by author's pseudonym (prior to 1938) in Pseudonym Card File; on computer terminals by correspondence control number, remitter's name and any entered cross-references; in the case of physical files, by correspondence control number on a bar code label attached to each file.

SAFEGUARDS:

With the exception of the Copyright Card Catalog and post-1977 automated catalog files, these records are maintained in areas that are restricted to authorized personnel. All records in this system are maintained in areas that are locked during nonworking hours.

RETENTION AND DISPOSAL:

Retained permanently.

SYSTEM MANAGER(S) AND ADDRESS:

Section Head, Renewals Section, Examining Division, Copyright Office, Library of Congress, Washington, DC 20559; Section Head, Mail and Correspondence Control Section, Receiving and Processing Division, Copyright Office, Library of Congress, Washington, DC 20559; Section Head, Records Storage Section, and Section Head, Card Catalog Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559, Section Head, Technical Support, Cataloging Division, Copyright Office, Library of Congress, Washington, DC 20559.

NOTIFICATION PROCEDURE:

Inquiries about an individual's record should be in writing addressed to the Supervisory Copyright Information Specialist, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURE:

Requests from individuals should be in writing addressed to the official designated under "Notification procedure."

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204.

RECORD SOURCE CATEGORIES:

Remitters or their authorized agents.

CO-4

SYSTEM NAME:

Miscellaneous Correspondence Files.

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington, DC 20559.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have: (1) Written to the Copyright Office for general information about copyright; or (2) request fee services such as search reports, copies of records or additional certificates of copyright registration.

CATEGORIES OF RECORDS IN THE SYSTEM:

General correspondence, including, where appropriate, the requester's name and action taken by the Office.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 407–410, 705, 706, 708

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Office uses these records: (1) To maintain a record of correspondence with individuals who address inquiries to the Office and with individuals who request fee services; (2) to record the removal and return of documents in a file by Office personnel; and (3) to control and monitor the processing of requests.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manila envelopes in file cabinets and on shelves, and, on occasion, 3 x 5 paper slips in a file cabinet.

RETRIEVABILITY:

Alphabetically by correspondent's name.

SAFEGUARDS:

These records are maintained in areas that are restricted to authorized personnel and locked during nonworking hours.

RETENTION AND DISPOSAL:

Some files are retained indefinitely, while others are only retained for 3 years.

SYSTEM MANAGER(S) AND ADDRESS:

Section Head, Certification and Documents Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, D.C. 20559; Section Head, Mail and Correspondence Control Section, Receiving and Processing Division, Copyright Office, Library of Congress, Washington, DC 20559.

NOTIFICATION PROCEDURE:

Inquiries about an individual's record should be in writing addressed to the Supervisory Copyright Information Specialist, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURE:

Requests from individuals should be in writing addressed to the official designated under "Notification procedure."

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204.

RECORD SOURCE CATEGORIES:

Individual to whom the record pertains, or their authorized agent.

CO-5

SYSTEM NAME:

Recorded Documents Files.

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington, DC 20559.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who are parties to, or have submitted for recordation,

assignments, licenses, notices of termination of transfer, and other documents pertaining to a copyright; notices of error in the name in a copyright notice; authors of anonymous and pseudonymous works in instances where any person having an interest in the copyright in such a work submits a statement identifying one or more authors of the work; authors of works in instances where any person having an interest in the copyright in a particular work submits a statement of the death of the author or a statement that the author is still living on a particular date.

CATEGORIES OF RECORDS IN THE SYSTEM:

Assignments, licenses, notices of termination of transfer, wills, statements of abandonment of copyright, affidavits (such as a statement with respect to the authorship of a work), agreements or contracts, and other documents pertaining to copyright ownership, statements of identity of an anonymous or pseudonymous author, statements of the date of death of an author or that the author is still living on a particular date, and notices of error in the name in a copyright notice.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 203(a)(4), 205, 302, 304(c), 408(a)(2), 705.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records of recorded documents are open to public inspection from 8:30 a.m. to 5 p.m., Monday through Friday, except legal holidays. In addition, the Office uses these records to compile an index to documents received for recordation. The index to documents received and recorded through 1977 is located in the Copyright Card Catalog. Since January 1, 1978, access to assignment documents recorded after 1977 is available in the automated document catalog file.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Prior to recordation, records are maintained in manila envelopes in file cabinets. Once recorded, original documents are microfilmed and returned to the remitter. Copies of copyright assignments and related documents received prior to 1964 are in bound volumes as well as on microfilm.

RETRIEVABILITY:

By the date the Office received the document and cross-referenced it in the Copyright Card Catalog or automated document catalog file by individual names and titles of works.

SAFEGUARDS:

Prior to recordation, documents and related materials are maintained in a room which is restricted to authorized personnel. All records are maintained in areas that are locked during nonworking hours.

RETENTION AND DISPOSAL:

Retained permanently.

SYSTEM MANAGER(S) AND ADDRESS:

Supervisor, Documents Unit, Technical Support Section, Cataloging Division, Copyright Office, Library of Congress, Washington, DC 20559; and Section Head, Reference and Bibliography Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

NOTIFICATION PROCEDURE:

Inquires about an individual's record should be in writing addressed to the Supervisory Copyright Information Specialist, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURES:

Requests from individuals should be in writing addressed to the official designated under "Notification procedure."

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204.

RECORD SOURCE CATEGORIES:

Individual to whom the record pertains, such individual's authorized agent, and other parties to the document recorded, or such parties' authorized agents, as well as individuals having an interest in the copyright in a work which is the subject of the document submitted for recordation.

CO-6

SYSTEM NAME:

Motion Picture Agreement Files.

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington, DC 20559.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Copyright depositors who have agreed to return to the Library one archival quality copy of any motion picture returned to the depositor if the Library of Congress requests such return within two years of the date of deposit.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records contain the name and address of the depositor and the date on which the Motion Picture Agreement was executed by the Librarian of Congress.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 407, 705.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Office uses these records to determine if the Library of Congress has a Motion Picture Agreement with the depositor of a motion picture. If the Library has such an agreement, the copy of the motion picture submitted will be returned to the remitter if a written request has been made. In the absence of such an agreement, the Office will retain the copy.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Upon receipt of these Agreements, the Deposits and Acquisitions Division transcribes some of the information in the agreements onto 3 x 5 cards, copies of which are then sent to the Performing Arts Section of the Copyright Office Examining Division.

RETRIEVABILITY:

Alphabetically by depositor's name.

SAFEGUARDS:

These records are maintained in a room which is restricted to authorized personnel and locked during nonworking hours.

RETENTION AND DISPOSAL:

Retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Copyright Acquisitions Section, Deposits and Acquisitions Division, Copyright Office, Library of Congress, Washington, DC 20559.

NOTIFICATION PROCEDURE:

Inquiries about an individual's record should be in writing addressed to the Supervisory Copyright Information Specialist, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURES:

Request from individuals should be in writing addressed to the official designated under "Notification procedure."

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204.

RECORD SOURCE CATEGORIES:

Depositors' or their authorized agents.

CO-7

SYSTEM NAME:

Deposit Recordation File.

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington, DC 20559.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who, without simultaneously applying for copyright registration, have submitted deposit copies in accordance with the provisions of 17 U.S.C. 407.

CATEGORIES OF RECORDS IN THE SYSTEM:

Title of work, edition statement, imprint, collation, in notice statement, depositor, depositor's address, number of copies received, and date received.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 407, 705.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Office uses these records: (1) To keep a record of compliance with 17 U.S.C. 407; (2) to locate and correspond with those who have published works with notice of copyright, but who have not deposited the required copies; (3) to prepare weekly statistics on the number and nature of deposits received; and (4) to prepare search reports at the request of a member of the public.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

4 x 6 cards in the cabinet and visible file.

RETRIEVABILITY:

Alphabetically by depositor's name, author's name, and title of work.

SAFEGUARDS:

These records are maintained in a room which is restricted to authorized personnel and locked during nonworking hours.

RETENTION AND DISPOSAL:

Retained permanently.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Deposits and Acquisitions Division, Copyright Office, Library of Congress, Washington, DC 20559.

NOTIFICATION PROCEDURE:

Inquires about an individual's record should be in writing addressed to the Supervisory Copyright Information Specialist, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURES:

Requests from individuals should be in writing addressed to the official designated under "Notification procedure."

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204.

RECORD SOURCE CATEGORIES:

Deposit copies submitted.

CO-8

SYSTEM NAME:

Compliance Activity File.

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington, DC 20559.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals from whom the Office has demanded, in accordance with 17 U.S.C. 407, copies of works published with a notice of copyright in the United States. It also includes individuals whose works were found to be deposited in accordance with 17 U.S.C. 407 prior to a demand.

CATEGORIES OF RECORDS IN THE SYSTEM:

Author's name, title of work, publisher, copyright claimant, dates of initial and follow-up action.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 407, 705.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Office uses these records to avoid sending out duplicate correspondence.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

4 × 6 index cards in a file cabinet.

RETRIEVING:

Alphabetically by title and claimant's name.

SAFEGUARDS:

These records are maintained in a room which is restricted to authorized personnel and locked during nonworking hours.

RETENTION AND DISPOSAL:

Retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Deposits and Acquisitions Division, Copyright Office, Library of Congress, Washington, DC 20559

NOTIFICATION PROCEDURE:

Inquiries about an individual's record should be in writing addressed to the Supervisory Copyright Information Specialist, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURES:

Requests from individuals should be in writing addressed to the official designated under "Notification procedure."

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204.

RECORD SOURCE CATEGORIES:

Printed bibliographies, publishers' catalogs, citations provided by the Library of Congress, published citations of the work, and Office personnel who have personally observed the item cited.

CO-9

SYSTEM NAME:

Office Mailing Lists.

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington, DC 20559.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have frequent contact with the Copyright Office, or have asked to receive all Office information circulars, announcements, and other printed material prepared by the Office. Attorneys who are listed in the annual edition of the "American Bar Association Section of Patent, Trademark, and Copyright Law Committees" as members of the copyright-related committees are also included.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Names and address.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 707.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Office uses these records to address and mail Office information

circulars, announcements and other printed material. The regulations of the Office now provide that these mailing lists will not be disclosed to the public.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manila folders in a file cabinet and computer print out sheets in a binder, stored in a desk drawer.

RETRIEVABILITY:

Alphabetically by name.

SAFEGUARDS:

These records are maintained in a room which is restricted to authorized personnel and locked during nonworking hours.

RETENTION AND DISPOSAL:

Individuals may request that their names be dropped from the list. The list is verified and updated periodically.

SYSTEM MANAGER(S) AND ADDRESS:

Section Head, Publications Section, Information and Reference Division, Copyright Office, Library of Congress Washington, DC 20559.

NOTIFICATION PROCEDURE:

Inquiries about an individuals record should be in writing addressed to the Supervisory Copyright Information Specialist, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURE:

Requests from individuals should be in writing addressed to the offical designated under "Notification procedure."

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204.

RECORD SOURCE CATEGORIES:

Individuals to whom the record pertains, Copyright Office records, trade reference sources, and annual edition of "American Bar Association Section of Patent Trademark and Copyright Law Committee."

CO-10

SYSTEM NAME:

Freedom of Information Act and Privacy Act Requests and Disclosures File.

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington DC 20559.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have submitted Freedom of Information Act and/or Privacy Act requests in accordance with 37 CFR Parts 203 and 204.

CATEGORIES OF RECORDS IN THE SYSTEM:

Requests submitted under the Freedom of Information Act and/or Privacy Act; requests submitted under the Privacy Act for correction or amendment of Office records; and copies of the Office response to these requests.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 701.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Office uses these records: (1) To maintain an accounting of Freedom of Information Act and/or Privacy Act requests and Office responses to these requests; (2) to maintain an accounting of requests submitted under the Privacy Act to correct or amend a record pertaining to an individual and the Office responses to these requests; (3) to compile the annual report required by the Freedom of Information Act; and (4) to review and compile the annual report required by the Privacy Act.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manila folders in a file cabinet.

RETRIEVABILITY:

Alphabetically by requester's name.

SAFEGUARDS:

These records are maintained in a room which is restricted to authorized personnel and locked during nonworking hours.

RETENTION AND DISPOSAL:

Retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Section Head, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

NOTIFICATION PROCEDURE:

Inquiries about an individual's record should be in writing addressed to the Supervisory Copyright Information Specialist, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURES:

Requests from individuals should be in writing addressed to the official designated under "Notification procedure."

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204.

RECORD SOURCE CATEGORIES:

Individuals to whom the record pertains, and Copyright Office records.

CO-11

SYSTEM NAME:

Address File.

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington, DC 20559.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Copyright claimants of record whose address has been requested by a member of the public.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name and address of claimant of record, year date of address.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 705.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Office uses these records to facilitate searching for address of copyright claimants when such addresses are requested by a member of the public.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

3 x 5 index cards in file box.

RETRIEVABILITY:

Alphabetically by claimant of record's name.

SAFEGUARDS:

These records are maintained in a room which is restricted to authorized personnel and is locked during nonworking hours.

RETENTION AND DISPOSAL:

Retained indefinitely; however, obsolete addresses are disposed of as more current addresses are obtained.

SYSTEM MANAGER(S) AND ADDRESS:

Section Head, Reference and Bibliography Section, Information and Reference Division, Copyright Office,

Library of Congress, Washington, DC 20559.

NOTIFICATION PROCEDURE:

Inquiries about an individual's record should be in writing addressed to the Supervisory Copyright Information Specialist, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURES:

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204.

RECORD SOURCE CATEGORIES:

Copyright claimants, their authorized agents, phone books, and city directories.

CO-12

SYSTEM NAME:

Bibliographic File.

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington, DC 20559.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Well-known or prolific authors or authors of well-known works, in those instances where the Office determines that it would be in the public interest to preserve published copyright-related information about such authors.

CATEGORIES OF RECORDS IN THE SYSTEM:

Newspaper clippings, magazine articles, obituaries, book jackets and similar information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 705.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Office uses these records: (1) In the preparation of search reports compiled at the request of a member of the public; and (2) in the compilation of an index to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Folders in file cabinets.

RETRIEVABILITY:

Alphabetically by author's name, law firm's name, or title of work.

SAFEGUARDS:

These records are maintained in a room which is restricted to authorized personnel and locked during nonworking hours.

RETENTION AND DISPOSAL:

Retained permanently.

SYSTEM MANAGER(S) AND ADDRESS:

Section Head, Reference and Bibliography Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

NOTIFICATION PROCEDURE:

Inquiries about an individual's record should be in writing addressed to the Supervisory Copyright Information Specialist, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURE:

Requests from individuals should be in writing addressed to the official designated under "Notification procedure."

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204

RECORD SOURCE CATEGORIES:

Magazines, newspapers, book jackets, trade reference sources, Copyright Card Catalog, applications and other materials.

CO-13

SYSTEM NAME:

Secondary Transmissions by Cable Systems: Initial Notice of Identity and Changes File.

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington, DC 20557.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Cable system owners who submit notices of identity for recordation in the Copyright Office, notices of ownership or control change, or notices of change in the signal carriage complement of cable systems.

CATEGORIES OF RECORDS IN THE SYSTEM:

Statement of identity and address of the person who owns the secondary transmission service, name and location of the primary transmitter or transmitters whose signals are regularly carried, changes in any of the preceding categories, and related correspondence.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 11(d)(1).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Office uses these records: (1) In the preparation of search reports compiled at the request of a member of the public; and (2) in the preparation of internal statistical reports; and (3) to establish and maintain a public record.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manila folders in locked file cabinet and microfilm (microjackets).

RETRIEVABILITY:

Alphabetically by legal name of the owner of the cable system.

SAFEGUARDS:

These records are maintained in a room restricted to authorized personnel and locked during nonworking hours.

RETENTION AND DISPOSAL:

Retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Licensing Division, Copyright Office, Library of Congress, Washington, DC. 20557.

NOTIFICATION PROCEDURE:

Inquiries about an individual's record should be in writing addresses to the Supervisory Copyright Information Specialist, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20557.

RECORD SOURCE CATEGORIES:

Licensing Division personnel, the Copyright Office General Counsel and the Register of Copyrights.

CO-21

SYSTEM NAME:

Mask Work Registration Files.

SYSTEM LOCATION:

Copyright Office, Library of Congress, Washington, DC 20559.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Mask work owners, applicants for mask work registration, or the authorized agents of such individuals.

CATEGORIES OF RECORDS IN THE SYSTEM:

Names and addresses of mask work owners; certified statements pertaining to creation, commercial exploitation, ownership, and other registration-related information; general correspondence pertaining to registration of mask work claims.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 908(b), 705.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Office uses these records: (1) In the preparation of search reports at the request of a member of the public; (2) to respond to requests by the public for information; (3) to correspond with applicants or otherwise process

applications and related materials; (4) to monitor and control the flow of work in the Office; and (5) to establish and maintain a public record. It is the general policy of the Copyright Office to deny direct public inspection of in-process application forms and correspondence, and any related material forming part of a pending application, except upon the request of the mask work owner or his/her authorized representative. However, information about the material facts alleged in the application will be given to the public upon request. Once registration of a claim to mask work protection has been completed or refused at the final agency level, the registration and correspondence records pertaining to that claim are open for public inspection from 8:30 a.m. to 5:00 p.m., Monday through Friday, except legal holidays.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manila envelopes in file cabinets and on shelves; computer tapes and discs; and microform.

RETRIEVABILITY:

Registration number, cross-referenced by name of owner and title of work in the automated or microform catalog files; by correspondence control number, applicant's name, title of work, and any entered cross-references in the automated correspondence management system; by fee service number, applicant's name, title of work, and any entered cross-references in the automated receipts in-process system; in the case of physical files, by correspondence control number on a bar code label attached to each file, for in-process files, and by applicant's name for closed correspondence files.

SAFEGUARDS:

Automated records are available at computer terminals located throughout the Library of Congress. Physical records are maintained in areas that are restricted to authorized personnel. All records in this system are maintained in areas that are locked during nonworking hours.

RETENTION AND DISPOSAL:

Retained permanently.

SYSTEM MANAGER AND ADDRESS:

Supervisor, Mask Work Unit, Examining Division, Department MW, Library of Congress, Washington, DC 20540.

NOTIFICATION PROCEDURE:

Inquiries about an individual's record should be in writing addressed to the Supervisory Copyright Information Specialist, Information Section, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURES:

Requests from individuals should be in writing addressed to the official designated under "Notification procedure".

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204.

RECORD SOURCE CATEGORIES:

Applicants or their authorized agents.

CO-22

SYSTEM NAME:

Mask Work Recorded Documents Files.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who are parties to, or have submitted for recordation, assignments, licenses, and other documents pertaining to a mask work.

CATEGORIES OF RECORDS IN THE SYSTEM:

Assignments, licenses, wills, agreements or contracts, and other documents pertaining to mask works.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

17 U.S.C. 908(b), 705.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM:

Records of recorded documents are open to public inspection from 8:30 a.m. to 5:00 p.m., Monday through Friday, except legal holidays. In addition, the Office uses these records to compile an index to recorded documents, which is interfiled in the automated catalog files.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Prior to recordation, records are maintained in manila envelopes in file cabinets. Once recorded, original documents are microfilmed and returned to the applicant. Mask work documents appear on separate reel(s) of microfilm; they are not interspersed with copyright-related documents.

RETRIEVABILITY:

Before recordation, by date the Office received the document; after recordation, cross-referenced in the automated catalog files by names of parties and titles of works.

SAFEGUARDS:

Prior to recordation, documents and related materials are maintained in a room which is restricted to authorized personnel. Automated records are available at computer terminals located throughout the Library of Congress. All records are maintained in areas that are locked during nonworking hours.

RETENTION AND DISPOSAL:

Retained permanently.

SYSTEM MANAGER(S) AND ADDRESS:

Supervisor, Documents Unit, Cataloging Division, Copyright Office, Library of Congress, Washington, DC 20559.

NOTIFICATION PROCEDURE:

Inquiries about an individual's record should be in writing and addressed to the Supervisory Copyright Information Specialist, Information and Reference Division, Copyright Office, Library of Congress, Washington, DC 20559.

RECORD ACCESS PROCEDURES:

Requests from individuals should be in writing addressed to the official designated under "Notification procedure".

CONTESTING RECORD PROCEDURES:

See rules published in 37 CFR Part 204.

RECORD SOURCE CATEGORIES:

Individual to whom the record pertains, such individual's authorized agent, and other parties named in the document recorded, or such parties' authorized agents, as well as individuals having an interest in the mask work which is the subject of the document submitted for recordation.

This meeting will be open to the public on a space available basis. The topics will include guidelines, policy and the Five-Year Plan.

If you need accommodations due to a disability, please contact the Office for Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, 202/682–5532, TTY 202/682–5496 at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call 202/682–5433.

Dated: May 23, 1986.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537–01–M

Media Arts Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Media Arts Advisory Panel (Radio Programming in the Arts Section) to the National Council on the Arts that was to be held on May 29, 1986, from 9:00 a.m.–5:30 p.m. in room 716 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC has been changed. This meeting will not be held on June 12, 1986, from 9:00 a.m.–5:30 p.m. in room 716 of the Nancy Hanks Center, 1100 Pensylvania Avenue, NW., Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Dated: May 23, 1986.

John H. Clark,

Director, Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537–01–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards Nuclear Regulatory Commission; Meeting Agenda

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on June 5–7, 1986, in Room 1046, 1717 H Street, NW., Washington, DC. Notice of this meeting was published in the Federal Register on May 19, 1986.

Thursday, June 5, 1986

8:30 A.M.–8:45 P.M.: Report of ACRS Chairman (Open)—The ACRS Chairman will report briefly regarding items of current interest to the Committee.

8:45 A.M.–12:30 P.M.: South Texas Project, Units 1 and 2 (Open/Closed)—The members will hear and discuss the reports of its subcommittee, the NRC Staff, and the Applicant regarding the request for an operating license for this facility.

Portions of this session will be closed as required to discuss Proprietary Information applicable to this facility and detailed security arrangements for this project.

1:15 P.M.–1:45 P.M.: Topics for Meeting with NRC Commissioners (Open/Closed)—The members will discuss the contents of its report of January 14, 1986 to the NRC regarding the Final Design Approval of the GESSAR II BWR/6 Nuclear Island Design Applicable to Future Plants.

Portions of this session will be closed as necessary to discuss Proprietary Information and detailed arrangements for plant security for this class of nuclear plants.

2:00 P.M.–3:30 P.M.: Meeting with NRC Commissioners (Open/Closed)—The members of the committee will meet with the NRC Commissioners to discuss the Committee's report of January 14, 1986 regarding the GESSAR II Final Design Approval as noted above.

Portions of this session will be closed as necessary to discuss Proprietary Information and detailed arrangements for plant security for this class of nuclear plants.

3:45 P.M.–5:45 P.M.: NRC Safety Research Program (Open)—The members will discuss portions of the proposed ACRS report to the NRC regarding the proposed safety research budget for FY 1988–89.

5:45 P.M.–6:45 P.M.: Future ACRS Activities (Open/Closed)—The members will discuss anticipated ACRS subcommittee activity, and proposed items for consideration by the full Committee.

Portions of this session will be closed as required to discuss National Security Information.

Friday, June 6, 1986

8:30 A.M.–10:30 A.M.: Recent Operating Experiences at Nuclear Facilities (Open/Closed)—the members will hear and discuss the reports of its subcommittee, and representatives of the NRC staff. Representatives of the nuclear industry will participate as appropriate.

Portions of this session will be closed to discuss Proprietary Information and detailed security arrangements for the facilities being discussed.

10:45 A.M.–12:00 Noon: Reactivation of Deferred and Cancelled Nuclear Plants (Open)—The members will hear a briefing regarding major issues in reactivation of nuclear power plant construction projects.

1:00 P.M.–1:30 P.M.: ACRS Subcomittee Activities (Open)—The members will hear and discuss a report by its subcommittee on thermal Hydraulic Phenomena regarding proposed NRC activities in this area.

1:30 P.M.–3:00 P.M.: NRC Safety Research Program (Open)—The members will continue discussion of the Committee's proposed report to NRC regarding the proposed NRC safety research program for FY 1988–89.

3:15 P.M.–5:15 P.M.: Source Term for Nuclear Power Plant Accidents (Open)—The members will hear and discuss proposed revisions to the accident source term used in evaluation of nuclear power plants.

5:15 P.M.–5:45 P.M.: ACRS Subcommittee Activities (Open)—The members will hear and discuss the report of its Management Subcommittee regarding procedural topics considered during its subcommittee meeting on June 4, 1986.

5:45 P.M.–6:30 P.M.: Appointment and Activities of ACRS Members (Open/Closed)—The members will discuss the report of its Nominating Panel regarding candidates nominated for appointment to the ACRS. The members will also discuss the proposed reappointment of a member of the Committee and the non-ACRS activities of ACRS members.

Portions of this session will be closed as necessary to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy.

Saturday, June 7, 1986

8:30 A.M.–12:30 P.M.: Preparation of ACRS Reports (Open/Closed)—The members will discuss proposed reports regarding matters considered during this meeting.

Portions of this session will be closed as necessary to discuss Proprietary Information, detailed security arrangements, National Security Information, and information concerning initiation, conduct, or disposition of a formal agency adjudication applicable to the matters being discussed.

1:30 P.M.–2:00 P.M.: ACRS Procedures (Open)—The members will discuss proposed changes to ACRS Bylaws and procedures for the conduct of ACRS activities.

2:00 P.M.–3:00 P.M.: Miscellaneous (Open/Closed)—The members will hear a report by a member of the Committee regarding participation on an ANS Panel to discuss ACRS recommendations on severe accidents. The Committee will also complete discussion of matters considered during this meeting.

Portions of this session will be closed as necessary to discuss controlled and classified information as noted above.

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 2, 1985 (50 FR 191). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director, R.F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with section 10(d) Pub. L. 92–463 that it is necessary to close portions of this meeting as noted above to discuss Proprietary Information (5 U.S.C. 552b(c)(4)) applicable to the facilities being discussed, detailed information related to the security arrangements at a nuclear power plant (5 U.S.C. 552b(c)(3)), information the release of which would represent a clearly unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)), classified restructed data (5 U.S.C. 552b(c)(3)), and information concerning initiation, conduct, or disposition of a formal agency adjudication (5 U.S.C. 552b(c)(10)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202/634–3265), between 8:15 A.M. and 5:00 P.M.

Dated: May 27, 1986.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 86–12154 Filed 5–29–86; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-369 and 50-370]

Duke Power Co.; Consideration of Issuance of Amendments to Facility Operating Licenses and Proposed No Significant Hazards Consideration and Determination

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. NPF–9 and NPF–17 issued to Duke Power Company for operation of the McGuire Nuclear Station, Units 1 and 2, located in Mecklenburg County, North Carolina.

The amendments would authorize on an emergency basis a one-time release of the existing contents of the Conventional (non-radioactive) Wastewater Basin, containing trace amounts of tritium, into the Catawba River. Technical Specifications (TS) 3.11.1.1 and its referenced Figure 5.1–4, "Site Boundary for Liquid Effluents" define the authorized discharge point for radioactive material released in liquid effluents to unrestricted areas as being only to Lake Norman. The proposed authorization would be accomplished by the addition of a footnote to TS Figure 5.1–4 at the discharge point for the Conventional Wastewater Basin into the Catawba River, stating that this discharge point is authorized for a one-time discharge of water which contains trace amounts of tritium in addition to the normally processed effluents of the Waste Water Collection Basin, effective the date of Commission approval. The change would not affect any existing limits or procedures regarding the processing of conventional (i.e., non-radioactive) contaminants.

These revisions to the technical specifications would be made in response to the licensee's application for amendments dated May 20, 1986.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

An unexpected release of tritium into the Conventional Wastewater Basin has created the need for prompt action as proposed above for two reasons, both stemming from the fact that the Basin is

nearly full. First, excessive rainfall could result in an overflow of the Basin, resulting in an uncontrolled release. Second, lack of available volume in the Basin will impair the station's ability to process conventional (non-radiological) liquid waste as required by the NPDES permit issued by the State of North Carolina and, thereby, result in an extended plant outage.

Non-radioactive chemical wastes from the McGuire Station (e.g., turbine building drains, water treatment system filter backwashes, demineralizer regeneration wastes) are routed through the Conventional Waste Water Treatment System (CWWTS) and subjected to physicochemical treatment. The CWWTS includes a Basin of two parallel stream settling ponds with a capacity of about 2 million gallon each. Upon completion of treatment, the discharges from this system are released to the Catawba River downstream of Cowans Ford Dam. The discharge from the CWWTS may also be mixed with water from the Standby Nuclear Service Water Pond to dilute waste concentrations prior to discharge to the river. Waste containing radioactive material is not intended for the CWWTS; rather such waste is routed to separate Liquid Radwaste Systems (see FSAR Section 11.2) for recycling, processing and disposal.

By letter dated May 20, 1986, the licensee noted that tritium, but no other radionuclide, had entered the Basin and had subsequently been diluted to a concentration of 1.4×10^{-6} microcuries per milliliter. The licensee proposed to discharge the 4 million gallons of water in the Basin, along with its tritium, to the river at a rate of 500 gpm over a duration of 133 hours. The Basin discharge would also be mixed by equal flow from the Standby Nuclear Service Water Pond, such that the tritium concentration at the river release point would be 7×10^{-8} microcuries per milliliter. This concentration is well within the limit of 3×10^{-3} microcuries per milliliter specified by 10 CFR 20.106 and associated Appendix B, table II, for tritium concentrations in water.

The NRC has evaluated doses resulting from the proposed discharge using models and assumptions in Regulatory Guide 1.109, "Calculation of Annual Doses to Man from Routine Release of Reactor Effluents for the Purpose of Evaluating Compliance with 10 CFR Part 50, Appendix I." For tritium the dominant exposure pathway is drinking water. The fish consumption pathway also makes a small contribution to the dose. Other potential pathways (such as due to irrigation or swimming) are negligible because of the properties of tritium, i.e. tritium does not accumulate either in the food chain or the body and it does not constitute a significant source of external radiation. The total body dose to a child or infant assumed to drink water from the river release point and to consume fish located at this release point was calculated by the Commission to be about 0.01 millirem. Corresponding doses to an adult or teenager were lower (i.e., about 0.008 and 0.006 millirem, respectively). Section II.A of Appendix I to 10 CFR Part 50 states that the calculated annual total quantity of all radioactive material above background to be released from each nuclear power reactor to unrestricted areas should not result in an estimated annual dose or dose commitment from liquid effluents from any individual in an unrestricted area from all pathways of exposure in excess of 3 millirems to the total body. Because the doses calculated for the proposed river discharge represent only a small contribution to this annual dose criterion of Appendix I, we find the proposed action to be consistent with Appendix I criterion.

The licensee calculated similar but lower doses in its letter of May 20, 1986. Unlike the licensee's calculations, the NRC results conservatively assume no credit for dilution of the tritium concentration within the river. Nevertheless, we find that the discharge concentrations of tritium and resultant does determined by the NRC are sufficiently low as to represent no significant safety concern.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission has provided guidance for the application of these criteria by providing examples of amendments that are considered not likely to involve significant hazards considerations (48 FR 14870). The proposed changes do not match any of the examples. However, based upon our review of the amendment requests and our independent dose calculations discussed above, we find that the proposed action is limited to the one-time release of very low concentrations of tritium within the Conventional Wastewater Basin which are well below limits permitted by 10 CFR Part 20, and if discharged to the Catawba River as proposed, would result in insignificant doses consistent with the guidance of Appendix I to 10 CFR Part 50. No changes in plant design, limiting safety system setpoints or allowable values, limiting conditions for operations or plant operating procedures would result from the proposed action. Therefore, operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

Therefore, based on these considerations and the three criteria given above, the Commission has made a proposed determination that the amendment request involves no significant hazards consideration.

The Commission has determined that failure to act in a timely way would result in extending shutdown because those activities which result in the generation of or need to process conventional (non-radiological) waste must be curtailed or deferred due to the inability to process conventional waste in compliance with the NPDES permit. The potential for uncontrolled release of the Basin with its tritium due to overflow as a result of rain also exists. Therefore, the Commission has insufficient time to issue its usual 30-day notice of the proposed action for public comment.

Normally, the Commission will not issue the amendment until the expiration of the notice period. However, should circumstances change during the notice period, the Commission may issue the license amendment before the expiration of the notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

If the proposed determination becomes final, an opportunity for a hearing will be published in the Federal

Register at a later date and any hearing request will not delay the effective date of the amendment.

If the Commission decides in its final determination that the amendment does involve a significant hazards consideration, a notice of opportunity for a prior hearing will be published in the Federal Register and, if a hearing is granted, it will be held before any amendment is issued.

The Commission is seeking public comments on this proposed determination of no significant hazards consideration. Comments on the proposed determination may be telephoned to B.J. Youngblood, Director of PWR Project Directorate No. 4, by collect call to 301–492–8060 or submitted in writing to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555 and should cite the publication date and page number of this Federal Register notice. All comments received by June 16, 1986, will be considered in reaching a final determination. A copy of the application may be examined at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC and at the Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223.

Dated at Bethesda, Maryland, this 27th day of May, 1986.

For the Nuclear Regulatory Commission.

Kahtan Jabbour,

Acting Director, PWR Project Directorate No. 4, Division of PWR Licensing-A.

BILLING CODE 7590-01-M

[Docket Nos. 50-289 RA, 50-289 EW; ASLBP No. 86-532-03-SP]

GPU Nuclear, Three-Mile Island Nuclear Station, Unit No. 1; Designation of Presiding Officer

Pursuant to delegation by the Commission dated December 29, 1972, published in the Federal Register, 37 FR 28710 (1972) and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, a presiding officer is designated in the following proceeding:

GPU Nuclear, Three-Mile Island Nuclear Station, Unit No. 1.

The presiding officer is being designated pursuant to the provisions of an Advisory Opinion and Notice of Hearing (CLI–86–09) issued by the Commission on May 15, 1986 concerning the requests of Robert Arnold and Edward Wallace for a hearing pursuant to the Commission's decision in CLI–85–2, NRC 282, 317 (1985) and CLI–85–19, 22 NRC 398 (1985).

The presiding officer in this proceeding is The Honorable Ivan W. Smith, Administrative Law Judge.

All correspondence, documents and other materials shall be filed with Judge Smith in accordance with 10 CFR 2.701. His address is: Administrative Law Judge Ivan W. Smith, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Issued at Bethesda, Maryland, this 22nd of May 1986.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

[FR Doc. 86–12156 Filed 5–29–86; 8:45 am]

BILLING CODE 7590-01-M

POSTAL SERVICE

Privacy Act of 1974; Systems of Records

AGENCY: Postal Service.

ACTION: Advance Notice of Records System Changes.

SUMMARY: The purpose of this document is to publish advance notice of changes in the system of records that contains postal customers' change of address information. The Postal Service proposes to consolidate all change of address information furnished to it by its customers into a computerized National Change of Address File, to be maintained by a Postal Service contractor, for the purpose of establishing a National Change of Address Service.

DATE: Comments on the proposed change and the proposed routine use must be received on or before June 30, 1986.

ADDRESS: Comments may be mailed to the Records Officer, U.S. Postal Service, 475 L'Enfant Plaza, SW, Washington, DC 20260–5010 or delivered to room 8121 at the above address between 8:15 a.m. and 4:45 p.m. Comments received may also be inspected during the above hours in room 8121.

FOR FURTHER INFORMATION CONTACT: John Gunnels, (202) 268–4873.

SUPPLEMENTARY INFORMATION: In accordance with provisions of the Privacy Act Implementation Guidelines issued by the Office of Management and Budget (40 FR 28961), the Postal Service has determined that it is necessary to publish advance notice of (1) changes in the description of records system USPS 010.010, Collection and Delivery Records—Address Change and Mail Forwarding Records and (2) a proposed new routine use No. 5 for that system. System 010.010 was last published at 50 FR 47311.

This change involves the collection or maintenance of information already collected and maintained by the Postal Service; it involves the disclosure of information already made available to the public.

The change relates solely to the proposed consolidation of change of address information, heretofore maintained on a decentralized basis, into an automated database to be known as the National Change of Address File. A file under contract with the Postal Service will perform periodic updates of the file. Through the National Change of Address Service, firms under license agreement with the Postal Service will make updated address information available for a fee to mailers who maintain mailing lists on magnetic media. An excerpt of a notice published in the *Commerce Business Daily* on April 8, 1986, is reproduced at the end of this SUPPLEMENTARY INFORMATION, because it more fully describes the proposed address-matching requirements for licensees.

Each subscriber to the National Change of Address Service will obtain access to updated change of address information contained in the National Change of Address File through the use of tape-to-tape matching techniques. A mailer requesting the service will provide its mailing list on magnetic tape or disk to the address-matching licensee, who will "match" the mailer's tape against the National Change of Address tape. When a specific name and address on the mailer's tape also appears on the updated National Change of Address tape, the corrected address information on the National Change of Address tape will be provided to the mailer. The mailer's tape will be returned to the mailer with the following information: (1) The address as it originally appeared on the mailer's list; (2) the address rearranged into a standardized format and appended with the correct ZIP+4 code; and (3) if a match has been made, the corrected address in standardized format.

Through this tape-matching method, the new information provided to the mailer will consist only of changed addresses for specific postal customers whose names and former addresses were already in the mailer's possession. Only corrected addresses, not new or corrected names, will be provided. A subscriber, in order to avail itself of this list correction service, must necessarily already have in its possession the name

BEST COPY AVAILABLE

and former address of any postal customer about whom corrected information is provided.

Postal customers may, but are not required to, provide change-of-address information to the Postal Service by submitting Form 3575, Change of Address Order, which contains the customer's name, old address, new mailing address, mail forwarding instructions, effective date, and information as to whether the move is permanent or temporary.

The Postal Service currently maintains this change of address information for a period of 18 months in hardcopy form at the post office serving the old address as well as in electromagnetic form at one of 197 Computer Forwarding System sites. Pursuant to existing regulations, the Postal Service makes the customer's new permanent mailing address available to the public upon specific request. The Postal Service also uses the information for the purposes of (1) forwarding the customer's mail to the new address and (2) providing an Address Correction Service to mailers.

Under the Postal Service's present mail forwarding and address correction system, large numbers of mail pieces are entered into the mailstream that are undeliverable as addressed. The Postal Service forwards a misaddressed piece to the new address, and, if the Address Correction Service has been requested, provides the corrected information to the mailer. This results in delayed delivery to the recipient and in substantial handling and forwarding expense to the Postal Service.

The National Change of Address Service will enable the Postal Service to provide updated address information to mailers as soon as that information becomes available to the Postal Service. It is expected that this service will result in a significant reduction in the numbers of misaddressed pieces entered into the mailstream. This will enable the Postal Service to provide a more efficient and cost-effective delivery service to its customers, both mailers and recipients.

The Postal Service will cause each firm under contract or license agreement to maintain the National Change of Address File in accordance with the relevant provisions of the Privacy Act. While the information is in the possession of the firm, the firm will safeguard its security and will refrain from using or disclosing the information for any purpose other than providing the authorized address correction service to others. No information concerning postal customers who are not already on a mailer's list is to be provided to that mailer, and no new names and addresses will be added to any mailer's list.

The Postal Service will also take the following measures to minimize the risk of unauthorized use or disclosure of the information:

1. Physical access to the address tapes will be restricted to those persons whose duties require such access.

2. Unauthorized use of the tapes by a firm or its employees will be expressly prohibited.

3. The Postal Service will monitor security through periodic on-site inspections.

4. The Postal Service's address tapes will be "salted" with fake addresses so as to alert the Postal Service to breaches of security that may have taken place.

The proposed National Change of Address Service will not involve the disclosure of any information about postal customers that is not already available to the public through existing address correction and mail forwarding services. The principal change now being proposed is the consolidation of the information into a national file to be maintained by a Postal Service contractor and the disclosure of updated information to eligible mailers soon after the information becomes available to the Postal Service. This service will also make it possible to provide a larger volume of corrected address information to a particular mailer at any given time than is presently possible under existing address correction services.

Under existing regulations, a postal customer may obtain an accounting of disclosures of the customer's new address to members of the public who have requested it by applying to the post office where the change-of-address order is on file. Because of the degree of automation associated with the proposed National Change of Address Service, it will not be practicable to provide a detailed accounting that sets forth the specific date on which an address was provided to a particular subscriber to the service by means of the tape matching technique. A postal customer will, however, be able to ascertain the identities of all of the subscribers who have used the National Change of Address Service over a specific period of time. Thus, a customer will be able to learn to whom the new address may have been provided during the 18-month period that the customer's new address is maintained in the file by requesting such information from Manager, NCOA, Address Information Systems Division, 6060 Primacy Parkway, Memphis, TN 38188-0001. Information from which an accounting can be made will be retained for the five-year period required by the Privacy Act.

Excerpt of Notice Published in Commerce Business Daily, April 8, 1986

National Change of Address System

The U.S. Postal Service is seeking non-exclusive licensees to provide standardized name and address matching services to Postal Service customers against the Postal Service National Change of Address File. Licensees will be provided a master ZIP+4 file and monthly updates of that file by the Postal Service. The Postal Service will also furnish licensees the master National Change of Address File and Semi-Monthly NCOA File updates. Licensees will be required to provide customer output consisting of the original address as presented, the standardized address appended with correct ZIP+4 Codes, and the new address where a match has been found with correct ZIP+4 Codes. The quality of address match shall be 99% with a match rate of no less than 5% as measured against the results of the USPS address matching software using a test address file. The quality of applied ZIP+4 codes shall be 95% as measured againt the ZIP+4 matching software. Quality of match equates to accuracy. The United States Postal Service will take a test file of names and addresses and match it against its own address matching software to determine the matches. The same test file will be provided to the applicants for license and will be run using the applicant's matching software. The results will then be compared for accuracy.

Licensees will be required to process and return customer lists within 7 business days, maintain a service log available for USPS review, provide service capability 5 days per week (Monday through Friday), and provide monthly performances reports to the Postal Service.

Licensees are required to possess or have the ability to obtain all necessary hardware, software, facilities, technical support, and management required to provide service to customers in accordance with the performance requirements set forth above. The Postal Service will not control the pricing at which the licensees offer services to customers. The Postal Service will, however, have the right to review and approve all advertising to ensure that the licensee's relationship with the Postal Service is accurately portrayed and that all other information is accurate.

Due to limits on the Postal Service's capabilities to service licensees, no more than 20 licensees will be granted. All applicants will be required to submit a proposal defining their capability to provide the required services. Applicants may also be required to provide a demonstration of their capability. If more than 20 applications are received, applicants will be evaluated and licenses will be granted to the 20 applicants found to possess all necessary capabilities and who are considered to have the ability to provide service to the maximum number of postal customers.

Licenses will be for a term of 3 years. The Postal Service shall have the right to

BEST COPY AVAILABLE

terminate for breach or at any time upon 60 days notice.

A yearly license fee shall be payable to the Postal Service with initial payment required within 10 days of license execution. During year one of the license term, the fee will be $100,000.00. The fee during years two and three shall be $38,000.00 each year.

Prospective licensees should be aware that the NCOA file is a system of records as defined in subsection (a)(5) of the Privacy Act of 1974, 5 U.S.C. 522a, and is subject to the provisions of the Act. Licensees must comply with all requirements of the Act.

Accordingly, it is proposed that the description for system 010.010 be changed and that routine use No. 5 be added to read as follows:

USPS 010.010

SYSTEM NAME:

Collection and Delivery Records—Address Change and Mail Forwarding Records, 010.010.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Purpose—(1) To provide mail forwarding services to postal customers who have changed address; (2) to provide address correction services to postal customers; and (3) to provide address information to the Red Cross about a postal customer who has been relocated because of a disaster.

Use—

* * * * *

5. Disclosure of a customer's new permanent address may be made from the National Change of Address File to customers seeking corrected addresses for their mailing lists.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The source documents are stored in filing cabinets at the delivery unit. They are filed alphabetically by name within month or quarter. Records generated from the source document are stored on cards or list forms or recorded on magnetic tape where central markup is computerized. These records are filed alphabetically by name and route number or zone. Records are also consolidated in a National Change of Address File on magnetic tape maintained by firms under contract or license agreement with the Postal Service.

* * * * *

NOTIFICATION PROCEDURE:

Customers wishing to know whether information about them is maintained in this system of records should address inquiries to their local postmaster. Inquiries should contain full name and address, effective date of change order, route number (if known) and ZIP Code. Customers wishing to know whether information about them is also maintained in the National Change of Address File should address such inquiries to Manager, NCOA, Address Information Systems Division, U.S. Postal Service, 6060 Primacy Parkway, Memphis, TN 38188–0001.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

[FR Doc. 86–12043 Filed 5–29–86; 8:45 am]

BILLING CODE 7710–12–M

Privacy Act of 1974; Systems of Records

AGENCY: Postal Service.

ACTION: Final notice of modification to existing systems of records.

SUMMARY: The purpose of this document is to publish final notice updating the "Retention and Disposal" section of existing systems of records.

EFFECTIVE DATE: May 30, 1986.

ADDRESS: Records Office, 475 L'Enfant Plaza, SW., Washington, DC 20260–5010.

FOR FURTHER INFORMATION CONTACT: Rubenia Carter, (202) 268–4872.

SUPPLEMENTARY INFORMATION: The Postal Service has determined that the "Retention and Disposal" section of each of the systems listed below, by USPS identification number, needs to be updated to more accurately reflect the disposition of the records maintained in these systems:

[illegible]	120.036	120.190
[illegible]	120.040	120.210
[illegible]	120.050	120.220
[illegible]	120.060	120.230
[illegible]	120.070	120.240
[illegible]	120.080	150.010
080.020	120.086	150.015
[illegible]	120.100	150.025
870.040	120.110	150.030
[illegible]	120.120	200.020
080.020	120.121	200.030
[illegible]	120.140	210.010
100.010	120.150	210.030
110.010	120.170	

A complete statement of the existence and character of each of these systems last appeared in 48 FR 10963 dated March 15, 1983, and 47 FR 1199 dated January 11, 1982.

The following constitutes final notice of the necessary changes.

USPS 010.030, Collection and Delivery Records—Carrier Drive-Out Agreements, 010.030

Retention and Disposal:

Change to read "a. Agreements—Destroy when 2 years old.

b. Postmaster's copy of the PS 1839—Destroy when 4 years old.

c. Machine-readable records at the PDC (PS 1839 information)—Destroy when 7 years old."

USPS 030.010, Equal Employment Opportunity—EEO Discrimination Complaint Investigation, 030.010

Retention and Disposal:

Change to read "a. Precomplaint records—Counselor notes are destroyed 1 year after a formal report is submitted to the EEO officer or 1 year following the final adjustment when made at that level.

b. Formal Complaint records—All closed cases are removed from the system quarterly. Each closed case is retained as follows: Official file for 4 years, any copies for 1 year, and background documents not in case file for 2 years.

c. ADP records—Closed case information is removed quarterly and stripped of personal identifiers. It is then moved to an inactive file (not a system of records) for future comparative analyses."

USPS 030.020, Equal Employment Opportunity—EEO Staff Selection records, 030.020

Retention and Disposal:

Change to read "Destroy 3 years from date the position becomes vacant."

USPS 030.030, Equal Employment Opportunity—EEO Administrative Litigation Case Files, 030.030

Retention and Disposal:

Change to read "a. Selected Appeals Case Files—Destroy 4 years from date of final decision or when they have no further use for reference, training, or similar purpose, whichever is longer.

b. Appeal Case Files—Destroy 4 years from date of final decision.

c. Paper records are shredded and computer tape/disk records are erased at the end of the retention period."

USPS 050.010, Finance Records—Employee Travel Records (Accounts Payable), 050.010

Retention and Disposal: .

Change to read "a. Officer's Expense Report—Destroy when 12 years old.

b. Travel Advance and Travel Voucher: (1) PDC Copy—Destroy when 6 years and 3 months old. (2) Office Copy—Destroy 2 years from date of submission to PDC.

c. Relocation Travel Orders—Destroy 4 years from date final relocation voucher is submitted.

d. Relocation Travel Orders (Issuing Office)—Destroy when no longer needed for reference."

USPS 050.040, Finance Records—Uniform Allowance Program, 050.040

Retention and Disposal:

Change to read "a. Post Office Case File—Destroy 3 years from date the employee leaves Postal Service or is no longer in a bargaining unit.

b. PDC Card File—Destroy 6 months after each Accounting Period.

c. PDC Pay Listing and Machine Readable Records—Destroy 6 years and 3 months from date of listing."

USPS 060.020, Fraud and False Representation Records—Prohibitory Order, 060.020

Retention and Disposal:

Change to read "a. Case Files—Dispose of 5 years from date of origin or 5 years from end of year of last application or enforcement, whichever is sooner.

b. Log Books—Dispose of 5 years from date of last entry."

USPS 070.010, Inquiries and Complaints—Correspondence Files of the Postmaster General, 070.010

Retention and Disposal:

Change to read "a. Permanent Subject Files—Transfer to a Federal Records Center when 4 years old. Offer to NARA in 5-year blocks when the latest records are 20 years old.

b. Temporary Subject Files—Destroy when 4 years old."

USPS 070.020, Inquiries and Complaints—Customer Complaint Records, 070.020

Retention and Disposal:

Change to read "Destroy 1 year after resolution of problem."

USPS 080.010, Inspection Requirements—Investigative File System, 080.010

Retention and Disposal:

Change to read "a. Records are maintained 1 to 15 years depending upon type. Exceptions may be granted for longer retention in specific instances. Paper records are destroyed by burning, pulping, or shredding. Computer tape/disk records are erased or destroyed.

b. Duplicate copies of investigative memorandums maintained by postal officials other than the Inspection Service are retained in accordance with official rather than Inspection Service disposition schedules."

USPS 080.020, Inspection Requirements—Mail Cover Program, 080.020

Retention and Disposal:

Change to read "a. Correspondence Files—Destroy 8 years after case is closed.

b. Investigations (C)—Transfer to FRC when 2 years old; destroy when 8 years old.

c. Index and Record Slips—Destroy 15 years after close of case."

USPS 090.020, Nonmail Services—Passport Application Records, 090.020

Retention and Disposal:

Change to read "Passport applications are retained for 2 days at the post office where application was made and then forwarded to the Department of State. Destroy original and carbon copy of DPS 5659 when 3 months old."

USPS 180.010, Office Administration—Carpool Coordination/Parking, 180.010

Retention and Disposal:

Change to read "a. Application Case Files—Screen file annually, and dispose of records that are 6 years old.

b. Machine-readable files—Immediately remove all information when employee surrenders space.

c. Accounting Reports—Destroy after audit or when 3 years old, whichever is sooner.

d. Other miscellaneous reports—Destroy when no longer needed for reference or when 1 year old, whichever is sooner.

e. Violations maintained in application case files—Destroy violation notice when 1 year old.

f. Medical files maintained by medical officer to support handicapped parking space—Destroy 1 year from date of termination of assignment. At the end of retention period, paper records are destroyed by shredding or burning and tape/disk records are erased."

USPS 110.010, Property Management—Accountable Property Records, 110.010

Retention and Disposal:

Change to read "Return to individual when accountability is terminated."

USPS 120.035, Personnel Records—Discipline, Grievance, and Appeals Records for Non-Bargaining Unit Employees, 120.035

Retention and Disposal:

Change to read "Appeal records are kept for 7 years after close of file. All other records are kept 1 year after close of file. Records are destroyed by shredding."

USPS 120.040, Personnel Records—Employee Job Bidding Records, 120.040

Retention and Disposal:

Change to read "Computer records are kept 2 years, then automatically deleted. Paper records are kept 6 months after a vacancy is filled, then destroyed. Some records are retained until employee separates. (Where records become part of a grievance case file, dispose of with the case file.)"

USPS 120.050, Personnel Records—Employee Suggestion Program, 120.050

Retention and Disposal:

Change to read "a. Adopted Suggestions (1) Record copies—Destroy when 4 years old. (2) All other copies—Destroy 2 years from date of adoption or approval.

b. Disapproved suggestions—Destroy 2 years from date of disapproval.

Records are destroyed by shredding and automatic deletions from computer tapes."

USPS 120.060, Personnel Records—Employment and Financial Interest Records, 120.060

Retention and Disposal:

Change to read: "Destroy 2 years from date of separation of employee or removal from the position requiring this statement."

USPS 120.070, Personnel Records—General Personnel Folder (Official Personnel Folders and Records Related Thereto), 120.070

Retention and Disposal:

Change to read "a. Official Personnel Folder (OPF) Records—These records are considered to be permanent and are maintained until employee is separated, and then are sent to the National Personnel Records Center, St. Louis, for storage, or to another Federal agency to which the individual transfers employment.

b. Personnel Work Sheets—Destroy 30 days after a new PS 50 is issued.

c. Temporary Records of Individual Employees—Destroy when 2 years old,

upon separation, or upon transfer of employee, whichever is sooner.

d. Service Record Cards—Destroy 3 years after separation or transfer of employee."

USPS 120.090, Personnel Records—Medical Records, 120.090

Retention and Disposal:

Change to read "a. Employee Medical Folder—Medical records considered to be permanent are maintained until employee is separated and then are sent to the National Personnel Records Center for storage, or to another Federal agency to which the individual transfers employment. The records are maintained for 30 years from the date the employee separates from Federal service.

b. Failed Eligibles—Retained in Personnel office along with employment application and destroyed by shredding when 2 years old.

c. Authorization for Medical Attention (PS 3956)—Destroy when 2 years old."

USPS 120.095, Personnel Records—Office of Workers' Compensation Program (OWCP) Record Copies, 120.095

Retention and Disposal:

Change to read "Transfer to a Federal Records Center when 5 years old; dispose of 30 years from date the employee leaves the Postal Service."

USPS 120.100, Personnel Records—Performance Awards System Records, 120.100

Retention and Disposal:

Change to read "a. Incentive Award Files—Destroy 4 years from date of approval or disapproval.

b. Length of Service Award Files—Destroy when 1 year old.

c. Non-USPS Awards—Destroy 2 years after date of award.

d. Letter of Commendation and Appreciation (excluding copies filed in the OPF)—Destroy 2 years from date of letter."

USPS 120.110, Personnel Records—Preemployment Investigation Records, 120.110

Retention and Disposal:

Change to read "a. Destroy 2 years from the date the employee is initially found suitable for employment or 2 years from the date action was taken to deny or terminate employment.

b. NACI reports are retained in the same fashion as local investigative records."

USPS 120.120, Personnel Records—Personnel Research and Test Validation Records, 120.120

Retention and Disposal:

Change to read "a. Hard Copy—Destroy 6 months after processing.

b. Magnetic Tape—Maintain for 30 years—DO NOT TRANSFER TO A FEDERAL RECORDS CENTER."

USPS 120.121, Personnel Records—Applicant Race, Sex, National Origin and Disability Status Records, 120.121

Retention and Disposal:

Change to read "a. Hard Copy—Destroy 6 months after processing.

b. Magnetic Tape—Maintain for 30 years—DO NOT TRANSFER TO A FEDERAL RECORDS CENTER.

c. Statistical Records (without individual identifiers)—Maintained for as long as needed for the purpose of conducting longitudinal studies."

USPS 120.140, Personnel Records—Employee Assistance Program (EAP), 120.140.

Retention and Disposal:

Change to read "a. Coordinator/Specialist Applications and Interviews—Destroy 1 year from date of application.

b. Participant's Case Cards—Destroy 6 years from date case is closed. DO NOT TRANSFER TO A FEDERAL RECORDS CENTER.

c. Historical Case Records Cards—Dispose of along with Case File (see d.).

d. Case Files—(1) Deceased Persons—Destroy immediately. (2) Persons Successfully completing EAP Program—Destroy 3 years from date of completion. (3) Persons Dropped from EAP Program—Destroy when 1 year old."

USPS 120.153, Personnel Records—Individual Performance Evalnation/Measurement, 120.153.

Retention and Disposal:

Change to read: "a. Merit Performance Evaluation Files—Destroy when 5 years old.

b. Individual Performance Evaluation/Measurement Records—Destroy when 10 years old or when no longer useful, whichever is sooner. DO NOT TRANSFER TO A FEDERAL RECORDS CENTER.

USPS 120.170, Personnel Records—Safe Driver Awards Records, 120.170

Retention and Disposal:

Change to read "Destroy 4 years from date of separation, expiration of license, recision of authorization, or transfer of driver into a nondriving status, or other transfer (unless requested by new installation or agency)."

USPS 120.190, Personnel Records—Supervisor's Personnel Records, 120.190

Retention and Disposal:

Change to read "a. Counseling Records—Destroy when 1 year old if there has been no disciplinary action initiated against the employee during that period.

b. Letters of Warning—Destroy when 2 years old if there has been no disciplinary action initiated against the employee during that period.

c. All Other Records—Dispose of immediately upon termination of supervisor/employee relationship."

USPS 120.210, Personnel Records—Vehicle Maintenance Personnel and Operators Records, 120.210

Retention and Disposal:

Change to read "Destroy 4 years from date of separation, transfer (unless requested by new installation or agency), expiration of license, recision of authorization, or transfer of driver into a nondriving status."

USPS 120.220, Personnel Records—Arbitration Case Files, 120.220

Retention and Disposal:

Change to read "a. Disciplinary Cases (to include removal) and contract application cases—(1) National Level—Destroy 15 years from date of final decision. (2) Field Level—Destroy 5 years from fate of final decision.

b. Contract Interpretation Cases (National Level)—Transfer to a Federal Records Center when 5 years old; destroy 15 years from date of expiration of the agreement.

c. Court Actions—Transfer to a Federal Records Center when 5 years old, destroy 15 years from date of final agreement."

USPS 120.230, Personnel Records—Adverse Action Appeals (Administrative Litigation Case Files), 120.230

Retention and Disposal:

Change to read "Destroy 7 years from date of final decision."

USPS 120.240, Personnel Records—Garnishment Case Files, 120.240

Retention and Disposal:

Change to read "Postal Data Center records are maintained on an active basis until subject matter has no informational value, and on an inactive basis for an additional 2 years. All other records are maintained for 5 years. Paper records are shredded and

computer tape/disk records are erased at the end of retention period."

USPS 150.010, Records and Information Management Records—Information Disclosure Accounting Records (Freedom of Information Act), 150.020

Retention and Disposal:

Change to read "Records maintained by custodians and the Records Office are disposed of 2 years from date of final response to requester. (Files may be transferred to FOIA Appeals Officer upon request. When this is done, files may become a part of the Appeals Case Files—see USPS 150.015.)"

USPS 150.012, Records and Information Management Records—Freedom of Information Act Appeals System, 150.015

Retention and Disposal:

Change to read "Destroy 10 years from date of final determination by Appeals Officer or upon final adjudication in case of civil suit."

USPS 150.025, Records and Information Management Records—Privacy Act Appeals System, 150.025

Retention and Disposal:

Change to read "Destroy 10 years from date of final determination by Appeals Officer or upon final adjudication in case of a civil suit."

USPS 150.030, Special Mail Services—Insured and Registered International Mail Inquiry and Application for Indemnity Records, 150.030

Retention and Disposal:

Change to read "Destroy when 3 years old."

USPS 260.020, Nonmail Monetary Claims—Monetary Claims Involving Present or Former Employees (Case Files), 260.020

Retention and Disposal:

Change to read "Records are destroyed 3 years from date claim is adjudicated."

USPS 260.025, Nonmail Monetary Claims—Tort Claims records, 260.030

Retention and Disposal:

Change to read "a. Closed Case Files (cases where claims were neither allowed nor disallowed)—Transfer to a Federal Records Center when 2 years old; destroy when 5 years old.

b. Appeal Case Files—Transfer to a Federal Records Center when 2 years old; destroy when 7 years old.

c. PDC Payment Records—Transfer to a Federal Records Center when 1 year old; destroy when 4 years old.

d. Locator Card—Destroy when 7 years old."

USPS 210.010, Contractor Records—Architect-Engineers Selection Records, 210.010

Retention and Disposal:

Change to read "a. Architect-Engineer and Related Services Questionnaire, SF 254—Destroy when 1 year old.

b. Architect-Engineer and Related Services for Specific Projects, SF 255—When a contract is awarded, attach form to contract; otherwise, destroy when 1 year old."

USPS 210.020, Contractor Records—Contractor Employee Fingerprint Records, 210.020

Retention and Disposal:

Change to read "Records are kept until employee leaves employment of USPS and then are destroyed 2 years later by shredding."

BILLING CODE 7710-12-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-23261; File No. SR-MSE-86-4]

Self-Regulatory Organizations; Proposed Rule Change by Midwest Stock Exchange, Inc. Relating to Bids and Offers on "Issued" Basis

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 13, 1986, the Midwest Stock Exchange, Incorporated filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

On November 9, 1985, the Securities and Exchange Commission appoved a proposed rule change to MSE Article XX, Rule 10 (SR-MSE-85-8, submitted August 7, 1985, amended October 19, 1985) on a six-month pilot basis. Such approval expires on May 7, 1986. By this filing, the Midwest Stock Exchange, Inc. hereby requests permanent approval of the rule change.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The rule change codifies MSE's policy of allowing trades to be effected on the MSE floor for settlement periods other than "cash", "regular way", or "seller's option".

The current rule 10 provides that contracts resulting from transactions effected on the MSE floor may be settled in one of three ways. First, the transaction may be settled for "cash", which indicates that delivery occurs on the day of the contract. Second, the transaction may be settled "regular way", which indicates that delivery will occur on the fifth full business day following the day of the contract. Third, the transaction may be settled "seller's option", which indicates that delivery will occur within the time period specified in the option, which time shall be no less than six full business days nor more than 30 days following the day of the contract.

Rule 10 also contains an exception providing for "next day" settlement (for delivery on the day following the day of the contract) for contracts in rights on the second, third, fourth and fifth full business days preceding the final day for subscription, and for "cash" settlement on the day immediately preceding the final day for subscription.

These changes are the result of requests made to the MSE by several members and member organizations to provide greater flexibility for trades with settlement periods other than the traditional periods cited in existing Rule 10.

Particular interest has been expressed in "next day" settlement and settlement occurring on the second, third, and fourth business days following the day of the contract in respect to "issued" securities and not merely subscription

rights. These same members and member organizations believe that additional settlement periods are becoming more useful in furthering the investment objectives of certain of their customers. In the past, MSE's policy was to allow three types of trades on an exception basis only.

With increased emphasis on sophisticated trading programs conducted by certain institutional investors, and the fact that other exchanges currently allow or are proposing to allow additional settlement periods, the MSE believes that it is appropriate at this time to provide in its rules additional time periods during which trades effected on the MSE may settle as a matter of course.

In addition, the rule change would expand the permissable "seller's option" period from 30 days to 60 days. This expanded period will also provide greater flexibility in developing investment strategies and is consistent with other exchanges' "seller's option" rules.

These changes have been in effect on a pilot basis for six months. In reviewing the operation of the pilot, it has been determined by the MSE that no unusual trading activity nor abuses have occurred during the initial six-month period. Permanent approval of the pilot program is, therefore, requested.

The proposed rule change is consistent with section 6 of the Securities Exchange Act of 1934 in that it helps remove an impediment to a free and open market and will also foster cooperation and coordination with persons engaged in settling and facilitating transactions in securities.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Midwest Stock Exchange, Incorporated does not believe that any burdens will be placed on competition as a result of the proposed rule change.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities & Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by June 20, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 21, 1986.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34-23363; File No. SR-PHILADEP 86-2]

Self-Regulatory Organizations; Proposed Rule Change By the Philadelphia Depository Trust Company Relating to Fee Schedule Amendments

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 1, 1986, the Philadelphia Depository Trust Company filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Philadelphia Depository Trust Company (PHILADEP) proposed as a rule change the adoption of amendments to its fee schedule to be effective as of May 1, 1986. The changes include certain increases, as well as a decrease for the automated customer name mailing service, in order to relate charges to costs more accurately. The rule change also unbundles certain services so that fees associated with those services more accurately reflect costs.

II. Self-Regulatory Organization's Statement Regarding the Proposed Rule Change.

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of Purpose of, and Statutory Basis for, the Proposed Rule Change

The PHILADEP fee revisions reflect changes in costs attributable to usage or expansion of the particular service affected. The purpose of the fee schedule revisions is the formulation of a fair and equitable fee schedule in view of current conditions, increased costs, the applicability of automation and advanced technology, the need for reliable as well as cost effective services, and the desire to be competitive in the industry.

The proposed fee changes are consistent with section 17A(b)(3)(D) of the Exchange Act in providing for equitable allocations of reasonable dues, fees, and other charges among participants.

(B) Self-Regulatory Organization's Statement on Burdens on Competition

PHILADEP does not perceive any burden on competition as a result of the proposed rule change, which is intended to align more closely the charge for a particular service with the cost of producing it.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Comments on the proposed rule change have not yet been received because the new schedule is being printed. A forthcoming SCCP/PHILADEP Member Bulletin will advise members of officials to whom they may direct questions upon receipt of the new schedule.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Exchange Act and subparagraph (e) of Rule 19b–4 thereunder. At any time within 60 days of the filing of this rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Exchange Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Those making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at PHILADEP. All submissions should refer to File No. SR–PHILADEP–86–2 and should be submitted by June 20, 1986.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 22, 1986.

Shirley E. Hollis,

Assistant Secretary.

PHILADEP SCHEDULE OF CHARGES—PHILADEP 06–2

[New material is italic; deleted material in bold brackets]

Service	Charge
1. Account Charges:

BILLING CODE 8010–01–M

[Release No. IC–15106; File No. 812–5786]

IDS Mutual, Inc. et al.; Application

May 20, 1986.

Notice is hereby given that IDS Mutual, Inc., IDS Stock Fund, Inc., IDS Selective Fund, Inc., IDS Equity Plus Fund, Inc., IDS new Dimensions Fund, Inc., IDS Progressive Fund, Inc., IDS Growth Fund, Inc., IDS Bond Fund, Inc., IDS Cash Management Fund, Inc., IDS Tax-Exempt Bond Fund, Inc., IDS High Yield Tax-Exempt Fund, Inc., IDS Tax-Free Money Fund, Inc., IDS Discovery Fund, Inc., IDS Extra Income Fund, Inc., IDS International Fund, Inc., IDS Strategy Fund, Inc., IDS Precious Metals Fund, Inc., IDS Managed Retirement Fund, Inc., IDS Life Capital Resource Fund, Inc., IDS Life Income Fund, Inc., IDS Life Moneyshare Fund, Inc. (individually a "Fund" and collectively the "Funds" or the "IDS Mutual Fund Group" and where appropriate the last three Funds referred to as the "Life Funds"); and Shearson Lehman Brothers Inc. ("Shearson") (collectively with the IDS Mutual Fund Group, "Applicants") filed an application on February 10, 1984, and amendments thereto on April 20, 1984, June 19, 1984, December 18, 1984, August 20, 1985, and December 19, 1985, requesting an order of the Commission, pursuant to sections 6(c) and 17(b) of the Investment Company Act of 1940 (the "Act"), exempting Applicants from the provisions of section 17(a)(3) and, pursuant to section 17(d) of the Act and Rule 17d–1 thereunder, permitting the IDS Mutual Fund Group to lend portfolio securities to Shearson, certain broker-dealer affiliates of Shearson, and future broker-dealer affiliates of Shearson that may enter into portfolio securities lending programs with the IDS Mutual Fund Group. Applicants also seek an exemption on behalf of registered investment companies that may, in the future, join the IDS Mutual Fund Group and adopt portfolio securities lending programs substantially identical to those described in the application. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act and rules thereunder for the text of the applicable provisions thereof.

Applicants represent that the Funds and the Life Funds are open-end diversified management investment companies registered under the Act. According to the application, the investment manager for the Funds is IDS Financial Services Inc. ("New IDS") and the investment manager for each Life Fund is IDS Life Insurance Company, Inc. ("IDS Life"), a wholly-owned subsidiary of IDS. Applicants state that Shearson is a wholly-owned subsidiary of American Express Company and a broker-dealer registered under the Securities Exchange Act of 1934.

Applicants represent that prior to January 12, 1984, Investors Diversified Services, Inc. ("Old IDS"), a wholly-owned subsidiary of Alleghany Corporation, served as investment manager of each Fund and that IDS Life, then a wholly-owned subsidiary of Old IDS, served as investment manager of each Life Fund. Applicants state that on September 28, 1983, Alleghany

Corporation and American Express Company entered into a Plan of Reorganization and Merger Related Agreement (which was subsequently amended on December 22, 1983) providing for the merger of Old IDS into New IDS, a wholly-owned subsidiary of American Express Company (the "Merger"). Applicants state that the Merger was completed on January 12, 1984.

According to the application, the Funds began lending their portfolio securities to brokers in 1974, and, in connection with the decision to lend portfolio securities, the Board of Directors of each Fund ("Boards") adopted certain procedures. Applicants state that, in October 1977, Shearson became an approved broker under the procedures adopted by the Funds and from that time until the day preceding the date of the Merger, the Funds had on occasion loaned portfolio securities to Shearson pursuant to those procedures. Applicants represent that prior to the Merger, Shearson had become one of the Funds' largest borrowers of portfolio securities. It is further represented that the Life Funds have also authorized and implemented a portfolio securities lending program. Applicants state that upon completion of the Merger, Shearson became, for purposes of section 17(a)(3), an affiliated person of an affiliated person of each Fund and of each Life Fund.

Applicants propose to continue the lending relationship with Shearson pursuant to the same procedures as those in place prior to the Merger and submit that these procedures assure that shareholders will be adequately protected from the potential abuses which section 17(a)(3) was designed to prevent. Applicants assert that Shearson's participation in the proposed loan transactions will be on a basis which is no more favorable than the participation of unaffiliated borrowers of securities from the IDS Mutual Fund Group and thus the conditions of Rule 17d–1 will be met. According to the application, the Boards of the IDS Mutual Fund Group have determined that the IDS Mutual Fund Group should be permitted to lend portfolio securities to Shearson subject to the adopted procedures, at rates determined on a case-by-case basis in the manner presently followed for all loans of portfolio securities. Applicants represent that, pursuant to the resolutions adopted by the Boards, a schedule of fees (and in the case of cash collateral, rates of interest to be remitted) is established by New IDS and is applied uniformly with respect to loans made to affiliated and non-affiliated brokers. Applicants state that substantially all loans are made at predetermined charges which are applied uniformly to all borrowers. Applicants represent that no loan will be made to an affiliated broker at less than the minimum charge set forth in paragraph 9 of the Boards' resolutions, and further that no loan will be made to an affiliated broker at a charge less than that specified in the schedule. Further, although the member funds of the IDS Mutual Fund Group may from time to time lend portfolio securities at higher charges than those reflected on the schedule, it is represented that such occurrences have been infrequent. Applicants represent that, in the unusual case where a security is loaned at a higher charge, all comparable loans of the security will be made at the same rate as required by paragraph 9(c) of the Boards' resolution, regardless of whether the loan is made to an affiliated or a non-affiliated broker.

In addition, to assure that there is no overreaching on the part of an affiliated borrower, Applicants also consent to the imposition of the following conditions to the requested order:

1. The IDS Mutual Fund Group will continue to make at least 50% of their portfolio securities loans to unaffiliated borrowers.

2. A Fund may not lend portfolio securities to Shearson if, at the time such loan is made, more than 10% of such Fund's assets computed at market, would be loaned to Shearson.

3. A Fund will not make any loan to Shearson unless the income attributable to such loan fully covers the transaction costs incurred in making such loan.

4. If the Funds receive cash as collateral, they may not remit to Shearson a portion of the interest earned on such collateral at a rate in excess of 85% of the weekly average of the 30-day commercial paper rate; if U.S. Government securities are received as collateral, the loan premium paid by Shearson shall not be less than ½% of the par value of debt instruments or the market value assigned to equities at the time of borrowing.

5. The Funds' Boards of Directors, including a majority of the directors who are not interested persons, (a) will determine no less frequently than quarterly that all transactions with Shearson effected during the preceding quarter were effected in compliance with the requirements of the resolution adopted by the Boards and the conditions of any order permitting such transactions and that such transactions were conducted on terms which were reasonable and fair; and (b) will review no less frequently than annually such requirements and conditions for their continuing appropriateness.

6. The IDS Mutual Fund group will maintain and preserve permanently a written copy of the procedures (and any modifications thereto) which are followed in lending securities. The Funds shall maintain and preserve a written record of each loan setting forth the number of shares loaned or the face amount of the securities loaned, the fee received (or the rate of interest remitted), the identity of the borrower, the terms of the loan, the information or materials upon which the findings that each loan made to Shearson was fair and reasonable and that the procedures followed in making the loan were in accordance with the other undertakings set forth above.

7. The IDS Mutual Fund Group will only accept cash or U.S. Government securities as collateral for securities loaned to an affiliated broker.

Applicants state that since the Funds began their lending program in 1974, no Fund has experienced any difficulties and the program has resulted in additional income to shareholders which, it is claimed, they would not otherwise have enjoyed. The IDS Mutual Fund Group represents that if the member funds of the IDS Mutual Fund Group are not able to lend securities to affiliated brokers, the premium income and benefits to shareholders attributable to such loans will be lost and cannot be replaced. Applicants submit that the loans of portfolio securities to Shearson in accordance with the procedures and guidelines which have been adopted would benefit the IDS Mutual Fund Group, that the participation of the IDS Mutual Fund Group in portfolio securities loans with Shearson subject to such procedures is fair and reasonable and will not involve overreaching on the part of any person, and that the proposed transactions are consistent with the policies of the IDS Mutual Fund Group and with the general purposes of the Act. Applicants also submit that the granting of the requested order is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 16, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities

and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicants at the addresses stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

By the Commission.

Shirley E. Hollis,

Assistant Secretary

BILLING CODE 8025-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Docket No. 301-55]

Unfair Trade Practices; Icicle Seafoods; Initiation of an Investigation

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of decision to initiate an investigation under section 301.

SUMMARY: Pursuant to 19 U.S.C. 2412(a), the United States Trade Representative has decided to initiate an investigation of the petition submitted by Icicle Seafoods, et al., and described below.

DATE: Written comments will be accepted through June 16, 1986.

ADDRESS: Written comments should be addressed to the Chairman, Section 301 Committee, Office of the United States Trade Representative, Room 223, 600 17th St., NW., Washington, DC 20506. Copies of the petition are available at this address.

FOR FURTHER INFORMATION CONTACT: Richard Parker, Assistant General Counsel, Office of the United States Trade Representative, (202) 395-6800.

SUPPLEMENTARY INFORMATION: On April 1, 1986, Icicle Seafoods and nine other companies with fish processing facilities in Washington or southeastern Alaska filed a petition under section 301 of the Trade Act of 1974, as amended (19 U.S.C. 2411, et seq.) alleging that Canada prohibits exports of unprocessed herring and salmon, and that this policy deprives petitioners of access to supplies of raw fish needed to maintain capacity utilization in petitioner's processing facilities. Petitioners allege that the Canadian prohibition is unreasonable and a burden on U.S. commerce, and a violation of Article XI of the General Agreement on Tariffs and Trade ("GATT"), which prohibits most types of export restrictions.

On May 16, 1986, pursuant to 19 U.S.C. 2412(a), the United States Trade Representative decided to initiate an investigation on the basis of this petition.

USTR has requested bilateral consultations with representatives of the Government of Canada. To assist USTR in preparing for these discussions, interested parties are invited to submit written comments regarding the issues raised by the petition. USTR is particularly interested in information on the following points:

(1) To what extent does the Canadian prohibition on unprocessed herring and salmon exports depress the price of unprocessed herring and salmon in Canada?

(2) To what extent does denial of access to unprocessed Canadian herring and salmon impair access of U.S. processors to adequate supplies of herring and salmon and/or increase unit costs in U.S. processing facilities?

(3) What would be the economic effects on U.S. and Canadian fishermen and processors of eliminating the Canadian prohibition on unprocessed herring and salmon exports?

Comments should be filed in accordance with the regulations in 15 CFR 2006.8 and are due no later than June 20, 1986.

Judith H. Bello,

Chairman, Section 301 Committee.

BILLING CODE 3190-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Advisory Circular, Cabin Pressurization Systems in Small Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Draft Advisory Circular (AC) Availability and Request for Comments.

SUMMARY: This AC provides information and guidance concerning compliance with the requirement of §§ 23.841(b)(3) and 23.841(b)(6) of the Federal Aviation Regulations (FAR) pertaining to pressurized cabins in small airplanes.

DATE: Commenters must identify File AC 23.841-XX; Subject: Cabin Pressurization Systems in Small Airplanes, and comments must be received on or before June 29, 1986.

ADDRESS: Send all comments on the proposed draft AC to: Federal Aviation Administration, ATTN: Regulations and Policy Office (ACE-110), 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Ervin Dvorak, Aerospace Engineer, Regulations and Policy Office (ACE-110), Aircraft Certification Division, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106; commercial telephone (816) 374-6941, or FTS 758-6941.

SUPPLEMENTARY INFORMATION: Any person may obtain a copy of this proposed draft AC by writing to: Federal Aviation Administration, Aircraft Certification Division, Regulations and Policy Office (ACE-110), 601 East 12th Street, Kansas City, Missouri 64106.

Comments invited: Interested parties are invited to submit comments on the

proposed draft AC. The proposed draft AC and comments received may be inspected at the offices of the Regulations and Policy Office (ACE-110), Room 1656, Federal Office Building, 601 East 12th Street, Kansas City, Missouri, between the hours of 7:30 a.m. and 4:00 p.m. weekdays, except Federal holidays.

Background

For pressurized cabins in small airplanes, questions have been raised for showing an acceptable means of compliance pertaining to the following requirements in §§ 23.841(b)(3) and 23.841(b)(6): (1) Provision of means by which the pressure differential can be rapidly equalized; and (2) provision of a warning indication at the pilot station to indicate when a cabin pressure altitude of 10,000 feet is exceeded. The AC discusses these requirements by first presenting a brief history on the development of the applicable airworthiness regulations and then the intent of the airworthiness requirements for small airplanes is explained.

Issued in Kansas City, Missouri, May 14, 1986.

Barry D. Clements,

Manager, Aircraft Certification Division.

BILLING CODE 4910-13-M

Advisory Circular; Flight Test Guide for Certification of Small Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Draft Advisory Circular (AC) Availability and Request for Comments.

SUMMARY: This AC provides information and guidance concerning acceptable means of showing compliance with Part 23 of the Federal Aviation Regulations (FAR) concerning flight tests and pilot judgments.

DATE: Commenters must identify File AC 23-XX-13; Subject: Flight Test Guide for Certification of Small Airplanes, and comments must be received on or before August 28, 1986.

ADDRESS: Send all comments on the proposed draft AC to: Federal Aviation Administration, ATTN: Regulations and Policy Office (ACE-110), 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Frank Stogsdill, Aerospace Engineer and Pilot, Regulations and Policy Office (ACE-110), Aircraft Certification Division, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106; commercial telephone (816) 374-6941, or FTS 758-5941.

SUPPLEMENTARY INFORMATION: Any person may obtain a copy of this proposed draft AC by writing to: Federal Aviation Administration, Aircraft Certification Division, Regulations and Policy Office (ACE-110), 601 East 12th Street, Kansas City, Missouri 64106.

Comments Invited

Interested parties are invited to submit comments on the proposed draft AC. The proposed draft AC and comments received may be inspected at the offices of the Regulations and Policy Office (ACE-110), Room 1656, Federal Office Building, 601 East 12th Street, Kansas City, Missouri, between the hours of 7:30 a.m. and 4:00 p.m. weekdays, except Federal holidays.

Background

FAA Order 8110.7, "Engineering Flight Test Guide for Small Airplanes," dated June 20, 1972, was published for internal FAA use to describe acceptable methods of compliance with the flight test portions of Part 23 of the FAR. Conversion of FAA Order 8110.7 to an AC is part of FAA's effort to convert internal FAA orders which contain certification guidance to ACs. This AC consolidates Order 8110.7, policy contained in correspondence between FAA Headquarters and certificating regions and subsequently developed policy. The methods and procedures contained in this AC are being promulgated for use during small airplane type certification and supplemental type certification flight testing.

Issued in Kansas City, Missouri, May 19, 1986.

Barry D. Clements,

Manager, Aircraft Certification Division.

[FR Doc. 86-12081 Filed 5-29-86; 8:45 am]

BILLING CODE 4910-13-M

Tri-Cities Airport, Pasco, WA; Receipt of Noise Compatibility Program and Request for Review

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by Tri-Cities Airport (PSC) under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) and 14 CFR Part 150 are in compliance with applicable requirements. The FAA also announces that it is reviewing a proposed noise compatibility program that was submitted for PSC under Part 150 in conjunction with the noise exposure maps, and that this program will be approved or disapproved on or before November 12, 1986.

DATES: The effective date of the FAA's determination on the PSC noise exposure maps and of the start of its review of the associated noise compatibility program is May 16, 1986. The public comment period ends December 12, 1986.

FOR FURTHER INFORMATION CONTACT: Dennis Ossenkop, FAA, Airports Division, ANM-611, 17900 Pacific Hwy S., C-68966, Seattle, WA 98168.

Comments on the proposed noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA finds that the noise exposure maps for PSC are in compliance with applicable requirements of Part 150, effective May 16, 1986. Further, FAA is reviewing a proposed noise compatibility program for that airport which will be approved or disapproved on or before November 12, 1986. This notice also announces the availability of this program for public review and comment.

Under section 103 on Title I of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator may submit to the FAA a noise exposure map which met applicable regulations and which depicts noncompatible land uses as of the date of submission of such map, a description of projected aircraft operations, and the ways in which such operations will affect such map. The Act requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies and persons using the airport.

An airport operator who has submitted a noise exposure map that has been found by FAA to be in compliance with the requirements (FAR) Part 150, promulgated pursuant to Title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

PSC submitted to the FAA on February 27, 1986, noise exposure maps, descriptions and other documentation which were produced during an airport Noise Compatibility Study. It was

requested that the FAA review this material as the noise exposure maps, as described in section 103(a)(1) of the Act, and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under section 104(b) of the Act.

The FAA has completed its review of the noise exposure maps and related descriptions submitted by PSC. The specific maps under consideration are Exhibits 4–1 and 8–2 in the submission. The FAA has determined that these maps for PSC are in compliance with applicable requirements. This determination is effective on May 16, 1986. FAA's determination on an airport operator's noise exposure maps is limited to the determination that the maps were developed in accordance with the procedures contained in Appendix A of FAR Part 150. Such determination does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on noise exposure maps submitted under section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of section 107 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the maps depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies with which consultation is required under section 103 of the Act. The FAA has relied on the certification by the airport operator, under § 150.21 of FAR Part 150, that the statutorily required consultation has been accomplished.

The FAA has formally received the noise compatibility program for PSC, also effective on May 16, 1986. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before November 12, 1986.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR Part 150, § 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the noise exposure maps, the FAA's evaluation of the maps, and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, Independence Avenue, SW. Room 615 Washington, DC

Federal Aviation Administration, Airports Division, ANM-600, 17900 Pacific Hwy S. C-68966 Seattle, Washington 98168

Tri-Cities Airport, Pasco, Washington

Questions may be directed to the individual named above under the heading, FOR FURTHER INFORMATION CONTACT.

Issued in Seattle, Washington, May 16, 1986.

Edward G. Tatum,

Manager, Airports Division, Northwest Mountain Region.

BILLING CODE 4910-13-M

Research and Special Programs Administration

Hazardous Materials; Grants and Denials of Applications for Exemptions

AGENCY: Research and Special Programs Administration, DOT

ACTION: Notice of grants and denials of applications for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted in April 1986. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

RENEWAL AND PARTY TO EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
6084-X	DOT-E 6084	Sandoz Chemicals Corporation, Sodyeco Plant, Charlotte, NC.	49 CFR 173.65(e), 175.24–4(a)	To authorize transport of a high explosive in DOT Specification 21P fiber drum having an inside polyethylene container similar to DOT Specification 6U with certain exceptions. (Mode 1.)
7052-X	DOT-E 7052	General Motors Corp., Warren, MI	49 CFR 172.101, 172.420, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as a flammable solids. (Modes 1, 2, 3, and 4.)
7052-X	DOT-E 7052	Ocean Technology, Inc., Burbank, CA	49 CFR 172.101, 172.420, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as a flammable solids. (Modes 1, 2, 3, and 4.)
7052-P	DOT-E 7052	Beckman Instruments, Inc., Fullerton, CA	49 CFR 172.101, 172.420, 175.3	To become a party to Exemption 7052. (Modes 1, 2, 3, and 4.)
7052-X	DOT-E 7052	Sippican Ocean Systems, Inc., Marion, MA.	49 CFR 172.101, 172.420, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as a flammable solids. (Modes 1, 2, 3, and 4.)
7052-X	DOT-E 7052	DME Corp., Ft. Lauderdale, FL	49 CFR 172.101, 172.420, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as a flammable solids. (Modes 1, 2, 3, and 4.)
7052-P	DOT-E 7052	University of Washington, Seattle, WA	49 CFR 172.101, 172.420, 175.3	To become a party to Exemption 7052. (Modes 1, 2, 3, and 4.)
7052-X	DOT-E 7052	Panasonic Industrial Co., Secaucus, NJ	49 CFR 172.101, 172.420, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as a flammable solids. (Modes 1, 2, 3, and 4.)
7052-X	DOT-E 7052	TNR Technical, Inc., Deer Park, NY	49 CFR 172.101, 172.420, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as a flammable solids. (Modes 1, 2, 3, and 4.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
7052-X	DOT-E 7052	Rayovac Corp., Madison, WI	49 CFR 172.101, 172.420, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as a flammable solids. (Modes 1, 2, 3, and 4.)
7218-X	DOT-E 7218	Structural Composites Industries, Inc., Pomona, CA.	49 CFR 173.302(a), 173.304(a), 175.3	To authorize manufacture, marking and sale of non-DOT specification fiber reinforced plastic full composite cylinders, for shipment of certain nonflammable compressed gases. (Modes 1, 2, 3, 4, and 5.)
7277-X	DOT-E 7277	Structural Composites Industries, Inc., Pomona, CA.	49 CFR 173.302(a)(1), 173.304(a), 173.304(d), 175.3.	To authorize manufacture, marking and sale of non-DOT specification fiber reinforced plastic full composite cylinder, for transportation of certain nonflammable compressed gases. (Modes 1, 2, 3, 4, and 5.)
7959-X	DOT-E 7959	Woods Hole, Marthas Vineyard & Nantucket Steamship, Woods Hole, MA.	49 CFR 172.101, 176.780(k)	To authorize stowage of recreational vehicles carrying liquefied petroleum gas for heating and cooking on the vehicle deck of passenger-carrying ferries and other passenger-carrying vessels. (Mode 3.)
8091-X	DOT-E 8091	AT&T Technologies, Inc., Greensboro, NC.	49 CFR Parts 100–177	To authorize transport of certain mercury relays exempted from 49 CFR 100–177, in heat sealed glass vials. (Modes 4, 5.)
8091-X	DOT-E 8091	Northwestern Bell, Omaha, NE	49 CFR Parts 100–177	To authorize transport of certain mercury relays exempted from 49 CFR 100–177, in heat sealed glass vials. (Modes 4, 5.)
8091-X	DOT-E 8091	Pacific Northwest Bell, Portland, OR	49 CFR Parts 100–177	To authorize transport of certain mercury relays exempted from 49 CFR 100–177, in heat sealed glass vials. (Modes 4, 5.)
8091-X	DOT-E 8091	Mountain Bell, Denver, CO	49 CFR Parts 100–177	To authorize transport of certain mercury relays exempted from 49 CFR 100–177, in heat sealed glass vials. (Modes 4, 5.)
8362-X	DOT-E 8362	Altus Corp., San Jose, CA	49 CFR 172.101, 173.206, 173.247	To authorize shipment of batteries containing lithium metal and thionyl chloride in a rigid metal structure of aluminum steel and components which secure the location of each of the 30 cell units, packed in a sturdy wooden box bolted to the base support plate of the internal metal structure. (Mode 1.)
8390-P	DOT-E 8390	Jones-Hamilton Co., Newark, CA	49 CFR 173.272, 178.210, 178.24a	To become a party to Exemption 8390. (Mode 1.)
8401-X	DOT-E 8401	ERA Helicopters, Inc., Anchorage, AK	49 CFR 175.3, 175.310(c)(3), 175.310(d)	To authorize carriage of fuel in Canadian 5B drums loaded in cargo compartments of passenger-carrying helicopters. (Mode 5.)
8451-P	DOT-E 8451	The Ensign-Bickford Co., Simsbury, CT	49 CFR 173.65, 173.66(e), 175.3	To become a party to Exemption 8451. (Modes 1, 2, and 4.)
8451-P	DOT-E 8451	Monongahela Power Co., Fairmont, WV	49 CFR 173.65, 173.66(e), 175.3	To become a party to Exemption 8451. (Modes 1, 2, and 4.)
8582-X	DOT-E 8582	Chicago and Northwestern Transportation Co., Chicago, IL.	49 CFR Parts 100–177	To authorize transportation of railway track torpedoes and fusees packed in metal kits, in motor vehicles by railroad maintenance crews as non-regulated rail carrier equipment. (Mode 1.)
8582-X	DOT-E 8582	The Atchison, Topeka and Santa Fe Railway Co., Chicago, IL.	49 CFR Parts 100–177	To authorize transportation of railway track torpedoes and fusees packed in metal kits, in motor vehicles by railroad maintenance crews as non-regulated rail carrier equipment. (Mode 1.)
8582-P	DOT-E 8582	Southern Pacific Transportation Co., San Francisco, CA.	49 CFR Parts 100–177	To become a party to Exemption 8582. (Mode 1.)
8692-X	DOT-E 8692	Mitsubishi International Corp., New York, NY.	49 CFR 173.154	To authorize ammonium persulfate, classed as an oxidizer, as an additional commodity and to authorize a smaller 1,100 pound capacity bag. (Modes 1, 2, and 3.)
8717-X	DOT-E 8717	Goodbar E. Moore, Inc., Danville, IL	49 CFR 173.28(m)	To authorize reuse of DOT Specification 17H steel drums of 55-gallon capacity, with an inside polyethylene liner of 0.010 inch minimum thickness, for shipment of certain adhesives, classed as a flammable liquid. (Mode 1.)
8751-X	DOT-E 8751	The Heil Co., Milwaukee, WI	49 CFR 173.119(a), 173.119(m), 173.245(a), 173.340(a), 178.340–7, 178.342–4, 178.343–5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying with DOT Specification MC–307/312 except for bottom outlet valve variations for transportation of liquid and semi-solid waste materials. (Mode 1.)
8791-X	DOT-E 8791	Stauffer Chemical Co., Westport, CT	49 CFR 173.245a, 173.3a, 178.245–1	To authorize use of a non-DOT specification portable tank equivalent to a DOT Specification 51 portable tank, for transportation of ethyl chloroformate. (Modes 1, 2, and 3.)
9077-X	DOT-E 9077	Central Vermont Railway, Inc., St. Albans, VT.	49 CFR Parts 100–177	To increase number of railway track torpedoes contained in flagging kits from 7 to 18. (Mode 1).
9077-X	DOT-E 9077	Central Vermont Railway, Inc., St. Albans, VT.	49 CFR Parts 100–177	To authorize transport of railway track torpedoes and railway fusees in flagging kits constructed of 24 gauge galvanized steel. (Mode 1.)
9105-X	DOT-E 9105	Sea-Land Service, Inc., Elizabeth, NJ	49 CFR 176.76(g)(3)	To authorize below deck stowage of DOT Specification IM 101 and IM 102 portable tanks containing a flammable liquid. (Mode 3.)
9106-X	DOT-E 9106	Kitty Hawk Airways, Inc., Dallas, TX	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b), Part 107, Appendix B.	To authorize carriage of certain Class A, B and C explosives that are not permitted for air shipment or are in quantities greater than those prescribed for shipment by air. (Mode 4.)
9130-X	DOT-E 9130	Bio-Lab, Inc., Conyers, GA	49 CFR 173.154	To authorize shipment of an oxidizer, n.o.s., in polyethylene containers of net over 10 pounds capacity each, overpacked in a non-DOT specification corrugated fiberboard box as prescribed in 49 CFR 173.217(c). (Modes 1, and 2.)
9211-X	DOT-E 9211	Waterman Steamship Corp., New Orleans, LA.	49 CFR 148.25–35(f)	To authorize installation and operation of electrically-powered lighting, air conditioning, alarm, fire detection, and cargo-handling systems in cargo holds containing Class A, B and C explosives in a Maritime Prepositioning Ship (TAKO). (Mode 3.)
9211-X	DOT-E 9211	Maersk Line, Limited, New York, NY	49 CFR 148.25–35(f)	To authorize installation and operation of electrically-powered lighting, air conditioning, alarm, fire detection, and cargo-handling systems in cargo holds containing Class A, B and C explosives in a Maritime Prepositioning Ship (TAKO). (Mode 3.)
9280-P	DOT-E 9280	Union Carbide Corp., Danbury, CT	49 CFR 173.119(m)	To become a party to Exemption 9280. (Mode 1.)

New Exemptions

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9559-N	DOT-E 9559	Sandco, Inc., Jacksonville, FL	49 CFR 173.154, 173.156, 173.160, 173.163, 173.164, 173.166, 173.169, 173.175, 173.182, 173.184, 173.187, 173.188, 173.194, 173.195, 173.198, 173.204, 173.207, 173.217, 173.219, 173.220, 173.229, 173.234, 173.235, 173.259a, 173.245(b), 173.366, 173.377, Part 173, Part 178.	To authorize manufacture, marking and sale of non-DOT specification polyethylene/fiberglass removable head salvage drum, net exceeding 80 gallon capacity, or 750 pounds gross weight, for shipment of certain solid and semisolid hazardous materials authorized in removable head drums. (Modes 1, and 2.)
9419-N	DOT-E 9419	PBA Compressed Gas Equipment, Westboro, MA	49 CFR 173.302(c)(2), 173.302(c)(3), 173.302(c)(4), 173.34(e), Part 107, Appendix B.	To authorize use of DOT Specification 3AAX or 3T cylinders that (i) are owned or leased by any of its subsidiaries and (ii) are retested by means other than the hydrostatic retest required in 173.34(e), for transportation of certain flammable and nonflammable gases. (Modes 1, and 3.)
9468-N	DOT-E 9468	ABCO Industries, Inc., Roebuck, SC	49 CFR 173.154	To authorize shipment of benzoyl peroxide dispersions and mixtures, classed as organic peroxide, packaged in DOT Specification 21F-600 fiber drums, with inside DOT Specification 2SL polyethylene container. (Mode 1.)
9469-N	DOT-E 9469	Mueller Ltd., Packaging Munchenstein, Switzerland	49 CFR 171.12(c), 178.3, 178.118-8(a)	To authorize manufacture, marking and sale of non-DOT specification steel drums of one millimeter thickness (19 gauge), to be used in place of 20/18 gauge, 55-gallon capacity, DOT-17E drums, for transportation of various hazardous materials. (Modes 1, 2, 3, and 4.)
9488-N	DOT-E 9488	E. I. du Pont de Nemours & Co., Inc., Wilmington, DE	49 CFR 172.570	To authorize shipment of potassium cyanide, solid, and sodium cyanide, solid, in collapsible, water-tight, polyethylene-lined, woven polypropylene bag, each having a capacity not exceeding 2,205 pounds each. (Modes 1, and 2.)
9519-N	DOT-E 9519	Transchem, Inc., South Bend, IN	49 CFR 173.119, 173.256, 173.266, 178.19, 178.255, Part 173, Subpart F.	To authorize manufacture, marking and sale of non-DOT specification rotationally molded, cross-linked polyethylene or linear medium density polyethylene portable tank, enclosed within a protective steel frame for shipment of corrosive liquids, flammable liquids or an oxidizer. (Modes 1, and 2.)
9543-N	DOT-E 9543	Reynolds Manufacturing Co., McAllen, TX	49 CFR 173.119(a), (m), 173.245(a), 173.340-7, 173.346(a), 178.342-5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks, patterned after DOT Specification MC-307 with certain exceptions, for transportation of certain flammable, corrosive or poison waste liquids or semi-solids. (Mode 1.)
9550-N	DOT-E 9550	U.S. Department of Defense, Falls Church, VA	49 CFR 172.101, 172.400, 173.306, 173.202, 175.3.	To authorize carriage of a cesium clock containing 5 grams of cesium and wet storage batteries in the passenger compartment of an aircraft. (Modes 1, and 5.)
9560-N	DOT-E 9560	Polaroid Corp., Cambridge, MA	49 CFR 173.119, 173.345	To authorize one-time reuse of refurbished DOT Specification 37M/2SL composite packaging for shipment of certain waste corrosive liquids, n.o.s., and waste flammable liquids, n.o.s. (Mode 1.)
9571-N	DOT-E 9571	U.S. Department of Justice, Washington, DC	49 CFR Parts 100–177	To authorize transport of not more than 5 grams of an approved or unapproved explosive in a special packaging essentially without regulation. (Modes 1, 2, 3, 4, and 5.)
9576-N	DOT-E 9576	Daniel F. Young, Inc., Miami, FL	49 CFR 172.101 column 8(b), 175.30	To authorize shipment of three rocket motors, having a gross weight in excess of that presently authorized for cargo aircraft. (Mode 4.)

Emergency Exemptions

Application	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 7092-P	DOT-E 7092	Aluminum Co. of America, Pittsburgh, PA	49 CFR 172.101, 172.420, 175.3	To become a party to Exemption 7092. (Modes 1, 2, 3, and 4.)
EE 9502-N	DOT-E 9502	Olin Corp. East Alton, IL	49 CFR 172.101, 175.30	To authorize transport of ammunition for cannon and other explosives and certain non-hazardous materials aboard cargo aircraft. (Mode 4.)
EE 9508-N	DOT-E 9508	Tennessee Eastman Co., Kingsport, TN	49 CFR 171.2, 173.119,. 173.125, 179.201-1.	To authorize use of a non-DOT specification tank car which conforms to DOT Specification 111A100W1 except for a thinner shell thickness in certain areas and for deviations in length of welds used in attaching bar pads. (Mode 2.)
EE 9504-N	DOT-E 9504	Great Lakes Chemical Corp., El Dorado, AK	49 CFR 173.252(a)(4)	To authorize a DOT Specification MC-312 cargo tank containing bromine to be loaded at less than 92% full capacity. (Mode 1.)
EE 9505-N	DOT-E 9505	Morton Thiokol, Inc., Brigham, UT	49 CFR 172.101, 173.61, 173.65	To authorize shipment of Cyclotetramethylene tetranitramine, dry, (HMX), in conductive velostat plastic bags, overpacked in DOT Specification 21C fiber drums not to exceed 200 pounds per drum. (Mode 1.)
EE 9506-N	DOT-E 9506	The Ensign-Bickford Co., Simsbury, CT	49 CFR 173.56(b)	To authorize two shipments of more than 110 detonators in one inside specially designed package. (Mode 1, 3.)

Withdrawals

Application	Applicant	Regulation(s) affected	Nature of exemption thereof
6626-P	National Welders, Charlotte, NC	49 FR 173.34(e) (15) (i), 173.34(e) (15) (v), 175.3.	To become a party to Exemption 6626. (Modes 1, 2, 3, 4, and 5.)
9554-X	Atlas Powder Co. Dallas, TX	49 FR 173.114a, 173.154, 173.60	To authorize transport of (propellant explosives, blasting agents and oxidizers, in a DOT Specification MC-306, MC-307 and MC-312 cargo tank. (Mode 1).

Denials

9057–X Request by Olympic Chemical Company, Orange, CA to renew and authorize an alternate angle valve similer to the one presently authorized except for shape of side port to be used on chlorine cargo tanks denied April 21, 1986.

9516–N Request by Union Carbide Corporation, Danbury, CT to authorize shipment of certain gases and their mixtures in fiberglass insulated (fiberlume) specification 3AL cylinders denied April 18, 1986.

9573–N Request by Chevron Resources Company, Grants, NM to authorize uranium ore to be transported in open rather than closed rail cars denied April 4, 1986.

Issued at Washington, DC, May 19, 1986.

J. Suzanne Hedgepeth,

Acting Chief, Exemptions and Approvals Branch, Office of Hazardous Materials Transportation.

BILLING CODE 4910-60-M

Urban Mass Transportation Administration

[Docket No. 86–G]

Buy American Requirements, Waiver Extension

AGENCY: Urban mass Transportation Administration, DOT.

ACTION: Notice of Temporary Extension of Buy America Waiver and Request for Comments.

SUMMARY: In the Federal Register of May 2, 1985 (50 F.R. 18760), the Urban Mass Transportation Administration (UMTA) published a notice of waiver from the Buy America requirements of the Surface Transportation Assistance Act (STAA) of 1982 for microcomputers. The purpose of this Notice is to temporarily extend the waiver until UMTA can determine whether the waiver should be granted permanently, and to seek comments from interested parties on that question, as to whether or not the waiver should be granted permanently.

DATE: The waiver granted on May 2, 1985, is extended until further notice. Comment period expires June 30, 1986.

ADDRESS: Comments should be submitted to UMTA Docket 86–G, Urban Mass Transportation Administration, Room 9228, 400 Seventh Street, SW., Washington, DC 20590. All comments and suggestions received will be available for examination at the above address between 8:30 a.m. and 5:00 p.m. Monday through Friday. Receipt of comments will be acknowledged by UMTA if a self-addressed stamped postcard is included with each comment.

FOR FURTHER INFORMATION CONTACT: Edward J. Gill, Jr., Office of the Chief Counsel, Room 9228, 400 Seventh Street, SW., Washington, DC 20590, (202) 426–4063.

SUPPLEMENTARY INFORMATION: On May 2, 1985, UMTA granted a temporary waiver for microcomputers from the Buy America requirements in response to a request from the America Association of State Highway and Transportation Officials (AASHTO) which indicated that several UMTA grantees were experiencing difficulty in purchasing domestically produced microcomputer equipment appropriate to their needs.

Section 165(b)(2) of the STAA provides that a waiver may be granted if materials and products being procured are not produced in the United States in sufficient and reasonable quantities and of satisfactory quality. Under UMTA regulations, the item being procured is presumed to be unavailable if no responsive bid is received which will provide a domestically produced product. Given the rapid technological changes in an expanding market for microcomputers, UMTA, at this time, is soliciting comments as to whether or not this waiver should be permanently granted. UMTA will take further action based on the comments received.

Issued on: May 27, 1986.

Ralph L. Stanley,

Administrator.

BILLING CODE 4910-57-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Department Circular—Public Debt Series—No. 20–86]

Treasury Notes of August 15, 1991, Series K–1991

Washington, May 21, 1986.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $7,750,000,000 of United States securities, designated Treasury Notes of August 15, 1991, Series K–1991 (CUSIP No. 912827 TS 1), hereafter referred to a Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The Notes will be dated June 3, 1986, and will accrue interest from that date, payable on a semiannual basis on February 15, 1987, and each subsequent 6 months on August 15 and February 15 through the date that the principal becomes payable. They will mature August 15, 1991, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next-succeeding business day.

2.2. The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. Notes in registered definitive form will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Notes in book-entry form will be issued in multiples of those amounts. Notes will not be issued in bearer form.

2.5. Denominational exchanges of registered definitive Notes, exchanges of Notes between registered definitive and book-entry forms, and transfers will be permitted.

2.6. The Department of the Treasury's general regulations governing United States securities apply to the Notes offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1 Tender will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239, prior to 1:00 p.m., Eastern Daylight Saving time, Wednesday, May 28, 1986. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, May 27, 1986, and received no later than Tuesday, June 3, 1986.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A

noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a 1/8 of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 98.750. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in section 3.5. must be made or completed on or before Tuesday, June 3, 1986. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Friday, May 30, 1986. In addition, Treasury Tax and Loan Note Option Depositaries may make payment for the Notes allotted for their own accounts and for accounts of customers by credit to their Treasury Tax and Loan Note Accounts on or before Tuesday, June 3, 1986. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted are not required to be assigned if the new Notes are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new Notes are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (Notes offered by this circular) in the name of (name and taxpayer identifying number)". Specific instructions for the issuance and delivery of the new Notes, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment must be delivered at the expense and risk of the holder.

5.4. Registered definitive Notes will not be issued if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (e.g., an individual's social security number or an employer identification number) is not furnished. Delivery of the Notes in registered definitive form will be made after the requested form of registration has been validated, the registered interest account has been established, and the Notes have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, to issue and deliver the Notes on full-paid allotments, and to maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public

announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

Gerald Murphy,

Fiscal Assistant Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 6:06 p.m. on Friday, May 23, 1986, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to:

(A)(1) receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in Centennial State Bank of Colorado, Englewood, Colorado, which was closed by the State Bank Commissioner for the State of Colorado on Friday, May 23, 1986; (2) accept the bid for the transaction submitted by First Interstate Bank of Centennial, National Association, Englewood, Colorado, a newly-chartered national bank; and (3) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction; and

(B) adopt a resolution making funds available for the payment of insured deposits made in Sunshine State Bank, South Miami, Florida, which was closed by the State Comptroller for the State of Florida on Friday, May 23, 1986.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Mr. Dean S. Marriott, acting in the place and stead of Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552 (b)(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting was recessed at 6:19 p.m. and at 3:03 p.m. on Saturday, May 24, 1986, the meeting was reconvened, by telephone conference call, at which time the Board of Directors adopted a resolution making funds available: (1) For the payment of insured deposits made in First State Bank & Trust Company, Edinburg, Texas, which was closed by the Banking Commissioner for the State of Texas on Friday, May 23, 1986, and (2) for an advance payment to uninsured depositors and other general creditors of the closed bank equal to 15 percent of their uninsured claims.

In reconvening the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Mr. Dean S. Marriott, acting in the place and stead of Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(8) and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8) and (c)(9)(B)).

Dated: May 27, 1986.

Federal Deposit Insurance Corporation

Hoyle L. Robinson,

Executive Secretary.

Part II

General Services Administration

Federal Travel Regulations

BEST COPY AVAILABLE

GENERAL SERVICES ADMINISTRATION

[GSA Bulletin FPMR A–40, Supp. 20]

Federal Travel Regulations

AGENCY: Federal Supply Service, GSA.

ACTION: Notice of changes to Federal Travel Regulations.

SUMMARY: GSA has issued GSA Bulletin FPMR A–40, Supplement 20, transmitting changed pages amending the Federal Travel Regulations (FTR), FPMR 101–7, to implement the new statutory provisions contained in Title I—Travel Expenses of Federal Civilian Employees, Pub. L. 99–234 (99 Stat. 1756), January 2, 1986.

The provisions of Title I, Pub. L. 99–234, remove the statutory ceilings on per diem allowances and actual subsistence expense reimbursements for Federal civilian employees on official travel within the conterminous United States and authorize the Administrator of General Services to establish appropriate maximum rates administratively. Title I of Pub. L. 99–234 also allows GSA's Administrator to establish the type of reimbursement system to be used by Federal agencies. GSA Bulletin FPMR A–40, Supplement 20, establishes maximum per diem rates and a lodgings-plus per diem system as the predominant method of reimbursement for travel within CONUS. While authority for reimbursement of the actual and necessary subsistence expenses of travel has been retained, use of this authority is limited and it is expected that such use will be held to a minimum.

Supplement 20 implements other provisions of Title I of Pub. L. 99–234 noted in the Supplementary Information paragraph.

EFFECTIVE DATES: (1) Except as provided in (2), below, the changed provisions of the FTR transmitted by Supplement 20 are effective for travel (including travel incident to change of official station) performed on or after July 1, 1986.

(2) The provisions of Chapter 2, Relocation Allowances, are extended to include officers and employees of the U.S. Postal Service who are transferred in the interest of the Government to an executive agency (see 2–1.2a(1–a)) and whose effective date of transfer (date employee reports for duty at the new official station) is on or after May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Staff members, Regulation and Policy Division FTS 557–1253 or 557–1256 (for non-FTS use AC 703).

SUPPLEMENTARY INFORMATION: GSA, in consultation with the Office of Management and Budget, has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in a major increase in costs to consumers or others, nor otherwise have a significant adverse effect on the national economy. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least cost to society.

Background Information

In addition to the new authority for reimbursement of subsistence expenses discussed in the Summary, above, title I of Pub. L. 99–234:

(1) Requires GSA, at least every 2 years from now until 1991, to collect data on travel, transportation, and relocation payments from agencies spending over $5 million a year on these payments and to submit an analysis thereof to the Office of Management and Budget;

(2) Expands eligibility for certain travel expense reimbursements to employees who experience personal emergencies while on official travel;

(3) Authorizes temporary payments of subsistence and transportation expenses for threatened law enforcement/investigative employees; and

(4) Expands eligibility for relocation allowances to U.S. Postal Service employees transferring to other Federal agencies.

Title II—Travel Expenses of Government Contractors, also contained in Pub. L. 99–234, amends section 201 of the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) by limiting Government-contractors' travel expenses to the rates and amounts established under Title I of Pub. L. 99–234 for Federal civilian employee travel. These provisions affecting Government contractors will be implemented in a change to the Federal Acquisition Regulation.

Notice to Agencies

The provisions of Supplement 20 establish a new lodgings-plus per diem system (without quarter day computations) for subsistence expense reimbursement for travel *within* CONUS. However, the current flat rate per diem system (with quarter day computations) for travel to, from, and between, or while at, locations *outside* CONUS is being retained at this time. As a result, allowable per diem reimbursement under the new regulations is computed differently based on whether travel is within or outside CONUS. A thorough review of the current reimbursement system for travel outside CONUS will be conducted following the issuance of this change to the FTR for CONUS travel.

A review also will be made of the existing structure of reimbursement levels for subsistence expenses incurred by employees incident to changes of official station. The requirement in the new law that GSA collect data from certain agencies on their travel, transportation and relocation payments will be implemented separately through issuance of a temporary regulation, or other publication.

Explanation of Changes

This supplement amends the FTR as follows:

a. Paragraph 1–2.4 is revised to refer the user to new Part 1–12 for provisions covering reimbursement of certain transportation expenses when, due to illness or injury or other personal emergency situation, an employee performs emergency travel (see paragraph f, below).

b. Part 1–7 is revised to make the following changes: (1) Prescribe a standard maximum per diem rate applicable under specified conditions for all locations within the conterminous United States (CONUS) and maximum per diem rates for specific localities (see 1–7.2a, 1–7.5a, and Appendix 1–A);

(2) Provide procedures by which agencies may request GSA to review a particular area to determine if it qualifies for a higher per diem rate (see 1–7.3);

(3) Implement a new lodgings-plus per diem system for travel within CONUS under which reimbursement for subsistence expenses is computed for each travel day based on the amount the traveler pays for lodging plus a fixed allowance for meals and incidental expenses, the total not to exceed a maximum daily rate set by locality (the average cost of lodging computation has been rescinded) (see 1–7.5);

(4) Add guidelines for determining the types of expenses that are allowable for lodgings (see 1–7.5c(2));

(5) Restate and revise, as necessary for clarification, the rules which generally apply on a worldwide basis (see 1–7.1, 1–7.2, 1–7.4, 1–7.7 thru 1–7.11);

(6) Restate and revise, as necessary for clarification, the rules for determining per diem allowances for an

BEST COPY AVAILABLE

route travel to, from, or between locations outside CONUS, including guidelines for authorization or approval of a rest stop (see 1–7.6);

(7) Provide guidelines for per diem reductions in certain situations, including provisions which reference regulations issued by the Office of Personnel Management (OPM) governing payment of subsistence expenses for extended training assignments (see 1–7.7);

(8) Provide specific guidelines for per diem computations when lodging accommodations are obtained on a weekly or monthly basis or when mobile homes or recreational vehicles are used during temporary duty assignments (see 1–7.9); and

(9) Restate, clarify and revise to some extent the rules for payment of per diem and actual subsistence expenses when the temporary duty assignment involves leave and nonworkdays (see 1–7.11).

c. Part 1–8 is revised to make the following changes:

(1) Delete the actual expense reimbursement authority for designated high rate geographical areas and the $75 statutory ceiling for reimbursement of actual subsistence expenses;

(2) Establish new maximum daily rates that may be authorized or approved for reimbursement of actual and necessary subsistence expenses for travel within CONUS (see 1–8.3a);

(3) Reserve paragraph 1–8.3b pending approval of an executive order delegating the President's authority to establish actual expense rates for localities outside CONUS;

(4) Restate and revise current provisions and add new provisions under which actual subsistence expense reimbursement may be authorized or approved;

(5) Revise and transfer to Part 1–7 the former reference to regulations issued by OPM concerning payment of subsistence expense for extended training assignments (see 1–7.7e);

(6) Revise the former mixed travel rule to reflect the new lodgings-plus per diem reimbursement system (see 1–8.6); and

(7) Make other minor editorial changes for clarity and to conform and standardize the terminology with Part 1–7.

d. Part 1–10 is amended to make the following changes:

(1) Paragraphs 1–10.1 and 1–10.2 are revised to (a) incorporate the authority contained in 41 CFR 101–41.203–2 for agencies to authorize cash purchases of transportation services exceeding $100 in emergency situations; (b) reflect certain provisions of FPMR Temporary Regulation A–25 as it pertains to use of Government contractor-issued charge cards for cash payment of passenger transportation services; and (c) reformat for clarification; and

(2) Paragraph 1–10.3 is revised to limit the advance of funds that an employee may be provided.

e. The following paragraphs in Part 1–11 (annotated with change lines) are amended to conform with other changes made in the regulations resulting from implementation of Public Law 99–234: 1–11.3c, 1–11.6a, and 1–11.6b.

f. Part 1–12 is added to Chapter 1, Travel Allowances, to implement new statutory authority (5 U.S.C. 5702(b)) for reimbursement of certain transportation expenses and allowable per diem when, due to illness or injury, or other personal emergency situation, an employee returns to his/her official station or performs travel from the temporary duty location to the official station or an alternate location to attend to the emergency situation.

g. Part 1–13 is added to Chapter 1, Travel Allowances, and reserved.

h. Part 1–14 is added to Chapter 1, Travel Allowances, to implement new statutory authority (5 U.S.C. 5706a) for payment of subsistence and transportation expenses under certain circumstances when the life of an employee who is employed in a law enforcement or investigative position, or similar capacity, or members of the employee's immediate family, is threatened as a result of the employee's assigned duties.

i. Paragraph 2–1.1 is amended and paragraph 2–1.2a(1–a) is added to implement new statutory authority (5 U.S.C. 5734), expanding the coverage of Chapter 2, Relocation Allowances, to include employees of the U.S. Postal Service who are transferred in the interest of the Government to an Executive Agency (as defined in 5 U.S.C. 5721) to the same extent as employees transferring between such Executive agencies.

j. Paragraphs 2–2.1, 2–2.2, and 2–2.3d are revised to reflect use of the new lodgings-plus per diem system rules under Chapter 1 for computing per diem for en route travel incident to changes of official station wholly within CONUS and to clarify that the applicable maximum per diem rate for such travel is still $50 (standard CONUS rate).

k. Part 2–5 is amended as indicated below:

(1) Paragraph 2–5.2g is revised to incorporate a new rule for determining the beginning of the eligibility period for reimbursement of temporary quarters subsistence expenses when the en route travel incident to a change of official station within CONUS and occupancy of temporary quarters occur in the same calendar day. Although reformatted, the rule has not changed for this determination when en route travel incident to changes of official station is computed under the quarter day system.

(2) Paragraph 2–5.4c(1) is revised to clarify that the maximum per diem rate of $50 (now referred to as the standard CONUS rate) is still applicable for computation of the maximum daily subsistence allowance when temporary quarters are located within CONUS.

l. Other minor and/or editorial changes have been made where indicated by change lines.

Accordingly, the Federal Travel Regulations, are amended as follows:

CHAPTER 1. TRAVEL ALLOWANCES

1. **Authority.** (Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Executive Order No. 11609, July 22, 1971; 5 U.S.C. 5707)

Part 2. Transportation Allowable

2. Paragraph 1–2.4 is revised to read as follows:

1–2.4. *Emergency travel due to illness or injury or a personal emergency situation.* Provisions governing reimbursement for allowable transportation in connection with emergency travel due to illness or injury or a personal emergency situation are in Part 1–12.

Part 7. Per Diem Instead of Actual Subsistence

3. Part 7 is revised to read as follows:

Part 7. Per Diem Allowances

1–7.1. *General.* The provisions of this Part 1–7 apply worldwide (both within and outside CONUS) except as specifically provided herein.

a. *Authority.* Per diem allowances shall be paid as prescribed in Part 1–7 for official travel away from the official station (including travel incidental to a change of official station), except when actual subsistence expense reimbursement is authorized or approved as provided in Part 1–8.

b. *Definitions.* For purposes of this Part 1–7, the following definitions apply:

(1) *Calendar day.* Calendar day means the 24-hour period from one midnight to the next midnight. For purposes of these regulations, the calendar day technically begins one second after midnight (reflected herein as 12:01 a.m.) and ends at 12:00 midnight.

(2) *CONUS.* CONUS refers to both the "Continental United States", defined in 5 U.S.C. 5701(6), and the "conterminous United States", defined in 1–1.3c(2) as the 48 contiguous States and the District of Columbia.

(3) *Locality rates.* Locality rates are maximum per diem rates prescribed for specific localities within CONUS. Locality rates are listed by State and city in appendix 1–A.

(4) *Standard CONUS rate.* Generally, the standard CONUS rate is prescribed for any location within CONUS that is not included in one of the defined localities or areas for which a specific rate is prescribed in appendix 1–A. The standard CONUS rate is also prescribed in certain specified circumstances as provided herein for *all* locations within CONUS, including the separately defined localities.

(5) *Per diem allowance.* The per diem allowance is a daily payment instead of actual expenses for lodging, meals and related incidental expenses (see 1–7.1c). The per diem allowance is distinguished from transportation expenses and other miscellaneous travel expenses as described below.

(a) *Transportation expenses.* Transportation expenses include commercial bus, air, rail, or vessel/steamship fares and are reimbursable in addition to the per diem allowance. Transportation expenses also include local transit system and taxi fares, cost of commercial rental cars and other special conveyances, and mileage and other allowances for use of privately owned conveyances, including fees for parking, ferries, etc. (See Parts 1–2, 1–3, and 1–4 for governing provisions.)

(b) *Other miscellaneous travel expenses.* Other miscellaneous travel expenses are those described in Part 1–8 that are directly attributable and necessary to the travel and temporary duty as authorized and performed. When authorized or approved by the agency concerned, these expenses are reimbursable in addition to the per diem allowance and transportation expenses.

c. *Types of expenses covered by per diem.* The per diem allowance covers all charges, including taxes and service charges where applicable, for the following types of subsistence expenses.

(1) *Lodging.*

(a) The term "lodging" includes expenses for overnight sleeping facilities; baths; personal use of the room during daytime; and service charges for fans, air conditioners, heaters, and fires furnished in rooms when such charges are not included in the room rate.

(b) The term "lodging" does not include accommodations on airplanes, trains, buses, or vessels. The cost of accommodations furnished aboard common carriers is included in the transportation cost and is not considered a subsistence expense. However, in determining the overall cost to the Government when authorizing the mode of transportation to be used (see 1–2.2), the availability of these accommodations shall be considered.

(2) *Meals.* Expenses for breakfast, lunch, and dinner (specifically excluded are alcoholic beverage and entertainment expenses, and any expenses incurred for other persons).

(3) *Incidental expenses related to subsistence.*

(a) Fees and tips to waiters and waitresses, porters, baggage carriers, bellhops, hotel maids, dining room stewards or stewardesses and others on vessels, and hotel servants in foreign countries.

(b) Laundry and cleaning and pressing of clothing.

(c) Transportation between places of lodging or business and places where meals are taken except as provided in 1–2.3b.

(d) Telegrams and telephone calls necessary to reserve lodging accommodations. (See Part 1–6 for allowable telegram and telephone expenses incurred for other purposes.)

d. *Employee responsibility.* An employee traveling on official business is expected to exercise the same care in incurring expenses that a prudent person would exercise if traveling on personal business and expending personal funds (see 1–1.3a). Excess costs, circuitous routes, delays, or luxury accommodations and services unnecessary or unjustified in the performance of official business are not acceptable under this standard. Employees will be responsible for excess costs and any additional expenses incurred for personal preference or convenience.

e. *Agency responsibilities for authorizing/approving rates.* It is the responsibility of the head of each agency, or his/her designee, to authorize or approve only those per diem allowances that are justified by the circumstances affecting the travel and are allowable under the specific rules in Part 1–7. However, the per diem rates provided for under these rules represent the maximum allowable. To prevent authorization or approval of per diem allowances in excess of amounts required to meet the necessary subsistence expenses of official travel, consideration shall be given to factors such as those listed below that reduce the necessary expenses of employees. (See specific guidelines in 1–7.7 for reducing rates.)

(1) Known arrangements or established cost experience at temporary duty locations showing that lodging and/or meals can be obtained without cost or at reduced cost to the employee;

(2) Situations in which special rates for accommodations have been made available for a particular meeting, conference, training or other temporary duty assignment;

(3) Traveler's familiarity with establishments providing lodging and meals at a lower cost in certain localities, particularly where repetitive travel or extended stays are involved;

(4) Modes of transportation where accommodations are provided as part of the transportation cost; and

(5) Situations in which the Government furnishes lodging, such as Government quarters or other lodging procured for the employee by means of an agency purchase order (see 1–7.7a).

1–7.2. *Maximum per diem rates.* Per diem allowances for official travel authorized or approved under this Part 1–7 shall be at daily rates not in excess of the maximum per diem rates established as follows:

a. *Conterminous United States (CONUS).* The per diem allowances payable for official travel within CONUS shall not exceed the maximum per diem rates established by the Administrator of General Services and listed in appendix 1–A of this regulation. (See instructions in 1–7.3 for requesting rate adjustments and 1–7.5 for application of per diem rules within CONUS.)

b. *Nonforeign areas outside CONUS.* The per diem allowances payable for official travel in nonforeign areas shall not exceed the maximum per diem rates established by the Secretary of Defense and listed in Civilian Personnel Per Diem Bulletins published periodically in the Federal Register. The term "nonforeign areas" includes the States of Alaska and Hawaii, the Commonwealth of Puerto Rico, and the possessions of the United States.

c. *Foreign areas.* Per diem allowances payable for official travel in foreign areas shall not exceed the maximum per diem rates established by the Secretary of State and published in the Per Diem Supplement to the Standardized Regulations (Government Civilians, Foreign Areas). The term "foreign areas" includes any area (including the Trust Territory of the Pacific Islands) situated both outside CONUS and the nonforeign areas as described in a and b, above.

1–7.3. *Rate adjustment requests for travel within CONUS.*

a. Federal agencies may submit a request to GSA for review of the subsistence costs in a particular city or area when travel to that location is repetitive or on a continuing basis and

travelers' experiences indicate that the prescribed standard CONUS per diem rate is inadequate. Other per diem rates listed in appendix 1–A will be surveyed on an annual basis by GSA to determine whether rates are adequate. Agencies' requests shall be submitted to the General Services Administration, Federal Supply Service, Attn: Regulations and Policy Division (FFY), Washington, DC 20406.

b. Requests for rate adjustments shall include a description of the location involved (city, county, or other defined area) and a recommended rate supported by a statement explaining the circumstances that cause the existing rate to be inadequate. The request also should contain an estimate of the annual number of trips to the location and the average duration of such trips.

1–7.4. *General rules affecting entitlement to per diem.*

a. *No allowance at official station.* A per diem allowance shall not be allowed within the limits of the official station (see definition in 1–1.3c(1)) at, or within the vicinity of, the place of abode (home) from which the employee commutes daily to the official station except as provided in Part 1–14. Agencies may define a radius or commuting area that is broader than the limits of the official station within which per diem will not be allowed for travel within one calendar day.

b. *Travel of 10 hours or less (10-hour rule).* A per diem allowance shall not be allowed when the period of official travel is 10 hours or less during the same calendar day except as provided in 1–7.6b(1). (Also see 1–7.5b(1).)

c. *Beginning and ending of entitlement.* For computing per diem allowances, official travel begins at the time an employee leaves his/her home, office, or other authorized point of departure and ends when the traveler returns to his/her home, office, or other authorized point at the conclusion of the trip.

d. *Deductions for meals and/or lodgings furnished.* Where meals and/or lodging are furnished without charge or at a nominal cost by a Federal Government agency at a temporary duty station, an appropriate deduction shall be made from the authorized per diem rate. (See 1–7.5a(2), 1–7.6c and 1–7.7b.)

1–7.5. *Lodgings-plus per diem computation rules for travel within CONUS.* Except as otherwise provided in Part 1–7, the per diem allowances authorized or approved for all official travel within CONUS, including travel incident to a change of official station, shall be computed under the lodgings-plus per diem system as prescribed herein. Under this system, the per diem allowance for each travel day is established on the basis of the actual amount the traveler pays for lodgings plus a prescribed allowance for meals and incidental expenses (M&IE)—the total not to exceed the applicable maximum per diem rate. The rules provided in a through d, below, shall be applied in the specific situations covered.

a. *Maximum CONUS per diem rates (appendix 1–A).* Maximum per diem rates prescribed under 1–7.2a for travel within CONUS are listed in appendix 1–A for certain specific localities. For all CONUS locations not specifically listed, a standard maximum per diem rate of $50 is prescribed. For all CONUS locations, whether or not they are specifically listed in appendix 1–A, the standard CONUS rate applies in certain specified travel circumstances (see b(2), below) and for subsistence allowances incident to a change of official station (see Parts 2–2, 2–4 and 2–5). The following elements comprise the per diem allowance:

(1) *Maximum lodging expense allowance.* The maximum per diem rates include a maximum amount for lodging expenses. The employee will be reimbursed for actual lodging costs incurred up to the applicable maximum amounts listed in appendix 1–A. Receipts for lodging are required as provided in c(1), below.

(2) *Meals and incidental expenses (M&IE) allowance.* The maximum per diem rates include a fixed allowance for meals and incidental expenses related to subsistence. This allowance is reflected in appendix 1–A as the M&IE rate. When the M&IE rate, or fraction thereof, is authorized or approved as provided herein, it is payable to the traveler without itemization of expenses or receipts. The M&IE rate shall be allocated as shown below when making necessary deductions from the per diem for meals furnished to the employee without charge by the Federal Government.

M&IE rates	$55	$50
Breakfast	6	7
Lunch	8	7
Dinner	19	17
Incidentals	2	2

b. *Per diem allowance computations.* The per diem allowance is to be calculated using the rules stated in (1) through (4), below.

(1) *Travel of less than 24 hours.*

(a) *10 hours or less.* Per diem shall not be allowed for travel of 10 hours or less within the same calendar day (see 1–7.4b). This prohibition is also applicable to travel incident to a change of official station within CONUS.

(b) *Exception to 10-hour rule.* Per diem shall not be allowed for employees who qualify for per diem solely on the basis of working a non-standard workday (e.g., four 10-hour days or other compressed schedule). In such instances, per diem shall not be allowed for travel periods less than or equal to the employee's scheduled workday hours plus 2 hours.

(c) *More than 10 hours.* When the travel period is more than 10 hours but less than 24 hours, the following rules apply:

(i) *Lodging not required.* If lodging is not required, the per diem allowable shall be one-half of the M&IE rate applicable to the location of the temporary duty assignment. If more than one temporary duty point is involved, the allowance will be one-half of the M&IE rate prescribed for the location where the majority of the time is spent performing official business.

(ii) *Lodging required.* If lodging is required, the rules for travel of 24 hours or more apply.

(2) *Travel of 24 hours or more.* The applicable maximum per diem rate (standard CONUS or locality rate from appendix 1–A) for each calendar day of travel shall be determined by the travel status and location of the employee at 12:00 midnight and whether lodging is required at such location. When lodging is required, the applicable maximum per diem rate shall be the maximum rate prescribed in appendix 1–A for the temporary duty location or en route stopover point where the lodging is obtained (see (3) and (4), below, for rules on lodging location and travel incident to a change of official station). Only one maximum rate will be applicable to a calendar day (12:01 a.m.–12:00 midnight). The following rules shall be applied in calculating the allowable per diem:

(a) *Day of departure.*

(i) *With lodging.* When lodging is required on the day travel begins (day of departure from the official station or other authorized point), the per diem allowable shall be the actual cost of lodging incurred by the employee, limited to the maximum applicable lodging allowance, plus one-half of the applicable M&IE rate.

(ii) *Without lodging.* When lodging is not required on the day travel begins, the per diem allowable shall be one-half the standard CONUS M&IE rate.

(b) *Full calendar days of travel.*

(i) *Lodging required.* For each full calendar day (12:01 a.m.–12:00 midnight) that the employee is in a travel status

and lodging is required (whether en route or at a temporary duty location), the actual cost of lodging incurred by the traveler shall be added to the applicable M&IE rate. The resulting amount, limited to the maximum per diem rate prescribed for the location in appendix 1–A, shall be the allowable per diem for the full calendar day.

(ii) *Lodging not required.* For any full calendar day of travel when lodging is not required (such as when employee is en route overnight returning to the official station), the maximum per diem rate shall be the M&IE rate applicable to the preceding travel day.

(c) *Day of return.* For the day travel ends (when employee returns to the official station or other authorized point), the per diem allowance shall be one-half the M&IE rate applicable to the preceding calendar day. The M&IE rate for the preceding day will be the M&IE rate for the last temporary duty point, except when lodging is required at an intervening en route stopover point. When this occurs, the M&IE rate for the en route stopover point will be applicable.

(d) *Lodging obtained after midnight.* Although per diem generally is based on the employee's location at midnight, there will be instances in which he/she is en route and does not arrive at the lodging location until after midnight. In such cases, the lodging shall be claimed for the preceding calendar day and the applicable maximum per diem will be determined as if the employee had been at the lodging location at 12:00 midnight of the preceding day.

(3) *Lodging location rules.*

(a) *Lodging at temporary duty location.* It is presumed that the employee will obtain lodging at the temporary duty location. However, if the employee obtains lodging away from or outside the temporary duty location because of personal preference or convenience, the allowable per diem shall be limited to the maximum per diem rate prescribed for the temporary duty location.

(b) *Lodging not available at temporary duty location.* In certain circumstances, lodging accommodations may not be available at the temporary duty location and the employee must obtain lodging in an adjacent locality where the prescribed maximum per diem rate is higher than the maximum per diem rate for the location of the temporary duty point. In such instances, if the lodging costs are excessive, the agency may make an administrative determination on an individual case basis to either authorize or approve the higher maximum per diem rate or reimburse the employee on an actual expense basis (see 1–8.2a). If the higher maximum rate is not justified and authorized in advance, the employee must furnish a statement with the travel voucher satisfactorily explaining the circumstances that caused him/her to obtain lodging in an area other than at the temporary duty point designated in the travel authorization.

(4) *Maximum rate applicable to change of official station travel.* The standard CONUS rate shall be the applicable maximum per diem rate for en route travel performed incident to a change of official station.

c. *Receipt requirements and allowable lodging expenses.*

(1) *Lodging receipt requirements.* Receipts shall be required to support all lodging costs for which an allowance is claimed under the lodgings-plus per diem system except that a statement instead of a receipt may be accepted for the fee or service charge incurred for the use of Government quarters.

(a) *Double occupancy.* If the lodging receipt shows a charge for double occupancy, such fact shall be shown on the travel voucher with the name and employing agency or office of the person sharing the room if such person is a Government employee on official travel. One-half of the double occupancy charge shall be allowable for each employee. If the person sharing the room is not another Government employee on official travel, identification of the person sharing the room is not required and the employee may be allowed the single room rate.

(b) *Receipts lost or impractical to obtain.* If receipts have been lost or destroyed or are impractical to obtain, a statement acceptable to the agency explaining the circumstances shall be furnished with the travel voucher, including the name and address of the lodging facility, the dates the lodging was obtained, and the cost incurred. Agencies may require employees to obtain copies of lost or destroyed receipts from the lodging establishment. (See also 1–11.3d.)

(2) *Allowable lodging expenses.* As provided in 1–7.5a(1), the traveler will be reimbursed only for his/her actual cost of lodging up to the maximum amount. No minimum amount is authorized for lodging under the lodgings-plus per diem system since reimbursement is based on the actual cost of lodging incurred by the employee. Expenses incurred in the situations described below will be allowed as lodging expenses.

(a) *Conventional lodging.* When an employee uses conventional lodging facilities (e.g., hotels, motels, and boarding houses), the allowable lodging expense will be based on the single room rate for the lodging used (for double occupancy, see c(1)(a), above). (See 1–7.9a for computing daily lodging expense when lodging is rented on a weekly or monthly basis.)

(b) *Government quarters.* A fee or service charge paid for the use of Government quarters is an allowable lodging expense.

(c) *Lodging with friends or relatives.* When the employee obtains lodging from friends or relatives (including members of the immediate family) with or without charge, no part of the per diem allowance will be allowed for lodging unless the host actually incurs additional costs in accommodating the traveler. In such instances, the additional costs substantiated by the employee and determined to be reasonable by the agency will be allowed as a lodging expense. Neither costs based on room rates for comparable commercial lodging in the area nor flat "token" amounts will be considered as reasonable.

(d) *Lodging in nonconventional facilities.* When no conventional lodging facilities are present (e.g., in remote areas) or when there is a shortage of rooms because of an influx of attendees at special events (e.g., world's fairs or Olympics), costs of lodging obtained in nonconventional facilities may be allowed. Such facilities may include college dormitories or similar facilities as well as rooms made available to the public by area residents in their homes. In such cases, the traveler must provide an explanation of the circumstances which is acceptable to the agency.

(e) *Use of travel trailer or camping vehicle for lodgings.* A per diem allowance for lodging may be allowed when the traveler uses a travel trailer or camping vehicle while on temporary duty assignments away from his/her official station. (See 1–7.9b for per diem computations in such situations.)

d. *Deviation from lodgings-plus per diem system.* An agency may determine that the lodgings-plus method as prescribed in 1–7.5 is not appropriate for certain travel assignment situations, such as when quarters or meals, or both, are provided at no cost or at a nominal cost by the Government or when for some other reason the subsistence costs to be incurred by the employee can be determined in advance. In such instances a specific per diem rate may be established within the maximum per diem otherwise applicable to the travel situation and appropriate reductions made in accordance with 1–7.7, provided the exception from the lodgings-plus per diem system and the specific per diem

rate are authorized in advance on the travel authorization by an appropriate official of the agency concerned.

1–7.5. *Per diem computation rules for travel to, from, between, or within locations outside CONUS.* Except as otherwise provided in Part 1–7, per diem allowances authorized or approved for official travel to, from, between, or within locations outside CONUS (including travel incident to a change of official station) shall be computed as provided in a through f, below.

a. *Maximum per diem allowable.* Per diem allowances for official travel within localities outside CONUS will be at rates not to exceed the maximum per diem rate established under 1–7.2b and c for the locality in which the travel is performed. Per diem allowances for en route travel to, from, or between localities outside CONUS will be determined as provided in c, below. Whenever lodging is not required during a calendar day of official travel under 1–7.6, the applicable maximum rate shall be reduced to reflect such fact as provided in 1–7.7a.

b. *Computation of basic per diem entitlements.*

(1) *Travel of 10 hours or less.*

(a) *10-hour rule.* Per diem shall not be allowed when the travel period is 10 hours or less during the same calendar day, except when the travel period exceeds 8 hours and either begins before 6 a.m. or ends after 8 p.m. (This rule does not apply for en route travel incident to a change of official station.)

(b) *Exception to 10-hour rule.* Per diem shall not be allowed for employees who qualify for per diem solely on the basis of working a non-standard workday (e.g., four 10-hour days or other compressed schedule). In such instances per diem shall not be allowed for travel periods less than or equal to the employee's scheduled workday hours plus two hours.

(2) *Methods of prorating travel days.* Basic per diem entitlements will be calculated on a calendar day basis. When a change in travel status requires a change in the applicable rate during a calendar day or a per diem allowance must be calculated for partial days of travel, the travel day will be prorated as follows:

(a) *Travel of 24 hours or less.* For continuous travel of 24 hours or less, the travel period will be divided into 6-hour periods starting from the actual time travel begins and ending with its completion at home, office, or other authorized point. For each 6-hour period, or fraction thereof, one-fourth of the applicable per diem rate for a calendar day will be allowed.

(b) *Travel of more than 24 hours.* In computing per diem allowances for travel periods covering more than 24 hours, the calendar day (midnight to midnight) shall be the unit. The calendar day shall be divided into four 6-hour periods (quarter days). The per diem rate in effect at the beginning of a quarter day shall continue to the end of that quarter. When the per diem rate is changed during a calendar day, such rate will take effect at the beginning of the next quarter day immediately following the quarter day in which the rate change occurred. For a partial day at the beginning or ending of a travel period, one-fourth of the applicable per diem rate for the calendar day shall be allowed for each quarter day, or fraction thereof, that the employee is in a travel status during the partial day.

(c) *30-minute rule.* When the time of departure from home, office, or other authorized point at the beginning of the trip or the time of return thereto at the end of the trip involves only a 30-minute fraction of a quarter day, per diem shall not be allowed for either such quarter day unless the traveler provides a statement with the travel voucher explaining the necessity for the specific time of departure or return that is acceptable to the agency. The 30-minute rule applicable to the payment of per diem as provided herein does not apply to the beginning of continuous travel of 24 hours or less as provided in (a), above; however, it is applicable to the end of such travel.

(3) *International dateline.* In computing per diem in cases where the traveler crosses the international dateline (180th meridian), the actual elapsed time shall be used to compute per diem rather than calendar days.

c. *Computation of per diem rates for en route travel to, from, or between locations outside CONUS.* The maximum per diem rate for en route travel to, from, or between locations outside CONUS is based on the traveler's actual travel time (including time spent at rest stop locations or stopovers at intermediate points) between duty points as prescribed below.

(1) *Duty point.* As used herein, the term "duty point" means the official station outside CONUS, any other place outside CONUS at which official travel begins or ends, or the point of exit or entry within CONUS.

(2) *Rates and conditions.* For en route travel beyond the limits of CONUS by airplane, train, or boat (regardless of whether commercially or Government-owned), whether en route between a duty point within CONUS and a locality beyond or between localities outside CONUS, including stopovers of less than 6 hours, the maximum per diem that may be authorized or approved is as follows:

(a) *Same day return.* When the traveler departs from a duty point within CONUS or a locality outside CONUS and returns during the same calendar day to a duty point within CONUS or the locality outside CONUS, respectively, the maximum per diem rate allowable for the trip shall be that of the duty point at which the trip began. Since lodging is not required in this instance, the per diem rate applicable to any duty point within CONUS shall be the standard CONUS M&IE rate prescribed in appendix 1–A. For the same reason, the maximum per diem rate for the origin locality outside CONUS shall be reduced to an appropriate amount to reflect no lodging costs.

(b) *En route less than 6 hours.* For travel other than that described in (a), above, when the en route travel time is less than 6 hours between a duty point within CONUS and a duty point in a locality outside CONUS or between two duty points outside CONUS, the maximum per diem rate allowable between duty points shall be that of the destination duty point. When the destination duty point is within CONUS, the maximum per diem rate shall be the standard CONUS rate prescribed in appendix 1–A.

(c) *En route 6 hours or more.* When the en route travel time is 6 hours or more between the duty points described in (b), above, the per diem rate applicable for travel between the duty points is $6, except:

(i) For vessel travel of more than 9 successive calendar days, in addition to the fractional days of embarkation and debarkation, the per diem rate for the succeeding calendar days and for the fractional day of debarkation is $2; and

(ii) When either the $6 or $2 rate prescribed herein is not commensurate with a traveler's subsistence expenses, a different per diem rate may be authorized or approved not in excess of the maximum per diem rate applicable to the destination duty point or, with respect to vessel travel, not in excess of $9, except that the rate for travel by the Alaska Ferry System shall not exceed the standard M&IE rate for CONUS.

(3) *Stopovers of 6 hours or more.* When the en route travel period between duty points involves a stopover at an intermediate point outside CONUS and the time spent at the stopover point is 6 hours or more, the per diem rate for the travel period at the stopover point shall be the rate applicable to the locality in which the stopover takes place. The applicable per diem rate shall

take effect at the beginning of the quarter day following the actual time of arrival at the intermediate stopover point. For purposes of determining per diem rates for en route travel, the length of time at an intermediate stopover point is controlling regardless of whether the stopover is necessary because of official duty, common carrier scheduling, or an authorized rest stop (see (6), below). Stopovers of less than 6 hours are considered part of the en route travel as provided in (2), above.

(4) *Travel beginning or ending within CONUS.* When the en route travel period begins or ends at a place (other than duty point) within CONUS, the maximum per diem applicable to the travel between such place and the duty point (place of entry or exit) within CONUS shall be the standard CONUS per diem rate prescribed in appendix 1–A, except that such maximum rate shall be limited to the M&IE rate portion of the standard CONUS rate in the following travel circumstances (calculation shall be under the quarter day system as prescribed in this 1–7.6):

(a) For the day travel begins when the traveler is in an en route travel status at 12:00 midnight and no lodging is required that day because of the en route travel status; or

(b) For the day(s) of return travel when lodging is not required because of en route status at 12:00 midnight or arrival at home or official station.

(5) *Travel beginning or ending outside CONUS.* When en route travel is required between a home, official station or some other location and the common carrier or other terminal, per diem for the quarter days involved will be based on the origin rate.

(6) *Rest stops.*

(a) When travel is direct between duty points which are separated by several time zones and at least one duty point is outside CONUS, a rest period not in excess of 24 hours may be authorized or approved when air travel between the duty points is by less-than-first-class accommodations and the scheduled flight time (including stopovers of less than 8 hours) exceeds 14 hours by a direct or usually traveled route.

(b) The rest stop may be at any intermediate point, including points within CONUS, provided the point is midway in the journey or as near to midway as requirements for use of U.S. flag air carriers and carrier scheduling permit.

(c) A rest stop shall not be authorized when an employee, for personal convenience, elects to travel by an indirect route resulting in travel time in excess of 14 hours.

(d) The per diem rate for the rest stop shall be the rate applicable for the rest stop location (see (3), above).

(e) When carrier schedules or the requirements for use of U.S. flag air carriers preclude an intermediate rest stop, or a rest stop is not authorized, it is recommended that the employee be scheduled to arrive at the temporary duty point with sufficient time to allow a reasonable rest period before reporting for duty. (See 1–3.6 for guidelines on the use of U.S. flag carriers.)

d. *When lodging is not located at duty point outside CONUS.* When suitable lodging is not available at place of temporary duty in a locality outside CONUS and the employee is required to obtain lodging in a different locality, the maximum applicable per diem rate shall be that of the locality in which the lodging is obtained.

e. *Deductions for meals and/or lodgings furnished.* Where meals and/or lodging are furnished without charge or at a nominal cost by a Federal Government agency at a temporary duty station, an appropriate deduction shall be made from the authorized per diem rate. (See 1–7.7b.)

f. *Travel involving temporary duty within CONUS.*

(1) When travel is from a duty point outside CONUS to a temporary duty location within CONUS, the lodgings-plus per diem system prescribed in 1–7.5. shall be followed to compute per diem for travel days at the CONUS temporary duty locations beginning from 12:01 a.m. on the day of arrival at the first temporary duty location through 12:00 midnight of the last full calendar day at a last temporary duty location within CONUS. (If actual subsistence expense reimbursement has been authorized or approved for the CONUS temporary duty location(s), the provisions of 1–8 are applicable for the same time period.)

(2) The quarter day system for en route travel as prescribed in b and c, above, is applicable only for the en route travel to CONUS beginning with the time of departure from the duty point outside CONUS through 12:00 midnight of the calendar day prior to the day of arrival at the CONUS temporary duty location and for the return travel day(s) beginning at 12:01 a.m. on the day of departure from the last CONUS temporary duty location through the time of arrival at the duty point outside CONUS.

1–7.7. Reductions in maximum per diem rates when appropriate (worldwide). An agency may, in individual cases or situations, authorize a reduced per diem rate under certain circumstances, such as when lodgings and/or meals are obtained by the employee at a reduced cost or furnished to the employee at no cost or a nominal cost by the Government; or when for some other reason the subsistence costs to be incurred by the employee can be determined in advance. In exercising its responsibilities outlined in 1–7.1a, the agency should consider any known factors that will cause the traveler's subsistence expenses in a specific situation to be less than the applicable maximum rates prescribed in 1–7.2. If it can be determined in advance of the travel that such factors are present, the agency should authorize a reduced rate that is commensurate with the known expense levels. Such reduced rate authorized on the travel authorization shall be the per diem rate payable on the travel voucher without receipts and/or itemization by the employee. Specific guidelines for reducing rates and situations where reduced rates may be appropriate are provided below.

a. *When no lodgings expenses incurred.* For travel within or outside CONUS which is less than 24 hours or in any other travel situation where lodging expenses will not be incurred, including instances where lodging is furnished by the Government without charge, the maximum per diem rate shall be reduced accordingly. For CONUS travel, the lodgings-plus per diem system automatically reduces the maximum per diem rate to the M&IE rate (or fraction thereof). When lodging is furnished at no cost to the employee through use of an agency purchase order, the agency shall not authorize or approve a per diem allowance for other subsistence expenses that will, when combined with the cost of lodging furnished, exceed the applicable maximum per diem rate prescribed under 1–7.2.

b. *When meals/lodgings are furnished by the Government.* When all or part of the meals and/or lodging are furnished at no cost or at a nominal cost to the employee by the Federal Government, the applicable maximum per diem rate or the M&IE rate, as appropriate, shall be reduced to a daily amount commensurate with the remaining expenses expected to be incurred by the employee. If a reduced per diem rate was not authorized in advance of the travel, an appropriate deduction shall be made from the total per diem payable on the travel voucher. (See 1–7.4d, 1–7.5a(2) and 1–7.8e.)

c. *Extended stays.* When travel assignments involve extended periods of more than 30 days at temporary duty locations and travelers are able to secure lodging and/or meals at lower costs, the per diem rate should be

reduced accordingly. If the extended temporary duty is for purposes of training, see e, below. (See also 1–7.9 for allowable expenses in special situations.)

d. *Meetings and conventions.* In the interest of uniform treatment of employees, whenever a meeting or conference is arranged which will involve the travel of attendees from other agencies or components of the same agency, and reduced cost lodging accommodations have been prearranged at the meeting or conference site, the agency or agencies sponsoring the meeting or conference shall recommend to the other participating agencies or components a per diem allowance that would be reasonable.

e. *Subsistence payments for extended training assignments.*

(1) The Government Employees Training Act (5 U.S.C. 4101–4118) authorizes agencies to pay all or a part of the subsistence expenses of an employee assigned to training at a temporary duty station. Implementing regulations prescribed by the Office of Personnel Management (OPM) in § 410.603 of Title 5, Code of Federal Regulations (5 CFR 410.603), provide specific guidelines for payment of subsistence expenses for employees on extended training assignments of more than 30 calendar days at temporary duty locations.

(2) Generally the OPM guidelines require a reduced subsistence payment of not more than 55 percent of the applicable maximum per diem rate prescribed in these regulations (see 1–7.2). Subsistence payments above these levels (not to exceed the maximum per diem rates) must be justified. Agencies shall refer to the OPM guidelines in 5 CFR 410.603 for specific criteria to determine the appropriate subsistence payments. Guidelines are also published by OPM in the Federal Personnel Manual, Chapter 410, Section 6–3.

1–7.8. *"Mixed travel" reimbursements.* "Mixed travel" occurs when travel days within a single trip are subject to reimbursement of the daily subsistence expenses under different computation methods or different maximum rates.

a. *General rule.* Reimbursement for subsistence expenses will be computed under only one method of reimbursement for each calendar day except when the provisions of 1–8.2b apply. Reimbursement for each day will be subject to only one maximum rate, except for travel under 1–7.8 which may require different rates within a calendar day due to the quarter day per diem calculation method.

b. *Same reimbursement method with different daily maximum rates.* The applicable rules for transition between different maximum rates are provided in 1–7.5, 1–7.8, and 1–8 for each reimbursement method.

c. *Transition between reimbursement methods.*

(1) *Travel wholly within CONUS.* Subsistence expenses for the majority of travel within CONUS will be reimbursed on a per diem basis for each calendar day. However, when actual expense reimbursement for certain travel days is intermittent with the per diem method for others, the traveler's status and location at 12:00 midnight on any given day control the method of reimbursement for that day (except as provided in 1–8.2b). (See 1–7.5 and 1–8.6 for specific rules.)

(2) *Travel to, from, between, or while at locations outside CONUS.*

(a) All travel to, from, between, and while at locations outside CONUS will be reimbursed under the quarter-day system as provided in 1–7.6 including travel time within CONUS incident to such travel except as provided in (b), below.

(b) When travel is from outside CONUS for temporary duty within CONUS, the transition from the quarter-day system to the CONUS lodgings-plus per diem system or actual expense method is governed by the rules in 1–7.5.

1–7.9. *Per diem allowance computations for special situations (worldwide).*

a. *Per diem for weekly or monthly rentals.*

(1) *Types of expenses included in lodging costs.* When an employee rents a room, apartment, house, or other lodging incident to a temporary duty assignment, the following expenses may be considered part of the lodging cost: the rental cost; if unfurnished, the rental cost of appropriate and necessary furniture and appliances, such as a stove, refrigerator, chairs, tables, bed, sofa, television, and vacuum cleaner; cost of connection, use, and disconnection of utilities; cost of reasonable maid fee and cleaning charges; monthly telephone use fee (does not include installation and long-distance calls); and, if ordinarily included in the price of a hotel or motel room in the area concerned, the cost of special user fees, such as cable TV charges and plug-in charges for automobile head bolt heaters.

(2) *Computation of daily lodging costs.* When the employee obtains lodging on a weekly or monthly rental basis, the daily lodging cost shall be computed by dividing the total lodging cost for the expenses listed in (1), above, by the number of days in the rental period (e.g., 7 or 30 days, as appropriate).

(3) *Per diem allowable.*

(a) Under the lodgings-plus system for CONUS travel, the allowable per diem consists of the daily lodging cost calculated under (2), above, plus the applicable M&IE rate not to exceed the maximum per diem rate prescribed for the location involved.

(b) When a reduced per diem rate is being established (see 1–7.7) in advance of the travel, the daily lodging cost calculated in (2), above, shall be added to the amount determined by the agency to be necessary for meals and incidental expenses.

b. *Per diem allowances for use of a recreational vehicle for lodging.* The term "recreational vehicle" includes mobile homes, campers, camping trailers, or self-propelled mobile recreational vehicles.

(1) *Privately owned.*

(a) *Lodging costs.* When an employee uses a privately owned camping or recreational vehicle while on official travel, allowable expenses which may be considered as a lodging cost include parking fees; fees for connection, use, and disconnection of utilities (electricity, gas, water, and sewage); bath or shower fees; and dumping fees. Depreciation shall not be considered as a lodging cost.

(b) *Meals and incidental expenses.* The agency shall determine an appropriate amount for meals and incidental expenses based on whether the type of recreational vehicle used by the employee has meal preparation facilities. When use of the recreational vehicle is for a temporary duty assignment within CONUS, such amount shall not exceed the applicable M&IE rate.

(c) *Per diem computation.* The daily lodging costs plus an appropriate rate for meals and incidental expenses determined under (b), above, shall be the per diem rate, limited to the applicable maximum rate prescribed under 1–7.2 for the locality involved. An agency may authorize a reduced per diem rate within the applicable maximum per diem rates if the actual costs expected to be incurred can be determined in advance of the travel.

(2) *Rented recreational vehicle.* When the use of a rented recreational vehicle is authorized or approved as advantageous to the Government, the rental fee and the allowable expenses shown in (1)(a), above, may be considered as lodging costs. Advantageous use might occur when the employee is on an extended temporary duty assignment in a remote area or

where conventional lodging facilities are limited or not available. If use of a rented recreational vehicle is not authorized or approved as advantageous, only those expenses listed in (1)(a), above, may be considered as lodging costs.

c. *Per diem computations when temporary duty is curtailed, canceled, or interrupted for official purposes (see 59 Comp. Gen. 609 (1980), 59 Comp. Gen. 612 (1980), 60 Comp. Gen. 630 (1981), and cases cited therein).* When an employee has made advance arrangements for lodging (such as those described in a or b, above), with reasonable expectation of the travel assignment being completed as ordered or directed, and subsequently the temporary duty assignment is curtailed, canceled, or interrupted for official purposes, or for other reasons beyond the employee's control that are acceptable to the agency, lodging costs may be calculated and paid as follows:

(1) *Travel assignment curtailed or interrupted.* When the temporary duty assignment is curtailed or interrupted for the benefit of the Government or for other reasons beyond the employee's control and the employee is unable to obtain a refund of prepaid rent, expenses incurred for unused lodging may be reimbursed under the following conditions:

(a) *Determination of reasonableness.* The agency must determine that the employee acted reasonably and prudently in incurring allowable lodging expenses pursuant to temporary duty travel orders. Included in this determination should be a consideration of whether the employee sought to obtain a refund of the prepaid lodging cost or otherwise took steps to minimize the costs once the temporary duty was officially curtailed or interrupted.

(b) *Adjusted calculation and reimbursement of lodging costs.* If the agency determines that the employee acted reasonably, the unused portion of the prepaid lodging cost may be reimbursed as follows:

(i) The daily lodging costs for the period covered by the voucher shall be calculated by dividing the total cost for the rental period by the number of days of actual occupancy. The total of the lodging costs thus calculated plus the appropriate daily amount authorized for meals and incidental expenses may be reimbursed not to exceed the per diem rate authorized in the employee's travel orders for the days that the lodging was occupied.

(ii) If the authorized per diem rate is insufficient for the days of occupancy, the daily lodging cost calculated in (i) plus the amount authorized for meals and incidental expenses may be reimbursed on an actual expense basis not to exceed appropriate maximum daily rates determined as provided in 1–8.3.

(iii) The excess amount (if any) of the unrefunded lodging cost not reimbursed under (ii), above, may be paid as a miscellaneous travel expense incident to the travel assignment, if otherwise proper.

(iv) In instances where the travel assignment was interrupted for official purposes (e.g., when the employee is directed to perform temporary duty at another location), allowable subsistence expenses (if any) incurred during the interruption may be reimbursed separately from those reimbursements outlined in (i) and (ii), above, if otherwise proper, and in conformance with the provisions of this Part 1–7.

(2) *Travel assignment canceled.* When the employee incurs lodging expenses in reasonable expectation of a travel assignment being completed as ordered or directed, and due to a change in travel orders the travel assignment is canceled prior to its commencement, the prepaid lodging expenses may be reimbursed as a miscellaneous travel expense provided the amounts are reasonable and the conditions in (1)(a) are met.

(3) *Forfeited rental deposits.* If, in situations described in (1) and (2), above, the employee was required by the terms of a lease or rental agreement to pay a rental deposit and all or part of the deposit is forfeited to cover unpaid lodging costs, the amount of the forfeited deposit may be reimbursed as a miscellaneous travel expense provided the conditions in (1)(a), above, are met. Reimbursement for deposits forfeited for damages to lodging accommodations shall not be allowed.

d. *Per diem while aboard Government vessel.* For temporary duty aboard Government vessels where meals and lodgings are furnished at no cost or at a reduced cost, agencies shall prescribe an appropriate per diem rate within the provisions of this Part 1–7. The term "Government vessel" includes vessels owned and operated, leased and operated, or chartered by the Government.

1–7.10. *Time determinations.*

a. *Duty to record pertinent times.* The date and hour of departure from and arrival at the official station or any other place at which official travel begins or ends must be shown on the travel voucher. The same information also must be shown for points at which temporary duty is performed when such arrival or departure affects the per diem allowance or other travel expenses. Other points visited should also be shown but the time of arrival and departure need not be entered.

b. *Use of standard time.* The hours of departure and arrival recorded on the voucher shall be those of the standard time in effect at the place involved. (See 15 U.S.C. 262.)

1–7.11. *Interruptions of per diem entitlement.* For purposes of this paragraph, the term "place of abode" means the place from which the employee commutes daily to the official station.

a. *Leave and nonworkdays.*

(1) *General.* Leave of absence (other than as provided in 1–7.11d) for one-half, or less, of the prescribed daily working hours shall be disregarded for per diem purposes. Where the leave is more than one-half of the prescribed daily working hours, no per diem shall be allowed for that day.

(2) *Nonworkdays.* Legal Federal Government holidays and weekends or other scheduled nonworkdays are considered nonworkdays. Employees are considered to be in a per diem status on nonworkdays except when they return to their official station or place of abode (see b, below), or except under conditions stated in (a) or (b), below.

(a) *Leave before and after nonworkdays.* Per diem shall not be paid for nonworkdays when:

(i) Employees are in a leave status at the end of the workday before the nonworkdays and at the beginning of the workday following the nonworkdays, and

(ii) The period of leave on either of those days is more than one-half of the prescribed working hours for that day.

(b) *Leave between nonworkdays.* Per diem shall not be paid for more than two nonworkdays in cases where leave of absence is taken for all of the prescribed working hours between the nonworkdays.

b. *Return to official station for nonworkdays.*

(1) *Required return—official business.* An employee who is required by appropriate agency officials to return to his or her official station for the nonworkdays to perform official business or because it is otherwise advantageous to the Government shall be allowed the round-trip transportation expenses and per diem for the en route travel.

(2) *Authorized return—substantial cost savings.* An agency may authorize per diem and transportation expenses to an employee to return home for nonworkdays where a significant cost savings will be achieved. Travel time shall be scheduled within the

employee's duty hours to the extent practicable. The cost of lost productivity attributable to the duty hours involved in traveling to and from the employee's residence for nonworkdays shall be considered in determining the cost savings (Comp. Gen. B–202544, August 31, 1981).

(3) *Authorized return incident to extended temporary duty.* Employees who are required to routinely perform extended periods of temporary duty may, at agency discretion and within the limits of appropriations available for payment of travel expenses, be authorized round-trip transportation expenses and per diem en route for periodic return travel to their official stations or places of abode for nonworkdays. Agencies are cautioned that this authority is to be used with the utmost discretion and consideration of the length and purpose of the temporary duty assignments and the distance of the return travel. (See 55 Comp. Gen. 1291 (1976).) The periodic return travel may be authorized as provided in (a) and (b), below.

(a) The head of the agency has determined, based on an appropriate cost analysis, that the costs of periodic weekend return travel (including the costs of potential overtime, if applicable) are outweighed by savings in terms of increased employee efficiency and productivity, as well as reduced costs of recruitment and retention of employees. This cost analysis shall be conducted no less frequently than every other year.

(b) Return travel for nonworkdays authorized under these provisions constitutes an exception to the directive on scheduling of travel contained in 5 U.S.C. 6101(b)(2) and therefore should be performed outside the employee's regularly scheduled duty hours or during periods of authorized leave. However, in the case of employees not exempt from the Fair Labor Standards Act overtime provisions, consideration should be given to scheduling the authorized travel to minimize payment of overtime, including scheduling of travel during regularly scheduled duty hours when necessary. (See Office of Personnel Management regulations for further guidelines covering overtime during travel.)

(4) *Voluntary return.* When an employee voluntarily returns to his/her official station or place of abode for nonworkdays, the maximum reimbursement for the round-trip transportation and per diem en route shall be limited to the per diem allowance and travel expenses which would have been allowed had the employee remained at the temporary duty station. The employee shall perform any such voluntary return travel during non-duty hours or periods of authorized leave.

c. *Indirect route or interrupted travel.* If there is an interruption of travel or deviation from the direct route resulting in excess travel time because of an employee's personal preference or convenience or through the taking of leave, the per diem allowed shall not exceed that which would have been allowed on uninterrupted travel by a direct or usually traveled route except as provided in Part 1–12 for certain emergency travel situations. (See 1–2.5, 1–7.10a, and 1–11.5a(3).)

d. *Illness or injury or a personal emergency situation.* Provisions governing per diem allowable for emergency travel performed due to an employee's incapacitating illness or injury or because of a personal emergency situation, as well as the continuation of per diem due to incapacitating illness or injury of the employee, are found in Part 1–12.

4. Part 8 is revised to read as follows:

Part 8. Reimbursement of Actual Subsistence Expenses

1–8.1. *General.* The provisions contained herein apply to travel within and outside the conterminous United States (CONUS).

a. *Authority.* Agencies may authorize or approve reimbursement for the actual and necessary subsistence expenses of official travel when such expenses are unusually high due to special or unusual circumstances or for occasional meals and/or lodging as provided herein. This authority shall be used for individual travel assignments or specific travel situations only after appropriate consideration of the actual facts existing at the time the travel is directed and performed.

b. *Delegation of authority.* Heads of agencies may delegate, with provisions for limited redelegation, the authority to authorize or approve travel on an actual subsistence expense basis. Such delegation or redelegation shall be held to as high an administrative level as practicable to ensure that authorization or approval of travel on an actual subsistence expense basis or reimbursement therefor is based on adequate consideration and review of the travel circumstances warranting such reimbursement.

c. *Agency responsibility.* Heads of agencies, as defined in 1–1.3c(8), shall, in accordance with provisions of this part, prescribe administrative policies and procedures under which reimbursement for actual and necessary expenses of official travel may be authorized or approved to ensure that the authority contained herein is administered in accordance with the intent of these regulations.

d. *Relationship to per diem.* Generally, authorization or approval of actual subsistence expenses is contingent on the entitlement to per diem. Except as otherwise provided herein, the definitions and rules stated in Part 1–7 applicable to the employee's entitlement to a per diem allowance shall apply to travel on an actual expense basis.

e. *Allowable expenses.* Actual subsistence expense reimbursement may be allowed for the same types of expenses that are covered by the per diem allowance in 1–7.1c provided such expenses are determined to be actual and necessary expenses incident to the particular travel assignment.

f. *Prudent traveler.* An employee traveling on the actual subsistence expense basis is expected to exercise the same care in incurring expenses as set forth in 1–7 for travel on a per diem basis.

1–8.2. *Conditions warranting authorization or approval of actual expenses.*

a. *Travel assignments involving special or unusual circumstances.* Travel on an actual subsistence expense basis may be authorized or approved for travel assignments within and outside CONUS when the applicable maximum per diem rate (see 1–7.2) is inadequate due to special or unusual circumstances. The maximum per diem rate, although generally adequate, may be insufficient for a particular travel assignment because the actual and necessary subsistence expenses are unusually high due to special duties or because subsistence costs have escalated temporarily during special events. Actual subsistence expense reimbursement shall not be authorized or approved when the actual and necessary subsistence expenses exceed or are expected to exceed the applicable maximum per diem allowance by only a small amount. Since lodging costs constitute a major portion of the subsistence expenses, travel on an actual expense basis may be authorized or approved for travel when, due to special or unusual circumstances, the lodging costs absorb all or nearly all of the applicable maximum per diem allowance (see 1–7.2). Examples of travel assignments or situations that may warrant authorization or approval of actual and necessary expenses include but are not limited to the following:

(1) The employee attends a meeting, conference, or training session away from the official duty station where lodging and meals must be procured at a prearranged place (such as the hotel where the meeting, conference, or training session is being held) and the lodging costs incurred, because of these prearranged accommodations, absorb all or practically all of the applicable maximum per diem allowance;

(2) The travel is to an area where the applicable maximum per diem allowance is generally adequate but subsistence costs have escalated for short periods of time during special functions or events such as missile launching periods, international or national sports events, world's fairs, conventions or natural disasters;

(3) Based on a situation described in (2), above, affordable lodging accommodations are not available or cannot be obtained within a reasonable commuting distance of the employee's temporary duty point and transportation costs to commute to and from the less expensive lodging facility consume most or all of the savings achieved from occupying less expensive lodging;

(4) The employee, because of special duties of the assignment, necessarily incurs unusually high expenses in the conduct of official business, such as to procure superior or extraordinary accommodations including a suite or other quarters for which the charge is well above that which he/she would normally have to pay for accommodations; or

(5) The employee necessarily incurs unusually high expenses incident to his/her assignment to accompany another employee in a situation as described in (4), above.

b. *Situations requiring reimbursement for occasional meals and/or lodging.* Although lodging and/or meals are furnished without cost (or at a nominal cost) for a particular assignment, the employee may necessarily incur expenses for occasional lodgings and/or meals. The agency may approve reimbursement of appropriate expenses incurred for occasional meals or lodging that are determined to be necessary and justified by the circumstances involved. For travel assignments within CONUS the actual expense allowable for lodging or each meal may not exceed the lodging or individual meal allowance set out in 1–7.5a, or 150 percent of those amounts if special or unusual circumstances are involved; for travel assignments outside CONUS, similar limitations on the amount of reimbursement for such expenses shall be determined by the authorizing agency. Each agency shall establish necessary administrative procedures for travel under these provisions.

1–8.3. *Maximum daily rates and reimbursement limitations.* The maximum amount of reimbursement for actual subsistence expenses that may be authorized or approved for each calendar day or fraction thereof is as provided in a and b, below. Agencies shall determine appropriate and necessary daily maximum rates not to exceed these amounts when authorizing or approving travel under this Part 1–8. Maximum daily rates need not be prorated for fractions of a day.

a. *Travel within CONUS.*

(1) *Maximum daily rates.* For travel within CONUS, the maximum daily rate for subsistence expenses shall not exceed 150 percent of the applicable maximum per diem rate (rounded to the next highest dollar) prescribed in appendix 1–A for the travel assignment location.

(2) *Reimbursement limitation.* When the actual subsistence expenses incurred during any 1 day are less than the maximum daily rate authorized, the employee shall be reimbursed only for the lesser amount. Expenses incurred and claimed (including those for fractional days) shall be reviewed and allowed only to the extent determined to be necessary and reasonable by the agency (see 1–8.5b). Reimbursement for meals and incidental expenses shall not, under any circumstances, exceed 150 percent of the M&IE rate applicable to the temporary duty location.

b. *Travel outside CONUS.* Reserved.

c. *When lodging is procured through use of an agency purchase order.* When actual subsistence expense reimbursement is authorized or approved under this Part 1–8 and lodging is furnished to the employee at no cost through use of an agency purchase order, the agency shall not authorize or approve reimbursement for other subsistence expenses that will, when combined with the cost of lodging furnished, exceed the maximum daily rate authorized under a or b, above.

1–8.4. *Authorization or approval.*

a. *Requests for authorization or approval of actual expense reimbursement.* It is the employee's responsibility to request authorization or approval for actual subsistence expense reimbursement when conditions appear to warrant such reimbursement and to furnish appropriate justification to support the request.

b. *Prior authorization of actual expense travel.* Normally, travel on an actual expense basis should be authorized in advance and the daily maximum rate authorized by the agency shall be stated in the travel authorization. Maximum daily rates need not be prorated for fractions of a day on the travel authorization.

c. *Approval after travel is completed.* If travel is performed without prior written authorization or is authorized on a per diem basis and otherwise conforms to the provisions of Part 1–8, reimbursement for actual and necessary subsistence expenses may be approved after completion of the travel.

1–8.5. *Requirements for documentation, review and administrative controls.*

a. *Documentation of actual expenses on the voucher.*

(1) *Itemization.* When travel is authorized or approved on an actual subsistence expense basis, the employee shall itemize on the travel voucher each expense for which reimbursement is claimed on a daily basis. Meals must be itemized separately; i.e., breakfast, lunch, and dinner. Those expenses that do not usually accrue on a daily basis, such as laundry and cleaning and pressing of clothing, may be averaged over the number of days that actual expense reimbursement is authorized or approved.

(2) *Receipts.* Receipts shall be required for lodging, regardless of amount, and any individual meal when the cost is over $25. Agencies may, at their discretion, require receipts for other allowable subsistence expenses; however, the employee must be informed of this requirement in advance of the travel. The provisions of 1–7.5c(1) (a) and (b) covering double occupancy and missing receipts apply to this Part 1–8.

b. *Agency review and administrative controls.* Procedures shall be established by each agency to ensure that actual subsistence expense reimbursement under the provisions of this Part 8 is properly administered and controlled to prevent abuse of the authority contained herein (see 1–8.1c). An appropriate review of the justification for travel on an actual subsistence expense basis shall be made. Expenses claimed by an employee shall be reviewed by the agency to determine whether the expenses are reasonable and allowable subsistence expenses and necessarily incurred in connection with the travel assignment.

1–8.6. *Mixed travel (per diem and actual subsistence expense) reimbursement.* Mixed travel involves more than one maximum reimbursement rate during a single trip and/or reimbursement on both a per diem and an actual subsistence basis. Generally,

the applicable rate and/or reimbursement method for each calendar day (beginning at 12:01 a.m.) will be determined by the employee's status and location at 12:00 midnight of that calendar day. Only one rate and reimbursement method will be authorized for each day except when reimbursement is authorized for occasional meals or lodging as provided in 1–8.2b. The reimbursement method and maximum rate for the day of departure from the official station will be the same as that authorized for the first location where lodging is required. On the day of return to the official station, the same method and maximum rate of reimbursement applicable to the previous calendar day shall apply.

1–8.7. *Interruption of subsistance entitlements.* The provisions of 1–7.11 applicable to interruptions of per diem entitlements (leave and nonworkdays, return to official station for nonworkdays, indirect route or interrupted travel, and illness or injury or a personal emergency situation) shall also apply to travel on an actual subsistence basis.

Part 10. Sources of Funds

5. Paragraph 1–10.1 is revised to read as follows:

1–10.1. *Employee to provide funds.* Employees traveling on official business shall provide themselves with funds for all current expenses. However, Government contractor-issued charge cards, transportation request forms, and travel advances as authorized by 1–10.2 and 1–10.3, respectively, should be used to reduce the need for travelers to use their own money. Employees issued a Government charge card in accordance with FPMR Temporary Regulation A–25 are encouraged to use the charge card to pay for official travel expenses to the maximum extent possible.

6. Paragraph 1–10.2b is revised to read as follows:

1–10.2. *Procurement of common carrier transportation.*

* * * * *

b. *Cash payments for procurement of common carrier transportation services.* The use of cash to procure passenger transportation services may not be authorized except under the conditions specified in (1) through (3), below. For the purpose of this paragraph b, the use of checks (personal or travelers), personal credit cards, or individual Government contractor-issued charg cards is considered the equivalent of cash. Cash payments may be made with a travel advance (see 1–10.3) or through the use of personal funds.

(1) *Procedures for the use of cash.* The procedures for the use of cash to procure passenger transportation services are prescribed by the Administrator of General Services in 41 CFR 101–41.203–2, as follows:

(a) *When cost of transportation is $10 or less.* Travelers shall use cash to procure all passenger transportation services costing $10 or less, excluding Federal transportation tax, and to pay excess baggage charges costing $15 or less for each leg of a trip, unless special circumstances justify the use of a GTR.

(b) *When cost of transportation is over $10 but does not exceed $100.* Agencies may, by appropriate regulations, require a traveler to use cash to procure passenger transportation services from, to, or between points in the United States and its possessions or the trust territories when the cost is over $10 but does not exceed $100, excluding Federal transportation tax, for each trip as authorized on the travel authorization (see note below).

Note.—The National Railroad Passenger Corporation (AMTRAK) will not accept a GTR for travel under $100. AMTRAK will accept personal checks or major credit cards provided proper identification is shown when purchasing a ticket.

(c) *When cost of transportation exceeds $100.* Except as noted in (2), below, a GTR must be used to procure passenger transportation services costing in excess of $100, excluding Federal transportation tax, unless otherwise exempted in writing by GSA as provided in 41 CFR 101–41.203–2.

(2) *Exception to cash payment limitation.* As an exception to the rule stated in (1)(c), above, cash payment of official transportation expenses, without regard to the $100 limitation, is authorized under the following conditions:

(a) *Reduced group or excursion fares available from travel agencies.* Cash payments in excess of $100 may be authorized by the agency for individual employees or a group of employees to secure reduced group or excursion fares available only through travel agents under certain conditions as provided in 1–3.4b(2). A copy of the administrative determination required under paragraph 1–3.4b(2) shall accompany the travel voucher.

(b) *Use of individual Government contractor-issued charge card for procurement of transportation exceeding $100.* Cash payment of passenger transportation services in excess of $100 is authorized when a participating agency or its employees use a charge card issued by a contractor under contract with the General Services Administration, for official travel. Use of charge or credit cards held by the employee for personal use and issued by any other credit card company is not authorized under this exception. (See FPMR Temporary Regulation A–25 governing the Government's charge card program.)

(c) *Emergency circumstances.* Under emergency circumstances when the use of GTR's is not possible, heads of agencies, or their designated representatives, may authorize or approve travelers' use of cash exceeding the $100 limitation when procuring passenger transportation services as provided in 41 CFR 101–41.203–2(b). Under this cited provision, the delegation of authority to authorize or approve the use of cash in excess of $100 for the procurement of emergency transportation services shall be held to as high an administrative level as practicable to ensure adequate consideration and review of the circumstances.

(3) *Reimbursement.*

(a) *Claim.* The travel voucher claiming reimbursement for cash payments for transportation services shall show the ticket number, carrier name, accommodations used, origin and destination of travel performed, and the agent's valuation of the transportation ticket. A traveler who has procured passenger transportation services with cash (whether using personal funds, a travel advance, or a Government charge card) shall assign to the Government his/her right to recover any excess payment involving a carrier's use of improper rates. (See statement/voucher requirements in 1–11.5c(3). Also see 1–1.6b for provisions on promotional materials received from carriers and 1–1.6c and 1–3.5 for provisions on denied boarding compensation.)

(b) *Documentation required.* Receipts, passenger coupons, or other appropriate evidence shall be required to support reimbursement claims for cash payments for passenger transportation services in all cases except for use of local transit systems (see 1–11.3c(18) and 1–11.5c(3)).

7. Paragraph 1–10.3a is revised to read as follows:

1–10.3. *Advance of funds.*

a. *Authority.* The head of each agency or his/her designated representative may advance through proper disbursing officers to any person entitled to per diem, mileage allowance, or subsistence expenses, or for the procurement of transportation by group or charter under 1–3.4b(2), any sums as may be deemed advisable considering the character and probable duration of the travel to be performed or the cost of the

transportation to be paid for by the employee. However, the amount of the advance shall not exceed 80 percent of the minimum estimated expenses that the employee is expected to incur prior to reimbursement. As a general rule, especially when the traveler is a Government contractor-issued charge card holder, advances shall be held to a minimum and allowed only when circumstances indicate that an advance is warranted and only in conjunction with a travel authorization. These provisions apply to advances issued for trip-by-trip authorizations as well as to permanent advances issued in conjunction with open travel authorizations. The need for a permanent advance and the amount of the advance shall be reviewed and justified when the corresponding open travel authorization is reviewed and justified. (See 1–1.5a and d.)

* * * * *

Part 11. Claims for Reimbursement

8. Paragraph 1–11.3c(18) is amended to read as follows:

1–11.3. *Travel vouchers and attachments.*

* * * * *

c. * * *

* * * * *

(18) *Cash payments for passenger transportation services.* (See 1–10.2b(3)(b).

* * * * *

9. Paragraphs 1–11.8a (1), (4) and (5) and 1–11.8b (15), (16), (17), (18), (26) and (27) are amended to read as follows:

1–11.8. *Administrative approvals.*

a. * * *

(1) *Return to official station due to illness or injury (1–2.4, 1–7.11d, 1–8.7, and Part 1–12).*

* * * * *

(4) *Continuation of per diem during leave of absence due to illness or injury (1–7.11d and 1–12.5a).*

(5) *Continuation of actual subsistence during leave of absence due to illness or injury (1–8.7 and 1–12.5a).*

* * * * *

b. * * *

* * * * *

(15) *Reductions in maximum per diem rates when appropriate (1–7.7).*

(16) *Additional per diem when travel en route is 6 hours or more (1–7.6c(2)(c)).*

(17) *Reimbursement of actual subsistence expense (1–8.4).*

(18) *Maximum daily reimbursement (1–8.3).*

* * * * *

(26) *Return to official station due to a personal emergency situation (1–2.4, 1–7.11d, 1–8.7, and Part 1–12).*

(27) *Travel to an alternate location due to illness or injury or a personal emergency situation (1–2.4, 1–7.11d, 1–8.7, and Part 1–12).*

* * * * *

10. Chapter 1 of the FTR is amended by adding Part 12 to read as follows:

Part 12. Emergency Travel of Employee Due to Illness or Injury or a Personal Emergency Situation, Within or Outside CONUS

1–12.1. *General.* Transportation and subsistence expenses may be allowed to the extent provided herein when an employee discontinues or interrupts a temporary duty travel assignment prior to its completion because of incapacitating illness or injury or a personal emergency situation.

1–12.2. *Agency responsibility/delegation of authority.* Agencies may authorize or approve reimbursement for transportation and per diem expenses under Part 1–12 based on the exigencies of the employee's personal situation and the agency mission. Each agency shall prescribe written administrative policies and procedures to govern its authorizations and approvals under these provisions. Agency heads may delegate their authority under this Part 1–12. Such delegation shall be held to as high an administrative level as practical to ensure adequate consideration and review of the circumstances surrounding the need for emergency travel.

1–12.3. *Employee responsibility and documentation.* As soon as an employee is incapacitated by illness or injury or informed of an emergency situation which necessitates discontinuance or interruption of the temporary duty travel assignment, he/she should attempt to contact the designated travel-approving official for instructions. In the event that such contact cannot be made on a timely basis, agencies may approve payments after the travel has been performed.

1–12.4. *Definitions.* As used in this part, the following definitions apply:

a. *Official station.* The term "official station" also refers to the home or regular place of business as it pertains to experts and consultants described in 5 U.S.C. 5703 (see 1–1.3c(6)).

b. *Alternate location.* An alternate location is a destination, other than the employee's official station or the point of interruption, where necessary medical services or a personal emergency situation exists. In the case of illness or injury of the employee, the nearest hospital or medical facility capable of treating the illness or injury is not considered to be an alternate location.

c. *Incapacitating illness or injury of employee.* For purposes of Part 1–12, an incapacitating illness or injury is one that occurs suddenly for reasons other than the employee's own misconduct and renders the employee incapable of continuing, either temporarily or permanently, the travel assignment. A sudden illness or injury may include a recurrence of a previous medical condition thought to have been cured or under control. The illness or injury may occur while the employee is at, or en route to or from, a temporary duty location.

d. *Family.* Family means those individuals defined in 2–1.4d who are members of the employee's household at the time the emergency situation arises. For compassionate reasons, when warranted by the circumstances of a particular emergency situation, an agency may on an individual case basis expand this definition to encompass other members of the extended family of an employee and employee's spouse, such as the individuals named in 2–1.4d who are not dependents of the employee or members of the employee's immediate household. In using this authority and deciding each case, agencies shall evaluate the extent of the emergency and the employee's relationship to, and degree of responsibility for, the individual(s) involved in the emergency situation.

e. *Personal emergency situation.* Personal emergency situation means the death or serious illness or injury of a member of the employee's family or a catastrophic occurrence or impending disaster such as a fire, flood, or act of God which directly affects the employee's home at the official station or the family and occurs while the employee is at, or en route to or from, a temporary duty location.

f. *Serious illness or injury of family member.* Serious illness or injury of a family member means a grave, critical, or potentially life-threatening illness or injury; a sudden injury such as an automobile or other accident where the exact extent of injury may be undetermined but is thought to be critical or potentially life threatening based on the best assessment available; or other situations involving less serious illness or injury of a family member in which the absence of the employee would result in great personal hardship for the immediate family.

g. *Fire, flood, or Act of God.* Fires or floods may be due to natural causes or human actions (e.g., arson) or other identifiable causes. Act of God means an extraordinary happening by a natural cause (as fire, flood, tornado, hurricane,

earthquake, or other natural catastrophe) for which no one is liable because experience, foresight, or care could not prevent it.

1–12.5. *Incapacitating illness or injury of employee.* When an employee interrupts or discontinues a travel assignment because of an incapacitating illness or injury (as defined in 1–12.4c), transportation expenses and per diem may be allowed to the extent provided below.

a. *Continuation of per diem at point of interruption.* An employee who interrupts the temporary duty assignment because of an incapacitating illness or injury and takes leave of any kind shall be allowed a per diem allowance under the provisions of 1–7.5 or 1–7.6, as appropriate, not to exceed the maximum rates prescribed under 1–7.2 for the location where the interruption occurs. Such per diem may be continued for a reasonable period, normally not to exceed 14 calendar days (including fractional days) for any one period of absence. However, a longer period may be approved by the employee's agency if justified by the circumstances of a particular case. The point of interruption may include the nearest hospital or medical facility capable of treating the employee's illness or injury. Per diem shall not be allowed while an employee is confined to a hospital or medical facility that is within proximity of the official station or that is the same one the employee would have been admitted to if the illness or injury had occurred while at the official station.

(1) *Receipt of payments from other Federal sources.* If, while in travel status under circumstances described in 1–12.5a, the employee receives hospitalization (or is reimbursed for hospital expenses) under any Federal statute (including hospitalization in a Veterans Administration or military hospital) other than 5 U.S.C. 8901–8913 (Federal Employees Health Benefits Program), the per diem allowance for the period involved shall not be paid or, if paid, shall be collected from the employee.

(2) *Documentation and evidence of illness.* The type of leave and its duration must be stated on the travel voucher. No additional evidence of the illness or injury need be submitted with the travel voucher. The evidence filed with the agency concerned, as required by that agency under the annual and sick leave regulations of the Office of Personnel Management, shall suffice.

b. *Return to official station or home.* When an employee discontinues a temporary duty assignment before its completion because of an incapacitating illness or injury, expenses of appropriate transportation and per diem while en route shall be allowed for return travel to the official station. Such return travel may be from the point of interruption or other point where the per diem allowance was continued as provided in a, above. If, when the employee's health has been restored, the agency decides that it is in the Government's interest to return the employee to the temporary duty location, such return is considered to be a new travel assignment at Government expense.

c. *Travel to an alternate location and return to the temporary duty assignment.*

(1) *Conditions and allowable expenses.* When an employee, with the approval of an appropriate agency official, interrupts a temporary duty assignment because of an incapacitating illness or injury and takes leave of absence for travel to an alternate location to obtain medical services and returns to the temporary duty assignment, reimbursement for certain excess travel costs may be allowed as provided in (2), below. The nearest hospital or medical facility capable of treating the employee's illness or injury will not be considered an alternate location (see 1–12.4b).

(2) *Calculation of excess costs.* The reimbursement that may be authorized or approved under (1), above, shall be the excess (if any) of actual costs of travel from the point of interruption to the alternate location and return to the temporary duty assignment, over the constructive costs of round-trip travel between the official station and the alternate location. The actual cost of travel will be the transportation expenses incurred and en route per diem for the travel as actually performed from the point of interruption to the alternate location and from the alternate location to the temporary duty assignment. (No per diem is allowed for the time spent at the alternate location.) The constructive cost of travel is the sum of transportation expenses the employee would reasonably have incurred for round-trip travel between the official station and the alternate location (had the travel begun at the official station) plus per diem calculated under Part 1–7 for the appropriate en route travel time. The excess cost that may be reimbursed is the difference between the two calculations.

1–12.6. *Personal emergency situation.*

a. *Return to official station or home.* When an employee discontinues a temporary duty assignment before its completion because of a personal emergency situation as defined in 1–12.4e, expenses of appropriate transportation and per diem while en route may be allowed, with the approval of an appropriate agency official, for return travel from the point of interruption to the official station. If, when the personal emergency situation has been resolved, the agency decides that it is in the Government's interest to return the employee to the temporary duty location, such return is considered to be a new travel assignment at Government expense.

b. *Travel to an alternate location and return to the temporary duty assignment.* When an employee, with the approval of an appropriate agency official, interrupts a temporary duty assignment because of a personal emergency situation as defined in 1–12.4e, and takes leave of absence for travel to an alternate location where the personal emergency exists, and returns to the temporary duty assignment, reimbursement may be allowed for certain excess travel costs (transportation and en route per diem) to the same extent as provided in 1–12.5c for incapacitating illness or injury of the employee.

1–12.7. *Procurement of transportation.*

a. *Use of discount fares.* The discount fares offered by contract air carriers in certain city pairs, as well as other reduced fares available to Federal travelers on official business, should be used to the extent possible for travel authorized or approved under this Part 1–12.

b. *Return to official station.* When the employee is authorized emergency return travel, from the point of interruption or discontinuance of the travel assignment to the official station, appropriate transportation services may be purchased by the agency or the employee. The unused return portion of round-trip transportation tickets procured by the agency for the travel assignment shall be used if appropriate for the mode of transportation required for the emergency travel. If not used, the agency and the employee shall ensure that all unused tickets are properly accounted for (see 1–3.5).

c. *Travel to alternate location.* An agency may require employees to use personal funds for emergency travel to an alternate location and return to the temporary duty assignment. A Government contractor-issued charge card also may be used for this purpose. However, if the employee does not have sufficient personal funds available and is not a Government charge card holder, the agency may procure (or provide an advance of funds for the employee to procure) appropriate transportation. The employee, upon completion of the

emergency travel, shall reimburse the Government for any cost of such transportation or travel advance that is above the amount of allowable reimbursement that may be authorized or approved under this Part 1–12.

11. Chapter 1 of the FTR is amended by adding and reserving Part 13 and by adding Part 14 to read as follows:

Part 13. [Reserved]

Part 14. Payment of Subsistence and Transportation Expenses for Threatened Law Enforcement/Investigative Employees

1–14.1. *Authority.* The head of an employing agency, as described in 1–14.2 (hereafter referred to as "agency"), may authorize or approve payment of subsistence and certain transportation expenses for threatened individuals (see 1–14.4) whose lives are placed in jeopardy as a result of the employee's assigned duties and who, as a protective measure, are moved to temporary living accommodations at or away from the official station within or outside CONUS.

1–14.2. *Agency responsibility/delegation of authority.* Heads of agencies are responsible for issuing regulations or guidelines to implement the provisions of this part and for ensuring that the agency's policy is adhered to. The agency head may delegate the authority to authorize or approve payment of allowable subsistence and transportation expenses for the use of temporary living accommodations by eligible individuals as provided herein. The delegation of authority shall be held to as high an administrative level as practical to ensure proper review of the circumstances surrounding the need to take protective action by moving eligible individuals from their homes.

1–14.3. *Policy.* The authority under 1–14.1 is to be given priority consideration when the life-threatening situation is expected to be of temporary duration (normally no more than 60 days) and the only feasible alternative is to transfer the employee to a new duty station. The head of an agency or his/her designee must make the final decision as to how long such payments should continue based on the specific nature and potential duration of the life-threatening situation and the alternative costs of a change of official station for protective purposes.

1–14.4. *Eligible individuals.* Employees (as defined in 1–1.3c(6)) who specifically serve in a law enforcement, investigative, or similar capacity, or other Federal employees detailed into these capacities for specific law enforcement/investigational purposes, are eligible for the allowances covered by this part. The employing agency shall be deemed to be the one to whom the employee was assigned at the time of the threat. Members of such employees' immediate families (as defined in 2–1.4d) also are eligible.

1–14.5. *Procedures for evaluating risk to threatened individuals.* When a situation occurs that appears to be life-threatening, the agency's first responsibility is to take any appropriate action necessary to protect the eligible individual(s), including removal from the home. The agency may ask the Criminal Division of the Department of Justice (DOJ) for assistance in determining the degree and seriousness of the threat. The agency, however, ultimately is responsible for deciding in each individual case, based on its own assessment of the situation (and the advice of the DOJ, if requested and furnished), whether protective action should be initiated, or continued if already undertaken, and the amount of subsistence and transportation expenses that will be approved. At 30-day intervals the agency will reevaluate the situation and decide whether any further extension of the time period is appropriate.

1–14.6. *Eligibility conditions and limitations.*

a. *Limits on duration of temporary living accommodations.* Subsistence payments may begin as soon as the agency determines that the provisions of this part should be invoked in a particular situation. Normally subsistence payments may be allowed for a period of no more than 60 days; the agency may, however, approve extensions of the time period as provided in 1–14.5. If the threatened individuals are directed to move immediately into temporary accommodations while the agency assesses the degree and seriousness of the threat, subsistence payments for this period may be allowed, even when the agency ultimately determines that the threat is not serious or no longer exists and decides to return the individuals to their home. When necessary occupancy of temporary living accommodations is expected to exceed 120 days, the agency should consider whether permanently relocating the employee would be advantageous given the specific nature of the threat, the continued disruption of the family, and the alternative costs of a change of official station.

b. *Location of temporary living accommodations.* The temporary living accommodations may be located in the vicinity of the employee's official station or at an alternate location away from the official station as circumstances warrant. When justified, the employee and immediate family members may occupy temporary living accommodations at different locations. The agency will designate the appropriate locations.

1–14.7. *Allowable subsistence payments.*

a. *Expenses covered.* Payments under this authority are intended to cover only reasonable and necessary subsistence expenses actually incurred incident to the occupancy of temporary living accommodations. Subsistence payments under this part generally will be limited to the cost of lodgings. However, certain expenses for meals, laundry, and cleaning of clothing may be allowed as provided in c, below.

b. *Determining allowable lodging costs.*

(1) *Allowable costs for daily rentals.* The same costs allowed in 1–7.5c(2) for lodging facilities obtained in connection with temporary duty travel may be allowed for temporary living accommodations under this part.

(2) *Allowable types of costs for other-than-daily rentals.* When an eligible individual rents lodgings on an other-than-daily basis for temporary occupancy under this part, the allowable costs shall be converted to a daily basis using the general guidelines under 1–7.9 which apply to lodgings obtained in connection with temporary duty travel.

c. *Determining other allowable expenses.* Costs of food, laundry, and cleaning of clothing are expenses incurred in day-to-day living. Such expenses should be considered the responsibility of the employee and normally will not be reimbursed. However, if temporary living accommodations do not contain cooking and/or laundry facilities, or other extenuating circumstances are present, certain of these expenses may be allowed to the extent determined appropriate by the agency.

d. *Maximum allowable amount.*

(1) *Method of computation.* An agency may approve the actual amount of allowable expenses incurred in each 30-day period (or fraction thereof) up to a maximum amount based on the daily limitations calculated under (2), below, multiplied by 30 (or the actual number of days used if fewer than 30). The daily actual subsistence expenses required to be itemized under e, below, will be totaled for each 30-day period (or fraction thereof) and compared with the maximum allowable for the particular period as prescribed under (2), below.

(2) *Daily limitations.* The maximum amount of subsistence payments for

each 30-day period (or fraction thereof) will be based on daily limitations calculated as provided in (a) through (e), below. If subsistence payments are authorized only for lodging costs, the daily limitations shall be reduced appropriately.

(a) For the employee, or for the unaccompanied spouse (one who necessarily occupies temporary accommodations without the employee or in a location separate from the employee), the daily limitation shall be an amount prescribed by the agency that shall not exceed the applicable maximum per diem rate prescribed under 1–7.2 for the location of the temporary living accommodations.

(b) For the spouse accompanied by the employee, the daily limitation shall not exceed three-fourths of the employee's daily limitation established in (a), above.

(c) For each other member of the employee's immediate family who is 12 years of age or older, the daily limitation shall not exceed three-fourths of the daily limitation established in (a), above, for the employee or the unaccompanied spouse, as appropriate.

(d) For each member of the employee's immediate family who is under 12 years of age, the daily limitation shall not exceed one-half of the daily limitation established in (a), above, for the employee or the unaccompanied spouse, as appropriate.

(e) For each member of the immediate family who necessarily occupies temporary living accommodations without, or at a location separate from, either the employee or the spouse, the agency may, when the limitations stated in (c) and (d), above, are inadequate, establish an appropriate higher daily limitation, that is within the limitation prescribed in (a), above.

e. *Itemization and receipts.* The actual expenses shall be itemized in a manner prescribed by the agency which will permit at a minimum a review of the amounts spent daily for (1) lodging, (2) meals, and (3) other allowable items of subsistence expenses (see a, above). Receipts shall be required at least for lodging and for any other allowable expenses as required by the agency.

1–14.8. *Transportation to and from a location away from the employee's designated post of duty.* The agency may approve the payment of transportation expenses when a situation described in 1–14.1 requires the employee and/or members of the immediate family to be temporarily relocated to a place away from the employee's designated post of duty. Transportation to and from such location shall be in accordance with the governing provisions of Parts 2 through 4 of this Chapter 1 unless the agency specifically approves a deviation from the rules for security reasons (see 1–10.2 regarding use of cash to procure transportation services in emergency circumstances). The documentation provisions of 1–14.9 govern in such instances.

1–14.9. *Authorizations and payment of claims.* Due to the unique nature of the situations covered under this part, agency heads shall establish specific administrative procedures for issuing authorizations and for payment of claims. In instances when documentation might compromise the security of the individuals involved, the head of the agency may waive all but absolutely essential documentation requirements.

1–14.10. *Advance of funds.* Funds may be advanced for subsistence and transportation expenses covered under this part in accordance with 1–10.3. The advance of funds will be at intervals prescribed by the agency but for no more than a 30-day period at a time. The amount of the advance shall not exceed an amount based on the daily limitations established by the agency under 1–14.7d(2).

12. Appendix 1–B, entitled "Travel Purpose Categories," is amended by redesignating category number 9 as number 10 and inserting new category 9 to read as follows:

* * * * *

9. *Emergency travel*—Travel to return an employee from a temporary assignment location at Government expense to his/her designated post of duty or home, or other alternate location, where he/she would normally be present to take care of the emergency situation if the Government had not directed or assigned the employee to another location to perform official business.

* * * * *

CHAPTER 2. RELOCATION ALLOWANCES

Part 1. Applicability and General Rules

13. Paragraph 2–1.1 is revised to read as follows:

2–1.1. *Authority.* These regulations are issued pursuant to 5 U.S.C. 5721–5734 and 20 U.S.C. 905(a).

14. Paragraph 2–1.2a is amended by revising subparagraph a(1) and adding paragraph a(1–a) to read as follows:

2–1.2. *Applicability.*

a. * * *

(1) Civilian officers and employees upon transfer from one official station or agency to another for permanent duty.

(1–a) Civilian officers and employees of the United States Postal Service transferred under 39 U.S.C. 1006 from the Postal Service to an agency as defined in 5 U.S.C. 5721 for permanent duty.

* * * * *

15. Paragraph 2–1.6a(3)(a) is revised to read as follows:

2–1.6. *Use of funds.*

* * * * *

(a) Per diem, mileage, and common carrier costs incident to his/her change of official station as set forth in 2–2.4;

* * * * *

Part 2. Allowances for Subsistence and Transportation

16. Paragraph 2–2.1 is revised to read as follows:

2–2.1. *For the employee.* Except as specifically provided in these regulations, per diem instead of subsistence expenses, transportation costs, and other travel expenses of the employee shall be allowed in accordance with the provisions of 5 U.S.C. 5701–5709 and Chapter 1; the maximum per diem rate allowable for travel within CONUS shall be the standard CONUS rate prescribed under 1–7.2 (see also 1–7.5a). Within CONUS, the prohibition on paying per diem for travel of less than 10 hours will apply to change of official station travel; outside CONUS, the 10-hour exclusion does not apply (see 1–7.4b). This part applies to travel of transferred employees, new appointees (including those covered in 2–1.5f), and employees assigned to posts of duty outside the conterminous United States in connection with either overseas tour renewal agreement travel or return travel to places of residence for the purpose of separation.

17. Paragraph 2–2.2b is revised to read as follows:

2–2.2. *For members of an employee's immediate family.*.

* * * * *

b. *Per diem allowance when en route between employee's old and new official stations.* When an employee is transferred, an allowance shall be paid for per diem instead of subsistence expenses incurred by the employee's immediate family while traveling between the old and new official stations regardless of where the old and new stations are located. If the actual travel involves departure and/or destination points other than the old or new official station, the per diem allowance shall not exceed the amount to which members of the immediate family would have been entitled if they had traveled by usually traveled route between the old and new official stations. In computing the per diem

allowance under provisions of Chapter 1, within CONUS, the prohibition on paying per diem for travel of less than 10 hours will apply to permanent change of station travel; outside CONUS, the 10-hour exclusion does not apply (see 1–7.4b). The maximum allowable per diem rates are as follows:

* * * * *

18. Paragraph 2–2.3d(1) is revised to read as follows:

d. *Maximum per diem allowances when privately owned automobile is used.*

* * * * *

(1) *Rates as prescribed by agency.* The per diem allowance for the employee while en route between the old and new duty stations shall be at appropriate rates, as prescribed by the agency concerned, within the applicable maximums and in accordance with provisions of 2–2.1 and Chapter 1. The per diem allowances prescribed in 2–2.2b apply for members of an employee's immediate family, except as excluded in 2–2.2c.

* * * * *

Part 5. Subsistence While Occupying Temporary Quarters

19. Paragraph 2–5.2g is revised to read as follows:

2–5.2. *Conditions and limitations for eligibility.*

* * * * *

g. *Effect of partial days on eligibility period.* Occupancy of temporary quarters for less than a whole day constitutes one full calendar day of the eligibility period.

(1) *Claim for temporary quarters when occupancy begins the same day on route travel ends.* The guidelines in (a) and (b), below, shall be used for determining the eligibility period for temporary quarters subsistence expense reimbursement and in computing maximum reimbursement when occupancy of temporary quarters for reimbursement purposes occurs the same day that en route travel per diem ends.

(a) *Old and new official station within the conterminous United States.* When en route travel (between official stations within the conterminous United States) ends and occupancy of temporary quarters for reimbursement purposes occurs in the same calendar day, the eligibility period for reimbursement for temporary quarters subsistence expenses shall start when en route travel terminates upon arrival at the temporary quarters location.

(b) *Old and/or new official station outside the conterminous United States.*

(i) *En route travel of more than 24 hours.* When en route travel is more than 24 hours, the eligibility period for reimbursement for temporary quarters subsistence expenses shall start at the beginning of the calendar day quarter immediately following the calendar day quarter in which en route travel per diem ends.

(ii) *En route travel of 24 hours or less.* When en route travel is 24 hours or less, the eligibility period for reimbursement for temporary quarters subsistence expense shall start at the beginning of the same calendar day quarter in which en route travel per diem ends.

(2) *Claims for temporary quarters occupancy in all other cases.* In all cases other than those covered in (1), above (e.g., when occupancy of temporary quarters occurs at the old official station or when reimbursement for occupancy of temporary quarters is not claimed on the same day that en route travel per diem begins or ends), the temporary quarters period shall start as provided in (a) or (b), below.

(a) *Old and new official stations within the conterminous United States.* When both the old and new official stations are within the conterminous United States, the temporary quarters period shall start at 12:01 a.m. of the calendar day (see 1–7.1b(1)) in which temporary quarters subsistence expense reimbursements is claimed, provided that temporary quarters are occupied during that calendar day.

(b) *Old and/or new official station outside the conterminous United States.* When the old and/or new official station is outside the conterminous United States, the temporary quarters shall start with the first quarter of the calendar day in which temporary quarters subsistence expense reimbursement is claimed, provided that temporary quarters are occupied during that calendar day.

(3) *Termination of eligibility period.* The temporary quarters period shall terminate at midnight of the last day of eligibility.

* * * * *

20. Paragraph 2–5.4c(1) is revised to read as follows:

2–5.4. *Allowable amount.*

* * * * *

(1) *Applicable maximum per diem rates.* The maximum per diem rates to be used for computations under (2) through (4), below, shall be as follows:

(a) For temporary quarters located in the conterminous United States, the applicable maximum per diem rate is the standard CONUS rate ($50) prescribed under 1–7.5a.

(b) For temporary quarters in applicable locations outside the conterminous United States, the maximum per diem rate is the rate prescribed by the Secretary of Defense or by the Secretary of State under 1–7.2b or c for the locality of the temporary quarters.

* * * * *

Appendix 1–A, Prescribed Maximum Per Diem Rates for CONUS

21. Appendix 1–A of the FTR is amended by removing Appendix 1–A entitled "Designated High Rate Geographical Areas (HRGA's)" and adding new Appendix 1–A entitled "Prescribed Maximum Per Diem Rates for CONUS" to read as follows:

[illegible] CODE [illegible]

APPENDIX 1-A, PRESCRIBED MAXIMUM PER DIEM RATES FOR CONUS

The maximum rates listed below are prescribed under paragraph 1-7.2 of these regulations (Federal Travel Regulations (FTR)) for reimbursement of subsistence expenses incurred during official travel within CONUS (the conterminous United States). The amount shown in column (a) is the maximum that will be reimbursed for lodging expenses. The MI&E rate shown in column (b) is a fixed amount allowed for meals and incidental expenses related to subsistence. The per diem payment calculated in accordance with Part 1-7 of the FTR for lodging expenses plus the M&IE rate may not exceed the maximum per diem rate shown in column (c).

Per Diem Locality		Maximum Lodging Amount (a)	+ M&IE Rate (b)	= Maximum Per Diem Rate (c) 4/
CONUS, Standard rate (applies to all locations within CONUS not specifically defined below. However, the standard CONUS rate applies to all locations within CONUS, including those defined below, under certain specified travel circumstances and for certain relocation subsistence allowances. See Parts 1-7, 2-2, 2-4 and 2-5 of the FTR)		$25	$25	$50

Gillette	Campbell	42	25	67
Jackson	Teton	51	25	76
Rock Springs	Sweetwater	35	25	60

1/ Unless otherwise specified, the per diem locality is defined as "all locations within, or entirely surrounded by, the corporate limits of the key city, including independent entities located within those boundaries."

2/ Per diem localities with county definitions shall include "all locations within, or entirely surrounded by, the corporate limits of the key city as well as the boundaries of the listed counties, including independent entities located within the boundaries of the key city and the listed counties."

3/ Military installations or Government-related facilities (whether or not specifically named) that are located partially within the city or county boundary shall include "all locations that are geographically part of the military installation or Government-related facility, even though part(s) of such activities may be located outside the defined per diem locality."

BILLING CODE 6820-AM-C

4/ Federal agencies may submit a request to GSA for review of the subsistence cost in a particular city or area when travel to that location is repetitive or on a continuing basis and travelers' experience indicates that the prescribed standard CONUS per diem rate is inadequate. Other per diem locality rates listed in this appendix will be surveyed on an annual basis by GSA to determine whether rates are adequate. Agencies' requests shall be submitted to the General Services Administration, Federal Supply Service, Attn: Regulations and Policy Division (FFY), Washington, DC 20406. Requests for rate adjustments shall include a description of the location involved (city, county or other defined area) and a recommended rate supported by a statement explaining the circumstances that cause the existing rate to be inadequate. The request also should contain an estimate of the annual number of trips to the location and the average duration of such trips.

Dated: May 9, 1986.

T.C. Golden,

Administrator of General Services.

Part III

Department of Defense
General Services Administration
National Aeronautics and Space Administration

48 CFR Part 31
Federal Acquisition Regulation (FAR); Travel Costs; Proposed Rule

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 31

Federal Acquisition Regulation (FAR); Travel Costs

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are considering a change to Federal Acquisition Regulation (FAR) 31.205-46, Travel costs, in order to implement the Federal Civilian Employee and Contractor Travel Expense Act of 1985 (Pub. L. 99-234).

DATE: Comments should be submitted to the FAR Secretariat at the address shown below on or before June 30, 1986, to be considered in the formulation of a final rule.

ADDRESS: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets NW, Room 4041, Washington, DC 20405.

Please cite FAR Case 86-29 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Ms. Margaret A. Willis, FAR Secretariat, Telephone (202)523-4755.

SUPPLEMENTARY INFORMATION:

A. Background

The provision contained in title II, section 201 of the Federal Civilian Employee and Contractor Travel Expense Act of 1985, specifies ". . . costs incurred by contractor personnel for travel, including costs of lodging, other subsistence, and incidental expenses, shall be considered to be reasonable and allowable only to the extent that they do not exceed the rates and amounts set by subchapter I of Chapter 57 of Title 5, United States Code, or by the Administrator of General Services or the President (or his designee) pursuant to any provision of such subchapter." To implement this provision of the Act, the Defense Acquisition Regulatory and Civilian Agency Acquisition Councils are proposing a revision to FAR 31.205-46, Travel costs. The proposed revision states that costs for lodging, meals, and incidental expenses incurred by contractor personnel shall be considered to be reasonable and allowable to the extent that they do not exceed on a daily basis the per diem rates set forth in the: (1) Federal Travel Regulations, (2) Joint Travel Regulations, or (3) Standardized Regulations (Government Civilians, Foreign Areas). In addition, the proposed revision provides for situations where contractors may reimburse their employees for the actual costs in excess of the per diem limits, as authorized for Federal civilian employees.

B. Regulatory Flexibility Act

The proposed change to FAR 31.205-46 is not expected to have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601, et seq.) because most supplies and services obtained from small entities are acquired on a competitive fixed-price basis and the cost principles do not apply. For the remainder of the supplies and services that are obtained from small entities, the cost principles are primarily used to establish negotiation objectives. Moreover, the proposed coverage merely implements Pub. L. 99-234, which requires comparable treatment of the costs of lodging, meals, and incidental expenses for contractors and Government employees. Notwithstanding the foregoing, specific comments on the proposed rule are solicited from small businesses.

C. Paperwork Reduction Act

Through contact with some trade associations and contractors, the Councils believe there may be additional recordkeeping burdens caused by the proposed rule. A request for approval of the additional paperwork burden is being submitted to the Office of Management and Budget.

D. Federal Travel Regulations

Revised per diem rates for travel within the continental United States, as set forth in amendments to the Federal Travel Regulations, appear elsewhere in today's issue of the Federal Register. Copies of the Federal Travel Regulations amendment are available for purchase from the Government Printing Office, Superintendent of Documents, for $1.50. The revised per diem rates will be effective for Government employees on July 1, 1986. The rates are expected to be made applicable to Government contractors in accordance with the provisions of this proposed FAR rule on or about August 1, 1986. However, the revisions to FAR 31.205-46 will be applicable to contracts awarded on or after the date the final rule is effective.

List of Subjects in 48 CFR Part 31

Government procurement.

Dated: May 23, 1986.

Lawrence J. Rizzi,

Director, Office of Federal Acquisition and Regulatory Policy.

Therefore, it is proposed that 48 CFR Part 31 be amended as set forth below:

PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

1. The authority citation for Part 31 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2453(c).

2. Section 31.205-46 is amended by revising paragraph (a) to read as follows:

31.205-46 Travel costs.

(a)(1) Costs for transportation, lodging, meals, and incidental expenses incurred by contractor personnel on official company business are allowable subject to this paragraph and paragraphs (b) through (f) of this subsection. Transportation costs may be based on actual costs incurred, on a mileage basis, or on a combination thereof, provided the method used results in a reasonable charge. Costs for lodging, meals, and incidental expenses may be based on per diem, actual expenses, or a combination thereof, provided the method used results in a reasonable charge.

(2) Except as provided in subparagraph (a)(3) of this subsection, costs incurred for lodging, meals, and incidental expenses (as defined in the regulations cited in (i) through (iii) of this subparagraph) shall be considered to be reasonable and allowable only to the extent that they do not exceed on a daily basis the per diem rates in effect at the time of travel as set forth in the:

(i) Federal Travel Regulations, prescribed by the General Services Administration, for travel in the conterminous 48 United States, available on a subscription basis from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, Stock No. 022-001-81003-7;

(ii) Joint Travel Regulations, Volume 2, DOD Civilian Personnel, Appendix A, prescribed by the Department of Defense, for travel in Alaska, Hawaii, The Commonwealth of Puerto Rico, and territories and possessions of the United States, available on a subscription basis from the Superintendent of Documents,

U.S. Government Printing Office, Washington, DC 20402, Stock No. 906-010-00000-1; or

(iii) Standardized Regulations (Government Civilians, Foreign Areas), Section 925, "Maximum Travel Per Diem Allowances for Foreign Areas," prescribed by the Department of State, for travel in areas not covered in (a)(2)(i) and (ii) of this subsection, available on a subscription basis from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, Stock No. 744-006-00000-0.

(3) In extraordinary and temporary situations, contractors may reimburse their employees for actual costs in excess of the above-referenced daily per diem rates in amounts not exceeding the higher amounts authorized for Federal civilian employees as permitted in the regulations referenced in (a)(2)(i), (ii), or (iii) of this subsection. For the cost of such higher reimbursements to be allowable, all of the following conditions must be met:

(i) One of the conditions warranting approval of the actual expense method, as set forth in the regulations referenced in (a)(2)(i), (ii), or (iii) of this subsection, must exist.

(ii) The authority to use the higher actual expense reimbursement method may be used only on an individual-case basis after appropriate consideration of the facts existing at the time travel is directed and performed. A written justification for use of the higher amounts authorized by this method must be approved on a case-by-case basis by an officer of the contractor's organization or designee to ensure that the authority is properly administered and controlled to prevent abuse.

(iii) Receipts are required to support the expenses incurred and the approved justification must be included in the supporting documentation.

(iv) If it becomes necessary to exercise the authority to use the higher actual expense method repetitively or on a continuing basis in a particular area, the contractor must obtain advance approval from the contracting officer.

Part IV

Department of Defense

Corps of Engineers, Department of the Army

33 CFR Parts 209, 335, 336, 337, and 338

Operations and Maintenance Regulations for Activities Involving the Discharge of Dredged or Fill Material in Waters of the United States and Ocean Waters; Proposed Rule

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

33 CFR Parts 335, 336, 336, 337, and 338

Proposed Amendment to Corps of Engineers Operations and Maintenance Regulations for Activities Involving the Discharge of Dredged or Fill Material in Waters of the United States and Ocean Waters

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Proposed rule.

SUMMARY: The Corps of Engineers is proposing to revise and relocate its 33 CFR 209.145 regulations to new Parts 335 through 338 for Corps operations and maintenance activities involving the discharge of dredged or fill material in waters of the United States and ocean waters. The relocation of this regulation will provide sufficient numbering and will allow easy reference to the permit regulations of 33 CFR Parts 320 through 330. These revisions are needed to reflect a number of new laws (primarily the 1977 Amendments to the Clean Water Act), Executive Orders (EOs), court decisions, and policy changes which have occurred since the current regulations were published on July 22, 1974. This regulation will provide updated procedures for compliance with state water quality and coastal zone certification requirements of Corps maintenance dredging and disposal activities in waters of the United States and ocean waters. A practices and procedures part has been added to explain and provide for consistent implementation of Corps operations and maintenance activities. These proposed regulation revisions will better enable the Corps of Engineers to implement the provisions of the Clean Water Act and Ocean Dumping Act when undertaking operations and maintenance activities involving dredged material disposal in waters of the United States and ocean waters.

DATE: Comments to this regulation must be received on or before July 29, 1986.

ADDRESS: Comments should be submitted in writing to: The Water Resources Support Center, Dredging Division, Casey Building, Ft. Belvoir, VA 22060-5586. Comments will be available for examination at this address.

FOR FURTHER INFORMATION CONTACT: Mr. Dave Mathis or Mr. Joe Wilson, Water Resources Support Center, phone (202) 335-2235.

Background

The legislative histories of the Federal Water Pollution Control Act of 1972 (amended in 1977 and commonly referred to as the Clean Water Act (CWA)) and of the Marine Protection, Research, and Sanctuaries Act of 1972 (commonly referred to as the Ocean Dumping Act (ODA)) reveal that one purpose of sections 404 and 103 of the CWA and ODA, respectively, was to address the dredged material disposal requirements for construction and maintenance of navigation projects. To ensure that essential navigation continues to be maintained in an environmentally responsible manner, Congress enacted special legislation under Pub. L. 91-611, directing that a comprehensive national program of environmental research on dredged material disposal be conducted to identify environmentally acceptable alternatives for the disposal of this material and to develop scientifically acceptable evaluations. This program was initiated in 1973 and included, at the outset, a five-year research effort that involved an expenditure of over $33 million. Current Federal expenditures on dredged material research and development have now cumulatively exceeded $100 million. This research has investigated all facets of disposal alternatives for dredged material, including beneficial uses and state-of-the-art evaluative procedures for contaminated sediments. These investigations have included thorough consideration of the environmental protection mandates of the Resource Conservation and Recovery Act and Toxic Substances Control Act, as well as other Federal environmental protection statutes.

Results of this extensive research on dredged material, which now represents well over a decade of intensive effort, have been widely published and have received close domestic as well as international scientific scrutiny through prominent scientific groups such as the National Research Council and the Scientific Group of the London Dumping Convention. With specific regard to dredged material disposal, we are capable of evaluating the feasibility and environmental acceptability of the full range of disposal alternatives. Based on this extensive scientific research base and experience, we believe that the most appropriate alternative can be selected only on a case-by-case basis by minimizing costs consistent with sound engineering practices and complying with appropriate environmental standards. Thus, all practicable alternatives, including the no dredging alternative, should receive full and equal consideration in the evaluation process. These alternatives include, but are not limited to, land-based diked containment areas, beneficial uses such as beach nourishment and marsh establishment, and aquatic (including ocean) disposal of dredged sediments.

Significant Changes in the 1974 Regulations

Following is a summary of the substantive changes in the 1974 regulation. Those changes that are editorial or self-explanatory in nature are not discussed.

Applicability to Other Corps Programs and Regulations

Through the budget process, the Congress decides which operations and maintenance projects are accomplished. However, before maintenance can be accomplished, the Corps is required to establish compliance with the environmental protection statutes, EOs and regulations. Other Corps regulations deal with similar requirements for Corps pre-authorization and continuing authorities (i.e., planning) projects and for the Corps regulatory program. This regulation prescribes the policies and procedures that should be followed to establish environmental compliance for Corps operations and maintenance activities. Various decisions are made in the budget process regarding need and justification for the operations and maintenance work. Once those decisions are made and the Congress allocates funds, it is the responsibility of the Corps to carry out the operations and maintenance work by selecting the alternative which is the least costly and consistent with sound engineering practices and appropriate environmental quality standards. This regulation focuses on procedures and documentation necessary to establish compliance with certain environmental statutes. Cost and engineering feasibility considerations, however, play a critical role in selecting the ultimate course of action.

Organization

The regulation has been reorganized into four parts to allow for sufficient numbering and easy reference. Part 335 describes the purpose of the regulation and identifies the applicable and related statutes and EOs. Part 336 contains the operating procedures for Corps field offices when undertaking operations and maintenance activities involving the discharge of dredged or fill material into waters of the U.S. or the transportation for disposal of dredged material into

ocean waters. Part 337 describes the Corps documentation process for dredged materials disposal activities related to Federal operations and maintenance projects. Part 338 has been added to address those operations and maintenance activities involving the discharge of fill material.

Recently, the Corps has been faced with a unique and important challenge: removing and disposing in an environmentally responsible manner contaminated sediments from a few contaminated reaches of Federal navigation channels. The Corps has been conducting an extensive research effort to develop a logical and scientifically valid testing, evaluation, and disposal management framework for handling these contaminated sediments. This management framework is now in the demonstration/refinement phase and will be used as the basis for determining the best management approaches for contaminated sediments. The Corps policy at §335.4 is reflective of experience, past and current research, and the necessity of considering all practicable alternatives on an equal basis.

Part 335 Policy.

A policy statement has been added to the regulation to reflect that the Corps undertakes operations and maintenance activities in a manner which recognizes cost, engineering constraints, and other factors that can limit consideration of some alternatives while at the same time ensuring environmentally responsible choices. The construction and maintenance of Congressionally authorized Federal navigation channels is primarily a Corps responsibility. When evaluating operations and maintenance projects, the Corps fully considers all practicable alternatives on an equal basis. Factors considered in determining whether to proceed with a proposed dredging and disposal activity include navigation, economics, engineering practicability, national defense, fish and wildlife, water quality, aesthetics, cultural resources, endangered species, wetlands, floodplains, recreation, etc. As part of the Corps overall effort to assure that needed dredging is accomplished in an economic, timely and environmentally responsible manner, an extensive research and development program was authorized in 1978 and continues as an integral and major support component of the Corps national dredging program. This research effort has resulted in the investigation of nearly every facet of dredging and dredged material disposal. When accomplishing dredging and disposal activities, these extensive research results and the experience gained by the Corps play a vital role in the ultimate selection of dredged material disposal sites.

Section 335.5 Applicable and Related Laws.

The 1974 regulation provides a summary of the Federal laws and EOs that are known to apply to maintenance dredging and disposal activities. To avoid the risk of misinterpretation, the Corps has decided in this proposed revision simply to list the applicable Federal statutes and EOs and not provide interpretive summaries. Interpretations are ultimately resolved by the courts and are often misleading when taken out of context.

Section 335.7 Definitions.

Certain definitions of the regulatory program applicable to Corps dredging and disposal activities have been incorporated by reference. Definitions exclusive to the dredging program have been defined in §335.7.

Section 335.7 Federal Standard.

This new concept has been added to allow the concerned public and the states to understand more fully how the Corps establishes its preferred alternative or alternatives. The ocean dumping criteria and 404(b)(1) guidelines are at 40 CFR Parts 220 through 228 and Part 230, respectively. The regulations for environmental impact statements and environmental assessments are at 40 CFR Parts 1500 through 1508 and 33 CFR Part 230. The procedures of these regulations require the Corps to consider all facets of the dredging and disposal operation to include cost, engineering feasibility, environmental concerns, and other practicable alternatives. The alternative selected should represent the least costly alternative consistent with sound engineering practices and meeting required environmental standards. The Corps' preferred alternative is defined as the Federal standard. When seeking state certification or evaluating Federal agency and public comments, the district engineer will be using the alternative(s) selected on this basis as a point of reference.

Part 336

This part has been divided into two sections to distinguish between Federal activities regulated by the ODA and CWA. The procedural requirements for compliance with these two laws are different and are more appropriately evaluated separately.

Section 336.0 Overlapping Jurisdiction of ODA and CWA in Territorial Sea.

The ODA and CWA have overlapping jurisdiction for dredged material disposal in the territorial sea. Pursuant to 40 CFR 230.2(b), dredged material disposal activities in the territorial sea will be evaluated under the ODA. Rules for dredged material disposal activities in the territorial sea are established in Part 336 and are based on the type of discharge and most appropriate methodology available for evaluating environmental impacts.

Section 336.0 Corps Authority to Select Dredged Material Disposal Sites in Territorial Sea and Ocean Waters.

Presently, the EPA has authority under section 102 of the ODA for designating ocean dump sites in territorial sea and ocean waters. The Corps has authority under section 103 of the ODA to authorize the transportation for disposal of dredged material in the territorial sea and ocean waters and also to select ocean dumping sites should an EPA designated site not be feasible for use. The Corps will continue to exercise this authority as necessary. In exercising its authorities, the Corps is required to apply the criteria established by the EPA pursuant to section 102(a), relating to the effects of the disposal. Presently, the EPA has designated 125 ocean disposal sites serving 115 Federally authorized navigation projects. To the extent feasible, the Corps uses and will continue to use the EPA designated sites; however, the Corps may select an ocean dredged material disposal site or sites under the authority of Section 103 of the ODA in consultation with EPA for situations where no EPA designated site exists or can be used feasibly.

Section 336.0 Dredged Material Disposal Activities Involving Fill Material in the Territorial Sea.

In those cases where the disposal of dredged material is also considered as the discharge of fill material, the activity will be evaluated under the CWA. Such activities include beach nourishment or the construction of underwater berms where the material is intended to return to the littoral transport process for the primary purpose of downdrift beach replenishment.

Section 336.1(a) State Requirements.

Since implementation of the 1977 amendments to the CWA, the Corps has sought state water quality certification for dredged material disposal activities that occur in waters of the United States. In general terms, the Coastal

Zone Management Act (CZMA) requires the Corps to provide a determination that its activities directly affecting the coastal zone are consistent with an approved state coastal zone management plan to the maximum degree practicable.

Some confusion has existed between the Corps and the states over respective authorities and responsibilities under the CWA and CZMA. Appropriate sections have been added to the regulation to recognize the role of the states in evaluating water quality and coastal zone impacts of Corps maintenance dredging disposal projects while ensuring that the states provide timely responses as required by Congress in the relevant Federal statutes.

The CWA and regulations implementing the CZMA provide for waiver if the state fails or refuses to act on requests for water quality certification or coastal zone consistency determinations within a reasonable period of time. The maximum period of time provided by section 401 of the CWA for the state to act on requests for water quality certification is one year from the date of the request. Based on experience since enactment of the CWA and CZMA, the Corps has determined that six months is reasonable as a maximum period of time within which the state must act on maintenance dredging disposal projects of significant scope and complexity. More routine maintenance dredging disposal projects are expected to take much less time. Therefore, we are requesting that the states act within two months after receipt of a request for water quality certification and within 45 days of a coastal zone consistency certification. The District Engineer may extend such time (up to six months from the request) for final state action upon a showing by the state that an additional period of time is warranted. The Corps and the state may mutually agree on alternative requirements to shorten the state water quality certification or coastal zone consistency process.

Section 336.1(b) Certification Requests.

Since implementation of the CWA and CZMA, the Corps has been providing information to affected states in support of requests for water quality certification and coastal zone consistency determinations. Generally, thorough project description information is adequate to determine compliance with state water quality standards and impacts to approved coastal zone programs. The absence of a Federal regulation to specify what information would be provided to the state in support of the water quality certification request and coastal zone consistency certification has invited lengthy delays by some states. Delays by some states of three years or more have been common for routine maintenance dredging and disposal activities. We believe that such long delays are unnecessary, and the proposed regulation seeks to avoid such delays in the future.

Section 336.1(b) National Environmental Policy Act (NEPA).

Since promulgation of NEPA in 1969, the Corps has prepared Environmental Impact Statements (EIS) or Environmental Assessments (EA) for all actively maintained navigation projects. Normally, an EIS or EA is issued for the life of an operations and maintenance activity. Changes in a disposal plan, however, will require re-evaluation under NEPA and may require re-evaluation under the CWA or ODA. The decision to prepare a new EA, EIS, or EIS supplement is made for each project on a case-by-case basis based on the significance of the potential impacts of the changes to the operations and maintenance activity. A preliminary determination on the NEPA requirements should be included in the public notice for the project and comments on the public notice should be used by the district engineer in making the final determination whether a new EIS, or EIS supplement, will be required. The procedures of 33 CFR Part 230 will be used to prepare NEPA documents.

Section 336.1(b) Related Activities.

In order to assure that beneficiaries of Corps navigation projects receive timely authorization of activities related to maintenance of the navigation project, district engineers are encouraged to include such related activities in the enviromental compliance process for the Corps project. This provision was in the 1974 rule. The lack of a procedure in the 1974 rule for authorizing the related activity prevented field offices from fully incorporating related activities in the environmental compliance documentation for the Corps activity. The evaluation of the related activity will include compliance with the substantive requirements of 33 CFR Parts 320 through 330. We are encouraging local users to coordinate with district engineers concerning inclusion of their activities in the Corps compliance process. For consistency with the permit program and to assure that the environmental compliance documentation for the Corps activity is not delayed by the local project, a separate permit and statement of findings, if appropriate, are to be used to authorize the related activity. Local users will be responsible for funding all work necessary in support of their related activity.

Section 336.1(b) Cultural Resource Considerations.

The cultural resources section has been revised to state that cultural resources warranting evaluation against the criteria of the National Register of Historic Places are not normally found in constructed navigation channels or previously used disposal areas. Therefore, cultural resources considerations will normally be limited to areas of new work or to constructed navigation channels and previously used disposal areas where cultural resources are known to exist.

Section 336.1(b) Fish and Wildlife Considerations.

All Corps projects in an active operations and maintenance status have either an EA or EIS. Since fish and wildlife resources are considered in the EA or EIS for the project, subsequent fish and wildlife considerations should address the scope of the action requiring re-evaluation under the CWA, ODA, or NEPA. The importance of fish and wildlife resources cannot be minimized. However, the scope of such considerations should not extend to an entire navigation project when only a minor disposal site modification, addition, or deletion is involved.

Section 336.1(b) Effects on Wetlands.

To avoid unnecessary duplication, the proposed regulation references the Corps regulatory program, the EPA's 404(b)(1) guidelines, and E.O. 11990, when dredging and disposal activities affect wetlands.

Section 336.1(b) Authority to Undertake Federal Projects.

The § 209.145 regulation at (h)(2)(i) was revised and moved to Parts 336 and 337 of the proposed regulation to specify procedures that should be followed when state agency comments significantly exceed the Federal standard established for the project. Specific procedures are required due to the diverse circumstances that can delay Corps maintenance dredging and disposal activities.

Section 336.2 Water Quality Certification of Ocean Disposal Activities.

The terms and legislative history of the ODA leave some doubt regarding whether a state has legal authority to

exert control over ocean dumping activities of the Corps covered under the Act (see section 106(d)). Thus, it is unclear whether the Corps must obtain a state water quality certification pursuant to section 401 of the CWA or certify consistency to the maximum extent practicable with an approved state coastal zone management plan pursuant to the CZMA for the ocean disposal of dredged material in the territorial sea.

Notwithstanding this legal question, the Corps will voluntarily, as a matter of comity, apply for state section 401 water quality certification and determine CZMA consistency for ocean disposal of dredged material within the three-mile extent of the territorial sea. Moreover, the Corps will attempt to comply with any reasonable requirement or condition imposed by a state in the course of the 401 certification process or the CZMA consistency certification process within the limits of the territorial sea. Nevertheless, the Corps reserves its legal rights regarding any case where a state unreasonably denies or conditions a 401 water quality certification for proposed ocean disposal of dredged material within the territorial sea or alleges that such disposal would not be consistent to the maximum extent practicable with an approved state CZMA plan.

If such a circumstance arises, the district engineer must so notify WRSC-D, DAEN-CWZ, and DAEN-CCE for purposes of consultation regarding the Corps' appropriate response and course of action.

Part 337 Practices and Procedures.

A practices and procedures part has been added to explain the Corps documentation process and to establish procedures to be applied consistently throughout the Corps' dredged material disposal maintenance program.

Section 337.1 Public Notices.

The public notice procedures section has been expanded to provide for consideration of the notification requirements of the ODA. Additionally we are emphasizing that normally public notices are issued for the life of a disposal activity unless required changes in a disposal plan warrant re-evaluation under the CWA or ODA.

Section 337.2 State Requirements.

Where state disposal requirements exceed those necessary in establishment of the Federal standard, the district engineer is expected to try to resolve the state's concern. In those cases where a resolution of the state's concern is not forthcoming, district engineers are expected to defer maintenance dredging and consult with higher Corps authority.

Section 337.4 Memoranda of Agreement (MOA).

Presently, public notices of maintenance dredging and disposal are required by sections 401 and 404 of the CWA, 103 of ODA, and 307 of the CZMA. We are encouraging district engineers to develop MOAs in order to avoid duplication with similar state and local procedures. Existing MOAs with the states should be examined and, as appropriate, revised to assure that the policies and procedures of this regulation are fully implemented.

Section 337.5 General Authorizations.

As provided by section 404(e) of the CWA and 104(c) of the ODA, certain categories of activities may be authorized on a regional or nationwide basis. The procedures of Part 330 are to be used for the development of new general authorizations. General authorizations which include local interests will comply with the procedures of 33 CFR Parts 320–329.

To better enable the public to utilize fully the benefits of Corps navigation projects, district engineers should propose for adoption regional general authorizations based on the intended use of the Corps' navigation channels. Conceptually, the district engineer would geographically specify the project boundaries. These areas would generally include port facilities, industrial canals, etc. adjacent to navigation channels. Categories of activities that would fulfill the intended project purposes would be authorized, such as maintenance dredging of boat slips and disposal of dredged material in designated disposal areas, mooring dolphins, wharves, etc. Special conditions based on regional environmental emphasis would also be included. This process would notify prospective applicants of parameters for development in specific geographic regions. Similarly, other areas such as those described in coastal zone management plans where development would be discouraged can also be identified.

Section 337.7 Emergency Actions.

In certain circumstances, the Corps may be required to conduct dredging activities to protect or restore navigation in a time period less than that required under normal circumstances.

Section 337.8 Reports to Higher Echelons.

The reports section has been revised to provide currency with existing requirements for reporting of certain activities to headquarters.

Section 337.9 Identification and Use of Disposal Areas.

This section encourages district engineers to identify long-term disposal sites for dredged material.

District engineers are expected to coordinate with local interests in identifying long-term disposal requirements with a view towards developing long-term dredged material disposal management strategies for Corps navigation channels.

Part 338 Other Operations and Maintenance Activities.

With the publication of a regulation for discharges of dredged material, other operations and maintenance (O&M) activities undertaken by the Corps involving the discharge of dredged or fill material also need a regulatory framework for establishment of compliance with applicable environmental laws and regulations. The Corps' planning regulations apply primarily to construction or new work projects, and the regulatory procedures of the permit regulations do not adequately guide Corps managers when undertaking O&M activities involving the placement of dredged or fill material in waters of the United States. Therefore, Part 338 was established to guide Corps managers when undertaking O&M activities involving fill material or dredged material used as fill discharged into waters of the U.S.

SUPPLEMENTARY INFORMATION:

Classification

Since these revisions primarily clarify the rules published at § 209.145 in 1974, based on amendments to the Clean Water Act, the Corps of Engineers has determined that these regulation revisions are not a major rule requiring a Regulatory Impact Analysis under Executive Order 12291.

Environmental Impact Statement

This regulation primarily pertains to the Corps of Engineers with respect to implementation of the environmental protection statutes and EOs. Although this regulation will change the current § 209.145 regulations in certain respects. We have determined that these changes do not constitute a major Federal action significantly affecting the quality of the human environment. Therefore, we have determined that an EIS under the National Environmental Policy Act of 1969 is not required. An Environmental Assessment has been prepared discussing the proposed changes to the

current regulation, subsequent expected environmental impacts, and overall need for the revisions.

Administrative practice and procedure.

33 CFR Part 209.145 is proposed to be removed and 33 CFR Parts 335, 336, 337 and 338 are proposed to be added to read as follows:

Dated: April 18, 1986.

Approved:

Robert K. Dawson,

Assistant Secretary of the Army (Civil Works).

PART 335—OPERATION AND MAINTENANCE OF CORPS OF ENGINEERS CIVIL WORKS PROJECTS INVOLVING THE DISCHARGE OF DREDGED OR FILL MATERIAL INTO WATERS OF THE U.S. OR OCEAN WATERS

Sec.

335.1 Purpose.
335.2 Authority.
335.3 Applicability.
335.4 Policy.
335.5 Applicable laws.
335.6 Related laws and Executive Orders.
335.7 Definitions.

Authority: 33 U.S.C 1344; 33 U.S.C. 1413.

§ 335.1 Purpose.

This regulation prescribes the practices and procedures to be followed by the Corps of Engineers to ensure compliance with the specific statutes governing Civil Works operations and maintenance projects involving the discharge of dredged or fill material into waters of the U.S. or the transportation of dredged material for the purpose of disposal into ocean waters. These practices and procedures should be employed throughout the decision/management process concerning methodologies and alternatives to be used to ensure prudent operation and maintenance activities.

§ 335.2 Authority.

In accordance with section 404 of the Clean Water Act of 1977 (CWA) and section 103 of the Marine Protection, Research, and Sanctuaries Act of 1972, hereinafter referred to as the Ocean Dumping Act (ODA), the Corps of Engineers regulates the discharge of dredged or fill material into waters of the U.S. and the transportation of dredged material for the purpose of disposal into ocean waters. Section 404 of the CWA requires public notice with opportunity for public hearing for discharges of dredged or fill material into waters of the U.S. and that discharge sites be specified through the application of guidelines developed by the Administrator of the Environmental Protection Agency (EPA) in conjunction with the Secretary of the Army. Section 103 of the ODA requires public notice with opportunity for public hearing for the transportation for disposal of dredged material into ocean waters. Ocean disposal of dredged material must be evaluated using the criteria developed by the Administrator of EPA in consultation with the Secretary of the Army. Section 103(e) of the ODA provides that the Corps of Engineers may, in lieu of permit procedures, issue regulations for Federal projects involving the transportation of dredged material for ocean disposal which require the application of the same criteria, procedures, and requirements which apply to the issuance of permits.

§ 335.3 Applicability.

This regulation (33 CFR Parts 335 through 338) is applicable to the Corps of Engineers when undertaking operation and maintenance activities at Corps Civil Works projects.

§ 335.4 Policy.

The Corps of Engineers undertakes operations and maintenance activities where appropriate and environmentally acceptable. All practicable alternatives are fully considered on an equal basis. This includes the discharge of dredged or fill material into waters of the U.S. or ocean waters in the least costly manner, at the least costly and most practicable location, and consistent with engineering and environmental constraints.

§ 335.5 Applicable laws.

(a) The Clean Water Act (33 U.S.C. 1251 et seq.) (also known as the Federal Water Pollution Control Act Amendments of 1972 and 1977).

(b) The Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1401 et seq.) (commonly referred to as the Ocean Dumping Act).

§ 335.6 Related laws and Executive Orders.

(a) The National Historic Preservation Act of 1966 (16 U.S.C. 470a et seq.), as amended.

(b) The Reservoir Salvage Act of 1960 (16 U.S.C. 469), as amended.

(c) The Endangered Species Act (16 U.S.C. 1531 et seq.) as amended.

(d) The Estuary Protection Act (16 U.S.C. 1221).

(e) The Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.), as amended.

(f) The National Environmental Policy Act (42 U.S.C. 4341 et seq.), as amended.

(g) The Wild and Scenic Rivers Act (16 U.S.C. 1271 et seq.), as amended.

(h) Section 307(c) of the Coastal Zone Management Act of 1976 (16 U.S.C. 1456(c)), as amended.

(i) The Water Resources Development Act of 1976 (Pub. L. 94–587).

(j) Executive Order 11593, *Protection and Enhancement of the Cultural Environment*, May 13, 1971 (36 FR 8921, May 15, 1971).

(m) Executive Order 12372, *Intergovernmental Review of Federal Programs*, July 14, 1982 (47 FR 3959, July 16, 1982).

(n) Executive Order 12114, *Environmental Effects Abroad of Major Federal Actions*, January 4, 1979.

§ 335.7 Definitions.

The definitions of 33 CFR Parts 323, 324, 327, and 329 are hereby incorporated into 33 CFR Parts 335, 336, 337, and 338. The following terms are defined or interpreted from the Parts 320 through 330 regulations for purposes of 33 CFR Parts 335 through 338.

"Beach nourishment" means the discharge of dredged or fill material for the purpose or replenishing an eroded beach or placing sediments in the littoral transport process.

"Emergency" means a situation which would result in an unacceptable hazard to life or navigation, a significant loss of property, or an immediate and unforeseen significant economic hardship if corrective action is not taken within a time period less than the normal time needed under standard procedures.

"Federal standard" means the dredged material disposal alternative or alternatives identified by the Corps which represent the least costly alternatives consistent with sound

engineering practices and environmental requirements. The alternative or alternatives are selected through the 404(b)(1) evaluation process or ocean dumping criteria, environmental assessment or environmental impact statement, and public notice coordination process.

"Navigable waters of the U.S." means those waters of the U.S. that are subject to the ebb and flow of the tide shoreward to the mean high water mark, and/or are presently used, or have been used in the past, or may be susceptible to use with or without reasonable improvement to transport interstate or foreign commerce. A more complete definition is provided in 33 CFR Part 329. For the purpose of this regulation, the term also includes the confines of Federal navigation approach channels extending into ocean waters beyond the territorial sea which are used for interstate or foreign commerce.

"Practicable" means available and capable of being done after taking into consideration cost, existing technology, and logistics in light of overall project purposes.

"Statement of Findings" (SOF) means a comprehensive summary compliance document.

"Territorial sea" means the belt of the seas measured from the line of ordinary low water a long that portion of the coast which is in direct contact with the open sea and the line marking the seaward limit of inland waters, extending seaward a distance of three miles.

PART 336—FACTORS TO BE CONSIDERED IN THE EVALUATION OF CORPS NAVIGATION DREDGING PROJECTS INVOLVING THE DISCHARGE OF DREDGED MATERIAL INTO WATERS OF THE U.S. AND OCEAN WATERS

Sec.

336.0 General.
336.1 Discharges of dredged material into waters of the U.S.
336.2 Transportation of dredged material for the purpose of disposal into ocean waters.

Authority: 33 U.S.C. 1344; 33 U.S.C. 1413.

§ 336.0 General.

Since the jurisdiction of the CWA extends to all waters of the U.S., including the territorial sea, and the jurisdiction of the ODA extends over ocean waters including the territorial sea, the following rules are established to assure appropriate regulation of discharges of dredged material into waters of the U.S. and ocean waters.

(a) The disposal into ocean waters, including the territorial sea, of dredged material excavated or dredged from navigable waters of the U.S. will be evaluated by the Corps of Engineers in accordance with the ODA.

(b) In those cases where the District Engineer determines that the discharge of dredged material into the territorial sea would be for the primary purpose of fill, such as the use of dredged material for beach nourishment, island creation, or construction of underwater berms, the discharge will be evaluated under section 404 of the CWA.

(c) For those cases where the District Engineer determines that the materials proposed for discharge would not be adequately evaluated under the section 404(b)(1) guidelines of the CWA, he may evaluate that material under the ODA.

§ 336.1 Discharges of dredged or fill material into waters of the U.S.

(a) *Applicable laws.* Section 404 of the CWA requires that a public notice, giving opportunity for public hearing, be issued and that discharge sites be specified through application of the section 404(b)(1) guidelines.

(1) The CWA requires the Corps to seek state 401 water quality certification for discharges of dredged material into waters of the U.S.

(2) Section 401 requires that the state establish procedures for public notice of all requests for water quality certification and that water quality certification requests must be processed to a conclusion by the state within a reasonable period of time, not to exceed one year, otherwise the certification requirements of section 401 are deemed waived.

(3) Section 307 of the Coastal Zone Management Act (CZMA) requires that any activity that a Federal agency conducts or supports within a state's coastal zone or in a Federal enclave within the geographic area of a state's coastal zone be consistent with the Federally approved state management program to the maximum extent practicable. The state is provided a reasonable period of time to take final action on Corps consistency determinations; otherwise state concurrence can be presumed.

(b) *Procedures.* If changes in the disposal plan for an existing Corps navigation project warrant re-evaluation under the CWA, the following procedures will be followed by district engineers prior to discharging dredged material into waters of the U.S. except where emergency action as described in 33 CFR Part 337 is required.

(1) A public notice providing opportunity for public hearing should be issued at the earliest practicable time. The public notification procedures of 33 CFR 337.1 should be followed.

(2) The public hearing procedures of 33 CFR Part 327 should be followed.

(3) As soon as practicable, the district engineer will request from the state a 401 water quality certification and, if applicable, provide a coastal zone consistency determination for the Corps activity. Submission of the public notice to the state will constitute a request for water quality certification for purposes of section 401 of the CWA and shall constitute a consistency determination for purposes of section 307 of the CZMA. The Corps and the state may mutually agree on alternative requirements, if appropriate, regarding the state water quality certification or coastal zone consistency process.

(4) Discharges of dredged material will be evaluated using EPA's guidelines authorized under section 404(b)(1) of the CWA, or using the ODA regulations, where appropriate. If the EPA guidelines alone would prohibit the designation of a proposed discharge site, the economic impact on navigation and anchorage of the failure to use the proposed discharge site will also be considered in evaluating whether the proposed discharge is to be authorized under CWA 404(b)(2).

(5) The EPA Administrator can prohibit or restrict the use of any defined area as a discharge site under 404(c) whenever he determines, after notice and opportunity for public hearing and after consultation with the District Engineer, that the discharge of such materials into such areas will have an unacceptable adverse effect on municipal water supplies, shellfish beds and fishery areas, wildlife, or recreational areas. Upon notification of the prohibition of a discharge site by the Administrator and in the absence of a resolution of the Administrator's concerns as expressed in the prohibition, the District Engineer should complete the administrative processing of the proposed project up to the point of authenticating the Statement of Findings (SOF) or Record of Decision (ROD). The unsigned SOF or ROD along with a report described in 33 CFR 337.8 will be forwarded through WRSC–D, Fort Belvoir, VA 22060–5586 to the Chief of Engineers.

(6) In accordance with the National Environmental Policy Act (NEPA), an Environmental Impact Statement (EIS) or Environmental Assessment (EA) should be prepared for all Corps of Engineers projects involving the discharge of dredged or fill material, unless such projects are included within a categorical exclusion found at 33 CFR

BEST COPY AVAILABLE

Part 230. If a proposed maintenance activity will result in a minor deviation in the operation and maintenance plan described in the EA or EIS, the District Engineer should determine the need to prepare a new EA, EIS, or supplement. If a new EA, EIS, or supplement is required, the procedures of 33 CFR Part 220 will be followed.

(7) If it can be anticipated that related activities by other Federal or non-Federal interests will occur in the same area as Corps projects, the District Engineer should include, to the extent practicable, related work in the planning, processing, and review of Corps projects. Related work normally includes, but is not necessarily limited to, maintenance dredging of approach channels and berthing areas connected to Federal navigation channels. To the maximum extent practicable, the district engineer should coordinate the related projects with interested Federal, state, regional, and local agencies and the general public at the same time he does so for the Corps project. The District Engineer should ensure that related projects meet all substantive requirements of 33 CFR Parts 320 through 330 or are authorized by nationwide or other general permit. Documents covering maintenance activities normally should include sufficient discussion of ancillary activities in need of maintenance. To the extent practicable, district engineers should assist local interests to obtain any necessary section 401 water quality certification and, if required, the section 307 coastal zone consistency concurrence from the state in the same action as the Federal maintenance work. The absence of such certification or concurrence by the state for the related project shall not be cause for delay of the Federal project. Local sponsors will be responsible for funding all work necessary in support of the related activity. If permitting of the related project is found to comply with all legal requirements and to be not contrary to the public interest, sections 10, 404, and 103 permits normally should be issued by the district engineer in separate SOF or ROD.

(c) *Evaluation factors.* The following factors should be used, as appropriate, to evaluate the discharge of dredged material into waters of the U.S. Other relevant factors may also be evaluated, as needed

(1) *Navigation and Federal standard.* The maintenance of a reliable Federal navigation system is essential to the economic well-being and national defense of the country. The district engineer should give full consideration to the impact of the failure to maintain navigation channels on the local, regional, and national economy. It is the Corps' policy to regulate the discharge of dredged material from its projects to assure that dredged material disposal occurs in the least costly, environmentally acceptable manner, consistent with engineering constraints established for the project. The environmental assessment or environmental impact statement in conjunction with the section 404(b)(1) guidelines and public notice coordination process should be used as a guide in formulating environmentally acceptable alternatives. The least costly alternative, consistent with sound engineering practices and environmental requirements and selected through this formulation process, will be designated the Federal standard for the proposed project.

(2) *Water quality.* Through the Section 404(b)(1) evaluation process, the district engineer should evaluate the water quality impacts of the proposed project. The evaluation should include consideration of state water quality standards. The district engineer should request state water quality certification using the procedures of 33 CFR 336.1(b) and § 337.2 of this Part. If the state does not take final action on a request for water quality certification within two months from the date of the initial request, the district engineer should notify the state of his intention to presume a waiver as provided by Section 401 of the CWA. If the state agency, within the two-month period, requests an extension of time, the district engineer should approve one 30-day extension unless, in his opinion, the magnitude and complexity of the information contained in the request warrants a longer or additional extension period. The total period of time in which the state must act shall not exceed six months from the date of the initial request. Waiver of water quality certification can be conclusively presumed after six months from the date of the initial request.

(3) *Coastal zone consistency.* As appropriate, the district engineer should determine whether the proposed project is consistent with the state coastal zone management program to the maximum extent practicable. The district engineer should, in accordance with the procedures of paragraph (b) of this section and § 337.2 provide a certification determination to the coastal zone management agency. If the state fails to provide a response within 45 days from receipt of the initial certification statement, the district engineer will presume state agency concurrence. If the state agency, within the 45-day period, requests an extension of time, the district engineer should approve one 15-day extension unless, in his opinion, the magnitude and complexity of the information contained in the consistency determination warrants a longer or additional extension period. The longer or additional extension period shall not exceed 6 months from the date of the initial consistency determination.

(4) *Wetlands.* Some wetland areas constitute a productive and valuable public resource, the unnecessary alteration or destruction of which should be discouraged as contrary to the public interest. The district engineer should, therefore, follow the guidance in 33 CFR 320.4(b) and Executive Order 11990, dated May 24, 1977, when evaluating Corps operations and maintenance activities in wetlands; also see paragraph (b)(4) of this section.

(5) *Endangered species.* All Corps operations and maintenance activities should be reviewed for the potential impact on threatened or endangered species, pursuant to the Endangered Species Act of 1973. If the district engineer determines that the proposed activity will not affect listed species or their critical habitat, a statement to this effect should be included in the public notice. If the proposed activity may affect listed species or their critical habitat, formal consultation procedures should be initiated with the U.S. Fish and Wildlife Service or National Marine Fisheries Service and a statement to this effect should be included in the public notice. See 50 CFR Part 402.

(6) *Cultural resources.* Archeological, historical, or architectural resource surveys may be required to locate and identify previously unrecorded cultural resources in navigation channels and at dredged or fill material disposal sites. If resources are known to exist within the navigation channel or proposed disposal area, further intensive testing may be necessary in order to evaluate the resources against the criteria of the National Register of Historic Places. Cultural resources are not normally found in previously constructed navigation channels or previously used disposal areas. Therefore, cultural resource investigations should not be conducted for maintenance dredging and disposal activities proposed within the boundaries of a previously constructed navigation channel or previously used disposal area unless it is established that a cultural resource exists.

(i) The district engineer should request a determination of eligibility for the National Register of Historic Places for all resources located within the disposal area which, after evaluation under the National Register criteria, the district engineer considers to be eligible for the Register.

(ii) In accordance with section 106 of the National Historic Preservation Act of 1966, as amended, the district engineer will request the comments of the Advisory Council on Historic Preservation for any proposed actions which will have an effect upon a resource listed on, or determined eligible for, the National Register of Historic Places.

(7) *Scenic and recreational values.* Maintenance dredging and disposal activities may involve areas which possess recognized scenic, recreational, or similar values. Full evaluation requires that due consideration be given to the effect which dredging and disposal of the dredged or fill material may have on the enhancement, preservation, or development of such values. Recognition of these values is often reflected by state, regional, or local land use classification or by similar Federal controls or policies. Operations and maintenance activities should, insofar as possible, be consistent with and avoid adverse effects on the values or purposes for which such resources have been recognized or set aside, and for which those classifications, controls, or policies were established. Special consideration must be given to rivers named in section 3 of the Wild and Scenic Rivers Act and those proposed for inclusion as provided by section 4 and 5 of the Act, or by later legislation. Any other areas named in Acts of Congress or Presidential Proclamations such as National Rivers, National Wilderness Areas, National Seashores, National Parks, National Monuments, and other such areas as may be established under Federal law for similar and related purposes must be given full consideration when evaluating Civil Works operations and maintenance activities.

(8) *Fish and Wildlife.* (i) In accordance with the Fish and Wildlife Coordination Act FWCA, district engineers will consult, through the public notification process, with the Regional Directors of the U.S. Fish and Wildlife Service and the National Marine Fisheries Service and the head of the agency responsible for fish and wildlife for the state in which the work is to be performed, with a view to the conservation of fish and wildlife resources by considering ways to prevent their direct and indirect loss and damage due to the proposed operation and maintenance activity. The district engineer will give full consideration to these views on fish and wildlife conservation in evaluating the activity. The proposed operations may be modified in order to lessen the damage to such resources. The district engineer should include such justifiable means and measures for fish and wildlife resources that are found to be appropriate. Corps funding of Fish and Wildlife Service activities is not applicable for Corps operation and maintenance projects.

(ii) District engineers should consider ways of reducing unavoidable adverse environmental impacts of dredging and disposal activities. The determination as to the extent of implementation of such measures will be done after weighing the benefits and detriments of the maintenance work and considering applicable environmental laws, regulations, and other relevant factors. The final decision on fish and wildlife conservation measures rests with the district engineer.

(9) *Marine Sanctuaries.* Operations and maintenance activities involving the discharge of dredged or fill material in a marine sanctuary established by the Secretary of Commerce under authority of Section 302 of the ODA should be evaluated for impact on the marine sanctuary. In such a case, certification should be obtained from the Secretary of Commerce that the proposed project is consistent with the purposes of Title III of the ODA and can be carried out within the regulations promulgated by the Secretary of Commerce to control activities within the marine sanctuary.

(10) *Other state requirements.* District engineers should make every reasonable attempt to comply with state water quality standards and Federally approved coastal zone programs. As a matter of policy, district engineers normally should not seek state permits or licenses not reasonably related to the control or abatement of pollution.

(11) *Additional factors.* In addition to the factors described in paragraphs (c)(1) through (9) of this section, the following factors should also be considered.

(i) The evaluation of Corps operations and maintenance activities involving the discharge of dredged or fill material into waters of the U.S. is a continuing process and, as practicable, should proceed concurrently with the processing of state water quality certification and, if required, the provision of a coastal zone consistency determination to the state. If a local agency having jurisdiction over or concern with the particular activity comments on the project through the public notice coordination, due consideration should be given to those official views as a reflection of local factors.

(ii) Where officially adopted state, regional, or local land use classifications, determinations, or policies are applicable, they normally should be presumed to reflect local factors and will be considered in addition to other national factors.

§ 336.2 Transportation of dredged material for the purpose of disposal into ocean waters.

(a) *Applicable law.* Section 103(a) of the ODA provides that the Corps of Engineers may issue permits, after notice and opportunity for public hearing, for the transportation of dredged material for the purpose of disposal into ocean waters. Proposed ocean disposal activities will be evaluated by the Corps using the appropriate EPA regulations promulgated pursuant to the ODA.

(b) *Procedure.* The following procedures will be followed by district engineers for dredged material disposal into ocean waters except where emergency action as described in 33 CFR 337.7 is required.

(1) In accordance with the provisions of section 103 of the ODA, the district engineer should issue a public notice giving opportunity for public hearing, following the procedures described in 33 CFR 337.1 for Corps operation and maintenance activities involving material dredged from navigable waters and disposed of in ocean waters, as well as dredged material transported through the territorial sea for the purpose of ocean disposal.

(2) The public hearing procedures of 33 CFR 327 should be followed.

(c) *State permits and licenses.* The terms and legislative history of the ODA leave some doubt regarding whether a state has legal authority to exert control over ocean dumping activities of the Department of the Army in the territorial sea covered under the Act (see section 106(d)). Thus, it is unclear whether the Department of the Army must obtain a state water quality certification pursuant to section 401 of the CWA or certify consistency with an approved state coastal zone management plan pursuant to the CZMA, for the ocean disposal of dredged material in the territorial sea. Notwithstanding this legal question, the Department of the Army will voluntarily, as a matter of

county, apply for state section 401 water quality certification and determine consistency with a Federally approved coastal zone management plan for the Department of the Army's ocean disposal of dredged material within the three-mile extent of the territorial sea. Moreover, the Army will attempt to comply with any reasonable requirement or condition imposed by a state in the course of the 401 certification process or the CZMA consistency certification process. Nevertheless, the Department of the Army reserves its legal rights regarding any case where within the limits of the territorial sea a state unreasonably denies or conditions a 401 water quality certification for proposed Army ocean disposal of dredged material, or asserts that such disposal would not be consistent with an approved state CZMA plan. If such a circumstance arises, the district engineer shall so notify WRSC–D, DAEN–CWZ, and DAEN–CCE for purposes of consultation regarding the Corps of Engineers' appropriate response and course of action.

(d) *Evaluation factors.* (1) In addition to the evaluation factors of § 336.1(c) of this part, activities involving the transportation of dredged material for the purpose of disposal in ocean waters will be evaluated by the Corps of Engineers to determine whether the proposed disposal will unreasonably degrade or endanger human health, welfare, or amenities, the marine environment, or ecological systems. In making this evaluation, the District Engineer, in addition to considering the criteria developed by EPA on the effects of the dumping, will also consider navigation, economic and industrial development, and foreign and domestic commerce, as well as the availability of alternatives in determining the need for ocean disposal of dredged material. Where ocean disposal is determined to be appropriate, the District Engineer should, to the extent feasible, select disposal sites which have been recommended by the Administrator pursuant to section 102(c) of the ODA.

(2) As provided by the EPA regulations for implementing the procedures of section 102 of the ODA, the Regional Administrator of EPA may make an independent evaluation of dredged material disposal activities regulated under section 103 of the ODA related to the effects of dumping. The EPA regulations provide that the Regional Administrator make said evaluation within 15 days after receipt of all requested information. The Regional Administrator may request from the district engineer an extension of this 15-day period to 30 days. The EPA regulations provide that the Regional Administrator notify the District Engineer of non-compliance with the environmental impact criteria or with any restriction relating to critical areas on the use of an EPA recommended disposal site established pursuant to section 102(c) of the ODA. In cases where the Regional Administrator has notified the district engineer in writing that the proposed disposal will not comply with the criteria related to the effects of dumping or as critical area restrictions, no dredged material disposal may occur unless and until the provisions of 40 CFR 225.3 are followed and the Administrator grants a waiver of the criteria pursuant to section 103(d) of the ODA.

(3) If the Regional Administrator advises the district engineer that the proposed disposal will comply with the criteria, the district engineer will complete the administrative record and sign the SOF.

(4) In situations where an EPA designated site is not feasible for use or where no site has been designated by the EPA, the district engineer, in accordance with the ODA and in consultation with EPA, may select a site pursuant to section 103. Appropriate NEPA documentation, to include appropriate environmental factors of section 102(a) of the ODA, should be used to support site selections.

(5) If the Regional Administrator advises the district engineer that a proposed ocean disposal site or activity will not comply with the criteria, the district engineer should proceed as follows.

(i) The district engineer should determine whether there is an economically feasible alternative method or site available other than the purposed ocean disposal site. If there are other feasible alternative methods or sites available, the district engineer will evaluate the engineering and economic feasibility of the alternative sites.

(ii) If the district engineer makes a determination that there is no economically feasible alternative method or site available, he will so advise the Regional Administrator of his intent to proceed with the proposed action setting forth his reasons for such determination.

(iii) If the Regional Administrator advises, within 15 days of the notice of the intent to issue, that he will commence procedures specified by section 103(c) of the ODA to prohibit use of a proposed disposal site, the case will be forwarded through WRSC–D, Fort Belvoir, VA 22060–5586 to the Secretary of the Army or his designee for further coordination with the Administrator of EPA and final resolution. The report forwarding the case will be in the format described in 33 CFR 337.9.

(iv) The Secretary of the Army or his designee will evaluate the proposed project and make a final determination on the proposed disposal. If the decision of the Secretary of the Army or his designee is that ocean disposal at the proposed site is required because of the unavailability of economically feasible alternatives, he will seek a waiver from the Administrator, EPA, of the criteria or of the critical site designation in accordance with section 103(d) of the ODA.

PART 337—PRACTICES AND PROCEDURES

Sec.
337.0 Purpose.
337.1 Public notice.
337.2 State requirements.
337.3 Transfer of Section 404 program to the state.
337.4 Memoranda of Agreement (MOA)
337.5 General authorizations.
337.6 Statement of findings (SOF).
337.7 Emergency actions.
337.8 Reports to higher echelons.
337.9 Identification and use of disposal areas.
337.10 Supervision of Federal projects.

Authority: 33 U.S.C. 1344; 33 U.S.C. 1413

§ 337.0 Purpose.

The practices and procedures part of this regulation apply to all Corps operations and maintenance activities involving the discharge of dredged or fill material in waters of the U.S. and ocean waters and related activities of local interests accomplished to ensure continued functions of constructed Corps projects.

§ 337.1 Public notice.

Presently, public notification of proposed discharges of dredged or fill material is required by the provisions of section 103 of the ODA, sections 401 and 404 of the CWA, and section 307 of the CZMA. District engineers are encouraged to develop procedures to avoid unnecessary duplication of state agency procedures. Joint public notification procedures should be a primary factor in the development of Memoranda of Agreement with the states as described in § 337.4 of this Part.

(a) With the possible exception of emergency actions as discussed in § 337.7 of this Part, the district engineer should issue a public notice for projects involving the discharge of dredged or fill

material into waters of the U.S. or ocean waters unless the project is authorized by a general permit. Public notices for Corps operation and maintenance activities are normally issued for an indefinite period of time and are not reissued unless changes in the disposal plan warrant re-evaluation under section 404 of the CWA or section 103 of the ODA. The public notice is the primary method of advising all interested parties of Federal projects and of soliciting comments and information necessary to evaluate the probable impact of the discharge of dredged or fill material into waters of the U.S. or ocean waters. The notice should, therefore, include sufficient information to provide a clear understanding of the nature of the activity and related activities of local interests in order to generate meaningful comments. The notice normally should include the following items:

(1) The name and location of the project and proposed disposal site.

(2) A general description of the project and a description of the estimated type, composition, and quantity of materials to be discharged, the proposed time schedule for the dredging activity, and the types of equipment and methods of dredging and conveyance proposed to be used.

(3) A sketch showing the location of the project, including depth of water in the area and all proposed discharge sites.

(4) The nature, estimated amount, and frequency of known and anticipated related dredging and discharge to be conducted by others.

(5) A list of Federal, state, and local environmental agencies with whom the activity is being coordinated.

(6) A statement concerning a preliminary determination of the need for and/or availability of an environmental impact statement.

(7) Any other available information which may assist interested parties in evaluating the likely impact of the proposed activity, if any.

(8) A reasonable period of time, normally thirty days but not less than fifteen days from date of mailing except in emergency situations where the procedures of § 37.7 of this Part will be followed, within which interested parties may express their views concerning the proposed project.

(9) If the proposed Federal project would occur in the territorial seas or ocean waters, a description of the project's relationship to the baseline from which the territorial sea is measured.

(10) A statement on the status of state water quality certification under section 401 of the CWA.

(11) As necessary, a statement on the status of coastal zone consistency determinations under section 307 of the CZMA.

(12) A statement on cultural resources, state of present knowledge, likelihood of damage or other adverse effect on such resources, etc.

(13) A statement on endangered species.

(14) A statement on evaluation factors to be considered, adapted from that presented at 33 CFR 325.3(b).

(15) The name, address, and telephone number of the Corps employee from whom additional information concerning the project may be obtained.

(16) The signature of the district engineer or his designee on all maintenance dredged material disposal public notices.

(17) For activities regulated under section 103 of the ODA, the following additional information should be integrated into the public notice:

(i) A statement on the designation status of the disposal site.

(ii) If the proposed disposal site is not a designated site, a description of the characteristics of the proposed disposal site and an explanation as to why no previously designated disposal site is feasible.

(iii) A brief description of known dredged material discharges at the proposed disposal site.

(iv) Existence and documented effects of other authorized disposals that have been made at the disposal area.

(v) An estimated length of time during which disposal would continue at the proposed site.

(vi) Information on the characteristics and composition of the dredged material, and the following paragraph:

"The proposed transportation of this dredged material for the purpose of disposing of it in ocean waters is being evaluated to determine that the proposed disposal will not unreasonably degrade or endanger human health, welfare, or amenities or the marine environment, ecological systems, or economic potentialities. In making this determination, the criteria established by the Administrator, EPA pursuant to section 102(a) of the ODA will be applied. In addition, based upon an evaluation of the potential effect which the failure to utilize this ocean disposal site will have on navigation, economic and industrial development, and foreign and domestic commerce of the United States, an independent determination will be made of the need to dispose of the dredged material in ocean waters, other possible methods of disposal, and other appropriate locations."

(b) The following statement should be included in the public notice:

"Any person who has an interest which may be affected by the disposal of this dredged material may request a public hearing. The request must be submitted in writing to the district engineer within the comment period of this notice and must clearly set forth the interest which may be affected and the manner in which the interest may be affected by this activity."

(c) Public notices should be distributed as described in 33 CFR 325.3(c). In addition, public notices should be sent to CDR USACE (DAEN–CWO–M), Washington, DC 20314, and the Water Resources Support Center, Dredging Division, Ft. Belvoir, VA 22060–5586, if the project involves the discharge of dredged material in waters of the U.S. or ocean waters. District engineers should also develop, as appropriate, regional mailing lists for Corps maintenance dredging and disposal activities to the extent practicable that property owners adjacent to the navigation channel and disposal area are notified of the proposed activity. In order to effect compliance with Executive Order 12372, district engineers should provide copies of public notices to concerned state and local elected officials.

(d) The district engineer should consider all comments received in response to the public notice in his subsequent actions. All comments expressing objections to or raising questions about the project should be acknowledged. Comments received as form letters or petitions, however, may be acknowledged as a group to the person or organization responsible for the form letter or petition. If comments are received which relate to matters within the special expertise of another agency, the district engineer may seek the advice of that agency. The receipt of comments as a result of the public notice should normally not extend beyond the stated comment period; however, at his discretion, the district engineer may provide an extension.

(e) Notices sent to several agencies within the same state may result in conflicting comments from those agencies. Many states have designated a state agency or individual to provide a single and coordinated state position regarding Federal activities. Where a state has not so designated a single source, the district engineer, as appropriate, may elicit from the Governor an expression of his views and desires concerning the proposed and subsequent similar projects.

(f) All appropriate comments received from the public notice coordination should be considered in the public interest review process. Comments received from Federal or state agencies which are within the area of expertise of another agency should be communicated with that other agency if the district engineer needs the information to make a final determination on the proposed project. Such comments should be treated as comments from interested parties.

§ 337.2 State requirements.

The procedures of this section should be followed in implementing state requirements.

(a) District engineers will cooperate to the maximum extent practicable with state agencies to prevent violation of state water quality standards and to achieve consistency to the maximum degree practicable with a Federally approved coastal zone management program. The district engineer should request water quality certification and certify consistency to the maximum extent practicable with an approved coastal zone program. Furthermore, the district engineer should request such certification and consistency to coincide with the maintenance dredging schedule for the project (normally ten years or longer). Requests should be as specific as possible while allowing enough flexibility to accommodate future minor deviations in the dredging or disposal plan due to changes in disposal technology, unexpected events such as shoaling from storms or highwaters, or changes in dredging schedules, etc., without necessitating additional formal coordination with the state agencies.

(b) If a state agency imposes beneficial dredged material uses as special conditions (e.g., to water quality certification), any additional expense associated with such provisions should not be a Corps responsibility unless specifically authorized by Congress. If the state agency imposes conditions or requirements which exceed those needed to meet the Federal standard, the district engineer should determine the state's rationale and provide to the state information addressing why the alternative which represents the Federal standard is environmentally acceptable. The district engineer should accommodate the state's concerns to the extent practicable. However, if a state agency attempts to impose conditions or controls which, in the district engineers opinion cannot reasonably be accommodated, the following procedures should be followed.

(1) In situations where an agency requires monitoring or testing, the district engineer should strive to reach an agreement with the agency on a data acquisition program. If the agency insists on requirements which, in the opinion of the district engineer, exceed those required in establishment of the Federal standard, the agency should be asked to fund the difference in cost. If the agency agrees to fund the difference in cost, the district engineer should comply with the request. If the agency does not fund the additional cost, the district engineer should follow the guidance in paragraph (b)(3) of this section.

(2) When an agency requires special conditions or alternatives and the Federal standard does not, district engineers should proceed as follows: In those cases where the project authorization requires a local sponsor to provide suitable disposal areas, the local sponsor should be advised of the need for disposal areas. Disposal areas should be made available by a sponsor before dredging proceeds. In other cases where there are no local sponsor requirements to provide disposal areas, the state or the prospective local sponsor will be advised that, unless the state or the sponsor provides suitable disposal areas, the added Federal cost of providing these disposal areas will affect the priority of performing dredging on that project. In either case, states will be made aware that additional costs to meet state standards or the requirements of the coastal zone management program may cause the project to become economically unjustified.

(3) If the state denies or notifies the district engineer of its intent to deny water quality certification or does not concur regarding coastal zone consistency the project dredging may be deferred. A report pursuant to § 337.8 of this Part should be forwarded through WRSC–D, Ft. Belvoir, VA 22060–5586 to the Director of Civil Works for resolution. The report should include justification showing the economic need for dredging, the impact on states outside the project areas if the project is not dredged, a description, an estimated cost of agency requirements which exceed those necessary in establishment of the Federal standard, and the relative urgency of dredging based on threat to national security, life or property. The report should also contain any other facts which will aid in determining whether to further defer the dredging or the need to exercise the authority of the Secretary of the Army to maintain navigation as provided by section 511(a) of the CWA if the disagreement concerns water quality certification. If the disagreement concerns coastal zone consistency, the district engineer should follow the reporting requirement of this section and 33 CFR 336.1.

§ 337.3 Transfer of the Section 404 program to the states.

Section 404(g–1) of the CWA allows the Administrator of the EPA to transfer to qualified states administration of the section 404 permit program for discharges into certain waters of the U.S. Once a state's 404 program is approved, the district engineer should follow state procedures developed in accordance with section 404(g–1) of the CWA for all ongoing Corps projects involving the discharge of fill material in transferred waters to the state agency responsible for administering the program. Corps projects involving the discharge of dredged or fill material in waters not transferred to the state should be processed in accordance with this regulation.

§ 337.4 Memoranda of agreement (MOA).

The establishment of joint notification procedures for Corps projects involving disposal of dredged or fill materal should be actively pursued through the development of MOAs with the state. The MOAs may be used to define responsibilities between the state and the Corps district involved. The primary purpose of MOAs should be to avoid or eliminate administrative duplication, when such duplication does not contribute to the overall decision-making process. MOAs for purposes of this regulation should not be used to implement provisions not related to the maintenance or enforcement of water quality standards (state or Federal) coastal zone management. District engineers are authorized and encouraged to develop MOAs with states and other Federal agencies for Corps projects involving the discharge of dredged or fill material. Copies of all MOAs should be forwarded to WRSC–D, Ft. Belvoir, VA 22060–5586.

§ 337.5 General authorizations.

Under the provisions of sections 404(e) of the CWA and 104(c) of the ODA, certain categories of activities may be authorized on a regional, statewide, or nationwide basis. General authorizations can be a useful mechanism for implementation of the procedural provisions of the CWA and ODA while avoiding unnecessary duplication and paperwork. Through the general authorization process, compliance with all environmental laws and regulations including coastal zone consistency, if applicable, and water quality certification can be

accomplished in a single process for a category of activities. Since the emphasis of particular environmental issues for most Corps projects is more regional than nationwide, district engineers are encouraged to develop general authorizations for routine Civil Works activities involving the discharge of dredged or fill material to address the specific requirements of a particular geographic region. When evaluating general categories of activities, the district engineer should follow the same procedure as outlined for individual Federal activities including the water quality certification and/or coastal zone consistency requirements of 33 CFR Part 336. General authorizations should include, as practicable, related activities of local interests. Additionally, district engineers should, to the maximum extent practicable, utilize existing general permits authorized on a statewide or regional basis and the nationwide permits at 33 CFR Part 330 for Federal projects involving the disposal of dredged material. The development of new statewide or regional general authorizations for Federal activities will be in accordance with the requirements of 33 CFR 336.1 and 336.2. General permits for related activities of local interests will be developed using the procedures of 33 CFR Parts 320 through 330.

§ 337.6 Statement of findings (SOF).

Upon completion of required coordination, receipt or waiver of required state certifications, and completion of the appropriate environmental documents, an SOF should be prepared. In cases involving an EIS, an ROD should be prepared in accordance with 33 CFR Part 230 and should be used in lieu of the SOF, providing the substantive parts of this section are included in the ROD. The SOF need not duplicate information contained in supporting environmental documents but rather may incorporate it by reference. The SOF should include a comprehensive summary and record of compliance and should be prepared in the following format except that the procedures of 33 CFR 325.2 should be followed for related activities of local interests.

(a) The SOF should identify the name of the preparer, date (which may not necessarily correspond to the date signed), and name of waterway.

(b) The proposed action for which the findings are made should be described.

(c) A coordination section should be provided. The coordination section will reference the public notice number and date. The letters of comment and appropriate responses will be summarized. Any coordination undertaken by local or state agencies should also be discussed.

(d) An environmental effects and impacts section should be used to document compliance with the applicable environmental laws. This section will include the views and/or conditions of the state concerning water quality certification and, if required, coastal zone consistency.

(e) A determinations section should reference the results of the EA and/or EIS and any necessary conditions or modifications as well as any special conditions necessary to meet the state's water quality standards or coastal zone management program. Appropriate conditions or modifications should be included in the project specifications. This section should also contain a section on consideration of alternatives and cumulative impacts.

(f) A section on the district engineer's findings and conclusions concerning the proposed project should be included.

(g) The SOF should be dated and signed by the district engineer, except in those cases requiring referral to higher authority.

(h) In accordance with the provisions of the ODA, the district engineer will forward a copy of the SOF to the District Commander, U.S. Coast Guard, if the activity involves the ocean disposal of dredged material. A copy of the SOF should also be placed in a conspicuous place on the vessel used for transportation or dumping of dredged material.

(i) The Findings of No Significant Impact required by 33 CFR Part 230 may be incorporated into the SOF, as appropriate.

§ 337.7 Emergency actions.

(a) After obtaining approval from the division engineer, the district engineer should respond to emergency situations on an expedited basis, complying with the procedures of this regulation to the maximum extent practicable. The district engineer should issue a public notice describing the emergency in accordance with § 337.1 of this Part, if such a notice is practicable in view of the emergency situation. To the extent practicable, the public notice should be forwarded to all appropriate Federal and state agencies. To the maximum extent practicable, the district engineer should coordinate with the EPA for consistency with the provisions of the CWA and ODA. To the extent practicable, the district engineer should prepare a section 404(b)(1) evaluation report and, as necessary, an environmental assessment. If comments are received from the public notice which, in the judgment of the district engineer, reveal the necessity of modifying the emergency operation, the district engineer should take appropriate measures to modify the emergency operation to reduce, avoid, or minimize adverse environmental impacts. If the district engineer, after receiving comments from the public notice, determines that the emergency action would constitute a major Federal action significantly affecting the quality of the human environment, he should, after consultation with the division engineer, to the maximum degree practicable, coordinate with the Council on Environmental Quality about alternative arrangements for compliance with the NEPA in accordance with 40 CFR 1506.11. To the maximum extent practicable, district engineers should consult with the appropriate state official to obtain water quality certification or waiver of certification and should certify that the Federal action is consistent to the maximum extent practicable with an approved coastal zone management plan for emergency activities.

§ 337.8 Reports to higher echelons.

(a) Certain activities involving the discharge of dredged or fill material require action by the division engineer or Chief of Engineers. Such reports will be prepared in the format described in paragraph (b) of this section. Reports may be necessary in the following situations:

(1) When there is substantial doubt as to authority, law, regulations, or policies applicable to the Federal project;

(2) When higher authority requests the case be forwarded for decision;

(3) When the state does not concur in a coastal zone consistency determination or concurs with conditions or controls not related to the coastal zone management program or significantly exceeding the Federal standard;

(4) When the state denies a water quality certification or issues the certification with conditions or controls not related to maintenance or enforcement of state water quality standards or significantly exceeding the Federal standard;

(5) When the Regional Administrator has advised the district engineer, pursuant to section 404(c) of the CWA, of his intent to prohibit or restrict the use of a specified discharge site or that the discharge of dredged material in ocean waters or territorial seas will not comply with the criteria and restrictions on the use of the site established under the ODA;

(6) When the state fails to grant water quality certification or a waiver of certification or concurrence or waiver of coastal zone consistency for emergency actions.

(b) *Reports.* The report of the district engineer on a project requiring action by the division engineer or by the Chief of Engineers should be in a letter form as prescribed by the Office of the Chief of Engineers.

§ 337.9 Identification and use of disposal areas.

(a) As practicable, district engineers should identify and develop dredged material disposal management strategies that satisfy the long-term (greater than 10 years) needs for Corps projects. Full consideration should be given to all practicable alternatives including upland, open water, beach nourishment, within banks disposal, ocean disposal, etc. Within existing policy, district engineers should also explore beneficial uses of dredged material, such as marsh establishment and dewatering techniques, in order to extend the useful life of existing disposal areas. Requests for water quality certification and/or coastal zone consistency concurrence for projects with identified long-term disposal sites should include the length of time for which the certification and/or consistency concurrence is sought. The section 404(b)(1) evaluation and environmental assessment or environmental impact statement should also address long-term maintenance dredging and disposal. The Corps of Engineers will be responsible for accomplishing the environmental compliance requirements for all Corps disposal areas.

(b) The identification of disposal sites should include, as practicable, consideration of dredged material disposal needs by local interests, with first priority being given to the Federal project. District engineers are encouraged to require local interests, where the project has a local sponsor, to designate long-term disposal areas.

§ 337.10 Supervision of Federal projects.

District engineers should assure that dredged or fill material disposal activities are conducted in conformance with current plans and description of the project as expressed in the SOF or ROD. Conditions and/or limitations required by a state (e.g., water quality certification), as identified through the coordination process, should be included in the project specifications. To the maximum extent practicable, contracting officers should assure that contractors are aware of their responsibilities for compliance with the terms and conditions of state certifications and other conditions expressed in the SOF or ROD.

PART 338—OTHER CORPS ACTIVITIES INVOLVING THE DISCHARGE OF DREDGED OR FILL INTO WATERS OF THE UNITED STATES

Sec.
338.1 Purpose.
338.2 Activities involving the discharge of dredged or fill material into waters of the U.S.

Authority: 33 U.S.C. 1344.

§ 338.1 Purpose.

(a) The procedures of this part, in addition to the provisions of 33 CFR Parts 335 through 337, will be followed when undertaking Corps operations and maintenance activities involving the discharge of fill material into waters of the United States, except that the procedures of 33 CFR Part 336 will be used in those cases where the discharge of fill material is also the discharge of dredged material, i.e., beach nourishment, within banks disposal for erosion control, etc.

(b) After construction of Corps Civil Works water resource projects, certain operations and maintenance activities involving the discharge of fill material require evaluation under the CWA. These activities generally include lakeshore management, installation of boat ramps, erosion protection along the banks of navigation channels, jetty maintenance, remedial erosion control, etc. While these activities are normally addressed in the existing environmental impact statement for the project, new technology or unexpected events such as storms or high waters may require maintenance or remedial work not fully addressed in existing environmental documents or state permits. The CWA exemptions at 404(f) and NEPA categorical exclusions should be used to the maximum extent practicable. If the district engineer decides that the changes have not been adequately addressed in existing environmental documentation, the procedures of this part will be followed.

§ 338.2 Activities involving the discharge of dredged or fill material into waters of the U.S.

(a) Generally, fill activities conducted by the Corps for operations and maintenance of existing Civil Works water resource and navigation projects are routine and have little, if any, potential for significant degradation of the environment. District engineers are encouraged to develop general authorizations in accordance with the procedures of 33 CFR 337.5 for categories of such routine activities. The general authorization should satisfy all compliance requirements including water quality certifications and, if applicable, coastal zone consistency determinations. For activities which are not conducive to the development of general authorizations or are more appropriately evaluated on an individual basis, the following procedures should be followed.

(b) A public notice should be issued using the procedures of 33 CFR 337.1.

(c) Water quality certifications should be requested and, if applicable, coastal zone consistency determinations should be provided using the procedures of 33 CFR Part 336.

(d) The discharge site should be specified through the application of the section 404(b)(1) guidelines.

(e) The procedures of 40 CFR Part 230 should be used to determine the NEPA compliance requirements.

(f) The factors of 33 CFR 336.1(c) should be followed when evaluating fill activities.

(g) Upon completion of all required coordination and after receipt of the necessary state certifications, the district engineer should prepare an SOF in accordance with 33 CFR 337.6.

Part V

Department of Defense

Department of the Army

32 CFR Part 553

Military Reservations and National Cemeteries; Arlington National Cemetery; Final Rule

DEPARTMENT OF DEFENSE

Department of the Army

32 CFR Part 553

Military Reservations and National Cemeteries; Arlington National Cemetery

AGENCY: Department of the Army, DOD.

ACTION: Final rule.

SUMMARY: The change clarifies the current rule the only certain individuals and organizations are allowed to donate items to be placed in Arlington National Cemetery. The Department of the Army is revising the rules concerning tributes in Arlington National Cemetery to commemorate events, units, groups and/or organizations.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Harriet Antiporowich, Arlington National Cemetery, Arlington, VA 22211-5003 (202) 695-3191.

SUPPLEMENTARY INFORMATION: Proposed rulemaking was published on pages 50315-50316 of the Federal Register of December 10, 1985. Interested parties were given the opportunity to comment. No comments have been received.

Responsibility for the administration of Arlington National Cemetery was recently transferred from the Director of Casualty and Memorial Affairs Operations Center, United States Army Military Personnel Center to the Commander, United States Army Military District of Washington. Accordingly tributes to be placed in Arlington National Cemetery will be approved by the Superintendent, Arlington National Cemetery rather than the Director of Casualty and Memorial Affairs Operations.

Regulatory Flexibility Act

This rule does not have "significant" economic impact on a substantial number of small "entities" as defined by the Regulatory Flexibility Act, 5 U.S.C. 601 et. seq.

Paperwork Reduction Act

There are no collection of information requirements contained in this rule that require approval by the Office of Management and Budget under 44 U.S.C. 3501 et. seq.

List of Subjects in 32 CFR Part 553

Army Department, Cemeteries, District of Columbia, Government property, Veterans.

Accordingly, 32 CFR Part 553 is amended as follows:

PART 553—[AMENDED]

1. The authority citation for Part 553 continues to read as follows:

Authority: 24 U.S.C. Chapter 7.

2. Section 553.22 is amended by adding new paragraphs (j), (k), (l) and Appendix A to read as follows.

§ 553.22 Visitor's Rules for the Arlington National Cemetery.

* * * * *

(j) *Tributes in Arlington National Cemetery to commemorate individuals, events, units, groups and/or organizations.*

(1) *General.* Tributes, which include plaques, medals, and statues, will be accepted only from those veterans organizations listed in the Directory of Veterans Organizations and State Department of Veterans Organizations published annually by the Veterans Administration or those substantially similar in nature.

(2) *Plaques at trees and other donated items.* Plaques may be accepted and placed at trees or other donated items to honor the memory of a person or persons interred in Arlington National Cemetery or those dying in the military service of the United States or its allies.

Plaques placed at trees or other donated items must conform to the specifications described in Appendix A, Specifications for Tributes in Arlington National Cemetery. A rendering of the proposed plaque shall be sent to the Superintendent, Arlington National Cemetery, Arlington, Virginia 22211-5003 for approval.

(k) *Tributes to the Unknowns (Unknown Soldier).*

(1) *General.* Tributes, normally plaques, to the Unknowns by those organizations described in 553.22(j) above must conform to specifications and guidelines contained in Appendix A, Specifications for Tributes in Arlington National Cemetery. Descriptions of the character, dimensions, inscription, material and workmanship of the tribute must be submitted in writing to Superintendent, Arlington National Cemetery, Arlington, Virginia 22211-5003 for approval.

(2) *Tributes to the Unknowns (Unknown Soldier) Presented by Foreign Dignitaries.* Presentation of tributes by Foreign Dignitaries is allowed as part of an official ceremony as defined herein.

(l) *Monuments.* Monuments (other than private monuments or markers) to commemorate an individual, group or event may be erected following joint or concurrent resolution of the Congress.

Appendix A.—Specifications for Tributes in Arlington National Cemetery

1. *Purpose.* The Appendix provides specifications and guidelines for obtaining approval for the donation of tributes at Arlington National Cemetery.

2. *Approval.* The Superintendent, Arlington National Cemetery, Arlington, Virginia 22211-5003 exercises general supervision over Arlington National Cemetery; and his approval of proposed tributes to be placed in Arlington National Cemetery is required.

3. *Who May Offer Tributes.* a. Tributes will be accepted only from those veterans' organizations listed in the Directory of Veterans Organizations and State Department of Veterans Organizations published annually by the Veterans Administration or those substantially similar in nature. Tributes will not be accepted from individuals or from subdivisions of parent organizations.

b. Only one tribute will be accepted from an organization. However, with prior approval, the inscription of a tribute already presented in Memory of the Unknown Soldier (World War I) may be reworded by the donating organization to commemorate one additional or all the Unknowns, or a new tribute may be substituted for the old one.

4. *Design.*—a. *Character.* The design of the tribute shall be artistically proportioned and shall be consistent with the sacred purpose of the shrine, which is to honor heroic military service as distinguished from civilian service however notable or patriotic.

b. *Dimensions.* The surface area of the tribute, including the mounting, shall not exceed 36 square inches; and the thickness or height shall not exceed two (2) inches when mounted.

c. *Inscriptions.*—(1). *Tributes to the Unknowns.* Tributes are accepted only for the purpose of commemorating and paying homage and respect to one or more of the Unknowns. Thus all tributes must include, either in the basic design or on a small plate affixed thereto, a clear indication of such commemoration.

Suggestions follow:

—In Memory Of The American Heroes Known But to God
—The American Unknowns
—The Unknown American Heroes
—The Unknown Soldier
—The Unknown of World War II
—The Unknown of the Korean War
—The Unknown American of World War II
—The Unknown American of the Korean War

The identity of the donor/Date of Presentation.

2. *Other Tributes including plaques at trees and other donated items.* Inscriptions on

tributes will be in keeping with the dignity of Arlington National Cemetery.

d. *Material and Workmanship.* The material and workmanship of the tribute, including the mounting, shall be of the highest quality, free of flaws and imperfections.

5. *Applications.* Requests for authority to present tributes shall be submitted in writing to the Superintendent, Arlington National Cemetery, Arlington, Virginia 22211-5003.

a. A scale drawing or model, showing the exact inscription and other details of the proposed tribute.

b. A copy of the constitution and bylaws of the organization desiring to make the presentation.

6. *Final Approval.* Upon fabrication, the completed tribute will be forwarded to the Superintendent, Arlington National Cemetery, Arlington, Virginia 22211-5003 for visual inspection prior to its presentation.

7. *Presentation of Tributes.* After authorized acceptance of the tribute the sponsoring organization may arrange appropriate presentation ceremonies with the Superintendent, Arlington National Cemetery, Arlington, Virginia 22211-5003. If presentation ceremonies are not desired, the Superintendent will acknowledge receipt of the tribute and inform the sponsoring organization of the number of the case in which it reposes in the Memorial Display Room at the Amphitheater at Arlington National Cemetery.

Dated: May 19, 1986.

Robert K. Dawson,

Assistant Secretary of Army (Civil Works).

48 CFR Parts 8, 12, 13, 15, 19, 32, 36, 38, 45, and 52

[Federal Acquisition Circular 84-16]

Federal Acquisition Regulation

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: Federal Acquisition Circular (FAC) 84-16 amends the Federal Acquisition Regulation (FAR) with respect to the following: International Federal Supply Schedule; Reporting Purchases of Identical Items at Less than Multiple-Award Schedule Prices; Subpart 8.7—Miscellaneous changes; Leasing of Motor Vehicles; Priorities and Allocations; Imprest Fund (Increase in Dollar Limitation); Evaluation of Bids for Multiple Awards; Written Confirmation of Oral Request for Best and Final Offers; Small Business Administration Procurement Center Representatives; Regulatory Guidance on sec. 211 of Pub. L. 98-507; Withholding of Funds from Construction Contracts Progress Payments; Presolicitation Notice for Construction; Definition of Government Property; Contractor Use and Rental of Government Property; Clarification of Small Business Concern Representation; and FAR 52.249-6, Termination (Cost-Reimbursement).

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Ms. Margaret A. Willis, FAR Secretariat, Telephone (202) 523-4755, Room 4041, GS Bldg., Washington, DC 20405.

SUPPLEMENTARY INFORMATION:

A. Public Comments

FAC 84-16, Items I through XVI (except Item XI). Public comments have not been solicited since these revisions either: (a) Do not alter the substantive meaning of any coverage in the FAR having a significant impact on contractors or offerors, or (b) do not have a significant effect beyond agency internal operating procedures.

FAC 84-16, Item XI, Withholding of Funds from Construction Contracts Progress Payments. On February 21, 1985, a notice of proposed rule was published in the Federal Register (50 FR 7200), requesting Government agencies, private firms, associations, and the general public to submit comments to be considered in the formulation of the final rule. As a result of the notice, comments were received and considered.

B. Regulatory Flexibility Act

FAC 84-16, Items I through XVI (except Item XI). Since solicitation of public comments is not required, the Regulatory Flexibility Act (Pub. L. 96-354) does not apply.

FAC 84-16, Item XI, Withholding of Funds from Construction Contracts Progress Payments. The addition of FAR 32.103 and the revision at 52.232-5 will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601, et seq.) because the revision does not alter the substantive meaning of any coverage in the FAR having a significant cost or administrative impact on contractors or offerors, or a significant effect beyond the internal operating procedures of the issuing agencies.

C. Paperwork Reduction Act

FAC 84-16, Items I through XVI. The Paperwork Reduction Act does not apply because this final rule does not contain information collection requirements which require the approval of OMB under 44 U.S.C. 3501, et seq.

List of Subjects in 48 CFR Parts 8, 12, 13, 15, 19, 32, 36, 38, 45, and 52.

Government procurement.

Dated: May 23, 1986.

Lawrence J. Rizzi,

Director, Office of Federal Acquisition and Regulatory Policy.

Federal Acquisition Circular

[Number 84-16]

Unless otherwise specified, all Federal Acquisition Regulation (FAR) and other directive material contained in FAC 84-16 is effective May 30, 1986.

Eleanor R. Spector,

Deputy Assistant Secretary of Defense for Procurement.

Terence C. Golden,

Administrator, GSA.

May 15, 1986.

S.J. Evans,

Assistant Administrator for Procurement, NASA.

Federal Acquisition Circular (FAC) 84-16 amends the Federal Acquisition Regulation (FAR) as summarized below:

Item I—International Federal Supply Schedule

FAR 8.403 and 38.102 are revised to include coverage concerning the International Federal Supply Schedule program which was developed by the General Services Administration to provide sources of supply to U.S. Government activities located overseas.

Item II—Reporting Purchases of Identical Items at Less Than Multiple-Award Schedule Prices

FAR 8.404-1, Mandatory use, is revised to provide current instructions concerning the purchase of identical items from commercial sources at prices lower than their Multiple-Award Schedule counterparts.

Item III—Subpart 8.7—Miscellaneous Changes

FAR 8.703, 8.704, 8.708, 8.712, are revised and FAR 8.715 is added to incorporate changes made to the Committee for Purchase from the Blind and Other Severely Handicapped regulation at 41 CFR 51-5.11 and 51-5.12 regarding specifications for commodities and services on the Procurement List and the time for their delivery.

Item IV—Leasing of Motor Vehicles

FAR Subpart 8.11 is revised to prescribe a new contract clause entitled "Tagging of Leased Vehicles," and FAR Subpart 52.2 is revised to include the new clause.

Item V—Priorities and Allocations

FAR Subpart 12.3, Priorities, Allocations and Allotments, is retitled Priorities and Allocations, and is revised to change coverage in the FAR which was superseded by a Department of Commerce regulation effective August 29, 1984 (49 FR 147). The provision at 52.212-7 and the clause at 52.212-8 are retitled, and the prescriptions at FAR 12.304 are changed to reflect the new titles.

Item VI—Imprest Fund (Increase in Dollar Limitation)

FAR 13.404 is revised to incorporate the Treasury Department's increase in the spending limitation for imprest fund transactions from $150 to $500.

Item VII—Evaluation of Bids for Multiple Awards

FAR Part 15, Contracting By Negotiation, is revised to prescribe a new solicitation provision, Evaluation of Offers for Multiple Awards, and FAR Part 52, Solicitation Provisions and Contract Clauses, is revised accordingly.

Item VIII—Written Confirmation of Oral Request for Best and Final Offers

FAR 15.611(a) is revised to add a requirement that oral requests for best and final offers be confirmed in writing. This revision is based on the advice of the Comptroller General.

Item IX—Small Business Administration Procurement Center Representatives
